This budget amendment authorizes funding for the contract with Real Estate Research Consultants, Inc. for project management on the City-owned property RFQ, which was approved by City Council on January 9, 2007. The amount of the contract is $68,750 ($55,000 fee and expenses up to $13,750 both on a not-to-exceed basis). This amendment is simply a technical, housekeeping item to appropriate the funding for the project since funding was not already included in the budget or appropriated at the January 9, 2007, meeting. Staff recommends that $68,750 be appropriated from the City's fund balance for this project.

City staff recommends City Council adopt the budget amendment, in the amount of $68,750, for project management on the City-owned property Request for Qualifications.

Mayor Bellamy asked for clarification regarding the Parkside property. She recalled that when Council discussed the RFQ and then approved the budget amendment for support of the Civic Center, there was discussion about a feasibility study being done on the realistic opportunities for Parkside to occur. She voted for that to happen but not as a part of the RFQ process. In fact, the minutes do not state specifically that the feasibility study would be part of the RFQ process. Since that time she has heard that the feasibility study was part of the RFQ process.

City Manager Jackson explained the RFQ process and said that any responses we get from the RFQ will not represent a feasibility study on a stand-alone performing arts center. It represents an interest on the part of potential partners to go through the due diligence with the City and whether or not that is a concept worth pursuing and investing in detailed feasibility studies, pro forma, development etc. Economic Development Director Sam Powers agreed that the motion approved by Council was not a feasibility study on Parkside for the performing arts center. It is project management to help develop and do a market scan of the sites and then to develop the RFQ and provide evaluation of the RFQ.

Mayor Bellamy said that she recalled when City Council approved the $400,000 for the next five years for the Civic Center, part of the motion was to do a feasibility study for Parkside.

Councilman Davis said that early on in the process, the Asheville Area Center for Performing Arts had volunteered to do a feasibility study. There was a time that we talked about partnerships with them in doing that feasibility study on the actual performing arts center. The principals still have that interest in doing that.

City Manager Jackson said that at this point it does not make sense for staff to do an independent study, but, subject to Council's approval, it would be one of the things we would ask the project management firm to advise us on.

Councilman Newman's understanding of the direction was to approve the $15 Million plan to do the deferred maintenance for the Civic Center. Beyond that, we have this property and if the performing arts center effort turns out to be viable, we would be open to reserving that

property for the performing arts center. He doesn't see carrying out a separate feasibility study as City Council's leadership role on that. He believed that the leadership responsibility for doing the feasibility study for the performing arts center rests with the Asheville Area Center for Performing Arts, at least initially. First, we are saying that we are going to fix up our building that we are responsibility for; and secondly, we are open to the fact that if the private sector and the performing arts organization's efforts turn out to be successful, then the City has some property that seems like an excellent place for the performing arts center to be built and that could be part of what the City contributes to the effort.

Mayor Bellamy felt we needed further dialogue about this issue since it is not clearly stated in our minutes of Council's actual direction.

Councilman Mumpower said that he disagrees with this expenditure of City funds and using those dollars from our savings account.

Councilman Davis moved for the adoption of Ordinance No. 3441. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 249

D. RESOLUTION NO. 07- 60 - RESOLUTION AMENDING THE CIVIC CENTER CAPITAL IMPROVEMENT PROGRAM

Summary: The consideration of the Capital Improvement Plan (CIP) schedule for the Civic Center in conjunction with the CIP recommendations of the Civic Center Commission.

The recommended projects on this six-year CIP list, adopted by City Council on December 12, 2006, were selected by staff because they addressed some of the most critical arena and building-wide deferred maintenance and safety issues. Due to budget constraints, including the absence of a new dedicated revenue stream, annual funding for this six-year plan is limited to approximately $400,000. The six-year staff recommended CIP only includes one specific auditorium project (smoke hatch replacement) because of the limited funding and the possibility the auditorium could be renovated in the future.

Staff amended the six-year CIP plan that incorporates the recommendations of the Civic Center Commission. Their ideas encompass both the arena and auditorium. They address public safety, efficiency and an appearance upgrade. With those recommendations added in, a funding gap of $320,000 is created in the six-year plan. There are several options for dealing with this gap. Staff could re-prioritize the project list and move projects slated for Fiscal Year 2007-08 into future years. A second option would be additional funding supplied as directed by Council. A final idea would be consideration given to using any actual dollar savings versus the budgeted deficit on an annual basis. While this latter option is less definite than the prior two options, it could provide some relief to the amount of funding provided by the City in any given year depending on the amount of savings. The amount of any savings in this area would not be known until close to the end of any fiscal year.

City staff recommends that City Council approve the revised CIP project list and further direct staff how to proceed with project scheduling given the funding gap.

Councilman Mumpower confirmed that we are committed to our existing facility, with the exception of the performing arts center component.

In response to Councilman Davis about the roof on the Thomas Wolfe Auditorium, City Manager Jackson said that if staff determines after an analysis that the roof needs to be moved up, they will be back to City Council for an amendment to the CIP for the Civic Center.

Councilman Davis moved for the adoption of Resolution No. 07-60. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 276

III. PRESENTATIONS & REPORTS:

A. POLICE ACTION PLAN FOR DRUG ENFORCEMENT AND NEIGHBORHOOD SAFETY

Police Chief Bill Hogan explained to City Council this following 7-Point Police Action Plan for drug enforcement and neighborhood safety:

Point No. 1 - Increase criminal interdiction traffic enforcement: (1) deploy directed patrols on streets and thoroughfares known for criminal activity or drug trafficking (immediate); (2) increase K-9 interdiction patrols; and (3) increase unobligated time in high crime areas by 50% per officer (summer of 2007).

Point No. 2 - Increase drug investigative special operations: (1) includes surveillance arrest operations, undercover drug buys and search warrant executions (immediate); (2) partner with Buncombe County Sheriff's Office to enhance long- and short-term investigations (immediate); and (3) expedite drug testing analysis with NarTest instrument (March 2007).

Point No. 3 - Increase current Drug Suppression Unit (DSU) staffing by 25%: (1) five vacant DSU (filled March 2007); (2) initial increase in drug-related arrests expected (March 2007); and (3) improved response time to drug tip line (May 2007)

Point No. 4 - Increase partnership with US Attorney's Office in federal drug case prosecution: (1) train officers to understand requirements for cases to be prosecuted at the federal level (immediate); and (2) partner with DEA to increase larger scale, multi-jurisdictional investigations (immediate).

Point No. 5 - Invest additional resources in crime prevention/neighborhood enhancement in public housing and high crime areas: (1) recommend additional fill-time employee Crime Prevention Officer (immediate); (2) Housing Security Team to conduct monthly meetings with residents associations (March 2007); and (3) implement the High Point model (summer 2007).

Point No. 6 - Increase community policing and outreach initiatives: (1) hire community relations manager to implement crime prevention programs (immediate); (a) neighborhood watch programs; (b) youth and children's programs; (c) neighborhood walks; and (d) community events and meetings.

Point No. 7 - Explore additional policy considerations: (1) consider additional resources/enhanced service levels in Fiscal Year 2007-08 budget; and (2) consider developing community work groups to address childcare and employment barriers in high crime areas.

Throughout discussion, Chief Hogan responded to various questions/comments from Council, some being, but are not limited to: is the full-time Crime Prevention Officer the only thing that is new in the budget; how do we measure our success in curtailing the open air drug market or other initiatives in tangible and intangible ways; what is the definition of "unobligated" time; if

neighborhoods are getting safer over time, is that a possible way to measure success; overview of the difference between federal vs. state prosecutions; is the Police Chief looking at expanding the three districts in the future or expanding the beats within the districts; and how is the Police Department stepping out to use technology to make them more efficient.

Councilman Mumpower suggested strengthening the effort in creating more tangible ways to measure success because he felt that if it were measurable, then we are more likely to accomplish it. He also requested, as the Police Chief discovers weaknesses in our system, that the Chief to bring those concerns to Council along with quarterly feedback.

In response to Councilman Mumpower, Police Chief Hogan said that he would bring a budget amendment for the Crime Prevention Officer to Council on March 13, 2007. Other issues will be coming to Council in the budget process.

In response to Mayor Bellamy, Police Chief Hogan said that they are looking at the proposal of a Federal Bureau of Investigation Task Force located in our area with consideration of a staff person in that effort.

At the request of Councilman Mumpower, it was the consensus of Council to ask the Police Chief to report back to Council with a more detailed plan to measure our progress.

B. VISION FOR BUNCOMBE COUNTY SHERIFF'S OFFICE

At Mayor Bellamy's invitation, Buncombe County Sheriff Van Duncan spoke about the direction of the Sheriff's Office. He explained the new badge of the Sheriff's Office along with the mission statement and guiding principles, said principles being service; integrity, professionalism, accountability and dignity. He then explained in detail the following:

Sheriff Office Changes: (1) shift and squad changes for patrol; (2) field investigator position; (3) school resource officers and the "On Track Program"; and (4) new name and focus for Metropolitan Enforcement Group (MEG).

Patrol Changes: (1) move from a five squad to a four squad division; (2) with the addition of field investigators it will move the number of officers per shift from 12 to 16; and (3) aligned with Asheville Police department (APD).

Field Investigators: (1) eight investigative positions moved to Patrol Field Investigations; (2) immediate response on investigations; and (3) move officers on the road.

School Resource Officers: (1) school administration will have input and ownership; (2) resource officer will be "the best of the best"; and (3) on track program.

New Name and Focus for MEG: (1) new name for MEG with a new focus; (2) will work in conjunction with DEA Task Force as well as DSU; (3) plans to include other municipalities; and (4) collaborative effort with no duplication of efforts.

Vice-Mayor Jones noted that the Asheville Police Department and the Sheriff's Office are working together intelligently, strategically and compassionately on the same page for the same end.

On behalf of City Council, Mayor Bellamy thanked Sheriff Duncan for taking time out of his busy schedule to outline his vision of the Sheriff's Office.

C. DISTRICT ATTORNEY'S OFFICE OVERVIEW

Mayor Bellamy said that District Attorney Ron Moore was unable to attend this meeting to talk about the court system, but will invite him to another meeting in the near future.

D. RIVER SCULPTURE FESTIVAL PRESENTATION

Mr. Robert Winkler, representing the River Sculpture Festival, gave a brief overview of the River Sculpture past and present. He said the emergence of the River Sculpture in 2006 was an unprecedented event on every level. This was not only the City's first large scale public art event, it was the first to feature contemporary outdoor sculpture by Western North Carolina artists; to set a major exhibit in a park setting; to juxtapose sculpture with dance, music, theater and education and to interact with the viewing public through guided tours and surveys.

Conceived and produced by Asheville residents Robert and Arlene Winkler, River Sculpture was the result of a highly successful collaboration with Asheville Park & Recreation, the Public Art Program, the Asheville Area Arts Council, Western North Carolina sculptors and private individuals and sponsors.

Our objectives for the 2006 pilot project were as follows: (1) to display a collection of outdoor works by the best local sculptors, enriching and interacting with the public on multiple levels; (2) to add an important new culture attraction that would draw additional visitors and income flow to area businesses, especially during the tourist "shoulder" between summer and the foliage season; (3) to create higher visibility for Western North Carolina sculptors as a part of the larger cultural community; and (4) to draw visitors to a beautiful part of the City that they might not normally visit. In spite of a tight time-frame and a limited budget, River Sculpture 2006 was an unqualified success with both the artists and the public.

River Sculpture 2007 can and should be even better. Based on our experience in 2006 and the foundation that is now in place, our objectives for River Sculpture 2007 are as follows: (1) to display more and larger contemporary outdoor works; (2) to draw artists from a broader geographic area creating higher visibility for Asheville and expanding the sculptors' dialogue with the larger cultural community; (3) to raise the sculptors' stipend from the current $250 per sculpture to help the artists offset expenses, to underscore Asheville's reputation as a City that supports the arts, and move us towards becoming the pre-eminent sculpture event in the region; (4) to offer merit awards for individual works in order to attract the highest level of quality as well as create public relation opportunities; (5) to acquire the appropriate permits to keep the exhibition in French Broad River Park for the entire duration; (6) to extend the exhibition period to at least 90 days; and (7) to focus on public relations and advertising beyond Western North Carolina in order to create broader visibility for River Sculpture both statewide and nationally, enabling Asheville to benefit from the high level of spending associated with art tourism.

The ongoing development of River Sculpture will require a commitment in both dollars and interest on the part of the City. It is our intention to continue fund-raising with the private sector, but the level of the City's involvement will underscore the value of the arts and drive the generosity of corporate and private donors.

In response to Councilman Davis, Cultural Arts Superintendent David Mitchell explained why the sculptures were moved from the French Broad River Park to City-County Plaza.

It was the majority of Council's consensus to support and endorse the River Sculpture 2007.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT AND A REQUESTED DENSITY BONUS FOR A 19-UNIT CONDOMINIUM PROJECT FOR PROPERTY LOCATED AT 2 SUNSET DRIVE AND A MODIFICATION OF THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW PARKING TO BE LOCATED IN THE FRONT SETBACK

ORDINANCE NO. 3442 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT AND A REQUESTED DENSITY BONUS FOR A 19-UNIT CONDOMINIUM PROJECT FOR PROPERTY LOCATED AT 2 SUNSET DRIVE AND A MODIFICATION OF THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW PARKING TO BE LOCATED IN THE FRONT SETBACK

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:20 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit and a density bonus for a 19-unit condominium project for property located at 2 Sunset Drive and a modification of the Unified Development Ordinance (UDO) to allow parking be located in the front setback.

The ***ACDP 2025*** proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property. One way to accomplish this goal is to apply existing zoning tools to encourage higher density residential infill development. This project accomodates this by utilizing the "Exceptional Development Standards" density bonus. In addition, the comprehensive plan discusses the need for residential infill development and new construction to be of a quality that preserves, protects, and enhances existing neighborhoods. The proposed development utilizes a sensitive building approach, design, and materials that will blend in with the existing neighborhood.

This project is also proposing 20% of the units (4 units) at the City's affordable housing rate standard. This is not only meets one of the City Smart growth goals for affordable housing, but also contributes to meeting the needs for affordable housing outlined in the Consolidated Strategic Housing and Community Development Plan 2000-2005.

This project utilizes the Density Bonus provision as an incentive in providing a higher density infill development as outlined under Housing Opportunities, Goal #3.

The project area is located in the Asheville city limits at the corner of Baird Street and Sunset Drive (City Exhibit 3 - Aerial Map). The property consists of 3.4 acres and is zoned RS-8. The site is currently developed and houses eleven (11) buildings consisting of a total of 23 units (4 duplex units, 1 quadraplex unit, 1 six-plex unit and 5 single family roudette buildings). Some of the units are accessed via a private drive along the backside of the development. The remaining units fronting Sunset Drive are accessed directly from the street.

The current development is considered non-conforming primarily in that the number of units existing on the site exceeds the density allowed under the RS-8 zoning district and Hillside development standards. Based on the Hillside area calculations certified by the project engineer a total of 12 units would be permitted. Under the same calculations, disturbance to the site is limited to 46% or 1.55 acres, less than half of the overall site acreage. The conceptual grading plan and a letter from the project engineer states that site disturbance for this project would be limited to approximately 45% (City Exhibit 3 - Site Plan).

The applicant is proposing to demolish the existing buildings and is requesting a 150% density bonus in order to reconstruct 19 units, a density of 5.6 units per acre. The development of the site will consist of sixteen (16) buildings with four (4) duplex structures, eleven (11) single family structures and one (1) 2-car garage. The development will provide 7- 2 bedroom units, and 12- 3 bedroom units. Of the 19 units, the developer is committing (4) four units to be sold at the City's affordable housing rates.

Access to the development and new structures is proposed via private driveways off of Sunset Drive and also by the existing private drive along the west side of the property that will be upgraded to meet City standards. A total of 33 off-street parking spaces and one two car garage are proposed to serve the development.

The re-development of the site will require that landscaping be brought into compliance with the Unified Development Ordinance (UDO). A 20-foot, Type B landscape buffer is required along the north and west sides of the property, a 15-foot Type A buffer along Baird Street and street trees along Sunset Drive.

The applicant is proposing significant tree preservation as an "Exceptional Development Standard" item being used to support the density bonus request. The existing vegetation may also be credited towards the landscape requirement once a tree survey is completed and tree protection fencing is installed to ensure the health of the trees.

In an effort to minimize land disturbance and clearing, the applicant is proposing to:

1) Use the existing building locations for the new construction and where possible, rebuild on existing concrete pads;
2) Utilize and improve the private drive along the west side of the development that serves the units at the rear of the lot;
3) Minimize the overall number of parking spaces for the development (33 off street spaces, plus one 2-car garage);
4) Utilize and improve the existing parking spaces along Sunset Drive (upgrading to City Standards as required by the Technical Review Committee). Note: This will require a modification by City Council (see below); and
5) Preservation of existing landscaping and undisturbed open space.

Based on the proposed plans and elevations provided by the applicant, staff feels that the project qualifies for the requested 150% density bonus by providing an exceptional development through: Higher quality building design and orientation, green building techniques, enhanced landscaping (significant tree preservation), project amenities (walking trails, open space in excess of City Standards), enhanced stormwater management, and environmentally sensitive design.

At the December 18, 2006, Technical Review Committee (TRC) meeting the project was approved subject to the conditions outlined in the TRC staff report and also with a condition that City Council grants a modification that would allow the parking spaces along Sunset Drive to be located within the front setback.

Regarding the modification request for City Council consideration, the applicant is requesting a modification of Section 7-8-4(f)(9) of the UDO that states no parking shall be permitted in any required setback. The conceptual site plan shows a 15-foot encroachment of 18 parking spaces that are located within the front setback along Sunset Drive. The applicant is requesting a modification from this standard that would allow the development continued use of the existing parking layout (parking spaces located directly off of Sunset Drive). Denial of this request would result in the need for creating a larger parking area that would be necessary to serve the number of units proposed on the lot.

Although staff is in support of this request with approval from the Engineering Department to allow the 90 degree parking off of Sunset Drive; as stated above, the applicant does have an option that would eliminate the need for the modification by creating an off-street parking area on the lot. This, however, would result in additional grading of the lot, removal of existing vegetation and a reduction in the open space area proposed for the project.

City Council must take formal action as set forth in section 7-9-9(c)(4) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the ***UDO***, the ***Standards and Specifications Manual***, the ***North Carolina Building Code*** and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The property in its current state is developed. The redevelopment of the site proposes demolition of all existing structures (23 units). The applicant intends to rebuild at a lower density than what is in place today.

   In an effort to reduce the amount of grading and disturbance on the site, and to also reduce the need for excessive removal of existing vegetation, the majority of new buildings (19 units) will be constructed on or near the existing building sites (utilizing existing concrete foundations where feasible).

The majority of disturbance on site will concentrated around units 9, 13 and 14. These units are being constructed in areas where buildings currently do not exist.

Additional efforts made by the developer to reduce the amount of grading on site include the following:

- Utilizing and improving the private drive along the west side of the development that serves the units at the rear of the lot;
- Minimizing the overall number of parking spaces for the development (33 off street spaces, plus one 2-car garage) and utilizing retaining walls to support these parking areas as necessary to minimize disturbance;
- Utilizing and improving the existing parking areas along Sunset Drive (upgrading to City Standards as required by the Technical Review Committee). Note: This will require a modification by City Council; see below.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
The development is not expected to injure the value of adjoining and abutting properties, given the proposal to utilize the existing site layout and commitment to preserve the majority of mature vegetation areas along the perimeter and interior portions of the property.

The new construction will be more in character with the existing development patterns on the hillside and will also be more architecturally attractive and consistent with the older Craftsman style homes of the area. The applicant, as part of the exceptional development standards bonus, has committed to the use of 'green building' techniques for appropriateness and energy efficiency.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The existing development on the hillside currently supports several pockets of medium density development as well as individual lots that would be classified as high density and low density. The redevelopment of this site is considered medium density, and proposes a decrease in the number of units from what currently exists (existing 23 units to 19 units).

The proposed development does not appear to be out of scale with many of the larger single family homes in the area as well as the existing multi-family structures. Units most visible to the area, along Sunset Drive, are a mix of 2 and 3 story buildings. The 3 story buildings will appear 2-story-like with 2 levels on Sunset Drive and the 3rd level below grade with a daylighted basement.

Lastly, the character of all the proposed structures would be more compatible with the architecture and materials of the more historic Craftsman style homes in the area and throughout Asheville.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The ***ACDP 2025*** proposes a Smart Growth development pattern that accommodates realistic, market based alternatives to promote infill development of vacant or underdeveloped property. One way to accomplish this goal is to apply existing zoning

tools to encourage higher density residential infill development. This project accomodates this by utilizing the "Exceptional Development Standards" density bonus. In addition, the comprehensive plan discusses the need for residential infill development and new construction to be of a quality that preserves, protects, and enhances existing neighborhoods. The proposed development utilizes a sensitive building approach, design, and materials that will blend in with the existing neighborhood.

This project is also proposing 20% of the units (4 units) at the City's affordable housing rate standard. This is not only meets one of the City Smart growth goals for affordable housing, but also contributes to meeting the needs for affordable housing outlined in the Consolidated Strategic Housing and Community Development Plan 2000-2005.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
This proposed development is within close proximity to alternative transportation and is located near major road facilities, interstate connections and other service centers with Charlotte Street & I-240. In addition, basic infrastructure appears adequate and preliminary review by other service providers has not revealed any problems for future service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The development proposes a decrease in the number of units. The City's Traffic Engineer has reviewed the proposal and determined that there are no traffic issues created by the project nor is a traffic impact analysis warranted.

Pros:
- Project incorporates green building and environmentally sensitive approach to development.
- The proposed development will replace outdated buildings with new construction that is more architecturally compatible with the surrounding neighborhood.
- The redevelopment of the site will result in a reduction in the number of units than what currently exists on the site today.
- Four (4) units will be sold at the City's affordable housing rate standards.

Cons:
- The project exceeds the density allowance under the RS-8 zoning district and Hillside development standards, unless the Conditional Use Permit and density bonus is approved.
- If a modification to allow the parking to encroach into the front setback along Sunset Drive is not approved, additional grading and clearing of a portion of the site will be necessary to create an off-street parking area.

Based on the above findings and that the project appears to display an "exceptional development", staff recommends approval of the conditional use permit and approval of the 150% density bonus requested by the applicant.

Mr. Alan Laibson, one of the developers of Sunset Park, spoke in support of the conditional use permit (Applicant Exhibit 1). He explained this project will exemplify the City's comprehensive plan what calls for new construction to preserve, protect and enhance existing neighborhoods, as well as epitomize what the City expects of a residential infill project. They have incorporated 20% of the units in Sunset Park to fall within the City's affordable rate standards. In order to achieve that goal, they had to partially subsidize their construction. Granting the density bonus will help them accomplish that goal. They have met with neighbors

12.

who are supportive of the project. There will be minimal disturbance of the property. To the most part, they will build on existing building footprints. They will be reducing the density from 23 rental units to 19 single-family homes and town homes of which 4 are affordable. The size and design are compatible with the existing neighborhood. In addition to creating energy efficient and green buildings and site plan, it should be noted that the site's proximity to public transportation and the ability to walk to downtown and north Asheville sites contributes to the sustainability the City is looking for.

Mr. Daryl Rantis, Architect, reviewed with Council a computer animation of the development (Applicant Exhibit 2). Using pictures (Applicant Exhibit 3), he explained how this development will meet the City's exemplary development standards. He said it was important to the development team that the building designs reflect the architectural heritage of the neighborhood and of north Asheville. They have always been ambitious about incorporating environmentally conscious design. They are incorporating passive and active solar heating and cooling strategies. They are fitting all of the buildings that have good solar access with panel ready rooflines for the direct application of photovoltaic and thermal hot water panels as an option for the buyers. They will be employing Energy star and healthy house certification programs as a minimum standard for all of the built structures. They will be incorporating a photovoltaic electrical panel system to run the site irrigation and lighting system. And they will also incorporate water conservation methods by specifying water conserving fixtures in the buildings and capturing rain water for use on the site.

Mr. Mike Lavoy, civil engineer, briefly explained the development.

After rebuttal, Mayor Bellamy closed the public hearing at 6:37 p.m.

Councilman Freeborn moved for the adoption of Ordinance No. 3442, granting a conditional use permit and a density bonus for a 19-unit condominium project for property located at 2 Sunset Drive and a modification of the UDO to allow parking be located in the front setback, subject (1) conditions recommended by City staff; (2) the project shall comply with all conditions outlined in the TRC staff report; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets. A lighting plan is required to be submitted for review and approval; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) A grading permit will not be approved until a tree survey is performed and tree protection measures are in place. Final Landscape and Grading plans shall clearly denote all tree's being preserved and also show tree protection devices in compliance with the City's UDO standards; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (7) The applicant shall provide documentation to staff ensuring that the affordable units proposed with this project are being offered at the City's affordable housing rate standards; and (8) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 251

B. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF PROPERTY LOCATED AT 341 ROCKWOOD ROAD

ORDINANCE NO. 3443 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED AT 341 ROCKWOOD ROAD

Mayor Bellamy opened the public hearing at 6:40 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to consider extending the corporate limits of the City of Asheville to include property located at 341 Rockwood Road. This public hearing was advertised on February 16, 2007.

Crown/Asheville, LLC has petitioned the City for the annexation of one lot owned by the LLC and located at 341 Rockwood Road (PIN 9643.02-65-9836) containing approximately 1.93 acres.

The lot is adjacent to the new Southridge Shopping Center located along Airport and Rockwood Roads in South Buncombe County. A restaurant is under construction on this property. The area, while contiguous to other non-contiguous ("satellite") parcels in the City of Asheville, is not contiguous to the primary corporate limits of the City and, therefore, is subject to the standards for annexation of noncontiguous areas contained in N.C. Gen. Stat. sec. 160A-58.1. One of these standards states, "no point on the proposed satellite corporate limits may be closer to the primary corporate limits of another city than to the primary corporate limits of the annexing city....." The area proposed for annexation is closer to the corporate limits of the Town of Fletcher. However, since Fletcher's charter precludes them from annexing into Buncombe County, staff has determined that this annexation is not contrary to state statutory requirements. Council may recall that similar situations have arisen in the past and we have handled these annexations by voluntary petition or legislative action.

Pursuant to N. C. Gen. Stat. sec. 160A-58.2 a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on April 30, 2007.

Considerations:

- Provides for the orderly growth of the City and the tax base through the acceptance of areas into the corporate limits where owners desire annexation.
- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council adopt the ordinance annexing the property set forth in the petition.

Mayor Bellamy closed the public hearing at 6:41 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3443. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 253

C. PUBLIC HEARING TO CONSIDER REZONING 11 LOTS LOCATED ON CRAVEN STREET, ROBERTS STREET, WEST HAYWOOD STREET, RIVERSIDE DRIVE AND THOMPSON STREET FROM RIVER DISTRICT TO URBAN PLACE DISTRICT

ORDINANCE NO. 3444 ORDINANCE TO REZONE 11 LOTS LOCATED ON CRAVEN STREET, ROBERTS STREET, WEST HAYWOOD STREET, RIVERSIDE DRIVE AND THOMPSON STREET FROM RIVER DISTRICT TO URBAN PLACE DISTRICT

Mayor Bellamy opened the public hearing at 6:42 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone 11 lots located on Craven Street, Roberts Street, W. Haywood Street, Riverside Drive and Thompson Street from River District to Urban Place District. This public hearing was advertised on February 16 and 23, 2007.

Mr. Glines said that the rezoning effort began with the intent to support the Wilma Dykeman Riverway Master Plan (Dykeman Plan) that was adopted by the City of Asheville in 2004. The Urban Place District provides the best fit for the development vision provided for in the Dykeman Plan. The Dykeman Plan anticipates the French Broad and Swannanoa Rivers becoming a vital mixed-use urban district. The individual program highlights of the plan provide a holistic approach to redevelopment in the river area. One area of importance is expanding the current roadway system to provide a cross town access route by improving existing roads and providing some new bridge connections. The economic development part of the plan proposes new mixed-use development, strengthening the arts community and opportunities for business growth in Asheville's core business sectors. A third highlight of the Dykeman Plan envisions environmental protection and recreation opportunities for the corridor which includes completion of the greenway system along the Swannanoa and French Broad Rivers, park development and water quality improvements for surface runoff. Above all, the river flood issues must be dealt with in an environmentally sensitive way to balance this special issue and still allow for the development in the floodplain. The Urban Place District encourages a scale and density to create the critical mass to make infill and redevelopment successful. Upper stories of buildings can be used for residential uses similar to the way downtown has redeveloped. The river area would benefit from the incorporation of live-work units which may have particular application as artist spaces.

The Urban Place District is designed to encourage higher density mixed-use development that is pedestrian friendly and includes special building design considerations similar to other mixed-use districts. The district is expected to foster development and redevelopment of areas with sufficient infrastructure in place to support the uses. Urban Place is expected to be applied to areas faced with blight and neglect and for areas that may have special environmental considerations. The list of uses is broad enough to support compatible infill redevelopment. This rezoning is an effort to begin implementing the Dykeman Plan by providing the appropriate zoning for the area properties. The proposed wording amendment to the Urban Place District also being considered will ensure that properties that are located in the floodplain will meet environmental standards that are similar to the River District.

The River District is developed to encourage redevelopment of the river areas in a manner that complements the natural environment of the river. The River District is unique in that it allows any use that is not prohibited in the list of uses. The residential density of the River District is relatively low for the nature of the district and the fact that most housing will be multi-family in style.

The River District Design Review Committee became interested in the topic of providing incentives for redevelopment of the river areas. The group reviewed the river maps and discussed areas most favorable for redevelopment. On September 14, 2006, a community meeting was held for all property owners with River District zoned property. The turnout was

reasonable and the majority of those in attendance agreed with the rezoning proposal for mixed-use nodes. The current rezoning proposal to Urban Place includes properties within those areas identified at the community meeting.

At the initial presentation of the rezoning request at the January 3, 2007, meeting of the Planning and Zoning Commission staff from RiverLink expressed concern with the zoning change primarily because of environmental issues. The Commission continued the item to allow time to explore those concerns. RiverLink staff, the River District Design Review Committee and City staff met on several occasions to review ordinances pertaining to environmental standards in the proximity of the river floodplain. The wording amendment to Urban Place District to include similar requirements from the River District is a result of these discussions. The net effect it that the environmental standards will still apply to properties that are located in the 100-year floodplain regardless to the zoning change to Urban Place.

Since the January meeting, two properties located on Thompson Street owned by the Dalton Family have requested to be added to the rezoning proposal. These properties are adjacent to the properties known as the Mica Village site. Recently the property owner of 91 Thompson Street has requested to be removed from consideration at this time. Staff is supportive of these changes.

The Planning and Zoning Commission considered the rezoning proposal and the Urban Place wording amendment at their February 7, 2007, meeting. Eight people spoke about the proposals and most were in favor of the changes. The Planning and Zoning Commission voted 5-0 to recommend in favor of the proposals.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Proposal is supports the goals of the City Development Plan 2025 related to river-area land use, smart growth concerns, transportation opportunities, potential for economic growth and greenway and environmental features.
- The rezoning is in line with the goals of the Wilma Dykeman Riverway Master Plan which was a planning effort spearheaded by RiverLink and adopted by City Council in July 2004 as an official plan of the City.
- The zoning to Urban Place will encourage private investment and redevelopment in the river areas.
- The zoning changes raise public awareness of the redevelopment potential in the river areas.

Cons:

- Additional rezonings will be needed over time to create the districts and nodes that are outlined in the Wilma Dykeman Riverway Master Plan document. (a potential pro) staff will need direction from City Council to move forward.
- Public participation for infrastructure needs will be required in the river area to realize the area's full potential. (a potential pro)
- Maps for the 100 year special flood hazard area are being revised and may be available this summer so the actual flood elevation may change.
- Flood and water quality issues are continuing concerns for some in the community and both issues have task groups working on them. (a potential pro)

At their February 7, 2007, meeting, the Planning and Zoning Commission voted 5-0 to recommend approval. Staff concur with this recommendation.

Ms. Spangler asked what the implications are when the properties are changed from River District to Urban Place District.

The following individuals spoke in support of this rezoning request:

Ms. Pattiy Tomo, resident on Riverside Drive and member of the River District Design Review Committee
Ms. Regina Trantham, representing Mica Village on 75 Thompson Street
Mr. Joe Ferikis, property owner in the River District
Mr. Alan Shepherd, one of the owners of the stockyard property
Mr. Whitt Riley

Mr. Mike Klepper, owner of four lots adjacent to the area, would like for his four lots to be included in this request as well. Mr. Glines responded that we cannot include the lots at this time, but would be happy to include them when City staff brings Council more properties, if Council is agreeable to this rezoning.

Mr. Don Yelton supported cleaning up the river area, but feared development due to flooding.

Mayor Bellamy closed the public hearing at 6:59 p.m.

In response to Councilwoman Cape, City Attorney Oast explained why he felt that spot zoning is not a legal issue in this case.

At the request of Vice-Mayor Jones, Mr. Glines spoke to the concern of RiverLink regarding flooding. It was his understanding that their concern was that flood ordinances in general may not be complete enough for what the City needs. Our Engineering Department is working on both the floodplain ordinance and the stormwater ordinance and feel that they will have a flood ordinance in place later this summer for Council consideration. Planning & Development Director Scott Shuford also resplied that in a following public hearing, there is a proposed Unified Development Ordinance wording amendment with specific changes to address some of the issues that have come up during this process. All of our erosion control, stormwater management, flood control ordinances are separate and stand alone and they apply no matter what the underlying zoning is. It really makes no difference on what the zoning is if those regulations are sound and we are working on improving them. They will address the issues at hand.

Vice-Mayor Jones was concerned about how the City is balancing more development with issues of flooding. Mr. Glines said that the flood ordinances are managed by the Engineering Department and we are working together to strengthen the ordinances.

Councilman Newman said that this rezoning looks good, but wondered if we have a process in place (similar to information on how traffic impacts the streets in terms of congestion) to look at the big picture to make sure that the pattern of development that we see unfolding will not exasberate flooding.

Mr. Chad Pierce, City Stormwater Services Manager, said that the Flood Reduction Task Force is looking at this particular issue. He said that Mr. Shuford made a presentation to the Task Force on this rezoning issue, coupled with the RiverLink presentation for the Wilma Dykeman Plan.

In response to Councilman Davis, Mr. Glines explained why some of the area property owners were not interested in joining this rezoning request at this time.

Councilwoman Cape said that the comprehensive watershed issue is absolutely important, but in that stead, we need to comprehensively look at the location of this section of the River and the overall regional benefit for bringing our density to this area. If we create these vibrant places, we are going to overall lessen the need to fill up the mountainside with houses for people to live. Cities and rivers can live together very vibrantly. We need to let local landowners be a part of the redevelopment boom of the River. We need to let them take their properties and make them viable right now. If we don't, what happens is the big developers are the ones who come in and reap reap the benefits. She encouraged Council to be supportive in moving forward and allowing these people to set the positive example. The flood regulations are in place to help manage the flooding issues.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3444, finding that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 261

At 7:26 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; State of North Carolina; and County of Buncombe. The statutory authorization is contained in G.S. 160A-318.11 (a) (3); and (2) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 160A-318.11 (a) (5). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:45 p.m., Mayor Bellamy moved to continue the closed session until after the completion of the agenda for the regular meeting. This motion was seconded by Councilman Davis and carried unanimously.

At 7:50 p.m., Councilman Freeborn moved to excuse Vice-Mayor Jones for the remainder of the meeting due to illness. This motion was seconded by Councilwoman Cape and carried unanimously.

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO AMENDING THE URBAN PLACE DISTRICT

ORDINANCE NO. 3445 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE RELATIVE TO AMENDING THE URBAN PLACE DISTRICT

Mayor Bellamy opened the public hearing at 7:50 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to consider an amendment to the Unified Development Ordinance (UDO) relative to amending the Urban Place District. This public hearing was advertised on February 16 and 23, 2007.

The Urban Place District is written to develop walkable pedestrian oriented mixed-use districts for areas that may be in decline and blighted or otherwise are not meeting their potential. The River area was anticipated as a likely area for the Urban Place District when it was created. The built environment is an important consideration and requirements are in place to ensure that new construction embraces the street and creates a active streetscape and pedestrian environment. The changes proposed in this amendment are the result of the request from RiverLink to strengthen the environmental standards for properties located within the special 100-year flood hazard area. The primary focus of the changes included here are specifications for properties that are affected by the special 100 year flood hazard areas. Most of the wording is currently found in the River District and has direct application to the Urban Place District for flood prone properties. A few minor wording changes cover other issues in the Urban Place District and will be briefly outlined.

The initiation of the wording amendment began with a proposal sponsored by the planning staff and the River District Design Review Committee, (River Design Committee) to rezone several parcels in the River District to Urban Place District. The River Design Committee supported this effort as a way to begin implementing goals of the Wilma Dykeman Riverway Master Plan which encourages redevelopment of river-area properties with sensitivity to the flood plain. After working on this proposal in 2006 and holding a community meeting in the fall, several property owners offered the rezoning of their property to Urban Place District. The amendments to Urban Place have been considered by the River Design Committee and RiverLink staff. The largest amendment to the Urban Place District is the addition of section 14 of the code to cover properties that are located within the 100-year special flood hazard area.

Section 14 replicates most of the special language from the River District to provide for a river resource yard, limits to speculative grading without a site plan, limits to impervious surfaces standards to match the River District. The remaining items cover design for new construction, elevated structures and encouragement for green building. The river resource yard is proposed to be expanded from a minimum of 20 feet in the River district to 25 feet. Several people from the review team recommended an even greater dimension for the river resource yard perhaps up a minimum of 50 feet. Staff notes that there was not sufficient time to meet with affected property owners and that the requirements found within the Urban Place District were not intended to replace or super cede the floodplain ordinance. The floodplain ordinance is managed by the City Engineering Department and there is some work being done to provide amendments to the floodplain ordinance and the stormwater ordinance. While the change to the river resource yard is minimal, it is still an improvement. Staff feels that larger and more comprehensive revisions are better researched and reviewed by the Engineering Department which is charged with managing this special area.

Another minor change is to remove 'inn' from the list of allowable uses and replace it with 'lodging facilities." The change will be more consistent with other districts found in the UDO by using the term lodging facility.

Considerations:

- This amendment seeks to provide an expanded understanding of the goals and opportunities of the Urban Place District especially as it pertains to parcels located in the special flood hazard areas.
- The amendment includes purpose statements directly from the Wilma Dykeman Riverway Master Plan.
- This amendment requires additional development standards for properties that are located adjacent to the French Broad or Swannanoa Rivers that was inspired by requirements found in the River District.

- The changes to fenestration requirements for building that are raised above the 100-year flood elevation will address what is a unique reality for development in the floodplain area of the rivers.
- A minor changes in the list of uses for lodging facilities provides consistency for Urban Place with other districts in the UDO.

Staff recommends approval of the proposed ordinance amendments to Urban Place.

Mayor Bellamy closed the public hearing at 7:52 p.m.

Mr. Glines responded to various questions/comments from Council, some being, but are not limited to: would this allow small river boat type manufacturing; will this change affect any existing businesses in that district; and is there a need to mention bus transfer stations in the permitted uses.

In response to Councilwoman Cape, Mr. Glines said that the Urban Place District does not allow salvage yards, salvage warehouses, recycling yards or recycling warehouses.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3445. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 263

E. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR NORTH VIEW AT BILTMORE LAKE PHASE II ON ENKA LAKE ROAD FOR 257 RESIDENTIAL MULTI-FAMILY UNITS ON 33 ACRES

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 7:57 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Alan Glines submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Glines said that this is the consideration of the issuance of a conditional use permit for North View at Biltmore Lake Phase II on Enka Lake Road for 257 residential multi-family units on 33 acres.

Under review is a proposal to build 257 residential units on 33 acres located in the City's western extraterritorial jurisdiction area (ETJ) (City Exhibit 3 - Location Map and Aerial Map). The site is zoned RM-16 and is being presented as a second phase of the North View at Biltmore Lake project that was approved in 2003. Under the current zoning the developers could build many more units than is proposed at this time. North View at Biltmore Lake Phase II (North View Ph. II) has access from Enka Lake Road at a point close to Sand Hill Road. The phase two site will share the main driveway with the phase one project (made up of apartments and condominiums) now called Seasons at Biltmore Lake. A second driveway will be constructed south of the existing driveway. A Traffic Impact Analysis (TIA) was completed for the original first phase and included a full build-out scenario for the two phases. Improvements to Enka Lake Road were constructed during the Phase I project as a result of this study.

The modified Site Plan (City Exhibit 4 - Modified Site Plan) consists of an additional six one-bedroom units.

The Master Plan proposes a circuitous driveway route across the hill top parcel. The main part of the development is clustered in the center of the site in the area that is now an open meadow. The fifteen residential buildings and clubhouse structure proposed on the plan will be accessed from the main drive route and will have two access points along Sand Hill Road. The front part of the lot and rear of the lot are heavily wooded. Some of these trees will be protected and will remain to provide natural buffers for the project. A portion of the rear section of the site is in the hillside ordinance area. This portion of the lot is not being developed and is being set aside. Open space is provided by the buffer areas and the space around the central clubhouse.

This number of units was recently updated based on the discussion during the Planning and Zoning Commission meeting. The 257 units are now designated as 102 one-bedroom units, 115 two-bedroom units and 40 three-bedroom units. Since the project does not require a density bonus or other incentive for development it is difficult to leverage affordable units in this project. Staff requested that the developer consider providing some percentage of the units at a rate affordable to people with incomes below 80% of area median income (AMI). The area median income for a family of four is $50,400. Projects throughout the City are needed to assist in the affordable housing crunch in Asheville. The developer has responded that the public sector should provide a subsidy to augment the financing for this kind of project to make the below-market rents feasible. The developer has noted that the projected rents at this point in the planning process for North View Phase II will serve the market that is making between 80% and 120% of the area median income. This market segment is commonly referred to as 'workforce housing'. They also noted in a recent meeting with staff that many of the units will be affordable to persons making between 80 and 100% of the AMI. At the Planning and Zoning Commission meeting the developer offered to take six three-bedroom units and convert them to 12 smaller one bedroom units. This would allow the developer to offer less expensive units within this project. The Planning and Zoning Commission and staff were supportive of this proposal. The numbers for the project now reflect this change from 251 total units to 257 units. The building footprints for the buildings (with the conversions from three bedroom units to two one–bedroom units) will not substantially change. Neither will site grading or parking requirements, etc.

Since the Technical Review Committee (TRC) reviewed the project some amendments were made to the plans which address some of the concerns from staff. Buildings One and Two at the front end of the parcel have been shifted closer to the access driveway to reduce the impact on the hill below and the existing vegetation there. The existing trees that can be protected are shown in more detail on the plans. Staff still recommends that the developer tighten the distance of the building to the driveway route to lessen the grading required and provide a tree survey for the areas below the two driveways and buildings One and Two. This will assist in preserving the buffer trees during construction and to reduce the limits of clearing in this

area. The project will lessen the visual impact from Enka Lake Road by saving trees in these areas.

The elevations that have been provided with this submittal have also been revised. The elevations show greater definition in the materials used on the facades. Two sizes of hardi-plank are being proposed to provide some visual interest for the facades. Stone veneer will be placed at the lower portions of the building. The colors of the materials should also offer variety in the facades.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) notes the seven conditional use standards and states that the Asheville City Council shall not approve the conditional use application and site plan unless and until it makes the following findings, based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case;

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposal is being reviewed and will meet requirements for City standards and the state building code. If the project is approved, detailed plans will be submitted and reviewed for permitting.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The development is in keeping with the underlying zoning for the area, residential multi-family high density (RM-16). The actual development will located at the center of the site on a sloping knoll on the part of the site is mostly already open. Parts of the front area and the rear portions of the site will be preserved and not graded or cleared. The upper section of the rear of the site is located in the city regulated Hillside area and no grading or clearing will occur in this area. The creek area at the front of the site will have some disturbance mainly from the required second driveway. Other sections adjacent to the creek will not be disturbed. The project is reasonably sensitive and compatible with the significant natural features of the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The proposed use is not expected to injure the value of adjoining or abutting property. This type of investment is important for providing a mix of residential uses in this sector of the community. The area has seen significant growth in the single family residential market and the original North View Phase I is converting to condominiums. This rental project will provide balance to the area.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The density of the project is just under eight units per acre. The zoning of the site is RM-16. The project does not require density bonuses or special incentives to build this project. The proposed use is in harmony with the scale, bulk, coverage, density and character of the underlying area. The clustering of the units and the preservation of some of the existing trees at the front and rear of the site will assist the development in blending into the site in a similar fashion as other developments in the area have done.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The comprehensive plan encourages development in areas where the infrastructure is in place to support the development. The comprehensive plan encourages a variety of housing types in a given sector of the community. The west end of the City is expected to continue to develop and redevelop to serve the growth in the population there. The project is providing market rate rental units with initial prices in a range that can be considered workforce housing. This is an important segment of the population to serve. Affordable units are a challenge to provide for without some public participation through subsidy or tax credit. The project should still be an asset to the west Asheville community.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
Plans are underway for road widening for Sand Hill Road, the closest connecting street, based on growth projections for the community. Staff is recommending that the developer provide an urban level of service for the development and provide a comment for how they will accomplish this requirement. If this is made a requirement then this condition can be met. Other facilities are in place to support the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
With two driveway access points for Phase II and the road widening planned along Sand Hill Road, the proposed development is not expected to create undue traffic congestion or create a traffic hazard. A traffic impact analysis was completed for the Phase I project and anticipated an even larger build-out between the two North View phases. The roadway improvements that were noted in the TIA have been completed (turn lanes and widening on Enka Lake Road).

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Project provides some diversity in housing choices from smaller one bedroom units to three bedroom units.
- The site provides space for undisturbed buffers and open space to minimize impacts and improve the quality of life for residents.
- Provides a suitable transition from busier commercial areas to lower density residential and institutional uses.
- The developer has provided initial projections that most of the units will be in the price range of workforce housing, (families making 80% to 120% of area median income which is $50,400 for a family of four).

Cons:

- Project does not address the need for housing options to those residents making 60%-80% of AMI.
- Developer cannot ensure that projected rents will remain within the 80%-120% AMI.
- Besides the short term possibility that the widening along Sand Hill Road may fall behind this project timeline, no other items of concern are noted.

This conditional use permit was recommended for approval by a 5-0 vote by the Planning and Zoning Commission at their February 7, 2007, meeting. Besides the development team, no one spoke regarding the project. Staff also supports the approval of the project.

Mr. Will Buey, representing the design team, said that the clustering of homes is on property that was a meadow and was already cleared. We tried to make sure that the disturbance from the project is limited to that area. We have preserved quite a bit of open space and are staying away from the hillside area. He reviewed some statistics about what is allowed and what they are providing in terms of density, open space, undisturbed area, buffers and pervious area (Applicant Exhibit 1). They are providing a secondary access into the project. He explained the stormwater measures which will meet or exceed the City's standards.

Mr. Wyatt Dixon, representing the owner of the property, pointed out that the building footprints are half the size of the building footprints of the units in Phase I (Applicant Exhibit 2) (Applicant Exhibit 3). Regarding affordable housing, we did revise the Site Plan for smaller units at approximately $600 per month.

After rebuttal, Mayor Bellamy closed the public hearing at 8:09 p.m.

Councilman Newman moved to grant a conditional use permit for the proposed Master Plan for North View at Biltmore Lake Phase II on Enka Lake Road for 257 residential multi-family units on 33 acres (noting that the request is reasonable based on information provided in the staff report), subject to the conditions recommended by City staff and the following standard conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans and substantially agree with the plan presented to City Council; (4) The developer shall provide an urban level of public safety service for the development; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (6) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Mumpower.

In response to Mayor Bellamy, Mr. Dixon said that the units will be rental units.

When Mayor Bellamy asked if they would voluntary annex into the City, Mr. Dixon said that they have had discussions with City staff about that and at this point they are not prepared to commit to doing that, but they do note that as part of their approval process that they are required to provide an urban level of service. He explained that they would need to examine that further because this request has just recently been raised. Due to their investors and financing in place, he could not unilaterally commit to do that, however, they are willing to discuss that with City staff.

Councilwoman Cape suggested continuing this matter in order for Council to receive advice from the City Attorney as to what their options are concerning annexation as a term of a conditional use permit.

When Councilman Freeborn asked what would happen if Council did not approve this project, Mr. Dixon said that they would have to go back to the drawing board but was hopeful that would not happen.

Mr. Craig Justus, attorney, said that the issue of voluntary annexation was brought to their attention last week. It has never been brought to their attention at any time that a policy of the City requires a developer in an ETJ area, as a condition of approval, has to ask for annexation. The bottom line is these developers have spent a lot of money based on the rules in place presented to them. The only discussion about urban level of services at the Planning & Zoning Commission level was, you can ask for voluntary annexation, or you can by contract, contract with private services to provide an urban level of service. They would like to maintain that option. He asked what the point of continuance would be, unless Council believes they can create a policy to then apply it to the developers, almost retroactively. He hoped Council would not do that.

Councilman Freeborn said that he could not support any project in the ETJ unless they voluntarily annex.

In response to Councilman Newman, City Attorney Oast said that Council has to find in favor of every one of the seven conditional use standards in order to approve the conditional use permit. If they fail to meet any one of them, then Council may deny the conditional use permit. Council can put reasonable and appropriate conditions on a conditional use permit. He would have to explore whether a developer will or will not voluntary annex into the City is a basis for Council's decision on this project.

Councilman Mumpower said that the developer has come before Council with a project that seems to meet our criteria and standards and for us to ask if they would like to come into the City is fine, but to make a vote conditioned on that is municipal blackmail. This developer did not comply with our ordinances with an understanding that we had the criteria of voluntary annexation for acceptance of the project.

Councilwoman Cape said one of the roles of City Council is land planning. Regarding Condition No. 5, this continuance of adding people to our borders and spreading out, in an urban fashion, is not strategically economic or smart growth. She did not think this fits a comprehensive plan for how a city grows. They are contributing to the urban development of the area.

In response to Councilman Freeborn, Mr. Justus preferred that Council have adequate time for the City Attorney to them of what they are required to do under the law. He said that at no point in time did anyone point to a policy in writing, comprehensive plan or otherwise, that said that as part of the ETJ they have to come into the City. If after Council creates a policy, he felt to impose that retroactively is fundamentally unfair. They prefer not to be put into a corner because their only option is to litigate.

Councilman Davis said the developer is offering a lot of what we are looking for in this project, recognizing that they are enjoying building on the border of our City. He would not be comfortable in making any policy retroactive since this project is so far along.

Councilman Freeborn asked City staff ever asked this developer, who was looking at such a large scale project in our ETJ, if they were interested in voluntary annexation. Mr. Glines replied that they did discuss, in a general way, urban level of service can mean annexation, but they could provide it in another fashion as well.

Councilman Newman and Councilwoman Cape withdrew the motion to approve the conditional use permit to give the City Attorney time to look at the questions raised by Council.

Mr. Justus asked for Council to agree that this is a good project, and if part of the conditioning is to say they have to come into the City, they would like the opportunity to re-design

the project to increase the density to off-set the costs that they were unaware of at the beginning of the application.

Councilwoman Cape moved to continue this matter until March 13, 2007, in order to give the City Attorney time to look at the questions raised by Council. This motion was seconded by Councilman Freeborn and carried on a 4-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING NEW REQUIREMENTS FOR USE AND DIMENSIONAL NONCONFORMITIES

Mayor Bellamy opened the public hearing at 8:28 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to consider an amendment to the Unified Development Ordinance (UDO) regarding new requirements for use and dimensional nonconformities. This public hearing was advertised on February 16 and 23, 2007.

There has been recent community confusion about how the nonconformities section of the UDO addresses dimensional nonconformities. The community perception is that any renovation amounting to more than 50% of the appraised value of the structure causes full compliance with ALL sections of the UDO. This is incorrect. In Asheville, the "50% rule" applies only to certain site improvements, not to all of them. The code section in question is Section 7-11-2(b)(1) that states, in part, that "{t}he following developments must bring the entire site into ***full compliance with the requirements of Article XI*** of this chapter" (emphasis added) with one of the listed developments being "{r}enovations with a total cost exceeding 50 percent of the assessed value of the building, according to Buncombe County tax records." The reference to Article XI limits site compliance to only the standards that are covered in that Article which are:

- Parking, loading and access standards
- Landscape and buffering standards
- Open space standards
- Sidewalk requirements

As a consequence, building location, setback, height and other requirements are not required to be complied with in renovations exceeding 50% of appraised value. While it is common for zoning codes to exempt certain features from compliance in cases of significant site improvement, Asheville's UDO is one of the more generous. We have seen situations where virtually the entire structure has been demolished without triggering compliance with anything more than site design requirements.

In response to Council direction, staff has developed this ordinance which significantly increases the extent to which "virtual teardowns" must comply with all dimensional requirements but which exempts renovations (see definition below) from compliance with anything other than site design (Article XI) requirements.

Renovation means the repairing or remodeling of a structure in which the exterior walls, foundation and roof are maintained structurally intact.

There are two other significant changes in this ordinance from the current situation regarding nonconformities. First, the current provisions require adjoining lots in common ownership on the day that the UDO became effective to be combined to create a conforming or less-nonconforming lot(s). In other words, if there are two adjoining lots that were lawfully

created sometime in the past and which have become nonconforming due to code changes and if the lots were owned by the same entity in 1997, they cannot be separately developed. The same two lots owned by different entities in 1997 can be separately developed. The proposed amendment corrects this inequity.

Second, the proposed ordinance creates a new role for the Planning and Zoning Commission. Under current code, a nonconforming use can be replaced by another nonconforming use of equal or lesser intensity using the table provided in Section 7-11-2(d)(10). If the proposed existing or replacement use is not specifically listed, City staff makes the determination of whether replacement can occur. Under the revised ordinance, the Planning and Zoning Commission makes the determination as to whether the unlisted uses are of equal or lesser intensity.

Pros:

- Provides a simpler, cleaner approach to nonconforming uses and dimensional nonconformities.
- Meets the expectations of many in the community about site compliance during renovation.

Cons:

- Will likely result in increased cost of site development.
- Some projects may not be pursued due to expense of compliance.

The Planning and Zoning Commission considered this code amendment on February 7, 2007, and recommended approval of this amendment by a vote of 5-0, subject to staff adding a definition of the term "impact" and evaluating whether there was ordinance confusion about the terms "communication tower" and "telecommunication tower." Staff has added a definition for "impact" and reviewed ordinance provisions concerning the other two terms, finding that there is indeed sufficient ordinance clarity about the distinctions. City staff recommends approval of the proposed code amendment as modified.

When Mr. Shuford said that he has recently received five concerns from Mr. James Judd, some of which are well founded, Mayor Bellamy wondered if the Planning & Zoning Commission should review the concerns prior to City Council taking action.

Mr. Eugene Katz explained why he encouraged the use of non-conforming lots.

Mayor Bellamy closed the public hearing at 8:37 p.m.

Councilman Freeborn moved to remand this issue back to the Planning & Zoning Commission. This motion was seconded by Councilman Mumpower and carried unanimously.

V. UNFINISHED BUSINESS:

A. GREENLIFE/MAXWELL RECOMMENDATION

Assistant City Manager Jeff Richardson said that at the January 12, 2007, meeting, City Council directed staff to continue to analyze options regarding minimizing local commercial traffic on Maxwell Street.

At City Council's direction, City staff has continued to work with Greenlife Grocery Store officials and representatives for the property owners at located at 70 North Merrimon Avenue, in an effort to mitigate local commercial traffic accessing Greenlife Grocery from Maxwell Street.

As part of this process, store officials have analyzed the volume and size of delivery truck traffic accessing Greenlife in a seven (7) day period. The data represents store truck delivery broken down into two categories:

- Non-Commercial (cars, trucks, vans)
- Commercial ((Straight Trucks, Semi-Tractor Trailer)

Analysis reveals an approximate 50/50 volume split between commercial/non-commercial delivery traffic. Store officials believe that by reconfiguring the parking lot to include relocation of the one residential home, the redesign will allow for one (1) additional loading dock adjacent to the current loading dock on the west side of the store entrance. This additional dock will virtually guarantee that all mid-size straight trucks, along with all tractor trailer trucks will unload using the front store delivery entrance. Therefore, non-commercial trucks will use the side loading dock accessed using Maxwell Street and commercial truck deliveries will occur via Merrimon and confined to the front parking lot of the grocery store.

If this site design moves forward, store officials would obtain plan approval from City planning staff, which requires a privacy fence in addition to a minimum ten foot vegetative buffer. In addition, the Greenlife property owners have expressed continued support for a rezoning request for 37 Maxwell Street, which if approved, would provide Greenlife necessary space for the proposed parking lot redesign.

City Council may consider the options as outlined and staff is prepared to take further direction accordingly.

Ms. Hillary Stewart, resident on Maxwell Street, said that even with these changes, the volume is tremendous on this residential street.

Mr. James Judd if Council supports this solution, then he explained his concerns of due process. In the spirit of compromise, he believed the neighbors would be satisfied if the loading was taken off Maxwell Street, the parking reinstalled on the Maxwell Street, the intended buffer placed on Maxwell Street and no commercial traffic on Maxwell Street. He questioned the Planning & Development Director's authorities. City Council should direct the City Manager to delivery the notices of violation for the decision that exceeds staff's authority.

Councilman Newman said that the four major complaints heard include the question of the site triangle and the safety of trucks entering and exiting Greenlife property on Maxwell Street; problems of trucks on Maxwell Street, especially the large trucks; buffer compliance on Maxwell Street; and the need to restore street parking on Maxwell Street. He is not asking Council to vote on anything tonight because there are aspects on what is being presented which would require Planning & Zoning Commission review. These are the efforts which he and Councilman Freeborn have undertaken to see if there are different design options to address the concerns. This design option is not a perfect solution to the problems, but it goes a long way to address three of them - the site triangle issue is fully resolved; buffer compliance on Maxwell Street; and street parking is restored on Maxwell Street. Regarding the trucks on Maxwell Street, this design makes a significant impact on that issue. It would eliminate about 1/2 of the total truck traffic on Maxwell Street, but more important, it would significantly eliminate all of the large trucks. People have asked Council to do their best to create a situation where we are fully enforcing our laws. As he understands our laws, he does not think the City Council has the authority to require Greenlife to do everything people are asking Council to do. All Council has the authority to do is to spend some time in making the situation better and this design goes a long way to that end.

Councilwoman Cape thanked Greenlife for continually stepping up to the table to help solve this difficult situation, unlike others who do business in our community and who refuse to try

to seek solutions with us. She hoped that we would get better at removing some of those difficulties in those places and she is comfortable with the compromise that we have all come to for this difficult situation. One of the huge issues in a livable community is having grocery stores that people can walk to and be a part of in our community.

Councilman Mumpower felt this represents the best compromise effort to try to meet the most needs in the fairest way possible.

Councilman Freeborn wanted to hear what the Greenlife's plan is for managing truck traffic, since he is getting an additional loading dock and only 50% of the receiving traffic will be taken off Maxwell Street. He said that he would be happy to meet with Greenlife and talk about the type of management plan he is looking for in order to consistently manage the traffic of the deliveries.

Mr. Hugh Bradburn, Greenlife Store Manager, explained the overall operations of the store.

Councilman Davis noted that Greenlife will be spending a lot of money on this design to get to a better place, and wondered, if the end of the process, if there will still be neighborhood conflict. He hoped that Greenlife and the neighborhood will talk about what will happen at the end of the process.

Since it was agreed by Council that this is the best site design available, Councilwoman Cape asked what the next step would be. City Attorney Oast said that if a rezoning is required, it will go through the Planning & Zoning Commission. All that City Council can do at this point is to agree to consider the rezoning request.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO REGULATE THE REMOVAL, RELOCATION AND RECONSTRUCTION OF QUALIFIED SIGNS WITHIN THE QUALIFIED SIGN OVERLAY

ORDINANCE NO. 3446 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO REGULATE THE REMOVAL, RELOCATION AND RECONSTRUCTION OF QUALIFIED SIGNS WITHIN THE QUALIFIED SIGN OVERLAY

Mayor Bellamy said that this public hearing was held on January 9, 2007, and continued in order to allow staff to develop some illustrations showing what the modified ordinance would permit.

Using illustrations, City Attorney Oast responded to various questions/comments from Council, some being, but are not limited to: what is the purpose of this amendment; are billboard companies assigned a certain number of signs; does this allow dynamic (electronic screen) signs; how many signs does this amendment have the potential of affecting; and how many billboards are in our City.

Mayor Bellamy said that Council worked hard on an agreement with the billboard industry about three years ago and felt this might erode on what was agreed to.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3446. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Mayor Bellamy voting "no."

ORDINANCE BOOK NO. 23 - PAGE 271

C. SECOND READING OF ORDINANCE NO. 3413, AN ORDINANCE TO CREATE AN HISTORIC PRESERVATION OVERLY DISTRICT FOR THE ST. DUNSTAN'S NEIGHBORHOOD

Mayor Bellamy said that the public hearing on this matter was held on November 28, 2006, and because the ordinance failed to reach the 2/3 vote of the full Council, the matter needed to be brought back for a second vote.

In response to Councilman Newman, City Attorney Oast said that he would research the issue of allowing City Council to approve the guidelines for a historic district (since Council designates the area), with the Historic Resources Commission (HRC) providing Council with draft guidelines for their consideration, instead of having the HRC being the body to approve those guidelines.

Councilman Newman appreciated the HRC addressing the concerns raised by Council regarding incorporation of green building construction methods into new and existing structures in the local historic districts. He encouraged their sub-committee to continue to work on new language that could be incorporated into the guidelines.

It was the majority of Council's consensus to have the City Attorney provide Council with a memorandum on the guidelines of the St. Dunstan's Historic Preservation Overlay District along with the response regarding guideline approval requested by Councilman Newman. In addition, at Councilwoman Cape's request, the City Attorney was directed to report on the difference between the national guidelines around solar panels and what our HRC uses.

Councilman Mumpower felt there was no longer a need to create historic overlay districts to preserve historic properties anymore. He wondered when the last historic property was torn down in recent years that had anything left to it. He felt we are creating special privileges and government oversight in an elite community and could not support the motion.

Councilman Newman moved for the second and final reading of Ordinance No. 3413. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 152

D. RESOLUTION NO. 07-62 – RESOLUTION REQUESTING LEGISLATIVE ACTION FOR THE CITY OF ASHEVILLE IN THE 2007 GENERAL ASSEMBLY

City Attorney Oast said that last week Council took action to request the introduction of legislation dealing specifically with the City of Asheville. These were requests for local legislation, and the action last week was necessary in order to meet the submission deadline of February 27, 2007, that applied with respect to the Senate (the House deadline for local bills is March 7). The resolution also requests withdrawal of support for certain bills regarding annexation that have been introduced, and further requests that members of the delegation consider the introduction of legislation or other action to ensure that Asheville has the ability to encourage voluntary annexation. He then asked for further direction with respect to the other matters of local concern and potential legislative action. He noted that as bills come forward on items Council has expressed an interest in, he will advise Council.

Councilman Newman moved to support the Land for Tomorrow initiative. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

Councilman Freeborn moved to support increased funding for criminal justice. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Newman moved to ask the state legislators to increase the state minimum wage and index it annually for inflation. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no." Councilman Mumpower felt this is against every basic economic principle upon which this country is founded.

Councilwoman Cape moved to support review of child care reimbursement amounts for Buncombe County. This motion was seconded by Councilman Freeborn and carried unanimously.

Councilman Freeborn moved to support campaign funding, reform to allow local governments to implement public financing of local elections. This motion was seconded by Councilman Newman and failed on a 3-3 vote, with Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no." Councilman Mumpower felt we talking about using forced taxpayer money to finance elections and would not support the motion.

After a brief discussion, Councilwoman Cape moved to revise state laws relative to the homestead exemption for low-income, elderly homeowners. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Councilman Mumpower voting "no." He was concerned that when you give people exemptions, you take away their incentives to participate in local government. Mayor Bellamy asked the City Attorney to advise Council as taxation bills come forward.

Councilman Mumpower moved to support strengthening criminal laws dealing with sexual predators, especially as related to children. This motion was seconded by Councilman Freeborn and carried unanimously.

After a short discussion, Councilman Freeborn moved to support obtaining legislation to strengthen the City's ability to regulate development on steep slopes, including transfer of development rights. This motion died for a lack of a second.

After a short discussion, Councilman Freeborn moved to support obtaining stronger legislation in order to create financial incentives for private sector development who would like to build more affordable housing. This motion was seconded by Councilman Newman and carried on a 4-2 vote, with Councilman Davis and Councilman Mumpower voting "no."

Councilman Newman moved to support obtaining stronger legislative authority to allow governments to create stronger incentives for environmentally sustainable design. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

Councilman Mumpower moved to support obtaining stronger legislation to deal with illegal immigration at the local level. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Freeborn voting "no." Councilman Freeborn felt that this is a federal issue and felt confident that our new Congress will be able to deal with this issue.

There was no motion to support obtaining stronger legislative authority for regulation of trees and vegetation.

After a brief discussion, Councilman Freeborn moved to establish authorization and funding for a program to allow for enforcement of City's "quality of life" ordinances (noise, solicitation, junk vehicles, minimum housing, etc.), similar to existing programs in other N.C. cities, e.g., Durham. This motion was seconded by Councilman Davis and carried unanimously.

After a brief discussion initiated by Mayor Bellamy, Councilman Freeborn moved to ask our legislators for a direct appropriation of $5 Million to fund improvements to the Civic Center (in case they do not authorize Asheville to charge a 1% room occupancy tax as a revenue source for this effort). This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no."

Councilman Newman moved to support the state funding of the Asheville Art Museum's expansion. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no." Councilman Mumpower said that expansion will be expensive and would not be able to support the motion.

Councilwoman Cape was supportive of the Chamber of Commerce's legislative agenda item regarding transportation and infrastructure.

Councilman Freeborn moved to support the Chamber of Commerce's state legislative agenda item regarding unfunded mandates. This motion was seconded by Councilman Mumpower and carried unanimously.

After a short discussion initiated by Councilman Mumpower, Councilwoman Cape moved to reprioritize and focus on the I-26/I-40 interchange and then perform the due diligence for the remainder of the project, with the community input. This motion was seconded by Councilman Freeborn. (No vote was taken.)

Councilman Mumpower moved to support expediting the planning and construction of the I-26 Connector Project. This motion was seconded by Councilman Davis and carried on a 4-2 vote, with Councilwoman Cape and Councilman Freeborn voting "no."

Councilman Freeborn updated City Council on the proposal to create an independent Airport Authority. He said that the he has been working actively, with the Airport staff and the City and the County to move this issue forward. He said that they feel confident that they will have a recommendation to bring forward soon. They have drafted very basic language for legislation to be introduced this session in case the details with the City, Buncombe County and the Airport Authority can agreed upon. If the details are agreeable, they wanted to act on it this session. Therefore, they have asked Representative Goforth to introduce the very basic legislation. They feel confident that the legislation will be amended once the details are agreed upon by the three bodies. On March 27, 2007, he will provide Council with a detailed update.

RESOLUTION BOOK 30 PAGE 210

VI. NEW BUSINESS:

A. RESOLUTION NO. 07-61 - RESOLUTION APPOINTING MEMBERS TO THE DOWNTOWN COMMISSION

Mayor Bellamy said that Larry Turner, member of the Downtown Commission, resigned thus leaving an unexpired term until December 31, 2008.

City Council instructed the City Clerk to arrange the following interviews: Amy Merritt, Brad Galbraith, Hutch Kerns and James Kilbourne. Ms. Merritt was moving out of state and withdrew her application.

After Council spoke highly of the candidates, Brad Galbraith received 4 votes, Hutch Kerns received 1 vote, and James Kilbourne received 1 vote. Therefore, Brad Galbraith was appointed as a member of the Downtown Commission to serve the unexpired term of Mr. Turner, term to expire December 31, 2008, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 27

B. CONSIDER DIRECTION FOR REVIEW OF SUBDIVISION REGULATION AND PROCESS

Planning & Development Director Scott Shuford said that City staff is requesting direction from Council concerning changes to subdivision requirements.

Staff would like to receive direction from City Council on several proposed or potential changes to the subdivision requirements. The changes are scheduled to be considered by the Planning & Zoning Commission on March 7, 2007. Changes identified by staff include:

- Update application procedures for better consistency with other application processes
- Re-organize and re-format to improve comprehension and clarity
- Remove engineering/construction standards that will be separately covered in the Standards and Specifications Manual
- Add information regarding "Planned Community Act"
- Update definitions
- Cross-reference access standards covered in other sections of the City Code and Standards and Specifications Manual
- Revise and enhance enforcement processes
- Establishing standards for allowing gated communities as a conditional use permit
- Treating all subdivisions of more than 50 lots as Level III projects (conditional use permit)

While most of the changes listed above fall into general housekeeping or clarification categories, the last two items are more substantive and are discussed in more detail below.

Gated communities – Council has noted that there may be times in which gating a community may be appropriate. These may include when criminal activities may need to be addressed through CPTED measures or when connectivity is not necessary or desired (e.g., when an inappropriate cut-through situation would occur). These times are likely infrequent so staff suggests creating a conditional use permit process, allowing Council to consider any gating proposals. The conditional use permit process would involve all developments, not just subdivisions. Alternatives include: Outright prohibition; status quo.

Pros: Allows case-by-case consideration; allows control over gating
Cons: Additional review time for developer, staff, & Council; not prohibitive

Level III – Subdivisions have been excluded from the Level III process because they primarily involve technical development standards and result only in the creation of lots that conform to underlying zoning district requirements. Council oversight was not regarded as necessary since the lot layout is required to meet existing lot size and width, street access and design, stormwater management, utility placement, and similar standards. The areas for significant negotiation are therefore much more limited than for site plans. Additionally, it may be legally-problematic to turn unpopular subdivisions down if all the road width, utility locations, and lot sizes meet highly objective standards, creating a situation where Council's ability to act is more limited than what the public expects. Public input occurs at Technical Review Committee (TRC) meetings. Staff estimates that Council would see five or fewer such subdivisions in a typical calendar year. Alternative: Status quo.

Pros: Allows case-by-case consideration; allows control over subdivision details
Cons: Additional review time for developer, staff, & Council; Council involvement in what is primarily a technical decision-making procedure; public expectations may not match Council's ability to manage subdivision design.

Other pending amendments related to subdivisions (and other developments) that may be of interest to Council will be brought forward separately. These include:

- **Open space requirements** – Scheduled for March 7 Planning & Zoning Commission meeting
- **Steep slopes and ridgetops** – Scheduled for March 7 Planning & Zoning Commission meeting
- **Retaining walls** – Scheduled for March 7 Planning & Zoning Commission meeting
- **Infill development incentives** – To be developed (will include regulatory incentives for cluster developments, green infrastructure, etc. using a "menu" system)
- **Level III incentives**

City staff recommends City Council provide direction regarding Council expectations for changes to the subdivision ordinance.

At the request of Councilwoman Cape, it was the consensus of Council to ask the Planning & Zoning Commission to re-evaluate the standard in the minor subdivision regulations regarding 1,500 feet or 1/4 mile between these kind of developments.

It was the consensus of Council to ask the Planning & Zoning Commission review the subdivision requirements for potential changes and make a recommendation to City Council.

Mr. Shuford said that in the absence of no recommendation (1) regarding gated communities, staff will put the more restrictive language in the draft ordinance (a prohibition of gated communities); and (2) a requirement that large subdivisions be a Level III review. These will be reviewed by the Planning & Zoning Commission and then brought to City Council for consideration.

Councilwoman Cape moved to establish standards for allowing gated communities through a conditional use permit process. This motion was seconded by Councilman Freeborn and Councilman Newman.

Mayor Bellamy didn't support the gated community concept in that they divide our community.

Councilman Freeborn withdrew his second of the motion made by Councilwoman Cape.

Councilman Newman felt this will send the development community a message to not count on getting a high-end gated community approved.

The motion made by Councilwoman Cape and seconded by Councilman Newman failed on a 3-3 vote, with Councilwoman Cape, Councilman Davis and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Freeborn and Councilman Mumpower voting "no."

Councilwoman Cape moved to disallow gated communities. This motion was seconded by Councilman Freeborn and carried on a 4-2 vote, with Councilman Davis and Councilman Mumpower voting "no." Mr. Shuford said that this language will be put into the draft ordinance that will be reviewed by the Planning & Zoning Commission.

C. ANNEXATION POLICY DISCUSSION

Planning & Development Director Scott Shuford said that City staff is requesting direction from Council concerning the City annexation program.

Staff is preparing the 2007 annexation program and would like to receive direction from City Council prior to initiation of the first step in the process.

Asheville's ability to annex is and has been complicated by many factors, including an unwillingness to involuntarily annex throughout the 1990s, a water agreement that limited our ability to require annexation as a condition of service from 1981 to 2006, and the new Sullivan Acts imposed by our legislative delegation that also limit our ability to annex. As a consequence, Asheville likely has the most restrictive annexation rules for any City in NC. If the local act sponsored by Mr. Thomas and Mr. Goforth passes, Asheville will undoubtedly have the most restrictive statutory environment for municipal annexation in NC.

Some quick annexation history facts developed by the NC State Demographer's Office showing population growth due to annexation and natural growth of NC's 15 largest cities show:

- Charlotte annexed over 83,000 people between 1990 and 2000 and about 55,000 since 2000 – a total of 138,000 people (or almost 2 entire cities of Asheville).
- Fayetteville annexed about 60,000 people in the last 15 years.
- Raleigh has annexed ~84,000 people in the last 15 years.
- Wilmington (perhaps the city most similar to Asheville) – ~27,000 in 15 years.
- Concord – (a much smaller city – for now) - ~20,000.
- Jacksonville (also much smaller – for now) – ~38,000.
- Asheville - about 8,000 in 15 years.

Our annexation efforts since 2000 have increased the City property tax base by over $300 million. We receive additional revenue in the form of sales taxes, Powell Bill funds, and fees. These revenues have enhanced our public safety staffing, provided much-needed capital investment in annexed areas, and improved the operation of our sanitation services, among other benefits.

Our strategic planning document provided to Council last year notes the effects of our daytime population and our tourist population on our infrastructure. It notes the challenges the City has faced and continues to face in addressing key service needs. It provides a key perspective about our failure to grow and its effect on our political influence in our region: "Had the Water Agreement not existed, we would have added around 25,000 new people to our population since 1981 through voluntary annexation to receive water services; it is interesting to

think of the political implications of our City having half Buncombe County's population, rather than one third."

City staff requests Council direction to staff regarding annexation.

Councilman Mumpower said that cities have to grow and there are a lot of ways to grow. One way is to expand the borders to sustain a balance of upper, lower and middle classes. We have a large upper class and a large lower class, in terms of social economic resources, and a shrinking middle class. He is against forced annexation in principle and practice. However, you have to either reach out and get people at the borders or you have incentives, like all other cities in North Carolina have, to make coming into the city attractive, e.g., lower water rates, lower sewer rates, fair tax rates, etc. Asheville has the worst of both worlds and that is not fair to the people who live in Asheville and who have to absorb the double tax rate. Our legislators should treat Asheville like all other cities in North Carolina and should have the same resources as other cities have to offer incentives for people to come in and get away from forced annexation.

Mayor Bellamy asked staff to look at creating incentives that we can use, e.g., the success of Biltmore Park came as a result of the City working with the developer on the front end on infrastructure. An agreement was worked out for voluntary annexation during the different phases.

Councilman Freeborn asked staff to do a better job in promoting voluntary annexation at the beginning of an application being received in the ETJ area.

Councilman Mumpower suggested that Council make a policy decision against forced annexation with the consideration that our state legislators provide us with incentive tools to facilitate voluntary annexation. Forced annexation is the default position for the City of Asheville and no Council Member likes it, takes pleasure in it, or enjoys it but there are no other alternatives.

Councilman Mumpower suggested a resolution be sent to our legislators stating that unless they give us the incentive tools to facilitate voluntary annexation, Asheville has no choice but to force annexation. Councilman Davis asked that language also be included in the resolution requesting a meeting with the legislators and the mayors of the municipalities in Buncombe County about what the future plans are for municipalities.

Councilman Mumpower was curious how the equation would change if the City had all the tools to create tax fairness when people come into the City. Mr. Shuford explained why he didn't think the equation would change that much in terms of relative difference between the City taxes and the taxes they pay in the County. He would have to get more information on that.

Councilman Mumpower asked what the other cities in the country do to make their voluntary annexations work. Mr. Shuford said that if they get the development at the stage where it's starting, they offer zoning incentives, the water and sewer services, potential economic development incentives, and possible tax incentives. It is very difficult to get a subdivision already in existence to voluntarily annex.

Mayor Bellamy was agreeable with the resolution to the legislators with a timeframe. The language could be if you don't want us to do forced annexation, then in this legislative session give us the tools that we need to facilitate voluntary annexations.

Councilman Newman supported asking our legislators to give Asheville the tools other cities have. The single biggest step that could be taken would be to allow Asheville to be able to work directly with the developers who are building on the edge of the City to come into the City

and not put the families who move into the subdivisions later through this unpleasant process. But, with that said, it would be wrong for Asheville to take the only tool they have left, which is the State law that authorizes cities to look at new developments at their borders that do meet specific criteria, and throw that tool out of the toolbox. He felt we should look for ways to create incentives for voluntarily annex and also proceed with using the basic State law tool. The basic principle is that as areas urbanize they should be included in the municipal boundaries. He wanted Council to ask staff to look at areas they believe meet the statutory requirements for annexation and proceed with bringing that information to Council.

In response to Councilman Davis, Mr. Shuford explained the how areas are determined if they meet the criteria for annexation and the annexation process. Staff is prepared to begin that process at Council's direction. He agreed with Councilman Newman in that Council needs to very seriously consider removing that one tool with regard to expanding our borders. There are a variety of other things that could be suggested to the legislature that may be more palatable to them, e.g., perhaps changing the qualifications for what constitutes an urban area. But, in exchange for having a higher standard before you could bring in areas involuntarily, perhaps there should be a counter to that, which is if there are lawsuits filed that are not successful, then the taxes become retroactive.

Councilwoman Cape explained how property taxes also give the community their share of sales taxes and Powell Bill funds (road fees). Her main concern is growth and how we keep expanding. We have developers who build right outside of our City and then sell proximity without the price which is unfair to the people who live in Asheville. State law says that cities are supposed to incorporate the urban areas into the city.

Councilman Freeborn moved to call our legislators tomorrow and ask them in this session to provide us those tools that other cities have to encourage to encourage voluntary annexation and if they do not act upon it in this legislative cycle that we pursue the most aggressive annexation policy going forward. This motion died for lack of a second.

Councilman Mumpower moved to submit a resolution to our legislative representatives requesting that they give fair consideration to supporting the creation of incentive resources for the City of Asheville to duplicate the model provided by other cities in North Carolina and in consideration of their actions that we initiate a moratorium on forced annexation until the end of the current legislative year. This motion died for lack of a second.

Councilman Newman moved to ask our legislators to allow Asheville to have the tools to work directly with developers in voluntary annexations in the same manner and using the same infrastructure and regulatory tools other cities have. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilman Mumpower voting "no".

Councilwoman Cape explained how we not only need the tools moving forward, but we need the tools retroactive as well because it's not fair to the new people coming in (using the new tools) when we have others at our borders that we could have been annexed, but were not.

Councilman Davis agreed with Councilwoman Cape that it is a land use planning tool that we need in the future, but it will leave gaps in our city boundaries. We don't want to lose our only annexation tool that we have now.

Councilman Newman moved to notify the City Manager that Council believes that the state's basic principle that urbanized area that meet objective criteria for urbanization should be included in the municipal boundaries is a sound principle and Council wants to proceed with considering areas that staff considers high priorities for incorporation. This motion was seconded by Councilwoman Cape.

The following individuals spoke against forced annexation and some urged Council to let the citizens who are potentially being annexed to vote on the issue to be annexed or not:

Mr. Jerry Jensen, Biltmore Lake resident
Mr. Don Yelton, property owner in Asheville
Mr. Mike Thompson, Biltmore Lake resident
Dr. Mark Stultzo
Mr. Philip Murphy, Biltmore Lake resident
Mr. Ed Panek, Biltmore Lake resident
Ms. Leslee Kulba

Ms. Patti Beaver, representing the Council of Independent Business Owners, said that since City Council currently has an annexation process, she was surprised with Council's action requiring the voluntary annexation of the North View at Biltmore Lake be part of the development process.

The motion made by Councilman Newman and seconded by Councilwoman Cape carried on a 4-2 vote, with Councilman Freeborn and Councilman Mumpower voting "no."

Mayor Bellamy was taken aback how people characterized Asheville and described the wonderful acknowledgments Asheville has received and the many improvements that have taken place over the past year. She was dedicated to making Asheville a better place to live, work and play.

VII. OTHER BUSINESS:

Councilman Freeborn urged the community to contribute to Vance Elementary School for a 5th grade field trip out of Buncombe County.

The following claims were received by the City of Asheville during the period of January 27 - February 22, 2007: McDonalds (Sanitation), Kerlee Johnson (Transit Services), Serena Hirst (Police), Alexsis Giese (Streets), Henry S. Anderson (Water) and David Nard (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Consolidation

Ms. Carol Keleher, Biltmore Lake resident, presented City Council with information on consolidation, which she feels is the solution to forced annexation.

Upon inquiry of Councilman Mumpower, Mayor Bellamy said that the issue of consolidation was brought up at the City Council retreat. City Council will receive an update by staff and will have the opportunity to discuss it.

13 Detroit Avenue

Mr. Steve Arpin, resident at 13 Detroit Avenue, urged City Council to extend the March 1, 2007, deadline from Building Safety Department to reduce the number of people living in his house, who are not related by blood or marriage, to five. He said that he is researching group ownership. He would like City Council to review the laws, e.g., people not living in outbuilding. He urged Council to contact the state legislators to request the State law regulating the number of people allowed to live in a home, who are not related by blood or marriage, be changed from five.

Mr. Brendon Gallagher, Mr. Paul Feather and Ms. Terra Curry all spoke in support of Mr. Arpin's sustainable community and environmental awareness at 13 Detroit Avenue.

After a short discussion and after hearing Planning & Development Director Scott Shuford's explanation of the violations and City Manager Jackson's report, Mayor Bellamy asked the City Manager to meet with Mr. Arpin personally to discuss the matter. She noted that Asheville has worked very hard as a community to develop the Minimum Housing Code and if we make some allowances and not look at the bigger picture, we may not be doing the best thing for our community as a whole.

It was the consensus of City Council to extend the enforcement by the Building Safety Department for two weeks, noting that we may not be able to grant waivers to the State Building Code, but anything under City's control, we will extend for two weeks.

IX. ADJOURNMENT:

Due to the hour at which the agenda was concluded, there was no continuation of the closed session and Mayor Bellamy adjourned the meeting at 12:04 a.m.

Kesha Lyse
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – March 13, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Various Girl Scouts from different troops led City Council in the Pledge of Allegiance, as this was National Girl Scout Week.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

A. UNC-ASHEVILLE WOMEN'S BASKETBALL TEAM

Mayor Bellamy was pleased to recognize the UNC-Asheville's Women's Basketball Team and Head Coach Betsy Blose, with her assistants, as winners of the Big South Conference.

B. PROCLAMATION PROCLAIMING MARCH 17, 2007, AS "NATIONAL QUILTING DAY"

Mayor Bellamy read the proclamation proclaiming March 17, 2007, as "National Quilting Day" in the City of Asheville. She presented the proclamation to Ms. Ellen Levin, President of the Asheville Quilting Guild, who briefed City Council on some activities taking place during the day.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Item "M" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON FEBRUARY 27, 2007

B. RESOLUTION NO. 07-63 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A NON-MATCHING GRANT FROM THE NC DEPT. OF CRIME CONTROL AND PUBLIC SAFETY FOR THE PURCHASE OF PORTABLE EMERGENCY RADIOS FOR THE ASHEVILLE FIRE DEPARTMENT

Summary: The consideration of a resolution authorizing the City Manager to accept a non-matching grant from the N.C. Dept. of Crime Control and Public Safety for the purchase of portable emergency radios for Asheville Fie and Rescue and the associated budget amendment, in the amount of $29,607, to receive grant money.

The City of Asheville Fire and Rescue Department was awarded $29,607 from the Fiscal Year 2006 State Homeland Security Grant Program for 800MHz emergency communication

equipment. This grant is provided for through funding available for interoperable communications and will be used for the procurement of six (6) portable radios to be used by Asheville firefighters. This radio equipment will be used every day by Asheville firefighters on emergencies occurring in Asheville. Were it not for the grant award, the department would need to provide the emergency radio equipment through general fund dollars. Asheville was awarded this non-matching grant funding because we are a North Carolina Voice Interoperability Plan for Emergency Responders (VIPER) participating partner municipality. The VIPER program is working with municipalities across the state to increase interoperable emergency communications between North Carolina cities and counties.

PROS:

- The State Homeland Security Grant Program is funding 100% ($29,607) of the costs of the radios, with no city match.
- Increased firefighter safety through the use of modern equipment that represents newer digital technology.
- The radios will replace obsolete equipment no longer supported for service or parts.
- The radios will provide equipment used on a daily basis on Asheville's 800MHz radio system.
- The radios are compatible with the state-wide communications system known as VIPER.
- The radios will allow personnel to communicate directly with mutual aid departments and with fire and other public safety agencies across the state if needed.
- Asheville Fire Rescue will be able to work more effectively with a variety of public safety agencies from across the state (in addition to other fire departments).

CON:

- None identified at this time.

City staff recommends City Council approve a resolution authorizing the City Manager to accept a non-matching grant from the North Carolina Department of Crime Control and Public Safety for the purchase of portable emergency radios for Asheville Fire and Rescue and the associated budget amendment, in the amount of $29,607, to receive grant money.

RESOLUTION BOOK NO. 30 – PAGE 282

C. ORDINANCE NO. 3447 - BUDGET AMENDMENT TO RECEIVE NC DEPT. OF CRIME CONTROL AND PUBLIC SAFETY GRANT FOR THE PURCHASE OF PORTABLE EMERGENCY RADIOS FOR THE ASHEVILLE FIRE DEPARTMENT

Summary: See Consent Agenda Item "B" above.

ORDINANCE BOOK NO. 23 - PAGE 273

D. RESOLUTION NO. 07-64 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT A NON-MATCHING GRANT FROM THE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY DIVISION OF EMERGENCY MANAGEMENT FOR THE PURCHASE OF EQUIPMENT TO BE USED BY HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6

Summary: The consideration of a resolution authorizing the City Manager to accept a non-matching grant from the N.C. Dept. of Crime Control and Public Safety Division of Emergency Manager for the purchase of equipment to be used by Hazardous Materials Regional Response Team 6 and the associated budget amendment, in the amount of $192,858, to receive grant money.

The U.S. Department of Homeland Security and the Office of Domestic Preparedness has made funds available through the State Homeland Security Grant Number: FY2006-GE-T6-0010 to implement the State Homeland Security Strategy. The strategy identifies the NC Hazardous Materials Regional Response Teams (RRTs) as an integral component of North Carolina's preparation and response to manmade and natural emergencies and disasters.

There are seven Regional Response Teams (RRTs) strategically located throughout the state. Asheville Fire and Rescue hosts one of the seven state funded teams - RRT 6. The team responds to hazardous materials incidents in the 20 westernmost counties of North Carolina.

Each of the seven RRTs will receive an equal amount of non-matching funding and each will procure comparable equipment. The equipment consists of updated detection and monitoring instruments, personal protective equipment, self contained breathing apparatus and mitigation materials required to lessen the affects of terrorist's attacks and hazardous materials incidents.

The grant is non-matching and all equipment provided through this grant will become the property of the City of Asheville.

PROS:

- The Department of Crime Control and Public Safety, Division of Emergency Management, will provide $192,858 in non-matching funds for the purpose of upgrading Asheville and Western North Carolina's terrorism response capabilities.
- The equipment is state of the art and will address the risk of terrorist's attacks and hazardous materials incidents.
- All statewide regional response teams will be comparably equipped and interoperability will be realized should an event require the resources of additional teams.
- This equipment is immediately available to Asheville residents and businesses. This level of equipment would most likely not be able to be obtained through the city's general budget process.
- Firefighter and citizen safety will be enhanced.

CONS:

- The City of Asheville will be responsible for maintenance and upkeep of the equipment.

City staff recommends that City Council approve a resolution authorizing the City Manager to accept a non-matching grant from the North Carolina Department of Crime Control and Public Safety Division of Emergency Manager for the purchase of equipment to be used by Hazardous Materials Regional Response Team 6 and the associated budget amendment, in the amount of $192,858, to receive grant money.

RESOLUTION BOOK NO. 30 – PAGE 283

E. ORDINANCE NO. 3448 - BUDGET AMENDMENT TO RECEIVE N.C. DEPT. OF CRIME CONTROL AND PUBLIC SAFETY DIVISION EMERGENCY MANAGEMENT GRANT FOR PURCHASE OF EQUIPMENT TO BE USED BY HAZARDOUS MATERIALS REGIONAL RESPONSE TEAM 6

Summary: See Consent Agenda Item "D" above.

ORDINANCE BOOK NO. 23 - PAGE 275

F. RESOLUTION NO. 07-65 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SUB-RECIPIENT AND SUB-ALLOCATION AGREEMENT WITH HENDERSON COUNTY FOR FEDERAL TRANSIT FUNDS

Summary: The consideration of a resolution authorizing the City Manager to execute a Sub-Recipient and Sub-Allocation Agreement with Henderson County for federal transit funds.

The Federal Transit Administration (FTA) encourages federal transit funding through a regional approach. Following the 2000 U.S. Decennial Census, showing the County of Buncombe with a population over 200,000, FTA designated Asheville as an Urbanized Area for regional funding (AUZA). Currently, there are only two transit systems within the AUZA authorized to apply for federal transit program funds, Asheville Transit and Henderson County Transit. The City of Asheville is the Designated Recipient for the AUZA and the only entity within the AUZA eligible for direct federal transit funding. As a part of the regional approach, FTA discourages having more than one Designated Recipient per region. In order for a transit system such as Henderson County to continue to receive federal transit funding under the regional approach, application to FTA must be made through the Designated Recipient. FTA further requires that the Designated Recipient enter into sub-recipient/sub-allocation agreements with those transit systems within the AUZA not otherwise eligible to make direct application to FTA for transit funding, to include Henderson County.

The purpose of the Sub-Recipient Agreement is to assure FTA that the Designated Recipient and the Sub-Recipient are aware of the conditions of federal transit funding and agree to such conditions, such as providing public notice, engaging in competitive bidding, providing assurances and certifications of non-collusion and lobbying, etc. The purpose of the Sub-Allocation Agreement is to provide for a fair and rational distribution of regional federal transit funding through a formula, (i.e. population, population density and system performance characteristics), which must be approved as being a fair and rational distribution by the AUZA's Planning Organization, which is the French Broad River Metropolitan Planning Organization. Henderson County has signed both Agreements.

This conforms with the City Development 2025 Plan in Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region.

This action conforms to the Strategic Operating Plan in Strategic Plan Section on Planning, Goal 2: Objective B, by creating a partnership between ATS and Henderson County and to mitigate congestion and improve air quality.

Pro: Region conforms to federal requirements and enjoys continued transit connection between Henderson County and Asheville.

Cons: None.

City staff recommends adoption of a resolution authorizing the City Manager to execute a Sub-Recipient and Sub-Allocation Agreement with Henderson County for federal transit funds.

RESOLUTION BOOK NO. 30 - PAGE 234

G. RESOLUTION NO. 07-66- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH HENDERSON COUNTY TO LEASE TWO 20-PASSENGER BUSES

Summary: The consideration of a Resolution authorizing the City Manager to sign a Lease Agreement with Henderson County for two 2006 City Transit Buses.

The Asheville Transit System recently took delivery of five new buses, two of which are the smaller 20 passenger buses. The transit system however, has grown more rapidly than anticipated, thereby dispensing with any further need for the two smaller 20 passenger buses. Due to the rapid transit growth and the receipt of the new buses, the City has four more buses

than authorized by federal rules. Federal rules base the number of allowable buses on the peak service routes. Consequently, four buses must be disposed of or reallocated regionally. Henderson County is a three route transit system and in dire need of two new buses. With federal and state funding, the City paid a little over $13,000 for the two smaller 2006 buses, which buses were delivered on May 25, 2006. Although federal rules will permit Henderson County to purchase the City's surplus 2 smaller buses, Henderson County does not have sufficient capital funds for such a purchase. Federal rules frown upon the City leasing the buses to Henderson County, a member of the UZA, for any amount in excess of the depreciated value of the buses. The depreciated value of the two smaller transit buses over a five year period is approximately $6,000 per bus for a total of $12,000. At the end of five years, maximum depreciation is realized. Staff recommends leasing the two smaller surplus transit buses to Henderson County for five years, receiving the entire depreciated value of $12,000 for the first year and thereafter, for the four remaining years at $1.00 per year. What happens to the buses at the end of the five year lease will become part of the Lease Agreement.

This action conforms with the City Development 2025 Plan in Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region.

This action conforms to the Strategic Operating Plan in the Strategic Plan Section on Planning, Goal 2, Objective A, Creating a Multi-modal Transportation System, leveraging outside funding sources; and Objective B, by creating a partnership between ATS and Henderson County and to mitigate congestion and improve air quality.

Pro: Increased mobility for Asheville residents by placing additional seats in the active fleet.

Cons: None.

City staff recommends adoption of the resolution authorizing the City Manager to enter into an Agreement for the lease by Henderson County of two surplus City of Asheville Transit Buses.

RESOLUTION BOOK NO. 30 - PAGE 215

H. RESOLUTION NO. 07-67 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ACCEPT GRANT FUNDS FROM THE TARGET CORPORATION TO ASSIST THE ASHEVILLE POLICE DEPARTMENT IN THE PURCHASE OF HANDHELD RADIO EAR PIECES

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds, in the amount of $1,000, from the Target Corporation to assist the Asheville Police Department in the purchase of handheld radio ear pieces and associated budget amendment to receive grant money.

The Asheville Police Department has been awarded $1,000 from the Target Corporation for the purchase of radio ear pieces for police officer's handheld radios. There is no match involved in this grant.

This action conforms to the Asheville City Council's Goals and Vision in the Priority Area of Critical Services and Infrastructure by improving and enhancing basic city services.

Pro:

- Provide officers with handheld radio ear pieces so that they can conduct their patrol business in a safer and more effective manner.

Con: None noted.

City staff recommends City Council approve a resolution authorizing the City Manager to accept grant funds, in the amount of $1,000, from the Target Corporation to assist the Asheville Police Department in the purchase of handheld radio ear pieces and associated budget amendment to receive grant money.

RESOLUTION BOOK NO. 30 - PAGE 286

I. ORDINANCE NO. 3449 - BUDGET AMENDMENT TO RECEIVE GRANT FUNDS FROM THE TARGET CORPORATION TO ASSIST THE ASHEVILLE POLICE DEPARTMENT IN THE PURCHASE OF HANDHELD RADIO EAR PIECES

Summary: See Consent Agenda Item "H" above.

ORDINANCE BOOK NO. 23 - PAGE 277

J. RESOLUTION NO. 07-68 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO INSTALL EMERGENCY SIGNAL CONTROLS BETWEEN FIRE STATION 11 AND THE INTERSECTION OF BREVARD ROAD AND ROCKY RIDGE ROAD

Summary: The consideration of a resolution authorizing the City Manager to enter into an agreement with the N.C. Dept. of Transportation (NCDOT) to install emergency signal controls between Fire Station 11 and the intersection of Brevard Road and Rocky Ridge Road.

The City of Asheville Fire and Rescue Department will be operating Fire Station 11 in July, 2007. Traffic signals located adjacent to fire stations are equipped with emergency signal control to better enable emergency equipment to safely travel through signaled intersections. This request is the format required by NCDOT. The work will total $4,000.00.

PROS:

- The signal control will aid Asheville Fire and Rescue in navigating the intersection of Brevard Road and Rocky Ridge Road on emergency responses.
- The signal control system has the concurrence by the city's traffic engineer.
- Funding for this project has already been approved in the city's budget.

CONS:

- None identified at this time.

City staff recommends City Council approve a resolution authorizing the City Manager to enter into an agreement with the NCDOT to install emergency signal controls between Fire Station 11 and the intersection of Brevard Road and Rocky Ridge Road.

RESOLUTION BOOK NO. 30 - PAGE 287

K. ORDINANCE NO. 3450 - BUDGET AMENDMENT FOR THE ACQUISITION OF A DRIVEWAY EASEMENT TO PROVIDE ACCESS TO A SIGNALIZED INTERSECTION FOR CITY-OWNED PROPERTY ON AIRPORT ROAD

Summary: The consideration of a budget ordinance amendment, in the amount of $250,000, for the acquisition of a driveway easement to provide access to a signaled intersection for City owned property on Airport Road.

This budget amendment authorizes funding for the purchase of a driveway easement over property owned by Hankins Properties LLC adjoining City owned property at 550 Airport Road. The purpose of the easement is to provide a connection between the City's property and Rockwood Road in order to allow ingress and egress from the City's property to Airport Road via the signaled intersection of Airport Road and Rockwood Road. The objectives would be to address a safety issue; to enhance the value of the City's property for sale; and to facilitate future development on the site. Acquisition of the easement was approved by City Council in closed session on February 20, 2007. The purchase price of the easement is $250,000. This amendment is to formally appropriate the funding for the project. Staff recommends that $250,000 be appropriated from the City's fund balance for this project.

City staff recommends City Council approve the budget ordinance amendment, in the amount of 250,000, for the acquisition of a driveway easement to provide access to a signaled intersection for City owned property on Airport Road.

ORDINANCE BOOK NO. 23 - PAGE 279

L. RESOLUTION NO. 07-69- RESOLUTION APPROVING LOCAL ALCOHOLIC BEVERAGE CONTROL BOARD PROPOSAL TO USE PROCEEDS FROM REAL PROPERTY SALES FOR CAPITAL PROJECT

Summary: The consideration of a resolution approving Local ABC board proposal to use proceeds from real property sales for capital projects

At Council's February 13, 2007, meeting Local ABC Board Chair Charles Worley gave a report to Council on the Local ABC board's activities and its capital improvements plans.

At the close of the presentation, Mr. Worley was asked what action might be needed from the City to help with the Board's plans. Mr. Worley responded that the Board would like to use the proceeds from the sale of two of its properties (Biltmore and Tunnel Road) for acquisition and construction of new facilities and expansion of existing facilities. Ordinarily, the proceeds from the sale of ABC properties would be treated as program income, with certain percentages earmarked for certain purposes. Mr. Worley indicated that, with Council approval, all of the proceeds could be used for the planned capital improvements, and he was requesting such approval.

Pro: Allows for quicker completion of needed capital improvements.

Con: Slight decrease in percentage of revenue available for other ABC purposes.

If Council approves of the ABC Board's request, as communicated in the report by Mr. Worley, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 30 - PAGE 288

M. RESOLUTION APPROVING AN UNDERWRITING TEAM AND GRANTING APPROVAL TO FILE A WATER SYSTEM REVENUE BOND APPLICATION WITH THE LOCAL GOVERNMENT COMMISSION

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Freeborn and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

RESOLUTION NO. 07-70 - RESOLUTION APPROVING AN UNDERWRITING TEAM AND GRANTING APPROVAL TO FILE A WATER SYSTEM REVENUE BOND APPLICATION WITH THE LOCAL GOVERNMENT COMMISSION

Summary: The consideration of a resolution approving an underwriting team and granting approval to file a water revenue bond application with the Local Government Commission.

On January 9, 2007, City Council gave staff direction to pursue a $35 million water revenue bond issue to improve the City's water system. In order to officially begin the process for a water revenue bond issue, City Council must adopt a resolution giving staff approval to apply to the Local Government Commission (LGC).

Specifically, the resolution provides for the issuance of $35,000,000 in bonds to finance the cost of the water system projects plus an additional $5,000,000 amount to 1) pay capitalized interest during construction of the projects, 2) fund a reserve fund for the Bonds if necessary, 3) pay for the cost of bond insurance if necessary and 4) pay underwriter's discount and other cost of issuing the bonds.

The resolution also appoints bond counsel, underwriter's, underwriter's counsel and the trustee and escrow agent for the Bonds; directs the Chief Financial Officer to file an application with the LGC for approval of issue of the bonds; and acknowledges that the City Council has determined that the issuance of bonds to improve the water system is necessary and expedient.

City staff recommends City Council approve a resolution approving an underwriting team and granting approval to file a water revenue bond application with the Local Government Commission.

Councilman Mumpower personally didn't feel we should be borrowing money until our legal challenges regarding the Sullivan Act are resolved.

Chief Financial Officer Ben Durant responded to Councilman Davis regarding the $5,000,000 amount.

In response to Mayor Bellamy, Mr. Durant said that the debt follows the ownership of the water system.

Councilman Davis moved to approve Resolution No. 07-70. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 289

III. PRESENTATIONS & REPORTS:

A. PROPOSAL FOR CREATING BEAUCATCHER OVERLOOK PARK

Ms. Maggie Clancy, Project Manager with the Trust for Public Land (TPL), said that the TPL conserves land for people to enjoy as parks, gardens, and other natural places, ensuring

living communities for generations to come. Since 1972, the TPL has completed more than 3,300 projects; conserved more than 2.2 million acres, from wilderness areas to city parks; and helped generate more than $109 Billion of state and local conservation funding.

The TPL helps public agencies and communities to create a vision for conservation, raise funds for conservation, and complete complex conservation real estate transactions. She gave examples of TPL in North Carolina. TPL's partnership in parks in Asheville include: Beaver Lake Audubon Sanctuary, Reed Creek Greenway, Greenways Master Plan, Jake Rusher Park, and Beaucatcher Overlook Park. Working with communities across America, TPL believes that connecting people to land is key to create livable communities and a healthy environment.

Mr. Scott Riviere, volunteer co-chair for fundraising for acquiring the Greenberg property, explained the vision of Beaucatcher Overlook Park. Creating an overlook park is an idea that has been talked about for years in Asheville. The availability of the Greenberg tract, 30 acres of woodland covering the slope of Beaucatcher Mountain, is serving as a catalyst to revive the Overlook Park vision. The tract, behind McCormick Field, is a green backdrop to the City. The view of the wooded slope is visible from nearly everywhere in downtown Asheville. The need for action is urgent. The landowner has generously offered to sell the wooded mountainside tract for a park. However, the landowner has set firm and relatively quick timeline for action. The option of the property now held by the TPL expires on March 31, 2007. If the land is not quickly acquired, it will be developed with high-end housing. This is our last chance to protect a sizable green space in the City of Asheville.

The site is perfectly situated to be the centerpiece of a new vision for the area around McCormick Field and Beaucatcher Mountain. The Greenberg tract is surrounded by another 30 acres of City-owned land, including the baseball field, Memorial Stadium, and about 10 acres of vacant land behind them. The City is considering buying McCormick Heights public housing project, and redeveloping this as affordable housing. The Greenberg tract is right below White Fawn Reservoir, which is also owned by the City. The Parks & Recreation Master Plan proposed a "Sister Cities Park" to be located on the site of the reservoir, and that site can be easily connected to the Greenberg tract. The Greenways Master Plan shows a connector greenway extending from downtown through the Greenberg tract and up to the Beaucatcher Mountain ridgeline, and extending all the way to the I-240 cut.

The purchasing of the Greenberg tract will establish a natural park, within walking distance of downtown Asheville, the surrounding neighborhoods of the White Fawn, East End, and Kenilworth and Mission Hospital, and on a city bus line. It is easily accessible to the residents of Buncombe County and visitors to Asheville. It will become an oasis of green in Asheville, offering opportunities for walking, bicycling, picnicking, and quiet experience of nature. The park will add to the offerings of arts and entertainment, dining, shopping, and the unique Asheville culture that attracts people from all over the world.

The establishment of the Park will take place in three phases: acquiring the Greenberg tract; further planning of the Park's proposed amenities; and the development of the Park and surrounding areas.

Regarding acquiring the Greenberg tract, Councilwoman Cape and community members contact the TPL to help acquire the Greenberg tract when they heard that the landowner wanted to develop the land.

Ms. Clancy said that the tract is now under option to TPL, but that option expires March 31, 2007. The landowner will give us time to work out the financial details; however, we need the commitment of the City, county and private donors to complete the acquisition and place the tract in public hands.

The cost of the property is $2.6 Million. The fair market value, established by an independent appraisal, is just above $2.6 Million. If developed for single-family homes under the current City guidelines, the value increases to about $7 Million in today's market.

Given the short timeline of the option, we put together a funding plan that shares the financial responsibility among five partners: TPL (Jake Rusher Bequest) - $375,000 (available); State of North Carolina (Parks & Recreation Trust Fund) - $500,000 (apply January 2008); private donors - $575,000 (by March 31, 2007); City of Asheville - $575,000 (by March 31, 2007); and Buncombe County - $575,000 (by March 31, 2007).

After we receive financial commitments from the private donors, the City and the County, TPL will acquire the tract from the landowner. TPL will then transfer the deed to the public agency that will hold it, and enter into a 3-year lease/purchase agreement with the public agencies. The cost to the City would be dependent on the terms of the lease/purchase (how much is paid down, the interest rate, etc.).

Regarding the private and public commitments, we are actively raising funds from the community. We are confident that we will meet the goal of $575,000 by March 31, and we will not stop fundraising when we reach the interim goal. Also, we are exploring funding sources for the planning and development phases of the Park.

We have received endorsements for the Overlook Park vision and acquiring the Greenberg tract from the City's Parks & Recreation Advisory Board, the Greenway Commission, the Parks & Greenway Foundation, and Quality Forward.

The City and the Buncombe County commitments are necessary to make this Park a reality. We are presenting the Overlook Park to the Buncombe County Commissioners on March 20, 2007, and will be asking the County to commit to their share.

We are now asking the City for three actions: (1) authorize the purchase of the Greenberg tract; (2) commit funds for the City's contribution to the purchase price; and (3) work with TPL and Buncombe County on the details on the lease/purchase agreement.

Councilwoman Cape highlighted that this request came so close to the time with the option will expire because of the difficulty of getting the items on the agenda due to the fullness of the schedule. Mayor Bellamy reminded Council of the process of getting items on the agenda, and asked City Clerk Lipe to provide all Council members with this year's request.

Vice-Mayor Jones was pleased that the private donation portion has been met. She thanked Councilwoman Cape, for her work with this project, and the many other people who have contributed their time and energy into this project.

Councilman Mumpower asked that City staff also provide Council with information about the development and maintenance of the property as well.

It was the consensus of Council to bring this matter back to Council next week in order to give staff the opportunity to look at requested actions.

B. LIVING WAGE DISCUSSION

Mr. Isaac Coleman presented the Asheville/Buncombe Living Wage Campaign's Living Wage Proposal for the City of Asheville. Using a chart, he showed the share of the national income from 1975 to 2005.

The big picture is (1) if 1968's minimum wage was adjusted for inflation, it would be over $9.00 today; (2) real wages of non-management employees in the United States are 10% below their level in the early 1970's; and (3) since the early 1990s, over 140 cities and counties have passed a Living Wage Ordinance.

A Living Wage is based on information about what it costs to afford basic necessities in a particular geographic area. Local Living Wage policies and programs can begin to address the dramatic erosion of wage value for low-income workers over the last 30 years.

A Living Wage ordinance will (1) require the City of Asheville to pay City employees a Living Wage; and (2) prevent the future erosion of this wage value by committing to annual cost-of-living increases. It is also recommended that the payment of a Living Wage be considered in the City's contract bidding process.

A Living Wage will not (1) change the minimum wage in Asheville; (2) require private businesses to increase wages as participation will be voluntary; (3) eradicate poverty in Asheville; and (4) change Asheville's present budget.

A representative of the Affordable Housing Coalition said that living wages in Asheville will also (1) increase self-sufficiency for low-income workers; (2) promote the dignity of work; (3) allow workers to live in the communities they serve; (4) provide employers with useful information about adequate wage compensation in Asheville; and (5) strengthen businesses.

Asheville's living wage is $10.86 per hour without health insurance and $9.50 per hour with health insurance. These figures are based on what it costs for an individual to live in Asheville.

These figures were arrived at by (1) when an individual or family pays more than 30% of income in housing, it becomes difficult to meet other basic needs; (2) fair market rent for a one-bedroom apartment in the Asheville Metropolitan Statistical Area for 2007 is $543 a month; (3) an individual would have to earn at least $1,810 a month, or $21,720 a year, to afford a one-bedroom apartment in the City of Asheville; (4) dividing $21,720 by 2000 hours of work in a year, an individual working full-time would need to make $10.86 an hour; and (5) the $9.50 health care wage level simply acknowledges the high cost of this benefit for employers.

Mr. Mark Siler, one of the coordinators of the Asheville/Buncombe Living Wage Campaign, said that the real impact of an Asheville Living Wage will come as Asheville businesses take steps toward paying a Living Wage. We estimate that 25% of the jobs in Buncombe County doe not pay this Living Wage. Many of these jobs are concentrated in Asheville's tourist economy (retail/sales, cashiers, food preparers/servers, hospitality).

The Campaign's next steps are to (1) create a Living Wage Business Certification Program (a) encourage business participation; and (b) educate consumers and increase revenue for Living Wage businesses; and (2) explore the possibility of creating tax incentives for Living Wage businesses.

Mayor Bellamy said that staff has requested Council continue this matter until April in order to give them time to do due diligence on this matter.

Councilman Mumpower said that since there has been this advocacy presentation on this, he wondered if Council would have access to the information from the dramatic other side, or should Council pursue that on their own. He felt this is a highly socialistic initiative and for Council to not have some exposure to the potential damaging side of this equation would be in error. Mayor Bellamy responded that staff will list the pros and cons and provide Council with the raw data. It will be up to Council to interpret that data. In addition, City Manager Jackson said that staff will provide Council with the pros and cons drawn from other communities in order to

provide factual information to Council. Staff will be prepared to speak on the action steps requested.

Councilman Mumpower said that he didn't care if staff, or an opposing group, makes the opposition presentation, but if neither of them do, then he would take it upon himself to undertake that initiative. Mayor Bellamy said that if staff does not hear from an organized opposition prior to two weeks of the scheduled presentation on this issue in April, City Clerk Lipe will contact Councilman Mumpower in order for him to make that presentation.

The following items were additional information requests when this matter is brought back to Council: additional information on the contract bidding process; would the City still contract with those companies who do not pay a living wage; what is the Chamber of Commerce's and other businesses and business organizations' position on this issue; benchmark information from other cities who have living wage ordinances; and data of how this would affect our contract relationships.

Mayor Bellamy asked that if City Council has any other informational requests they would like for staff to research on this issue, please send them to City Manager Jackson by March 20, 2007, in order to allow staff a reasonable time within which to gather input.

It was the consensus of Council to continue this discussion until April in order to give staff time to do due diligence on this matter.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 47 RUTHERFORD ROAD FROM COMMUNITY BUSINESS II DISTRICT TO LIGHT INDUSTRIAL DISTRICT/CONDITIONAL ZONING IN ORDER TO ESTABLISH A CONFORMING OFFICE/WAREHOUSE USE WITH OUTDOOR STORAGE

Urban Planner Blake Esselstyn said that a letter has been received from Mr. Gerald Green, representing David Sweatt, owner of SigNet Real Estate, LLC, requesting this public hearing be continued to April 17, 2007, in order to allow them more time to meet with the Planning Department staff to address issues identified in the staff report, which they received Friday, March 9, 2007. Therefore, Councilman Mumpower moved to continue this public hearing until April 17, 2007. This motion was seconded by Councilman Davis and carried unanimously.

Councilwoman Cape requested additional information on when the property was zoned as part of the extension of the extraterritorial jurisdiction area.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO REVISIONS TO THE ADJUSTMENTS TO ENFORCEMENT PROCEDURES

At City staff's request, Councilman Mumpower moved to continue this public hearing until April 10, 2007. This motion was seconded by Vice-Mayor Jones and carried unanimously.

V. UNFINISHED BUSINESS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR NORTH VIEW AT BILTMORE LAKE PHASE II ON ENKA LAKE ROAD FOR 257 RESIDENTIAL MULTI-FAMILY UNITS

ORDINANCE NO. 3451 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR NORTH VIEW AT BILTMORE LAKE PHASE II ON ENKA LAKE ROAD FOR 257 RESIDENTIAL MULTI-FAMILY UNITS

Mayor Bellamy said that this public hearing was held on February 27, 2007, and continued to allow time for staff to address one concern, being whether annexation could be induced as a condition of zoning.

City Attorney Oast said that he researched the issue and it was his opinion that it would be inappropriate to require voluntary annexation as a condition of a conditional use permit, at least in this circumstance.

Councilman Newman moved to grant a conditional use permit for the proposed Master Plan for North View at Biltmore Lake Phase II on Enka Lake Road for 257 residential multi-family units on 33 acres (noting that the request is reasonable based on information provided in the staff report), subject to the conditions recommended by City staff and the following standard conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans and substantially agree with the plan presented to City Council; (4) The developer shall provide an urban level of public safety service for the development; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (6) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 23 - PAGE 281

B. RACE TRACK DISCUSSION

Councilman Davis said that this issue came up at City Council's retreat and three Council Members were interested in looking at the potential development of a race track at the Asheville Airport property that is in the floodplain. Since then, there has been a lot of community interest in this issue. They have asked staff to do a little work on that issue.

He said that staff has reviewed property at the Asheville Regional Airport. Almost the entire parcel is within the regulated floodway, which is the more restrictive of the flood zones. For development to occur in the floodway, the following steps would need to occur:

1. A *No Impact Study* is required. For this type of development, it may be difficult to achieve *No Impact Status,* meaning that the development would not trigger a change in the base flood elevation.
2. If change occurs due to development, that would trigger the requirements of a Letter of Map Revision process (LOMR). The LOMR work would be sent to the state's Floodplain Management branch for review and approval. Approximate turnaround time: Four months. Approximate cost: $30,000.

He said that staff feels that since the land availability for development is significant, it may be easier to design a project to mitigate any loss of potential storage volumes due to added fill and structures (i.e. excavation in some areas). In looking at the mapping, the floodplain is very wide and there is very little elevation change, so staff interprets the depth of flooding to be shallow, thus making this approach more plausible.

As Councilman Freeborn is Chairman of the Asheville Regional Airport Authority (Authority), he has met with him and the Airport Director to discuss this issue further. Even though the Authority is not committed at this point, there is an interest in them looking at this issue further. The process would be that if there is an interest from Council that we would look at the strategic goals we want to accomplish, e.g., an economic benefit. We would then work with the Airport Authority to develop a Request for Qualifications (RFQ) to send to potential developers to see if there is an actual interest in developing and operating a race track at the land at the Airport. He noted that A-B Technical Community College is in the process of looking to develop a training track for their basic law enforcement training and for EMT uses. If the decision is made to move forward on this project, they have an interest in partnering with us. There is a positive economic development aspect of racing as well since there is a great deal of industry revolving around the racing community. He asked for Council's support for the City to explore this issue further of whether or not the site can be used for a race track. He thinks we owe it to the community to look at both sides of this issue, making sure this is something that would be a good neighbor and something that can be successful in this community. He feels it will provide entertainment, an economic benefit, and the opportunity for law enforcement training.

Councilman Freeborn said that he has talked with the Mayors of Mills River and Fletcher and Chairman Moyer of Henderson County to let them know Council would be discussing this issue and to inform them what is being requested. We are only asking for Council to approve staff time to develop an RFQ process. If Council agrees to that, we would want to include the surrounding municipalities in that process so that all concerns expressed are addressed in the RFQ. The area municipalities seemed supportive of that process.

Councilman Newman said that Council is not looking at this as something we would be financially supporting, but if it is something that could financially support itself and have some economic benefits, that would be his prerequisite for it happening. His main concern is the question of noise. If the proposal is looking at a process of an RFQ for people who might be interest in building a facility like this, he personally would like to have more information on the noise issue before we invite developers to spend a lot of time and money. If the facility is not a nuisance to people and is financially self-sustaining, then it would be a good facility. He would not, however, be supportive it if degrades the quality of life. It is his understanding that there is the ability to use different technology and design to help mitigate noise and he would like to see that information.

Councilman Davis said that he has talked to several people in the racing community about noise. Noise is a serious question. He has been assured that there are tracks that are working throughout the country that do a good job with noise restrictions. Racing is not a totally quiet sport, but this area has an existing fairly loud noise level and feels that noise will be below the level of what is happening there now. In the RFQ process we would outline the concerns and what we would like to see in that area (other amenities to this recreational area, e.g., walking trail).

There was a short discussion of how this blends into Council's short and long term goals in their overall Strategic Operating Plan, which was agreed upon by all of Council. Mayor Bellamy's preference would be that we look at this when we review the Plan because we need to look at this issue in the context of all Council has asked staff to do. She asked that we not direct staff to do the due diligence right now, but to let them work on what we want to accomplish this year in our short and long term goals, noting that there are 52 items on the short term list.

Councilman Davis said that he would be happy to use his own time to assemble some of this information and make it available to staff. He was looking for endorsement by Council to move forward, noting that he, Councilman Freeborn, Councilman Mumpower and Councilman Newman supported moving forward.

Mayor Bellamy suggested the process of where the community gathers the information and provides a presentation to Council, in order to give staff a starting place to move it forward.

Councilman Davis said that they already have a good committee of people assembled that have a stake in racing, along with letters from the surrounding municipalities of their concerns and communications from the neighbors in the area. He feels they are beginning to get a base of inf mation to present to Council, with a small amount of staff effort. He also updated Council on the commemorative memorial at the old Asheville Speedway.

Vice-Mayor Jones said that she was not interested in investing significant City dollars in a racetrack. She wondered if the Airport Authority would be willing to share or cover the costs of a feasibility study.

In response to Councilman Newman, City Attorney Oast said that he believed that any final decision regarding a race track on this property will be contingent upon approval by City Council, Asheville Regional Airport Authority and the Federal Aviation Administration (FAA).

Councilman Freeborn feels that although the FAA in the past has taken a negative stance towards usage of this property for anything other than aviation, he feels confident that we could get a different decision today.

When Councilman Newman asked if the Airport Authority has any degree of decision making on that property, City Attorney Oast said that he would have to review the Airport Agreement but he believed there is some degree of overlapping approval required by the City Council and the FAA.

In response to Councilman Newman, Councilman Freeborn said that the Airport Authority's position is that they are supportive of looking at this, as long as it doesn't cost them any money. In terms of developing an RFQ process, their preference would be to have the City take the lead on the process leading up and through an RFQ and then the Authority would take over when it gets into the Request for Proposals process.

Councilwoman Cape suggested that as this is brought forward that a little historic prospective of racing to this area be presented.

The majority of Council supported moving the process forward via a community presentation before Council.

At 5:53 p.m., Mayor Bellamy announced a short recess.

C. DOWNTOWN SOCIAL ISSUES TASK FORCE - REVISITED RECOMMENDATIONS

Urban Planner Stephanie Monson said that this is the consideration by City Council of approval on two items from the revisited recommendations by the Downtown Social Issues Task Force and policy direction on five other recommendations.

At the request of City Council, the Asheville Downtown Commission recently reviewed the Downtown Social Issues Task Force's (original) recommendations and staff's responses to those recommendations. The Downtown Commission convened a subcommittee of Task Force members and asked them to make appropriate changes by taking into account any new conditions and by paying particular attention to supplying City Council with a wider range of options.

In summary regarding panhandling, the Commission requests Council consider execution of an encroachment agreement with the Asheville Downtown Association (ADA) to assist with the implementation of the Spare Change for Real Change Program. City staff also recommends City Council execute the encroachment agreement.

In summary regarding graffiti, the Commission requests Council consider drafting a 48-hour graffiti removal ordinance and/or 48-hour graffiti removal program pilot. Based on copious evidence as outlined by the original and revised Downtown Social Issues Task Force that prompt removal is the only proven method of abating graffiti, as well as a determination by staff that such an ordinance/program is feasible, staff recommends City Council direct staff to draft both a 48-hour graffiti removal ordinance and a 48-hour graffiti removal program to enforce said program. Part of the recommendation suggests that City Council consider adding a line item in the budget to help fund graffiti removal. There are suggested alternatives regarding the 48-hour removal program/ordinance noted in the "Revisited Recommendations" below.

Staff also recommends that City Council consider providing staff with their level of interest regarding implementation of the following items:

- Increased City of Asheville participation in Housing First portion of Ten Year Plan to End Homelessness
- Adding a line item in the next budget for the Asheville Mural Project's public art element.
- Adding more specific language to the current panhandling ordinance
- Support of City of Asheville solicitation of healthcare providers, law enforcement, and judicial system to create a facility modeled on The Healing Place
- Further exploration on the feasibility of establishing a City nuisance court
- Further exploration on the feasibility of Alcohol Impact Zones (Inebriate Safety Zones) and/or alternatives.

Ms. Kitty Love, member of the Downtown Commission, and Mr. Dwight Buckner, President of the ADA, briefly reviewed the result of the Downtown Commission's review:

(Information in plain type is the original recommendations and the revisited recommendations are stated in italics.)

Original Preamble:

The following represent the recommendations of the various subcommittees of the Downtown Social Issues Task Force. This task force was created by City Council in 2002 and was made up of downtown business owners and residents, city staff, representatives of the medical and mental health professions, various public and private social welfare and service agencies, homeless individuals and advocates, and representatives from the police department and justice system. Task force subcommittees focused on particular problem areas worked from early 2003 to late summer 2004 researching both the local situation and solutions that have worked effectively in other communities. Draft recommendations on the issues of homelessness, public drunkenness, graffiti, and panhandling were then presented to representative groups of homeless individuals, social welfare workers, and downtown residents and property owners for review and comment. These final recommendations are the product of hundreds of hours of research and meetings put in by the members of the various subcommittees.
These recommendations are supported by the research documentation gathered by the subcommittees including descriptions of programs and ordinances from other cities, research on efficacy, and supporting statistics. The recommendations were intended to work together to discourage unacceptable behavior, while at the same time offering constructive opportunities for people to both help themselves and receive appropriate community support. The group was aware that many government initiatives over the last 50 years have failed to have their intended effect because initiatives conceived of as two-part efforts were only half done, i.e. in the 60's and 70's mental hospital beds were greatly reduced but the planned level of supportive community services were never created; public drunkenness was decriminalized in the 70's but the intended opportunities for treatment were never fully enacted. Many of these half-done initiatives have resulted in cities and their downtowns bearing the brunt of community-wide problems. The goal was to be fair and balanced.

The final recommendations were presented to Council with that supporting information in late summer 2004. City Council asked City Staff to evaluate the recommendations and report back to Council. The result of the staff's work is described in a memorandum from the City Planning Director dated 1/12/07. City Council has asked the Downtown Commission to revisit the recommendations and revise as appropriate for any changes or new conditions, with a particular emphasis on providing Council with a wider range of and/or more varied options. The Downtown commission requested updates or further recommendations from representatives of the Task Force. Those updated recommendations follow.

Summary of Recommendations from the Conditions Committee on Homelessness

Throughout 2003, the conditions committee of the Downtown Social Issues Task Force has engaged in conversation to develop strategies that address the conditions of homelessness that impact behavior problems in the downtown area. As our conversations evolved, it became clear that simply implementing one or two innovative strategies or programs could not "solve" the conditions of homelessness. The conditions of homelessness and the coinciding behaviors are problems that are entwined with bigger, systematic issues. Therefore, the Downtown Social Issues Taskforce (DTSITF) recommends:

1. The City of Asheville and the County of Buncombe develop a Ten Year Plan to End Homelessness that includes initial priority on the chronic homeless population, the sup-population most visibly present in the downtown area.
2. Leadership roles and positions within the steering committee be defined and;
3. Funds for staff time be allocated so that the plan can be carried out and written in a timely manner.

This was unchanged because the recommendations were followed and a Ten Year Plan to End Homelessness was created with cooperation from the County and appropriate social service agencies.

Original Graffiti Recommendations

1. Graffiti removal pilot program.

We recommend that the City of Asheville, Quality Forward, Downtown Association, private property owners, business owners, and community volunteers cooperate in removing graffiti within 48 hours of it being reported to a graffiti hotline maintained by Quality Forward. A group of trained volunteers will remove the graffiti.

We recommend that the City of Asheville, Quality Forward, Downtown Association, private property owners, business owners, and community volunteers cooperate in removing graffiti within 48 hours of it being reported to a graffiti hotline maintained by the City of Asheville. (Originally Quality Forward offered to do this but 2 ½ years have passed and momentum for this private sector solution has dissipated during the 2 ½ years of inaction.) At this time, Quality Forward is still willing to help facilitate a volunteer program or help with outside contractors. A group of volunteers could be trained to remove the graffiti. Alternatively, we suggest the city take responsibility to assist property/business owners by putting a line item in its annual budget to fund graffiti removal, via private contractor.
Reasoning: Whereas in other cities, property owners who allow graffiti to remain on their buildings receive stiff penalties, we propose a cooperative rather than punitive approach in order to relieve the burden of sole responsibility from the property owner.

2. 48-hour graffiti removal

We recommend that the City pass an ordinance that requires building owners to either remove all graffiti themselves within 48 ours of its being reported or to grant permission for their property to be cleaned by volunteers. Violations will incur a penalty of $25 per day.

We recommend that the City pass an ordinance that requires building owners to either: 1) remove all graffiti themselves within 48 hours of its being reported or 2) to grant permission for their property to be cleaned by others (either a volunteer staff or city staff or a city contractor). Violations will incur a penalty of $25 per day.
Reasoning: While no one wants to "punish the victim," our research indicated graffiti in a community has an adverse effect on issues of safety, tourism and economic development. Further, our extensive research indicates that insuring removal of graffiti within 48 hours is the single most effective way to abate graffiti. It may be complicated or difficult to insure removal within that time period, but if a community is serious about graffiti abatement, fast removal is key. It is a requirement that property owners remove ice from sidewalks, for example, and that they provide facilities for the handicapped, so certainly there is precedent for holding property/ business owners responsible for the well-being of citizens. In every city researched that successfully abated graffiti property owners were held responsible for removing graffiti from their property with fines for non-compliance or the city did the work and in most cases billed the property owner.

3. We recommend that the City initiate education in the schools, modeled on Keep America Beautiful's "Graffiti Hurts" program. In addition, we recommend that the City create a web page describing Asheville's graffiti abatement program with a hot link to Quality Forward's website describing their role in the program.

Unchanged

4. We recommend a program of public art murals to foster development of neighborhood

ownership and pride, specifically supporting the Asheville Mural Project.

Unchanged

5. Legal Graffiti Wall

Not originally a part of the committee's recommendation, a legal wall was added to the committee's recommendations to Council following public input sessions. Upon further discussion, we recommend:

The City consider as part of a larger graffiti abatement program a legally sanctioned graffiti wall on private property.
Requirements:
1. *Such a wall would be located on private property with, of course, property owner's permission.*
2. *The Task force agrees to review proposals from those wishing to offer their space as a legal site in order to address issues that may arise such as cleanliness, maintenance, and safety.*

Reasoning: While research shows inconclusive results as to the effectiveness of legal walls as an abatement measure, there is some evidence that indicates that legal walls can provide an alternative outlet for habitual offenders. It is possible as well that the presence of a legal site can lessen the negative perceptions which fuel politically inspired graffiti.

Additional Options:
Our recommendations are above. IF City Council is strongly opposed or unwilling to follow the recommendations, it could consider some of the following:
1. *A city sponsored public relations campaign along the lines of "Keep America Beautiful" or "Don't be a Litterbug" emphasizing "Beat Graffiti - Remove it within 48 hours", with the City setting that as its policy for city-owned property and encouraging all other property owners to follow the City's lead, with fines kicking in after 7(?) or 10(?) days.*
2. *Perhaps the clean-up could be pricritized so that less stringent standards and time limits applied to graffiti not visible from a public thoroughfare.*
3. *Perhaps less stringent standards and time limits could be applied to graffiti which is particularly difficult to remove because the graffiti is inaccessible or involved some permanent alteration of the substrate (like acid etching of windows). If this course is followed there should also be more stringent criminal penalties for graffiti vandals responsible for such damage as well as a reward program for information leading to their arrest and conviction.*

A request for a City liaison (department director if possible) for the graffiti abatement program.

Original Recommendations of the Panhandling Subcommittee

1. Through the Asheville Downtown Association, work to redirect money from panhandling to the local service providers.

   (a) Implement a public relations campaign that encourages downtown visitors to not give money to panhandlers and instead give money to local organizations that are working with the homeless population and working to end homelessness. The campaign would include posters in businesses' windows, articles in the papers, and radio spots. In addition, a flyer detailing available local services would encourage visitors to not give to panhandlers, but to these local service providers. There have been numerous of these campaigns in other cities, one example being called "Real Change, Not Spare Change"

(b) Place several "lock boxes" on the street in downtown to accept donations for homeless organizations in conjunction with the PR campaign. In addition, place donation boxes at participating businesses, making it convenient for folks to donate.

2. Educate District Court judges about the different kinds of panhandling happening in downtown and ask that harsher sentences be enacted for those committing fraud.

The original recommendation is unchanged because the recommendations were sound but the following elaboration on the lock-box program is provided:

Asheville Downtown Association "Spare Change for Real Change" Donation Box Proposal

The installation of donation boxes in key locations throughout downtown is seen as a key transition point in the overall implementation of the Downtown Social Issues Taskforce recommendations addressing social issues in downtown Asheville. In many ways, the panhandling program is the first transition point where the taskforces proposals addressing "conditions" which lead to various social issues integrate into programs, which attempt to control the negative behavioral consequences of poverty, homelessness, drug and alcohol abuse, and graffiti. The Taskforce was clear that we not only needed to address the conditions which lead to negative social behavior but we also have to address the behaviors themselves. The following proposal addresses the logistics involved in installing and maintaining the donation boxes. The Asheville Downtown Association has approved funding for the design and manufacture of the donation boxes. The box is constructed of quarter inch plate steel welded and assembled to look like a small home. The box will be secured with a heavy-duty padlock protected against damage. Each box will have a durable, easily replaceable sign identifying the box as a location to make donations. We originally proposed four boxes installed in key locations downtown. The four locations we originally requested were, one on Pack Square, one on Biltmore Ave., one in Pritchard Park and one in front of the Civic Center. The ADA has subsequently revised its request to add an additional location on North Lexington Ave at the corner of Walnut and North Lexington Ave for a total of five locations. The ADA believes that those key locations are the places to start. We will, of course, with your permission, gauge the effectiveness and coverage area and be ready to expand our locations as needed. As the program takes hold, the ADA also hopes to include donation centers in businesses throughout downtown on a volunteer basis. The Asheville Public Works Department has offered help with the installation and the ADA would like to request that the City provide the poles that we need to install the boxes on. We anticipate using a pole identical to the ones currently being used to mount the parking meters downtown.

The ADA is establishing precincts throughout downtown to facilitate the distribution of information to the downtown community. We anticipate that precinct captains will be responsible for the collection and maintenance of any collection boxes in their assigned area. We are providing samples of the signage on the boxes as well as the paint we anticipate using. The ADA anticipates some backlash to this program based on the level of graffiti that exists downtown as well as a somewhat natural resistance on the part of those panhandling to the existence of competition for the funds normally given to panhandlers. The design of the boxes and the signage anticipates just such activities. We anticipate that funds will be collected no less than on a weekly basis and any vandalism should be addressed within forty-eight hours by the precinct captains responsible. Once the funds are collected, the ADA plans to administer the distribution of those funds to the social welfare community through the Asheville Downtown Association Foundation, a 501-c-3 non-profit that we have established. The ADA plans to solicit matching funds from various businesses in the community on a tax-exempt basis in order to leverage the donations for a more significant impact on the conditions faced by the poor in our community. This will be the Foundations first project on behalf of the Association and we are inviting people from all areas of the community to make suggestions on the make up of our Foundation board. The Asheville Downtown Association has a one million dollar liability policy in place with the City of Asheville identified as a co-insured to offset liability concerns. Lastly, the ADA is making improvements to our public relations campaign based on our experiences so far. We expect to distribute our new poster in association with the installation of the collection boxes. We are updating our "Real Help" brochure to make it more current and we have designed a business card size handout to more easily direct panhandlers to the "Real Help" available. We hope that everyone in city government will procure brochures and/or business cards to distribute as they are approached during their daily activities downtown. The more participation we have the more effective the program will be.

Original Recommendations of the Public Drunkenness Subcommittee

The recommendations were intended to provide a unified and effective program to ameliorate the dangerous, expensive, and ineffective non-program currently represented by the "revolving door" approach to chronic public drunkenness problems. They were intended to be put into practice on parallel tracks so that the enforcement aspects of the recommendations act primarily as reinforcement for the recovery opportunities provided:

The original recommendations are largely unchanged because the Task Force felt that it was critically important that the punitive/enforcement recommendations and the treatment recommendations work together as a mutually reinforcing complementary solution. Changes are in italics.

1. Recommend that the City of Asheville petition the authority with control over existing ABC local tax collections to dedicate locally collected funds to improved detox and rehabilitation programs or, in the alternative, *if insufficient funds are available from ABC tax collections or elsewhere*, seek legislation from the state giving authority to pass a local ordinance with a ½% sales tax on beer and wine with the funds earmarked for detox and rehabilitation, or, in the alternative. *(The order was changed making ABC collections the preferred funding source.)*

2. Recommend that the City of Asheville seek legislation from the state providing Asheville City Police with regular ABC enforcement powers to allow them to deal directly with problems at or related to specific local drinking establishments such as underage drinking, fighting, public urination, and regularly serving inebriated individuals.

3. Recommend that the City of Asheville establish a Housing First program providing housing for our most difficult, chronic, and expensive to manage alcohol-dependent homeless. *(This approach is being partially implemented in partnership with MHO but additional implementation will be necessary and our understanding is that the current*

program does not deal with the most chronic cases, which was a critical feature of the Housing First program as originally described to the Task Force).

4. Recommend that the City of Asheville, in concert with the County, establish a detox/recovery center similar to the Healing Place in Raleigh or the jail-based public inebriate program in Roanoke, VA. *(It is our understanding that Neil Dobbins Center will open a Crisis Stabilization Facility (detox facility) this summer (2007) and a Community Intervention Team (CIT) with representatives from the criminal court system, police, and sheriff's office are being trained in dealing with mental health emergencies, presumably including substance abuse. In addition City staff has recommended the Healing Place model be pursued.)*

5. Recommend that the City of Asheville seek legislation from the state, which would allow the city to recognize certain Alcohol Impact Areas (similar to what's been done in Seattle and Washington State). These areas would be selected because they have consistent problems with some individuals presenting themselves in an extremely inebriated condition and thereby create significant danger for themselves and for innocent third parties because of heavy traffic and the reduced sight lines caused by many parked cars along the streets. The special restrictions for these areas would be: 1) city government would have authority to outlaw the sale of large (40 oz) beer containers and fortified wines within the Alcohol Impact Area, and 2) individuals with more than 10 convictions over any twelve month period would be prohibited from entering the Area in which they had been repeatedly arrested for one year. *(Council could reduce the number of convictions to a smaller number if this provision were viewed as too lenient or increase the number if it were viewed as too harsh.) (City staff has recommended against this proposal although no research or case law was provided to contradict the materials relied on and provided by the Task Force in making its original recommendation. Enforcement difficulties have been cited even though downtown police officers were consulted in making the original recommendation and no new information has been provided to the effect that the City Police oppose this recommendation.)*

6. Recommend that the City of Asheville pass an ordinance against possession or use of alcoholic beverages, whether open or closed, on city property or in city parks without permission from the City Parks and Recreation Director or the City Public Works Director.

7. Recommend that the City of Asheville pass an ordinance allowing the City to cancel the privilege licenses of establishments, which have, create, or attract repeated and chronic criminal activity in their immediate vicinity. Closure would be based an objective standard such as twenty (20) separate incidents of arrests which resulted in convictions of patrons of the establishment over a 12 month period.

8. Recommend that the City Council issue a proclamation to the District Attorney's office requesting that they inform the district court judges of the seriousness of the problems and dangers to themselves and others created by chronically inebriated individuals and that the District Attorney's office seek and recommend the longest available jail sentences for repeat offenders in an effort to reinforce individual responsibility in such repeat offenders, to improve and reinforce the effectiveness of our local police, and to encourage said offenders to take advantage of recovery opportunities created by the community. *(The DTC was informed that this has been done, with additional information that the City was considering instituting a "nuisance" court.)*

Ms. Susan Griffin, Chair of the Downtown Asheville Residential Neighbors, supported (1) the ADA's Spare Change for Real Change program; (2) establishment of facilities, such as the Healing Place; (3) the formation of a Nuisance Court in Asheville; (4) the graffiti removal pilot program; (5) creating a graffiti wall; and (6) greater police presence in downtown.

Rev. Christopher Chiaronmonte spoke to Council about homelessness in Asheville and spoke in opposition of the Spare Change for Real Change program.

Rev. Amy Cantrell asked the City to deepen their commitment of the Housing First model, to drop laws against panhandling, and to channel those funds for policing this ordinance into housing and justice initiatives.

Council then thoroughly discussed each recommendation by the DTSITF (and others) resulting in the following directions:

1. Committee on Homelessness

   A Ten Year Plan to End Homelessness was adopted and we are addressing this issue through Community Development Block Grant funds.

2. Graffiti Removal Pilot Program - Recommendation that the City of Asheville, Quality Forward, Downtown Association, private property owners, business owners, and community volunteers cooperate in removing graffiti within 48 hours of it being reported to a graffiti hotline maintained by the City of Asheville.

   48-Hour Graffiti Removal - Recommendation that the City pass an ordinance that requires building owners to either: 1) remove all graffiti themselves within 48 hours of its being reported or 2) to grant permission for their property to be cleaned by others (either a volunteer staff or city staff or a city contractor). Violations will incur a penalty of $25 per day.

   After each individual Council Member expressed their views, it was the consensus of Council to remand this issue back to City staff to further research the following, with a report back to Council in June, or sooner: re-visit those cities who have enacted this legislation and see how those regulations are holding up, if the 48-hours makes a difference, if the legislation is still in place, and if they still feel the program is successful; provide best practices data; provide information on the cost and liability to the City; request the Downtown Commission and the ADA to do a survey of how many property owners would sign an agreement of intent to have the graffiti removed within 48-hours or as soon as possible; number of graffiti artists, specifically in the downtown district; and can we put graffiti in our crime stoppers program.

   Mayor Bellamy said that if, by the end of March, Council has any other questions regarding graffiti that they would like addressed by staff to refer those questions to City Manager Jackson.

3. Panhandling Subcommittee

A. Through the ADA, work to redirect money from panhandling to the local service providers.

(1) Implement a public relations campaign that encourages downtown visitors to not give money to panhandlers and instead give money to local organizations that are working with the homeless population and working to end homelessness.

After discussion, it was the consensus of City Council to support the implementation of a public relations campaign.

(2) Place several "lock boxes" on the streets in downtown to accept donations for homeless organizations in conjunction with the PR campaign. In addition, place donation boxes at participating businesses, making it convenient for folks to donate.

After each individual Council Member expressed their views, it was the consensus of Council to support placing several "lock boxes" on the streets in downtown.

Mr. Buckner said that 100% of what is collected from the lock boxes is committed to be distributed to our local social service agencies.

At the request of Mayor Bellamy, Mr. Buckner said that in the Downtown Commission's annual report to City Council that information will be included each year about how much is collected from the lock boxes and given to the social service agencies.

Mr. Buckner agreed with Mayor Bellamy when she requested the "lock boxes" design be mandatory review and compliance with the Downtown Commission.

B. Educate District Court judges about the different kinds of panhandling happening in downtown and ask that harsher sentences be enacted for those committing fraud.

After a brief discussion, it was the consensus of City Council to refer this to the Public Safety Committee to look at other alternatives to harsher sentences.

4. Public Drunkenness Subcommittee

A. Recommend that the City of Asheville petition the authority with control over existing ABC local tax collections to dedicate locally collected funds to improved detox and rehabilitation programs or, in the alternative, if insufficient funds are available from ABC tax collections or elsewhere, seek legislation from the state giving authority to pass a local ordinance with a ½% sales tax on beer and wine with the funds earmarked for detox and rehabilitation, or, in the alternative.

As a first step, the majority of Council instructed Councilman Mumpower, as liaison to the ABC Board, to talk to the ABC Board regarding this request and report back to Council.

After said report, at this time, it was the majority of Council's desire to request City Attorney Oast to draft a resolution requesting the ABC Board dedicate some of their ABC local tax collections to improve detox and rehabilitation programs.

B. Recommend that the City of Asheville seek legislation from the state providing Asheville City Police with regular ABC enforcement powers to allow them to deal directly with problems at or related to specific local drinking establishments such as underage drinking, fighting, public urination, and regularly serving inebriated individuals.

It was the consensus of Council to instruct the City Attorney to provide Council with a memo on what powers the City has regarding providing the Asheville Police Department with regular ABC enforcement powers.

C. Recommend that the City of Asheville establish a Housing First Program providing housing for our most difficult, chronic, and expensive to manage alcohol-dependent homeless.

The Housing First Program has already been enacted.

Councilman Newman updated City Council on the program to date.

D. Recommend that the City of Asheville, in concert with the County, establish a detox/recovery center similar to the Healing Place in Raleigh or the jail-based public inebriate program in Roanoke, VA. *(It is our understanding that Neil Dobbins Center will open a Crisis Stabilization Facility (detox facility) this summer (2007) and a Community Intervention Team (CIT) with representatives from the criminal court system, police, and sheriff's office are being trained in dealing with mental health emergencies, presumably including substance abuse. In addition City staff has recommended the Healing Place model be pursued.)*

This recommendation is moving forward.

Councilman Mumpower said that a Drug Commission subcommittee will be making a presentation to the entire Drug Commission about a comprehensive initiative that speaks directly to this recommendation. Mayor Bellamy asked that Councilman Mumpower advise Council Members of the date and time of this presentation.

E. Recommend that the City of Asheville seek legislation from the state, which would allow the city to recognize certain Alcohol Impact Areas (similar to what's been done in Seattle and Washington State). These areas would be selected because they have consistent problems with some individuals presenting themselves in an extremely inebriated condition and thereby create significant danger for themselves and for innocent third parties because of heavy traffic and the reduced sight lines caused by many parked cars along the streets. The special restrictions for these areas would be: 1) city government would have authority to outlaw the sale of large (40 oz) beer containers and fortified wines within the Alcohol Impact Area, and 2) individuals with more than 10 convictions over any twelve month period would be prohibited from entering the Area in which they had been repeatedly arrested for one year.

It was the consensus of City Council to refer this to the Public Safety Committee.

F. Recommend that the City of Asheville pass an ordinance against possession or use of alcoholic beverages, whether open or closed, on city property or in city parks without permission from the City Parks and Recreation Director or the City Public Works Director.

It was the consensus of City Council to refer this to the Public Safety Committee.

G. Recommend that the City of Asheville pass an ordinance allowing the City to cancel the privilege licenses of establishments, which have, create, or attract repeated and chronic criminal activity in their immediate vicinity. Closure would be based an objective standard such as twenty (20) separate incidents of arrests which resulted in convictions of patrons of the establishment over a 12 month period.

It was the consensus of City Council to refer this to the Public Safety Committee.

H. Recommend that the City Council issue a proclamation to the District Attorney's office requesting that they inform the district court judges of the seriousness of the problems and dangers to themselves and others created by chronically inebriated individuals and that the District Attorney's office seek and recommend the longest available jail sentences for repeat offenders in an effort to reinforce individual responsibility in such repeat offenders, to improve and reinforce the effectiveness of our local police, and to encourage said offenders to take advantage of recovery opportunities created by the community.

It was the consensus of City Council to refer this to the Public Safety Committee.

5. Asheville Mural Project

Request for City Council to dedicate additional funds towards the implementation of the Asheville Mural Project as part of a budget amendment.

After discussion, it was the consensus of Council to refer this to the Public Art Board.

6. Current Configuration of Pritchard Park (safety, cleanliness, sleeping in the Park)

After discussion, it was the consensus of Council to ask the City Clerk prepare a letter to both Chairs of the Downtown Commission and the Recreation Board to establish an ad hoc committee with the charge of developing a public input process, including the input of the police officer who deals with SEPTA and including representatives of the homeless, regarding the configuration of Pritchard Park, including, but not limited to, the removal of the brick in the Park and replace it with wrought iron fencing.

In response to Vice-Mayor Jones, City Manager Jackson said that we should have the downtown public restrooms under contract within the next two weeks and after that it is a 90-day project.

7. Feeding in Pritchard Park. The feeding is occurring, however, people are not cleaning up afterwards.

The majority of Council instructed the City Attorney to look at what are the options available for regulating certain activities in Pritchard Park.

8. Proliferation of Newspaper Stands in Downtown

Economic Development Director Sam Powers said that City staff, along with representatives of the different media who utilize the stands, are working on a pilot project and he will provide Council with a report at their next meeting.

9. New Trash Cans and Recycling Cans in Business Districts

City Manager Jackson said that staff has developed some budget options and would bring those to Council in the budget process.

D. DISCUSSION OF SCHOOL BOARD

Because of the small pool of applicants for two seats on the Asheville School Board, City Council discussed re-opening up the application process for School Board candidates. It was the majority of Council's direction to instruct the City Clerk to extend the application deadline for 30 days.

Mayor Bellamy asked that if any Council Member had suggestions on other ways the City Clerk could recruit more applicants, to let her know as soon as possible.

VI. NEW BUSINESS:

A. RESOLUTION NO. 07-71 - RESOLUTION APPROVING A HOUSING TRUST FUND LOAN TO VOLUNTEERS OF AMERICA OF THE CAROLINAS FOR AFFORDABLE RENTAL HOUSING ON SPRINGSIDE ROAD

Ms. Adria Hardy, Community Development Analyst, said that this is the consideration of a resolution approving a $445,269 Housing Trust Fund (HTF) loan to Volunteers of America of the Carolinas for the development of 63 units of affordable senior rental housing.

Volunteers of America of the Carolinas (VOAC) plans to construct 63 one- and two-bedroom apartments for the elderly on Springside Road in South Asheville. Tenants will have incomes below 60% of area median income, qualifying the project for the most favorable HTF loan terms. The terms requested are 2% annual interest-only payments with principal deferred for 30 years.

Shelter Development received a $500,000 HTF award for this project last fall, but their national office has since decided not to pursue tax credits in North Carolina and they have withdrawn from the project. The option to purchase has been assigned to VOAC and they plan to use the same architectural plans for the development.

The total project budget is $7.9 million. VOAC has made application for Low Income Housing Tax Credits as the major source of revenue for the project. They have also applied for $171,961 in HOME funds. The local HTF and HOME investment will earn crucial additional points in the tax credit competition.

The application was reviewed by a panel consisting of staff and outside experts and it scored well overall, with particularly high scores for the quality of development and for long-term affordability. The developer has a strong financial capacity and much experience across the Carolinas developing affordable housing, with two projects successfully completed in Asheville in the past eight years.

The project is dependent on receiving tax credits and awards will not be made until July, 2007. However, if tax credits are awarded, it is very likely the development will proceed successfully. Housing Trust Funds will not be released prior to the award of tax credits.

The Housing and Community Development Committee reviewed the application on February 12, 2007, and recommended awarding a HTF loan in the amount of $445,269 at the terms requested.

Pros:

- Creation 63 units of affordable housing in Asheville

- Increase the City tax base by about $5 million
- 30 years of affordability is guaranteed through the tax credit program

Cons:

- Ties up HTF funds for several months before results of LIHTC competition are known

Staff recommends approval of a resolution approving a $445,269 Housing Trust Fund (HTF) loan to Volunteers of America of the Carolinas for the development of 63 units of affordable senior rental housing.

Ms. Hardy responded to various questions from Councilman Mumpower, some being, but are not limited to: what percentage of dollars for this project is coming from the federal, state or local government; is any money coming directly from the developer; what are the amenities this project is proposing; and how will the loan be repaid.

Councilman Mumpower said that it is hard to speak against housing for the elderly; however, he felt this is a use of taxpayer dollars to create a fairly elaborate style of living for only a very limited number of people in the community.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-71. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 291

B. RESOLUTION NO. 07-79 – RESOLUTION EXPRESSING POSITION OF ASHEVILLE CITY COUNCIL AS TO LOCAL TAXATION, TAX EQUITY, AND THE SULLIVAN ACT

Chief Financial Officer Ben Durant said that the purpose of this report is to provide general information about: 1) the General Obligation Bond Referendum process and City's current debt capacity, and 2) the Chamber of Commerce's half-cent sales tax proposal that is being considered in the State Legislature.

GO Bond Referendum History

The following chart shows the City's GO bond referendum history and results over the last 30 years:

Year	Project(s)	Amount	Vote
1981	Parking Bonds Redevelopment Bonds	Not available	No (64%) No (63%)
1986	Street & Sidewalk Bonds Education/Arts/Science Center Bonds	$17,000,000 $3,000,000	Yes (68%) Yes (62%)
1989	Water Bonds	$40,000,000	No (61%)
1999	Parks, Recreation and Greenway Bonds	$18,000,000	No (53%)

Current Debt Capacity

To help decide how much debt to issue, it is necessary to look at bond or debt ratios. Numerous ratios are available for measuring local debt burden, but the most frequently used are:

- Debt per capita
- Debt as a percentage of assessed valuation
- Annual debt service on net debt as a percentage of general fund revenues or spending.

Asheville currently has a low *debt per capita* relative to the North Carolina population peer group average. He explained that Asheville's debt per capita is approximately $315 compared to a peer group average of $630. He also explained that the average *debt to assessed valuation* for Asheville's North Carolina peer group is 0.813% compared to Asheville's ratio of approximately .035%.

In addition, he explained that the median *debt service as a percentage of revenues* for North Carolina cities & towns with a bond ratings of Aa2 (Asheville's current rating) is equal to 8.2% compared to Asheville's ratio of approximately 5.8%.

All three of the aforementioned ratios show that Asheville has good debt capacity relative to its population or bond rating peer groups.

Current Debt Retirement Schedule

Mr. Durant explained the current debt service retirement schedule for general fund supported debt and the estimated funds that will become available resulting from a cumulative decline in our existing debt service over the next several years. A chart showed that in subsequent years the City will have the potential to issue new debt without increasing our current debt service contribution over current Fiscal Year 2007 levels.

Potential Bond Schedule

He explained to showed Council a draft schedule for a general obligation bond referendum to be held in November 2007. North Carolina General Statutes set forth specific timing requirements that are reflected in the schedule. The reason that the schedule starts so early (late July) is that the City will have to give the Board of Elections enough lead time to be able to have absentee ballots available 50 days before the election.

It is important to note that before Council actions start on this schedule, the City will have to know the amounts and specific projects/purposes to be voted on. This means that between now and July, some type of process that includes community input and support building will need to take place that defines the City's capital improvement and bond referendum priorities.

It is also important to note that the statutes require that each category of items (projects) be voted on in separate questions on the ballot. For example, we can combine all street & sidewalk construction into one question and all park and recreation related projects in another question and public safety facilities in a different question, each one asking voters to approve a specific amount for that category. We cannot, on the other hand, combine streets and parks in one ballot question for an up or down vote.

The Bond Orders referred to on the schedule are essentially the ballot question. The Bond Orders determine the scope on which the City is allowed to use the money authorized by the bond referendum. The Bond Orders can be drafted as generally as possible to provide flexibility within a category of projects or they can be drafted specifically so that the GO money that is authorized can only be used for a specific purpose (or anywhere in between). Most prefer to draft the question broadly, but discuss specific projects during the process to educate voters about the referendum.

Chamber of Commerce's Half Cent Sales Tax Proposal

There is currently Chamber of Commerce interest in the North Carolina State Legislature authorizing an additional half-cent sales tax in Buncombe County. The proceeds from this additional half cent sales tax would be dedicated to funding infrastructure improvements county-wide and would be divided between the County and all of the municipalities based on population. Five-year county-wide and City of Asheville revenue estimates are provided in Table 1 below. He also said that there is an analysis from the Chamber of Commerce detailing the impact of the additional sales tax on different consumer income groups.

Table 1
Buncombe County
¼ Cent Sales Tax (including food)

Year	County-Wide	City of Asheville
FY08	$18,389,202	$6,139,716
FY09	$18,940,878	$6,323,907
FY10	$19,509,104	$6,513,625
FY11	$20,094,377	$6,709,033
FY12	$20,697,209	$6,910,304

Based on these estimates, the City would receive approximately $6.1 million in Fiscal Year 2007-08 in additional revenue that could be dedicated to capital and infrastructure improvements. This amount of funding would afford the City the opportunity to significantly enhance its capital improvement program. By way of comparison, the City's current Fiscal Year 2006-07 General Fund capital improvement program includes $3.07 million in pay-as-you-go funding; so an additional $6.1 million would allow the City to more than double its pay-as-you-go funding. Alternatively, the City could leverage all or a portion of the additional $6.1 million in sales tax revenue and issue debt to further expand the capital improvement program. Six million dollars in available debt funding would generate between $50 and $60 million in bond proceeds, depending on several factors such as the type of bonds issued, interest rates, issuance costs, etc.

The Chamber of Commerce has requested formal feedback from City Council on this half-cent sales tax proposal, as well as specific examples of the City's major infrastructure needs. Examples of infrastructure needs that should be considered by Council include the following: 1) Public Safety (police & fire substations, training facilities); 2) Sidewalks; and 3) Public/Affordable Housing Development Programs.

City staff requests City Council provide staff with further direction or requests for analysis.

Mayor Bellamy asked if Council would be open to starting the discussion about the possibility or feasibility of a bond referendum for our community to vote on some of the needs that we have.

Councilman Newman feels that we should look at each of the infrastructure areas individually because bonds might not be the most effective strategy in all areas. He spoke in favor of more public investment in sidewalks and greenways. But in those areas there are other financial strategies that he would prefer to look at first, before bonds. He and Councilman Freeborn have been encouraging the Metropolitan Planning Organization to make the decisions on where the funding we get from the state will be used. They basically decided to allocate upwards of $3 Million a year for local projects for every year between 2009 and 2015 and sidewalk and greenway projects are the kinds of projects they will be looking for. So if the City

made a commitment to fund sidewalks and greenways every year between 2009 and 2015, we might get a 3, 4, or 5-1 match on our increased investment for those things.

Councilman Freeborn felt it might be beneficial for the Parks & Recreation Foundation to make a presentation before Council to discuss what their vision is and what kind of dollar figures they would need to be able to leverage additional money.

Councilwoman Cape felt that we need to know exactly the nature and timing of whatever issue we are interested in taking to the public in a bond referendum. It's important that the people understand the exact nature of what we are asking them to pay for. She felt it's easy to lose the vote if you don't have the time to educate the people with clear and concise information. She needed more information on the relationship between the pay-as-you-go results that can be achieved or if we are going to get a bunch of money at once, how many projects can we really do.

Councilman Davis was concerned with a menu of items, without hearing a big resident cry from the community of what they want.

Councilman Mumpower opted for a pay-as-you-go approach and felt we need some real compelling reasons to incur the debt.

Vice-Mayor Jones explained why she thinks this is too short of time period for the City to be successful in a bond referendum. She is very appreciative of our MPO members to identify this money for sidewalks and greenways.

Mayor Bellamy felt that the need to re-tool public housing in order to eliminate concentrated poverty is going to require additional money. She did not think that pay-as-you-go will get it done. She would like to see the City move forward on a bond referendum for that. Even in situations where cities are able to get a HOPE 6 grant, the city also has to contribute quite a bit of money. As far as Parks & Recreation Foundation, she is open to supporting a bond referendum for them. She felt we need to start setting some parameters about the dialogue and where we are going to go, noting that the education component is very important. She will continue to put before Council the issues that need addressing and our sidewalks are a significant issue. She will continue to get information requested about timing and the relationship about pay-as-you-go. During this budget process Council will be able to see the capital improvement needs that our City is facing. She will provide Council with that data and then Council can make a determination on what or what not to do.

Councilman Freeborn supported more conversation taking place on a synthetic HOPE-6 type project; sidewalks; and parks and greenways.

Councilwoman Cape needed more specific information on the individual projects, e.g., what do they look like, what is the timeframe, etc. She was also interested in receiving information on what other kind of bond initiatives can be used for different projects.

Mayor Bellamy said that for large projects she wants to make sure that we have community support and buy-in to make that happen.

The majority of Council gave Mayor Bellamy direction to start obtaining information in order for Council to make the best decisions regarding a bond referendum.

Mr. Rick Lutovsky, President and CEO of the Asheville Chamber of Commerce, said that discussions with Council has been occurring about the proposal of implementation of 1/2 cent sales tax in anticipation of the State giving up their 1/2 cent. Four years ago the Chamber took the position in favor of the 1/2 cent sales tax if the State gave up their half, and if we received from the City and County their anticipated uses of the funds. Four years ago the City was interested in utilizing their amount (approximately $4.5 Million) on the Civic Center. Nothing has

happened with the State up until last year, when they gave up their 1/4 cent. The other 1/4 cent is supposed to be decided this year. Our intentions were to look at a funding source that would be sustainable and would allow the City and the County and other units of government to do some of the things we need to do in this community.

Mayor Bellamy explained that the City of Asheville's sales tax, the portion that we receive, is based upon our tax rate and the Chamber's proposal is based on a specific per capita. Mr. Lutovsky noted that the per capita formula that the Chamber has developed is more favorable towards the units of government within the county.

Mayor Bellamy said that the Chamber has requested formal feedback from City Council on specific examples of the City's major infrastructure needs we would consider using our funds for. Her personal projects would include re-tooling public housing, sidewalks and public safety training facilities.

Councilman Newman said that City Council has voted previously that we are opposed to a new sales tax. In talking with some other Council Members in the last few days, he heard some common ground around some ideas of possible ways to look at this. He offered two resolutions. Resolution No. 1 would be that City Council opposes a sales tax as a stand-alone policy. City Council affirms its opposition to a new local sales tax due to the deeply regressive nature of the tax. People earning between $15,000-$25,000 are required to pay three to four times more of their income for a sales tax than people in the upper 5% bracket. According to the N.C. Employment Security Commission, there are more than 27,000 jobs in the Asheville metro area that pay, on average, $10 per hour or less, meaning they make $22,000 per year or less for full-time work Placing an additional regressive tax on these 27,000 workers in our community would drive more working families into poverty. Resolution No. 2 would be that City Council supports a comprehensive tax equity agreement for our community and settlement of the Sullivan Act dispute out of court. City Council could only support an additional sales tax if a significant percentage of the new resources are directed towards programs that directly reduce poverty and support low-wage, working families and if it is tied to an overall tax equity agreement. Asheville would support a new sales tax only under the following conditions: (1) grocery sales are removed from the sales tax, making it somewhat less regressive. This reduces the revenue projections by about 30%; (2) the per capita formula is used for distribution of revenues; (3) at least 30-40% of the sales tax revenues must be earmarked for programs and services that directly support low-wages workers and poverty reduction efforts, such as affordable housing, child care for working families, transit services, or other programs to boost wages for low income workers. From a fairness standpoint, a regressive tax can only be justified if a larger percentage of the resource directly benefit low income families; (4) Asheville is allowed to use a 1% hotel occupancy fee (either from an increase or the existing revenues) for renovation of the Asheville Civic Center. If the working poor are being asked to pay more, so should the wealthy tourists who visit Asheville; and (5) the Sullivan Act litigation is settled out of court: (a) Asheville agrees to no differential water rates; (b) Asheville agrees to no diversion of water funds to other purposes; (c) the County pays Asheville $4-$5 Million annually in tax equity. This could be a direct payment for specific projects/programs; and (d) Asheville has the authority to annex new developments proposed within one-half to one mile of the City limits in order to receive water services, as all other cities can do.

Councilwoman Cape felt this is another attempt on our part to try to work with the County. She was specifically interested, should we make this arrangement with the County and move forward, that we look for specific ways to do bonding around housing, transportation and look for creative ways at how we can really alleviate the financial burden to the people we are asking to pay more.

Councilman Mumpower said that not everyone agrees that a sales tax is a regressive tax, but a consumption tax is one of the fairest taxes. He wondered why we are considering any tax increase since he has heard nothing from this Council about supporting a tax increase. He hears

no compelling need, but just wants. Before he would consider any tax increase, he thinks there should be an effort to look hard at where we can cut costs and show some kind of restraint to the people that are paying the taxes.

Vice-Mayor Jones explained that sales tax makes people with less pay a larger proportion of what money they have.

Vice-Mayor Jones moved to adopt Councilman Newman's Resolution No. 1 above stating that City Council opposes a sales tax as a stand-alone policy. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

Mayor Bellamy asked that Council break the complex issues down in Resolution No. 2 and deal with them one by one. City Attorney Oast said that Council will need a motion to divide a complex issue.

Councilman Newman moved to adopt his Resolution No. 2 above stating that City Council supports a comprehensive tax equity agreement for our community and settlement of the Sullivan Act dispute out of court. This motion was seconded by Councilwoman Cape.

Mayor Bellamy asked Councilman Newman why he was not agreeable to dividing the motion so that individual Council Members could support an individual condition. Councilman Newman responded that the argument for keeping the issue together, since we weren't supportive of the sales tax, is that that we are providing some positive outcomes to counteract the negative implications, so that there is enough positive stuff in the package that we can tolerate the tax.

Councilwoman Cape's understanding is that Resolution No. 2 says that we would like to go to the table with the County Commissioners and our State legislators and say this is were we are starting from as a body.

Mayor Bellamy said that when have large issues in previous discussions, especially when we are dealing with issues of other bodies, because of the importance, we have gone through and allowed people to have some say so. This is either all or nothing. This impacts not only this Council but future Councils. So if you don't support a little bit of it, you are basically muted at the table when we talk about issues with the County.

Councilman Freeborn moved to divide this complex issue. Said motion died for a lack of a second.

Councilwoman Cape asked City Attorney Oast if we adopt Resolution No. 2, in conjunction with the Sullivan Act litigation, does it give us the opportunity in closed session to talk about our negotiating position on these items as they are linked to the litigation of the Sullivan Acts. City Attorney Oast felt it was possible to receive legal advice with respect to our position on the Sullivan Acts litigation in closed session. We have talked about all these matters with the County openly and assume Council is willing to continue to do so.

At the suggestion of Mayor Bellamy, Councilman Newman supported amending No. 4 in Resolution 2 to read: "(4) Asheville is allowed to use a 1% hotel occupancy fee (either from an increase or the existing revenues) for renovation of the Asheville Civic Center and/or other public venues, e.g., the performing arts center."

At the suggestion of Mayor Bellamy, Councilman Newman supported amending No. 5 (c) in Resolution 2 to read: "(c) the County pays Asheville $4-$5 Million annually in tax equity with the specific uses to be determined."

Mayor Bellamy supported removing grocery sales from the sales tax. She supported the per capita formula being used for distribution of revenues. She supported using a portion of the sales tax revenue being earmarked for programs and services that directly support low wage workers and poverty reduction efforts and would like to see those funds even leveraged more by additional bond capacities. She supported Asheville being allowed to use the existing 1% hotel occupancy for the renovation of the Civic Center as well as the performing arts center. And, she supported the City settling the Sullivan Act litigation out of court (without supporting delineating what the settlement would be).

As the Council Member who seconded the motion to adopt Resolution No. 2, Councilwoman Cape said that she would be fine with removing the points delineating what the settlement of the Sullivan Act litigation would be. Councilman Newman said that he would not be willing to remove the points.

After two more failed tries to re-tool the language on the tax equity bullet, the motion made by Councilman Newman and seconded by Councilwoman Cape carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

VII. OTHER BUSINESS: Resolution Book 30 - page 300

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte spoke about the lack of concern the City has towards the homeless.

Ms. Karen Speed, Chairman of the Board of Directors of the Buncombe County Rescue Squad, said they are a local private non-profit 501 (c) (3). They are governed by a non-compensated Board of Directors. She said that Council Members should have received a mailed request for possible financial support for their organization. She asked to be placed on the April, 2007, City Council agenda to publicly present their request for financial assistance from the City. She learned today from Mayor Bellamy of the outside agency grant process, noting that the deadline is January. She will be contacting Chief Financial Officer Ben Durant about that process. She asked if there are any other alternatives to that process to expedite their receiving funding. If so, she would like to investigate those avenues. Mayor Bellamy said that she is pursuing this request with the City Manager.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:30 p.m.

Kisha Lee
CITY CLERK

Jerry M Bellamy
MAYOR

Tuesday – March 20, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Students from two 5th Grade classes from Ira B. Jones Elementary School led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 13, 2007

B. RESOLUTION NO. 07-72 - RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A LEASE AGREEMENT WITH ONTARIO INVESTMENTS FOR REPLACEMENT OF MOWING EQUIPMENT AT THE ASHEVILLE MUNICIPAL GOLF COURSE

Summary: The consideration of a resolution authorizing the City Manager to execute the lease agreement with Ontario Investments for replacement of mowing equipment at the Asheville Municipal Golf Course.

The City currently contracts with Ontario Investments to lease mowing equipment at the golf course. The new lease agreement will replace one Toro Groundsmaster 4500-D rough mowing unit and a Toro Reelmaster 6500–D fairway mowing unit with new equipment of the same kind.

The current lease value for six year old equipment is $19,620 per year, whereas the proposed lease value for new equipment is valued at $32,500 per year. The new lease is $12,888 per year above the existing lease since it will replace two six year old mowing units with new equipment. The full cost of the lease is budgeted in the Fiscal Year 2006-07 golf course operating budget.

The purchase price of the equipment as specified in the agreement is a total of $85,376. The City saves $20,376 over the life of the lease by leasing the equipment rather than purchasing.

Staff completed a cost comparison with Toro and found Ontario Investments to be slightly less for the same lease period. Ontario Investments was selected due to cost, past experience and a reliable business relationship.

Ontario Investments end of lease options:

1. Return the equipment with no further obligation.
2. Extend the lease
3. Purchase the equipment at fair market value.

Pros:

- Enables the City to acquire new replacement equipment without expending capital funds.
- Reduces maintenance costs on equipment through routine maintenance provided through lease.
- Puts all equipment leases at the golf course on the same schedule and enables the golf course to replace equipment on a set schedule reducing maintenance cost and down time of equipment.

Con:

- Increases the golf course annual operating budget.

Parks and Recreation recommends City Council approve a resolution authorizing the City Manager to execute the lease agreement with Ontario Investments for replacement of mowing equipment at the Asheville Municipal Golf Course.

RESOLUTION BOOK NO. 30 - PAGE 292

C. RESOLUTION NO. 07-73 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH HICKORY CONSTRUCTION COMPANY FOR THE PROJECT KNOWN AS WATER TREATMENT PLANT IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Hickory Construction Company for the project known as Water Treatment Plant Improvements.

The Water Resources Department requested through its contracted engineers, Brown and Caldwell, bids for water treatment plant upgrades at the North Fork and Bee Tree plants. Both plants require upgrades to meet current and future Environmental Protection Agency (EPA), State of North Carolina and Clean Water Drinking Act requirements. A request for construction bids for improvements to the water treatment plants was submitted to utility contractors in the southeast with four bids returned.

The Water Resources Department and its contracted engineer had previously estimated the biding and construction project management and construction phase of the water treatment plant upgrades to be approximately $5.7 million in 2005. Due to funding issues of not having a dedicated revenue source this project was delayed and the cost for construction and material has escalated over the past 18 – 24 months. The treatment plant upgrades were anticipated to be funded by the Capital Improvement Program fee starting in 2003. The water fund budget was not approved with this revenue source for three years which caused the project to be postponed until a primary funding source was obtained. The approval by City Council of the CIP fee in Fiscal Year 2006-07 allowed this project to move forward.

The four bids received were:

1. Hickory Construction Company: $6,362,500.00
2. Gilbert Engineering Company: $6,667,650.00
3. State Utility Contractors, Inc.: $7,680,00.00

4. Thamer Construction/Wharton-Smith, Inc.: $8,010,000.00

Our contracted engineering firm has recommended bid award to Hickory Construction Company in the amount of $6,362,500.00. Hickory Construction Company is in compliance with the City Minority Business Plan.

This award will require allocating partial funds from the Water Fund Equity (fund balance) account and reallocating funds from other projects due to cost escalations for materials and products since the initial and previous cost estimates were completed in 2005 and in late 2006. The current engineering estimate for the construction phase of the project was $7,162,513. A future bond resolution could reimburse the water fund for these costs with the funds being reallocated to cover these projects and other pay-as-you-go projects.

PROS:

- This project will enhance the water system and ensure we continue to meet all federal and state mandated clean water drinking act regulations.
- Partial funds are allocated in the current year budget.

CON:

- Partial funding for this construction requires $2,000,000 in funds to be reallocated from the Water Fund equity account.

City staff recommends City Council approval of a resolution authorizing the City Manager to enter into a contract with Hickory Construction Company for the project known as Water Treatment Plant Improvements.

RESOLUTION BOOK NO. 30 - PAGE 293

D. ORDINANCE NO. 3452 - BUDGET AMENDMENT FOR THE CONTRACT WITH HICKORY CONSTRUCTION COMPANY FOR UPGRADING WATER TREATMENT FACILITIES AT NORTH FORK AND BEE TREE WATER PLANTS

Summary: See Consent Agenda "C" above.

ORDINANCE BOOK NO. 23 - PAGE 287

E. RESOLUTION NO. 07-74 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE REIMBURSEMENT OF FUNDS TO BE EXPENDED FOR TRANSIT SERVICE TO BLACK MOUNTAIN

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Black Mountain.

The NC DOT has tendered a contract to the Asheville Transit System in which the NC DOT will contribute funds for bus service to Black Mountain. The Asheville Transit System will operate said service.

Asheville Transit System will operate an intercity bus route between the City of Asheville and the Town of Black Mountain along US 70 with stops at the Asheville Mall, Riverbend Marketplace, Veteran's Administration Hospital, and multiple residential areas. The service will

operate five times a day, six days a week. All financing will be provided by the State (maximum of $196,500), the Town of Black Mountain ($13,500), Mountain Mobility ($4,000), and Fare Box Revenue ($19,000). The total budgeted cost is $233,000. The contract has a period of performance of 12 months - from July 1, 2006, through June 30, 2007, as well as to pass through funding to Mountain Mobility for the operation of their route in Black Mountain through the same date. These funds are currently programmed in the City budget, with no City funds being expended. Ridership on this route in FY 2006 was 19,727, with ridership in FY 2007 (the period of this contract) expected to be approximately 32,000.

This action conforms with the City Development Plan 2025 in Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region. Strategy 4: Expand inter-city service to Hendersonville, Black Mountain, Weaverville, Mars Hill, and Sylva.

This action conforms with the Strategic Operating Plan in Strategic Plan Section on Planning, Goal 2, Objective A, Creating a Multi-modal Transportation System, leveraging outside funding sources; and Objective B, by creating a partnership between the state, the Town of Weaverville and the Asheville Transit System to mitigate congestion. In addition, this action complies with the Strategic Operating Plan in the Planning Focus Area- Goal #2-A Multi-modal Transportation System, leveraging outside funding sources.

Pro:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville.

Con:

- There are no disadvantages to the City of Asheville.

City staff recommends adoption of the resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation for the reimbursement of funds to be expended for service to Black Mountain.

RESOLUTION BOOK NO. 30 - PAGE 294

F. RESOLUTION NO. 07-75 - RESOLUTION AUTHORIZING THE MAYOR TO ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION FOR THE REIMBURSEMENT OF FUNDS TO BE EXPENDED FOR TRANSIT SERVICE TO WEAVERVILLE

Summary: The consideration of a resolution authorizing the Mayor to enter into an agreement with the N. C. Dept. of Transportation (NC DOT) for the reimbursement of funds to be expended for service to Weaverville.

The NC DOT has tendered a contract to the Asheville Transit System in which the NC DOT will contribute funds for bus service to Black Mountain. The Asheville Transit System will operate said service.

The Asheville Transit System will operate an intercity bus route between the City of Asheville and the Town of Weaverville along US 25 Business with stops at UNCA, along Merrimon Avenue, in downtown Weaverville, at the Rose's Shopping Center, SonoPress, and other locations along the route. The service will operate five times per day, six times per week. The State and the Town of Weaverville have funded the entire amount of the operating costs less fare box revenue. The total budgeted cost for this project is $124,500 for the Fiscal Year July 1, 2006 through June 30, 2007. The State of NC is providing $110,500 for this Intercity Project. The Town of Weaverville has budgeted $10,000 to this route. The balance of $4,000 is expected from farebox revenues. There are no City funds in this operation, and the City is specifically

exempted from funding any of these operations in the contract from the NC DOT for these routes. Ridership on this route in FY 2006 was 6,254 from the inauguration of service in Mid-August through the end of the fiscal year. Ridership in the current fiscal year is expected to be approximately 14,000.

This action conforms to the City Development Plan 2025 in Goal VI: Develop a transit system that is capable of meeting the needs of all residents of and visitors to the region, Strategy 4: Expand inter-city service to Hendersonville, Black Mountain, Weaverville, Mars Hill, and Sylva.

This action conforms with the Strategic Operating Plan in Strategic Plan Section on Planning, Goal 2, Objective A, Creating a Multi-modal Transportation System, leveraging outside funding sources; and Objective B, by creating a partnership between the state, the Town of Weaverville and the Asheville Transit System to mitigate congestion. In addition, this action complies with the Strategic Operating Plan in the Planning Focus Area- Goal #2-A Multi-modal Transportation System, leveraging outside funding sources.

Pros:

- Increased mobility for the citizens of Asheville both within and outside the city at no additional cost to the City of Asheville.
- Increased accessibility to jobs in Weaverville (SonoPress being the largest employer in Weaverville), and access to jobs in Asheville by those living along the route.

Con:

- None

City staff recommends City Council endorse a resolution authorizing the Mayor to enter into a funding agreement with the NC DOT for the provision of transit services to the Town of Weaverville, and the associated budget amendment.

RESOLUTION BOOK NO. 30 - PAGE 295

G. RESOLUTION NO. 07-76 - RESOLUTION AUTHORIZING BILBERRY LANE IN THE ASBURY ROAD AREA TO BECOME A PUBLICLY MAINTAINED STREET

Summary: The consideration of a resolution to accept Bilberry Lane as a publicly maintained street in the Asbury Road area.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Bilberry Lane is a developer-constructed street that has an average width of 24 feet and a length of 0.07 miles. Transportation and Engineering Department Staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Bilberry Lane will be added to the official Powell Bill list.

Pros:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.
- Homes constructed on this roadway increase the tax base in the City.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council accept Bilberry Lane in the Asbury Road Area as a City maintained street.

RESOLUTION BOOK NO. 30 - PAGE 296

H. ORDINANCE NO. 3453 - RESOLUTION TO DISSOLVE THE EDUCATIONAL ACCESS CHANNEL COMMISSION

Summary: The services of the Educational Access Channel Commission are no longer necessary.

ORDINANCE BOOK NO. 23 - PAGE 290

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. GREENWAY COMMISSION PRESENTATION

Ms. Linda Giltz, Chairman of the Greenway Commission, explained that a greenway is (1) a protected corridor of open space managed for conservation, recreation or non-motorized transportation; (2) often follows geographic features such as ridges or rivers, or sometimes built along canals, utility corridors, or abandoned rail lines; (3) may include a trail or bike path, but others may be strictly for environmental or scenic protection; and (4) may be publicly or privately owned.

She said that the Greenway Commission was established in 1999. The Greenway Commission's 2006-07 efforts include (1) assist City staff with land acquisition by talking with land owners along priority greenway corridors; (2) develop criteria to rank/prioritize greenways and prioritize all greenways in the Master Plan; (3) work with the City and other organizations to explore a bond referendum and other sources that could provide significant funding for greenways; (4) assist with the Master Plan update; and (5) work closely with the Asheville Parks and Greenways Foundation.

The Greenway Commission's 2006 accomplishments include (1) assisted staff with land owner outreach and negotiation (a) downtown to A-B Tech greenway; (b) Reed Creek Greenway; (c) French Broad River Greenway (Progress Energy sections); and (d) Beaverdam Greenway; (2) worked with staff to refine alignment of greenways; (3) reviewed development plans for new developments along Reed Creek Greenway; (4) reviewed and toured proposed greenways; and (5) education/outreach.

One criteria used for greenways is community benefits. They include (1) provides connectivity to an existing greenway, expands neighborhood connectivity, extends an existing greenway; (2) close proximity to natural features or potential to improve water quality, mitigate flooding, improve wildlife habitat, etc.; (3) provides safe corridor/connections for alternative transportation; (4) highly visible to the public; (5) in an aesthetically pleasing location and/or corridor has historic significance; and (6) potential to promote economic development.

Another criteria used for greenways is also affordability. They include (1) potential for partnerships with other organizations or funding sources; (2) cost of acquisition; and (3) cost of development; (4) property is owned, controlled or available publicly.

Ranking the greenways includes community benefits vs. affordability ranked separately and together. Top ranked greenways are French Broad River (Dog Park to Haywood Road), French Broad River (Amboy Road to Hominy Creek), Reed Creek (Weaver Boulevard to downtown), and Swannanoa River (Azalea Park to Riverbend).

Use of criteria and ranking involve (1) prioritizing fundraising and work/effort; (2) evaluating requests for new greenways; (3) providing ability to respond quickly when funding opportunities arise; (4) updating the Master Plan; and (5) refining alignments.

Other observations are (1) challenge - need additional staff and funding - formed a committee to explore bond referenda, identify organizations to collaborate with and test the political climate; and (2) demand for greenways is getting stronger; and (3) greenways provide multitude of benefits (health, water and air quality, economic, tourism, habitat protection, quality of life).

Ms. Giltz responded to various questions/comments from Councils, some being but are not limited to: what is the process for the Master Plan update; what is the relationship with new property owners who buy land that a proposed greenway is planned; what are the economic benefits for the City and for the property owners; when development proposals are reviewed, is there a mechanism in place to talk about greenways; and is there an overlap between the Pedestrian Plan and the Greenway Plan.

Upon inquiry of Councilman Freeborn, Mayor Bellamy said that the Greenway Commission request for additional staff and funding will be a part of the budget process.

Councilman Mumpower felt that greenways are a good concept, however, until we can effectively police the parks that we have now and can start controlling traffic problems and the public safety issues in public housing, he could not support spending money on something nice, but not necessary.

Councilman Newman said that during the City Council retreat, sidewalks and greenways were a top priority. He explained the process of the Metropolitan Planning Organization's (MPO) allocation of additional funding for local projects between 2009-2015. He asked if Council would be open to increasing annually the amount we spend on greenways and identify, between now and 2015, what projects we really want to accomplish and partnership with the MPO and other sources to complete those projects.

Vice-Mayor Jones said that there is good data about the tourism related benefits of greenways and felt the Buncombe County Tourism Development would be a source to inquire about funding as well.

Councilman Davis said that when this issue comes back to Council during the budget process, he would like information about maintenance costs and crime statistics regarding greenways.

Mayor Bellamy thanked Ms. Giltz for her annual report and said that we will take a comprehensive look at parks and greenways during the budget process. She also cited the many improvements the City has undertaken in our various parks, noting that we will continue to improve on our quality of service for the community's quality of life.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT AGREEMENT WITH BILTMORE FARMS, LLC, AND TOWN SQUARE WEST FOR THE DEVELOPMENT OF BILTMORE PARK TOWN CENTER

RESOLUTION NO. 07-77 - RESOLUTION APPROVING AN ECONOMIC DEVELOPMENT AGREEMENT WITH BILTMORE FARMS, LLC, AND TOWN SQUARE WEST FOR THE DEVELOPMENT OF BILTMORE PARK TOWN CENTER

Mayor Bellamy opened the public hearing at 5:49 p.m.

Economic Development Director Sam Powers and Urban Planner Julia Cogburn said that this is the consideration of: (1) a resolution approving an economic development agreement with Biltmore Farms, LLC and Town Square West for the development of Biltmore Park Town Center; and (2) adoption of an ordinance annexing Biltmore Park Town Center (petitioned annexation). This public hearing was advertised on March 2, 2007.

Regarding the economic development portion, Mr. Powers said that Biltmore Park Town Center is a proposed high-density, mixed use development project in south Buncombe County, in an area abutting the current City limits. The development program consists of approximately 200,000 sq. ft. of retail/dining; a 50,000 sq. ft. 15-screen cinema; 100,000 sq. ft. of new office space; 150 room hotel; approximately 264 housing units (175 rental/89 condo); and 1,850 spaces of structured parking. The estimated capital investment for the project is $123-130 million. Job creation of 1,200 new jobs is expected at build-out. Construction employment is estimated to create 300 jobs. The developer has requested that consideration be given for this investment in the form of an economic development grant agreement.

The economic development incentive agreement under consideration calls for payments to be made in 5 annual installments, which take into account the prospective tax revenues (property, sales, etc.) from the property coming to the City, beginning with calendar year 2008. The estimated total incentive for this project is $2.5 million. The City's obligation to make payments would terminate after 5 years.

Regarding the voluntary annexation portion, Ms. Cogburn said that as structured, the City's obligations under this incentive agreement do not arise unless and until the property is annexed into the City. Accordingly, the owner of the property has filed with the City a petition for voluntary annexation pursuant to N.C.G.S. 160A-31. That statute requires the City to investigate the petition as to compliance with certain criteria (contiguity with existing boundary, owners sign petition, etc.).

This investigation has been completed and the Certificate of Sufficiency was presented. This area is contiguous to the existing corporate limits and qualifies for annexation by petition as set forth in NCGS 160A-31.

Mr. Powers said that this project will require two actions, both of which are interdependent on each other for City involvement:

1. Adoption of a resolution authorizing the City to enter into the economic development incentive agreement; and
2. Adoption of ordinance annexing the area into the City.

Though it is a separate action, the request for annexation is set out in the economic development incentive agreement. The law requires a public hearing on ten days notice for the voluntary annexation. Council also holds public hearings for economic development incentive agreements, and these public hearings require notice as well. Both public hearings have been properly advertised and scheduled to coincide. Should City Council decide to proceed, the effective date of annexation would be April 30, 2007.

Pros:

- Provides for orderly growth of City and growth of tax base through acceptance of appropriate areas into corporate limits where owners desire annexation.
- Provides new economic development anchor opportunity for the City, by providing new City area to attract new employers and jobs, including construction jobs for extended periods.
- $123 million increase to City tax base at project build-out.
- Meets the City of Asheville's definition of Smart Growth: "...makes efficient use of land, fully utilizes urban infrastructure...promotes variety of transportation & housing...protects architectural & environmental character of the City through compatible, high quality, & environmentally-sensitive development practices...implemented through effective policies, regulations, capital projects & incentives".
- Increase Asheville's efforts to develop Sense of Place and additional destinations to enhance tourism and length of visitor stays and increased visitor spending.
- High density mixed use and structured parking reduces land use by 23 acres.
- Use of means other than water to encourage annexation.

Cons:

- Marginal increase in service costs.

Staff recommends approval of a resolution approving the economic development incentive agreement, and adoption of the ordinance for voluntary annexation.

Mr. James Downs, Vice-President of Crosland Retail, explained Crosland's market focus. He outlined some of the projects Crosland developed. He then explained the project in detail. Under the economic development agreement, the developer would (1) build and own four parking decks: 80% public parking, 20% (up to 30%) reserved for residents; (2) build, obtain financing, lease, and assume financial responsibility consequences of project; (3) pays 100% of city (and county) taxes upon annexation; and (4) provide office space and connections for building inspector. The City would (1) provide one full-time building inspector; and (2) make five annual grant payments equal to incremental ad valorem taxes on the project for 2008 through 2012.

He said the economic benefits include (1) one time job creation of 310 construction jobs; (2) on-going job creating of 1,223 jobs; (3) high quality retailers provide benefits/wages, including part-time; (4) upon completion, $651,548 estimated annual revenue to city; (5) avoid legal cost and delay of city-initiated annexation; and (6) catalyst for future growth in Technology Park and southwest Asheville.

The environment benefits include (1) density - better use of the land, prevents 23 acres of sprawl; (2) car trips reduced by 11.7%; (3) integrated stormwater management; (4) of the larger 76.5 acre, Urban Village District, 24 acres are open space; (5) voluntary conservation easements preserve 2.9 acres of wetlands; and (6) developer will endeavor to use Energy Star appliances.

He explained how this meets the City of Asheville's definition of smart growth development.

Mayor Bellamy closed the public hearing at 6:05 p.m.

There was a brief discussion, initiated from Councilman Mumpower's concern about the City taxpayer paying for the City providing a full-time inspector. Mr. Powers said that a full-time inspector will be able to expedite the reviews for a quicker build-out.

In response to Councilman Mumpower's concern regarding the cost of street and sidewalk maintenance, Mr. Squire said the City will own approximately 95% of the streets, except in the small residential areas, which will be privately maintained streets. Mr. Squire said that they

would sign an agreement with the appropriate City department stating that the developer would be responsible for replacement of sidewalks that have more expensive pavers, anything other than basically concrete.

Mayor Bellamy noted that the City will receive additional Powell Bill funds and once the condominiums are sold, the City will receive increased property taxes. She also noted that this action shows that the City is willing to work with individuals on the front end of a development so people who buy there already know what taxes they will be paying.

Mayor Bellamy said that members of Council have previously received a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 07-77. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 198

B. PUBLIC HEARING TO CONSIDER ADOPTION OF AN ORDINANCE ANNEXING BILTMORE PARK TOWNE CENTER

ORDINANCE NO. 3454 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE BILTMORE PARK TOWN CENTER

Mayor Bellamy opened the public hearing at 6:28 p.m. and said that the information pertaining to this public hearing is contained above in Public Hearing "A".

Mayor Bellamy closed the public hearing at 6:29 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3454. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 291

V. UNFINISHED BUSINESS:

A. BEAUCATCHER OVERLOOK PARK

City Manager Jackson said that at the request of City Council, staff has reviewed a finance plan and purchase agreement option, and preliminary development and annual maintenance cost considerations for Beaucatcher Overlook Park. He briefly reviewed the following information prepared by the Parks & Recreation Department.

Finance Plan: The City's finance director recommends the City to fund the entire amount of its commitment for the land purchase in the current fiscal year. Trust for Public Land offered the City a three-year financing option with an interest rate of prime plus one percent. At the current prime rate, this offer would require the City to pay an annual interest rate of approximately 9.0%. For this reason, it is recommended the City appropriate fund balance to pay for this land purchase in the current year and thus avoid the interest costs. Based on current financial estimates for the General Fund, staff does not anticipate this appropriation will have a negative impact on year-end fund balance levels.

Purchase Agreement: Based on review by the City's attorney, Trust for Public Land would use funds and pledges of funds from a variety of sources, including City funds, to contract the acquisition of Beaucatcher Overlook Park. Trust for Public Land would be responsible for performing due diligence work with respect to the property such as title search, environmental assessments, etc. Trust for Public Land would then acquire the property, with closing anticipated in April. Trust for Public Land would then enter into a purchase agreement with the City, whereby the City would acquire title to the property (subject to restrictions as to use of the property placed on the property by Trust for Public Land), and agree to pay Trust for Public Land the City's pledged amount. A public hearing would be required prior to the City entering into this arrangement. This is similar to the manner in which the property for the Azalea Park was acquired. It does not appear that this transaction is subject to approval by the North Carolina Local Government Commission although the legal staff is seeking confirmation of this.

Development: Beaucatcher Overlook Park is intended for passive recreation with minimal development and preserved predominantly as a natural area. When considering park development, the City follows a process of site analysis, engineering and environmental studies to determine feasibility, and public input prior to park design which leads to cost estimate of development. The following may be considered as minimal development based on preliminary cost projections without a comprehensive site analysis and review of all options. Cost will vary and should not be viewed as final cost estimates.

Development may include the following at a minimum cost of $325,000: Trails; Overlook(s); Picnic area(s); Parking area(s); Benches, trash receptacles, signage; Access road and park entrance improvements; and environmental and biological assessment.

Other cost considerations listed below may increase development cost by 30% to 50%.

- Accessibility as required by the Americans with Disabilities Act
- Security
- Emergency response accessibility
- Maintenance accessibility
- Forest management and environmental options
- Design and engineering
- Escalation
- Funding plan

Annual Maintenance: Maintenance for a 30-acre site with minimal development designed predominantly as a natural area may cost approximately $5,000 per year for the first five years, followed by $7,000 to $10,000 per year thereafter. Minimal maintenance will include the following: Trash collection and litter control; Mowing; Repairs; Vandalism; Trail Maintenance; Forest Management; and Miscellaneous.

Ms. Maggie Clancy, Project Manager with the Trust for Public Land, said that the Buncombe County Commissioners today approved their $575,000 commitment to the purchase price of the Greenberg tract, contingent upon City Council's approval.

Councilman Mumpower said that even though the City is making progress, he hoped that the City can strengthen its efforts regarding public safety on our streets, in public housing and in neighborhoods.

Councilwoman Cape moved to commit $575,000 for the City's contribution to the purchase of the Greenberg tract. This motion was seconded by Councilman Newman and carried unanimously.

VI. NEW BUSINESS:

VII. OTHER BUSINESS:

Councilman Mumpower expressed appreciation to people who attended the For Our Kids event in Hillcrest.

Councilman Mumpower announced the March 2007 Drug Commission poster.

Vice-Mayor Jones announced the modification to the School Board schedule. She said that the new application deadline is March 26, 2007.

Councilman Davis explained a Sister Cities event that took place, noting that the proceeds will go to help our Sister City in Greece.

Mayor Bellamy advised the community to contact 211 to see which agencies are offering free tax service.

The following claims were received by the City of Asheville during the period of February 23-March 15, 2007: Christina Sperandeo (Streets), Aaron Dison (Police), Kaleb Geise (Streets), Marble Slab (Streets), Jeff Lovelace (Streets) and David Stevens (Community Development). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Alton Scott explained how it is his desire to build affordable housing on Mardell Circle, however, he has been informed that there is no water availability in that area. He asked for Council's assistance in providing the resources to upgrade the system. Mayor Bellamy said that this matter will be referred to the Housing & Community Development Committee.

Mr. Walter Plaue spoke to Council regarding raising the minimum wage and urged Council to look at the pros and cons of such before implementation.

CLOSED SESSION

At 6:50 p.m., Councilman Mumpower moved to go into closed session for the following reasons: (1) to establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property on Victoria Road by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 160A-318.11 (a) (5). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:20 p.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 7:20 p.m.

Kendra Lyle
CITY CLERK

Terry M. Bellamy
MAYOR

Tuesday – March 27, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn (arrived in meeting at 5:18); Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Cub Scout Pack 45 led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B" and "C" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 20, 2007

B. RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING AIRSPACE AT 11 BOSTON WAY

This item was removed from the Consent Agenda for an individual vote.

C. RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING AIRSPACE AT 82 PATTON AVENUE

This item was removed from the Consent Agenda for an individual vote.

D. ENERGY AND THE ENVIRONMENT POLICY UPDATE

Summary: Since the Sustainability Advisory Committee on Energy and the Environment (SACEE) initial meeting in late January, the Committee has met bi-weekly in an effort to formulate two (2) short term goal recommendations by March 31st, as directed by City Council in their December 13, 2006, meeting. Due to the volume of information and a need for further research, the SACEE requests a 30-day extension.

In December City Council directed the newly formed SACEE to bring forth two specific recommendations before March 31, 2007, as follows:

1) Define (with benchmarks) specific energy & conservation goals for Asheville; and,
2) Develop specific guidelines for future municipal facilities to be LEED certified.

The SACEE's membership has been diligently researching the multiple options available. Furthermore, benchmarking data has shown a wide variance in the goals and logic behind them; therefore, in order to confidently bring forth thoughtful, attainable and pragmatic recommendations for Council review and action, it is the consensus of the Committee that there is insufficient information to make such recommendations by March 31st.

The SACEE is confident that an additional 30-day extension will provide the time to more thoughtfully formulate sound recommendation(s).

Staff recommends City Council approves a 30-day extension to the Sustainable Advisory Committee on Energy and the Environment.

E. RESOLUTION NO. 07-78- RESOLUTION AUTHORIZING THE CITY MANAGER TO INCREASE THE NUMBER OF SWORN POLICE OFFICER POSITIONS BY ONE FOR THE PURPOSE OF HAVING A DEDICATED SPECIALIZED CRIME PREVENTION OFFICER ASSIGNED TO PUBLIC HOUSING IN THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to increase the number of sworn police officer positions by one for the purpose of having a dedicated Specialized Crime Prevention Officer assigned to public housing in the City of Asheville and associated budget amendment, in the amount of $58,137, which includes necessary equipment and vehicle purchases.

The Police Department in an ongoing effort to facilitate quality of life improvement in Asheville's public housing, in conjunction with the Housing Authority of the City of Asheville and to further assist in the reduction of illegal drug sale and use in public housing needs to expand crime prevention programs solely dedicated to public housing residents. There is not sufficient staff to dedicate full time efforts to the unique problems and concerns of public housing residents. This additional position will work closely with the Weed and Seed Coordinator as well as the Drug Suppression Unit to ensure that effective programs are in place to maximize positive returns for overall improvement for residents. The uniqueness of public housing issues must be a multi-level approach and a dedicated crime prevention officer will facilitate educational, protective concepts and functions for a safer living community in public housing.

Pros:

- Continuing education of public housing residents as to strategies for safety and protection
- Introduction of programs designed to encourage community bonding and increased security
- Facilitation of cooperative programs which will assist a variety of needs in the area of health care, jobs, child care, home security and overall quality of life improvement
- Community programs specifically designed for children and youth mentoring
- Closer relationships between residents and police
- Increasing the sense of ownership and responsibility for residents
- Safer communities

Cons:

- Budget ramifications for one additional sworn officer position

City staff recommends City Council approve a resolution authorizing the City Manager to increase the number of sworn police officer positions by one for the purpose of having a dedicated Specialized Crime Prevention Officer assigned to public housing in the City of Asheville and associated budget amendment, in the amount of $58,137, which includes necessary equipment and vehicle purchases. Staff recommends that this additional expense be funded with sales tax revenue.

RESOLUTION BOOK NO. 30 – PAGE 299

F. ORDINANCE NO. 3455 - BUDGET AMENDMENT FOR A DEDICATED SPECIALIZED CRIME PREVENTION OFFICER

Summary: See Consent Agenda Item "E" above.

ORDINANCE BOOK NO. 23 - PAGE 295

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ITEMS TAKEN OFF THE CONSENT AGENDA FOR INDIVIDUAL VOTES

Because the two items removed from the Consent Agenda are of a similar nature, discussion of them both took place at the same time.

B. RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING AIRSPACE AT 11 BOSTON WAY

Summary: The consideration of a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding airspace at 11 Boston Way.

A bid has been received from Kessler Asheville LLC in the amount of $11,665 for the purchase of air space at 11 Boston Way.

The property at 11 Boston Way is the former Exxon Station across from the Biltmore Estate entrance. The project which is called Bohemian Hotel at Biltmore Village proposes to construct a four (4) story, 89 key boutique hotel. The project received approval from the Historic Resources Commission on October 11, 2006, approval from the Technical Review Committee on November 6, 2006, and approval of the building plans by the Building Safety Department for a Building Permit subject to acquisition of the air space for the balconies.

The air space for the balconies over the sidewalk totals 890± S.F. beginning at approximately 18 feet above the sidewalk and projecting over the sidewalk 5.25 feet. Past appraisals indicate that the value of air space for balconies projecting over rights of way is 20% of the per square foot land value of the property from which the balcony projects applied to the horizontal area of the airspace. This method was used to extrapolate a value for the air space using an appraisal of the property at 11 Boston Way dated February 13, 2006, adjusted for time. The estimated value of the air space is $11,665.

The bid from Kessler Asheville LLC is to acquire the air space for the balconies for the sum of $11,665.

Pros:

1. The sale will be at fair market value.
2. It will facilitate an increase in the tax base.
3. It will accommodate characteristics of the building design intended to conform to the historic nature of Biltmore Village.

Con: There is no negative impact.

Economic Development staff recommends City Council approve a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding airspace at 11 Boston Way.

C. RESOLUTION DIRECTING THE CITY CLERK TO ADVERTISE AN OFFER OF PURCHASE FOR UPSET BIDS REGARDING AIRSPACE AT 82 PATTON AVENUE

Summary: The consideration of a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding airspace at 82 Patton Avenue.

A bid has been received from Urban Capital LLC in the amount of $3,350 for the purchase of air space at 82 Patton Avenue.

The property at 82 Patton Avenue is the former First Union Bank building. The project which is called Capital Center proposes to renovate the building into office condominiums. Along with interior redesign the building will receive a new facade which will include balconies extending out over the sidewalk in a bowed pattern to a maximum distance of 4' with a view of Pritchard Park. The project has received Level 1 approval from Planning & Development, unanimous approval from Downtown Design Review and the plans have been approved by the Building Safety Department for a Building Permit subject to acquisition of the air space for the balconies. The air space for the balconies over the sidewalk totals 216.6 ± S.F. and begins at approximately 16 feet above the sidewalk. Past appraisals indicate that the value of air space for balconies projecting over rights of way is 20% of the per square foot land value of the property from which the balcony projects applied to the horizontal area of the airspace. This method was used to extrapolate a value for the air space using the tax assessment for the property at 82 Patton Avenue. The estimated value of the air space is $3,350.

The bid from Urban Capital LLC is to acquire the air space for the balconies for the sum of $3,350.

Pros:

1. The sale will be at fair market value.
2. It will facilitate an increase in the tax base.
3. It will accommodate the connectivity of public and private space for a more robust downtown environment.

Con: There is no negative impact.

Economic Development staff recommends City Council approve a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding airspace at 82 Patton Avenue.

Real Estate Manager Ed Vess responded to Councilman Mumpower's concern whether Asheville is getting fair value for the air rights.

Councilman Mumpower moved for the adoption of a resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding airspace at 11 Boston Way and 82 Patton Avenue. This motion was seconded by Councilman Davis.

Mayor Bellamy felt this amount doesn't reflect the true market value for air rights in our community.

Councilman Mumpower asked that in the future City staff provide Council with additional research to substantiate the price for air rights.

Councilman Davis suggested Mr. Vess benchmark other cities of our size and type to see how they determine the amount of their air rights. Until that information is obtained, he withdrew his second.

Upon inquiry of Councilman Mumpower, Mr. Vess said that a delay of this action, until further information is obtained, will delay the projects.

Councilman Newman seconded Councilman Mumpower's motion to adopt the resolution directing the City Clerk to advertise an offer of purchase for upset bids regarding airspace at 11 Boston Way and 82 Patton Avenue. This motion failed on a 3-3 vote, with Councilwoman Cape, Councilman Mumpower and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones and Councilman Davis voting "no."

It was the consensus of Council to instruct Mr. Vess to look at comparable cities that are selling air rights that have a market similar to Asheville.

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE REGIONAL AIRPORT AUTHORITY REPORT

Councilman Freeborn, Chair of the Asheville Regional Airport Authority, presented Council with an Airport overview. He said that the 2006 traffic statistics revealed 572,228 total passengers, with the major uses being commercial aviation, corporate aviation and general aviation. Using a chart, he showed, the passenger traffic growth for Fiscal Years 2002 - 2007.

Regarding community benefits, based on a 2006 economic impact study by the N.C. Dept. of Transportation, the Asheville Airport has a total of 2,466 jobs, an annual economic impact of $238,349,900 and an annual payroll of $22,172,300. The Airport also provides the County with a significant source of property tax revenue with 134 based aircraft at a calculated value of $63,200,000, which would result in ad valorem taxes of $372,800 based on the County rate of $0.59 per $100. This study estimated that there were 174,250 visitors to the area that utilized the Asheville Regional Airport.

He then reviewed the financial information, outlining the revenue/expenses, net income during Fiscal Year 2002 through 2007, and the proposed budget.

There are 23 non-stop flights to 8 hub cities: Atlanta, Charlotte, Cincinnati, Detroit, Houston, Newark, Orlando and Minneapolis/St. Paul. Those flights are on 4 commercial air carriers: Continental (11%), Delta (43%), US Airways (34%) and Northwest (12%).

New/additional hub service opportunities include: Atlanta, Boston, Chicago, Denver, Memphis and Washington, D.C. New non-stop service opportunities include: Boston, Chicago, Ft. Lauderdale/Miami, Tampa and Washington, D.C.

New customer service initiatives include (1) a Guest Services Program for Fiscal Year 2007-08 (ground transportation coordination; luggage assistance/skycap/porter service; airline assistance; place to obtain area information/maps directions; paging; services - stamps, shipping, faxing, copies; lost and found; and meeting point for large groups); (2) Arts in the Airport Program - (a) The inclusion of arts in the public eye adds immensely to the dimension, depth and character of a community; it inspires our youth, fortifies local identity, and adds to the quality of life; (b) A changing art exhibit will distinguish the Asheville Regional Airport and help integrate it more fully into the culture of the region; (c) The display of art in the terminal will make a unique contribution to the experience of travelers by educating them about Western North Carolina area and creating

an aesthetically pleasing environment; (d) additionally, a changing art exhibit will allow for a variety of artwork by many different area artists to be displayed throughout the year, giving the terminal a fresh look with each new rotation of art; and (e) another amenity providing a more pleasing terminal as an enhanced traveler experience; (3) Art Gallery location and remodeling (a) former Welcome Center location; (b) includes art in various mediums (sculpture, paintings); and (c) $50,000 of improvements including: remodeling of space, insurance, printing, publicity; air/dust collectors, pedestals/vitrines for sculpture; and signage.

Councilman Freeborn explained the development of the Airport, explaining the $22,149,660 2007-08 capital improvement program. The Airport Authority is under contract with PBS&J/GreenPlan for a Land Use Planning Study. The Land Use Study will address land use planning for the north, east, south and west areas of the Airport. In addition to a Land Use Plan, the deliverables will provide the Airport Authority with marketing and development materials. The Plan will provide the Airport Authority with a proper guide to the future development of both aviation and non-aviation Airport property.

Regarding environmental initiatives, the Airport Authority is installing electrical based (1) pre-conditioning air systems for heating and cooling aircraft at the gates; and fixed ground power systems for the provision of electrical service to aircraft at the gates. This will eliminate the need for the majority of flights for PC Air and Ground Power to be supplied by fossil fuel based units, thereby improving overall air quality at the Airport.

The Airport Authority is working with Land-of-Sky, Carolina Mountain Land Conservancy, DNER, and Clean Water Management Trust Fund on the potential for the establishment of a conservation easement on Airport property along the French Broad River. Potential for grant funds that may be used for other property acquisition if such property is included in the conservation easement. Conservation easement would allow for bike and walking trails. In addition, this would be a great opportunity to give back to the community.

Regarding an independent Airport Authority, draft legislation has been submitted through the House, sponsored by Representative Goforth. This legislation will enable the City, County and Airport Authority to work out the details of proposed legislation while preserving the ability for action to be taken during the 2007 legislative session. Over the next 60 days City and Airport Authority staff are completing an analysis of valuation alternatives of the Airport land and the City's original dollar investment in the purchase of land for the Airport. Alternative governance structures are also being evaluated.

In response to Councilman Newman regarding passenger traffic, Councilman Freeborn said that we are above the 2001 numbers across the board throughout the county.

Responding to Councilman Davis, Councilman Freeborn explained how they are constantly monitoring pricing.

Mayor Bellamy made a couple of suggestions for the airport terminal, being (1) a sign be placed stating that drinks cannot be taken through security; and (2) an additional television set be placed in the back waiting room due to the size of the waiting area. She thanked the Airport Authority for going wireless and for the increased landscaping.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING RELATIVE TO REZONING PROPERTY LOCATED AT 253 BILTMORE AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT

ORDINANCE NO. 3456 - ORDINANCE TO REZONE PROPERTY LOCATED AT 253 BILTMORE AVENUE FROM REGIONAL BUSINESS DISTRICT TO CENTRAL BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 6:13 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone property located at 253 Biltmore Avenue from Regional Business District to Central Business District. This public hearing was advertised on March 16 and 23, 2006.

The parcel requesting rezoning is located on the busy Biltmore corridor. The current use is a commercial automobile repair business with a one-story building. The owners have requested the rezoning because the change would be in-line with their personal goals and with the anticipated long term growth and redevelopment of the Central Business District (CBD). Over the years the CBD has expanded and moved southward. About six years ago the CBD was expanded to its present boundary adjacent to this parcel. In 2005 and 2006 the Downtown Commission presented a proposal for a wording amendment to the CBD and expanded the design review overlay area to include all properties that are located in the CBD. The proposal was approved by City Council in April 2006. During that time the Downtown Commission discussed expanding the CBD boundary south to incorporate the Regional Business District properties leading to the Institutional zoned hospital campus. No action was taken at the time to pursue that initiative. The other changes to the CBD were the first priority. The property that is the subject of this request was in that CBD expansion consideration. Properties to the north of the proposed parcel are zoned CBD.

The Regional Business District is established to provide areas for large scale commercial operations. The district is not intended to create strip-style commercial centers but rather a concentration of commercial uses with a coordinated design theme. This district is designed to be located around the intersections of high traffic volume thoroughfares such as interstate highways and arterial roads. While the automobile and transit are the primary modes of transportation, pedestrian connections are also noted as important considerations.

The Central Business District is established to reinforce the downtown as the urban center of Asheville and western North Carolina by encouraging private and public investment to preserve the district as the primary retail, office, hotel, institutional, cultural, entertainment center of the community. A high priority is placed on design, integrating new uses into and with existing architecture in a cohesive manner. Development balances pedestrian circulation and streetscape requirements with the automobile circulation and efficiency. Development in the CBD has the potential to embody the smart growth and sustainable development policies adopted by the City.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

This rezoning was recommended for approval by a 5-0 vote by the Planning and Zoning Commission. No one spoke during the public hearing regarding the rezoning proposal.

Pros:

- Staff and the Downtown Commission have discussed expanding the CBD to include this RB zone southward to the Institutional Zoning, although no action was taken to initiate this change.
- Development in the CBD is expected to expand into this area as the Biltmore Avenue corridor redevelops.
- The comprehensive plan and smart growth policies encourage opportunities for high-density infill growth and redevelopment.

Con: No items of concern are noted regarding this request.

The Planning and Zoning Commission voted to recommend approval of the request by a vote of 5-0. Staff concurs with this recommendation.

2007		
Festival Area	**Recommendations**	**Financial Impact/Considerations**

Mayor Bellamy closed the public hearing at 6:16 p.m.

Councilman Davis hoped that the Central Business District be extended down Biltmore Avenue as the corridor redevelops.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3456. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 297

V. UNFINISHED BUSINESS:

A. BELE CHERE COMMUNITY COUNCIL REPORT

Ms. Debi Smith, Chair of the 2007 Bele Chere Board of Directors, presented the recommendations for formal adoption by City Council as a result of the Bele Chere Community Forum.

The purpose of this report is to provide recommendations to City Council on behalf of the Bele Chere Board of Directors as a result of community input on how to enhance the City's Bele Chere festival. Approximately 75 citizens participated in the Bele Chere Community Forum on January 30, 2007, to develop a consensus on two key questions related to Bele Chere. In addition, more than 100 citizens provided their input in writing.

The Bele Chere Board of Directors was charged with reviewing the feedback at a board retreat in order to make recommendations to City Council for modifying the festival to ensure it represented what citizens want in a community festival. Based on citizen input, the board has developed recommendations related to three key community goals. The board's recommendations are further organized by suggestions that can be implemented in the 2007 festival, potential suggestions warranting further review for the 2008 festival and suggestions that would be reviewed and researched as part of long range strategic planning for the event.

She reviewed the following recommendations:

Community Goal: Make Bele Chere more local and reflective of Asheville's unique character.

Music & Entertainment	• Changing WNC band selection from 25% to 35% of total band composition. • Changing Regional band selection from 35% to 45%. • Changing National band selection from 40% to 20%.	No financial implications

Arts & Crafts	Award more points for local artists in selection process	No financial implications
Arts & Crafts	Make selection committee all local artists	No financial implications
Kids Activities	Reduce cost of kids' rides by 20% and incorporate local Appalachian history educational activities	No financial implications; vendor is amenable to reducing cost to public
Food & Beverage	Implement pilot program for a local microbrewery beverage booth	No financial implications
Impact on local business	Move stage to N. Lexington and Hiawassee to support Lexington revitalization and LAMA	No financial implications
Impact on local business	Hold merchant meetings to promote $50 booth space for entire festival	No financial implications
2008		
Food & Beverage	Add additional local food booths (Reduce fee for local vendors from $1800 to $500 per booth)	Revenue loss of $1,300 per booth space with a potential loss of $80,000
Food & Beverage	Evaluate microbrewery pilot program and expand if successful for local brewers	No financial implications
Long-term Strategic Planning		
Music & Entertainment	Renegotiate talent buyer contract in 2009 and open to local and regional promoters	TBD

Community Goal: Change the Date of the Festival.

Long-term Strategic Planning		
Festival Area	**Recommendations**	**Financial Impact/Considerations**
Date of festival	Analyze financial impact of moving date to alternative times of year. Work in partnership with CVB to determine optimal dates and impact on festival revenue.	TBD

Community Goal: Explore funding models and sponsorship opportunities to reduce financial burden on taxpayers.

2007

Festival Area	Recommendations	Financial Impact/Considerations
Festival Operations & Financing	Work with festival experts to evaluate 2007 festival and provide recommendations for long-term financial viability and sustainable operations with the goal of reducing tax burden.	$20,000 fee for services
Festival Operations & Financing	Reduce expenses in festival budget by 20% for FY07-08 budget.	Less funding dedicated to securing entertainment acts and less contingency in budget.
	2008	
Sponsorships	Evaluate possibility of contracting with an outside sponsorship agency to attract new festival partners.	Potential to increase revenue from sponsorships.

The board is also committed to continuing to focus on festival areas that the community values most. These areas include:

- Fostering community pride through volunteerism and nonprofit organization involvement
- A free festival with free music
- The quality and diversity of music
- Visibility of the region

The Board recommends: (1) City Council formally adopt the 2007 suggestions that have no financial impact; (2) direct staff to provide Council with more information within 60 days in order to develop recommendations to reduce taxpayer burden; and (3) City Council direct staff to come back to City Council in December to provide additional information and recommendations for 2008 and long term strategic planning. This will allow time for additional research and review as well as an opportunity to evaluate how specific changes impact the 2007 festival.

Ms. Smith and Ms. Melissa Porter, Festival Coordinator for the City of Asheville, responded to various questions/comments from Council, some being, but are not limited to: if the date of the festival move, in what year would that take place; what kind of information would we get from the festival consultant; do other festivals have brand names; when the expenses are reduced, is there a corresponding reduction of revenues; and what are some of the environmental changes that could be made.

Councilman Davis was not particularly interested in making Bele Chere bigger and better and would like to try some of the recommendations that came out of the forum. Until those ideas are tried, he would not be supportive of hiring a festival expert.

Councilman Mumpower was concerned about spending $20,000 for a festival consultant since Asheville has good people who are familiar with this festival.

Vice-Mayor Jones felt there are a lot of variables in the size of the festival, e.g., making it shorter by two hours, quit selling alcohol earlier, etc., noting that bigger is not always better. She felt that the festival might benefit from a finance subcommittee and she would be happy to talk with the Bele Chere Board further about that.

Mr. Dwight Butner, President of the Downtown Association and downtown property owner, offered two suggestions: (1) stopping the event in earlier in the evening; and (2)

boundaries of festival be expanded with the view that no operating retail establishment be blocked from the streets by booths or staging.

Councilman Mumpower moved to adopt the 2007 recommendations as follows: (1) increase percentage of required local/regional acts; (2) award more points to local artists in selection process and make selection committee all local artists; (3) reduce cost of kids rides 20% and offer Appalachian history educational activities; (4) pilot microbrewery beverage booth; (5) move stage to N. Lexington and Hiawassee to support revitalization; and (5) hold merchant meetings to promote $50 booth space for entire festival. This motion was seconded by Vice-Mayor Jones and carried unanimously.

Councilman Davis moved to not spend $20,000 to contract with festival experts to evaluate the 2007 festival and develop recommendations for reducing taxpayer contribution. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilwoman Cape said that since one of the national "green" festival organizers is here in Asheville she suggested they be invited to a Bele Chere Board meeting to give us some hints about how we can do a better job with that.

It was the consensus of Council to direct staff to come back to City Council in December to provide additional information and recommendations for 2008 and long term strategic planning, along with (1) a review of Mr. Butner's suggestions being incorporated into the results; and (2) a review of a finance subcommittee for the Bele Chere Board.

VI. NEW BUSINESS:

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. David Allen Wilson, Asheville resident, urged Council to take appropriate measures to reduce crime in downtown Asheville by placing police officers where we currently have crime.

Rev. Christopher Chiaronmonte spoke about the lack of concern the City has towards the homeless.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 6:23 p.m.

Kesha Lipe
CITY CLERK

MAYOR

Tuesday – April 10, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; Assistant City Manager Jeffrey B. Richardson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

The Asheville Division of the US Navy Sea Cadets led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

ANNOUNCEMENT

Mayor Bellamy asked that the community join together in a Day of Prayer on April 11, 2007.

I. PROCLAMATION:

A. PROCLAMATION PROCLAIMING APRIL, 2007, AS "CHILD ABUSE PREVENTION MONTH"

Vice-Mayor Jones read the proclamation proclaiming April, 2007, as "Child Abuse Prevention Month" in the City of Asheville. She presented the proclamation to Mr. Bill McGuire, who briefed City Council on some activities taking place during the month and the importance of preventing child abuse.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "D" and "E" were removed from the Consent Agenda for individual discussion.

At the request of Councilwoman Cape, Consent Agenda Item "C" was removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MARCH 27, 2007

B. RESOLUTION NO. 07-80- RESOLUTION AUTHORIZING THE MAYOR TO APPLY FOR A GRANT AND ENTER INTO AN AGREEMENT WITH THE N.C. DEPT. OF TRANSPORTATION TO FUND THE TRANSIT PLANNING PROGRAM

From Staff Report: Summary: The consideration of a resolution authorizing the Mayor to apply for a grant and enter into an agreement with the North Carolina Department of Transportation (NCDOT) to fund the Transit Planning Program.

The Metropolitan Planning Organization (MPO) Section 5303 planning grant is a grant of federal and state funds renewable annually to be used for transit planning. This funding is in the amount of $59,460, $5,956 (10%) of which is required to be a local match. This will continue funding that has been received in prior years, it is not new funding. The last agreement for this funding was signed in 2001 and NCDOT has requested a new agreement. The money will be used to partially fund a transit planner position and for staff training.

Since the City of Asheville is the lead planning agency for the MPO, the City must approve this grant.

The grant revenue and the match of $5,946 are currently budgeted in the Transportation and Engineering Department's budget.

Pros:

- This money helps fund an existing position.
- Approval allows $53,514 of federal and state money to be received for transit planning.

Con:

- Funding requires a 10% match ($5,956).

City staff recommends City Council approve a resolution authorizing the Mayor to apply for a grant and enter into an agreement with the NCDOT to fund the Transit Planning Program.

RESOLUTION BOOK NO. 30 – PAGE 301

C. BUDGET AMENDMENT TO AUTHORIZE THE PASS-THROUGH OF FEDERAL TRANSIT FUNDING TO HENDERSON COUNTY

This item was pulled from the Consent Agenda for an individual vote.

D. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA CORNERSTONE CONSTRUCTION FOR THE RENOVATION TO THE PUBLIC RESTROOMS IN THE RANKIN STREET PARKING DECK

This item was pulled from the Consent Agenda for an individual vote.

E. BUDGET AMENDMENT FOR THE RENOVATION TO THE PUBLIC RESTROOMS IN THE RANKIN STREET PARKING DECK

This item was pulled from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL DISCUSSION

C. ORDINANCE NO. 3457 - BUDGET AMENDMENT TO AUTHORIZE THE PASS-THROUGH OF FEDERAL TRANSIT FUNDING TO HENDERSON COUNTY

From Staff Report: Summary: The consideration of a budget ordinance amendment, in the amount of $303,700, to authorize the pass-through of federal transit funding to Henderson County.

The Federal Transit Administration (FTA) applies a formula each year to allocated federal transit funds to each Metropolitan Planning Organization (MPO). This formula considers population, population density and transit system performance. The same formula is used to allocate resources between Henderson and Asheville as was used by the FTA to allocate resources to the MPO. This directly reflects the contribution each system made to the federal formula that determines the total transit funding that comes to the MPO.

By this formula Asheville Transit is entitled to $1,324,300 of the $1.628 million in federal transit funds appropriated to the French Broad MPO by the Federal Transit Administration. Of the funds allocated to the Asheville Transit System, approximately $1,011,787 can be used to defray operational expenses.

In turn, Henderson County is entitled to $303,700 of the $1.628 million in federal transit funds appropriated to the French Broad MPO by the FTA.

The Asheville Transit System is the sole and designated recipient of all federal transit funds allocated to the French Broad Metropolitan Planning Organization (MPO). Therefore Asheville Transit will be the recipient of both systems' share of the federal transit funding and is responsible for passing Henderson County's share on to them, subject to the provisions of the Sub-Allocation Recipient Agreement approved by the council on March 13, 2007.

This action conforms with the City Council Strategic Operating Plan in Goal 2, Objective A, Task #2: Leverage outside funding to achieve multiple Transportation goals where possible.

Pro:

- Expended regional transportation opportunities to the citizens of Asheville.

Con:

- None identified at this time.

City staff recommends City Council approve a budget ordinance amendment, in the amount of $303,700, to authorize the pass-through of federal transit funding to Henderson County.

Mayor Bellamy - Item "C" on the Consent Agenda, Councilwoman Cape.

Councilwoman Cape - I apologize that my glasses saw the "C" on our drive and thought it was the "C" agenda item. I was looking for the bathrooms.

Mayor Bellamy - I would just like to highlight that the City of Asheville is working with another partner, that would be the County of Henderson, to be able to provide some transit funds for them. So I'm really happy to have this on the agenda.

Councilman Freeborn moved to approve Ordinance No. 3457. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 301

D. RESOLUTION NO. 07-81- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A CONTRACT WITH CAROLINA

CORNERSTONE CONSTRUCTION FOR THE RENOVATION TO THE PUBLIC RESTROOMS IN THE RANKIN STREET PARKING DECK

E. ORDINANCE NO. 3458 - BUDGET AMENDMENT FOR THE RENOVATION TO THE PUBLIC RESTROOMS IN THE RANKIN STREET PARKING DECK

From Staff Report: Summary: The consideration of a resolution authorizing the City Manager to enter into a contract with Carolina Cornerstone Construction for the renovation to the public restrooms in the Rankin Street Parking Deck and the associated budget amendment in the amount of $117,330.

In February 2002, the public restrooms in the Rankin Street Parking Deck were closed due to continuous vandalism. Due to the lack of public restrooms in downtown Asheville, City Council directed staff to pursue the re-opening of the restrooms. In working in conjunction with the Police Department, Office of Economic Development, and Transportation and Engineering Department, the Parks and Recreation Department prepared bid specifications for the renovation. The construction will be done in accordance with the International Building Code and to standards equivalent to those of North Carolina Department of Transportation rest area restrooms, in order to keep the vandalism to a minimum. Estimated time of completion is the end of July 2007. Request for bids was distributed to various contractors. The following two contractors responded:

Carolina Cornerstone Construction	$108,630
Buncombe Construction	no bid

Carolina Cornerstone Construction was the lowest responsible bidder at $108,630. The bid process and Carolina Cornerstone Construction have complied with the Minority Business Plan.

The budget amendment includes the construction cost of $108,630 plus $8,500 for the necessary architectural design fees for a total of $117,330. The Finance Department recommends that funding for this project be appropriated from the City's general fund balance. Based on current year-end revenue and expenditure estimates, staff anticipates that this appropriation will not have a negative effect on the City's fund balance reserves.

PRO:

- This project will provide public restrooms to the downtown Asheville in accordance with the current input from the Downtown Commission and the Downtown Social Issues Task Force.

CON:

- The City of Asheville will spend $117,330 for this project beyond the current capital improvement budget.

The Parks and Recreation Department recommends City Council approve a resolution authorizing the City Manager to enter into a contract with Carolina Cornerstone Construction for the renovation to the public restrooms in the Rankin Street Parking Deck and the associated budget amendment in the amount of $117,330.

Mayor Bellamy - Councilman Mumpower, did you have a question?

Councilman Mumpower - Yes, questions of staff. Mr. Richardson, are you going to be the point of contact on this?

Assistant City Manager Richardson - Councilman Mumpower, I believe we've also got with us folks from Parks & Recreation staff as well as Bruce Black from Transit.

Councilman Mumpower - Mr. Black would be great then. A couple questions. Frankly, this one needs to be highlighted anyway because we are creating something we haven't heard in a long time, at least not functionally had in a long time - that's a bathroom downtown and the successability of pretty much anybody who wants to treat it properly. I wanted to clarify a couple of things. The problem that we've had in the past with a bathroom at this location is that it was vandalized, and abused, mistreated in any other way imaginable. My understanding this is designed, built, for where it's low vandalism potential and then there is some other safeguards for building in place. The question is, what is those safeguards?

Transit and Parking Services Manager Bruce Black - It will be built to interstate standards, which would be a beginning to making it difficult to vandalize. The other safeguard in place is that it will be attended at all times when it is open.

Councilman Mumpower - And what now is the hours of operation?

Mr. Black - Right now the hours are planned to be from 7 a.m. until 6 p.m., six days a week.

Councilman Mumpower - And the City is paying to have the bathroom attended to?

Mr. Black - Yes, sir.

Councilman Mumpower - Mayor, I'll make a motion to approve. Can we do these agenda items together, Mr. Oast?

Mayor Bellamy - Yes.

City Attorney Oast - Yes.

Councilman Mumpower - Approve the agenda items D and E. Thank you Mr. Black.

Mr. Black - You're welcome.

Mayor Bellamy - Is there a second?

Councilman Freeborn - Second.

Mayor Bellamy - Any further questions or comments? Councilwoman Cape.

Councilwoman Cape - Mayor Bellamy, I would like to apologize. My glasses were crooked and this is the one I wanted to talk about also. I saw the "C" on the top and so I apologize for that. I guess my real concern comes from the fact that I know we need bathrooms downtown desperately. Last week we sat with real estate investors, or consultants, about the possibility of selling this building for redevelopment. So, the question that I have is that $117,000 is a lot of money that we will be. Is this the only option since we have put this on the list to get bathrooms quickly. We haven't been given a price of the portable, or the bathroom stations, that could be moved to someplace else. Do we have a staff member who can give us some information on the cost of those enclosed stations that would maybe stay open past the renovation point?

Economic Development Director Sam Powers - We may need to do some kind of team effort on this Councilwoman. In the initial research, we looked at a number of options, including some of the self-contained units. We did gather some cost information on those. I think the ultimate decision at the time was the most cost-effective method, was to go ahead and renovate the existing space into the standards of interstate accessibility and vandalism-proof. What we would be looking at is at a minimum of probably several years before, if that piece of property that

the bathrooms are going to re-open in, was offered for sale and someone submitted a proposal that would be acceptable and that the City would want to pursue. By the time all of the qualifications were evaluated and a proposal evaluated, I think we are probably talking a number of years, and so, we would get several years of life out of that facility and then ultimately anything that would replace that facility, I think would be designed in a manner that we would still be able to have public restrooms available. I think it's clear that is Council's goals. So, we do have some short-term costs involved. I think in the long-run the public benefit and the cost would be recouped whichever way we go. If it is still a desire of the Council to get some other options, like these self-contained units for other places, we can do that. Stephanie, do you remember off the top of your head in a ballpark figure what we were talking about?

Urban Planner Stephanie Monson - Around $100,000.

Mr. Powers - A similar cost.

Councilman Mumpower - I think you raise a good point. This is one of what, one of four properties that have been targeted for sale and I'm glad you raised the concern.

Councilwoman Cape - I mean, I know for myself when we talked about opening these bathrooms, I thought we were talking about a $40,000-$50,000. I didn't think we were talking about a $100,000-plus endeavor to open two bathrooms. And I apologize that I didn't bring this to our attention sooner. But, with the cost, may I ask the question, what is the turnaround delivery cost on a $100,000 stationary unit? Is that something you can get and have delivered in the same amount of time that we could have these two units renovated?

Mr. Powers - I can't answer that question.

Councilwoman Cape - Are they stock items that people have?

Ms. Monson - There are two different companies that make those units and I would have to do more research to answer that question.

Councilman Mumpower - The comment that folks who get this property are going to be supportive of a public restroom on that side, when you look at the dollars involved, I think there is a big question mark around that. I'm glad you brought this up. You're making others feel more strongly about it. But I'm going to withdraw my motion on that basis, because I don't believe we should invest this many dollars on something that may have a short shelf-life.

Councilwoman Cape - I want bathrooms sooner than later. But if for the same amount of money we can order some and have them dropped off a truck and put in place in two or three weeks, I sure would like to have the option of having that choice.

Mayor Bellamy - Councilman Davis.

Councilman Davis - Mr. Powers, let me ask. How far along are we on the process? I know we are a good way into it at this point as far as. Have we signed a contract or anything for the bathrooms?

Mr. Powers - No, sir. And Mr. Orr is here and can answer those specific questions. But we have not. By the same token, we're not into that process with the potential properties either. There has been no decision about whether they would be made available and at what time. So again, as we were looking at this bathroom option, at the time, that appeared to be the most cost-effective over a period of time, and this other potential option for real estate redevelopment came up after we were well into that process. It's certainly a valid concern. I think the access from the Rankin Street Parking Garage to Haywood Street would be reserved and would be available no matter how the property is developed in the future. That is a reservation that the City can make.

Mayor Bellamy - Councilman Davis.

Councilman Davis - I was just heading there with that comment. I agree with Councilwoman Cape. I think that sooner than later is better for the bathrooms, but I see that, in my opinion, there is a great opportunity here because even if we sell that building, we would probably maintain that access. I also feel that there is an opportunity that we could use that hallway for other things as well. It might provide some income. Councilman Freebom and I and the Mayor were talking about the possibility of stalls or booths in there that might generate some income as well. I think we desperately need the bathroom facilities and this one is moving along at a pretty good speed. I hate to derail that at this point. So if Councilman Mumpower has withdrawn his motion, I would move that we accept Consent Agenda Items "D" and "E".

Vice-Mayor Jones - Second

Mayor Bellamy - Councilman Freebom.

Councilman Freebom - That is what I was going to do.

Mayor Bellamy - All right. And I do want to add this comment that, first, are there any other comments from Council? Councilman Davis you really said what I was going to say in that regardless of what is going to happen with the offices over there, that we will have to maintain access for the corridor to get to the Parking Deck, which is were the bathrooms would go. And, ultimately people want restrooms downtown and I think that it would be hard to take something that can come off a truck and place it anywhere downtown without a visible fight. I think this is a great alternative to be able to solve a solution that has been a problem for a long time. And I think that the company that we would want to sign a contract with will do a phenomenal job. I think the cost has to do with the quality of development that we want. This isn't just what we had before - just some stalls and a toilet. We've asked that they be self-contained and be able to address graffiti and vandalism in a way that it is sustainable for years to come. So I think that we are going to have to pay for it. Councilman Newman.

Councilman Newman - From your standpoint, you think if we put the restrooms in this facility, in the hallway, but we do decide to redevelop that property that it's very likely that where these are located would not be part of the redevelopment - would not be affected by the redevelopment and still have a useful lifespan for years and years to come, even with that property redeveloped? Is that what you're saying?

Mayor Bellamy - That's what I'm saying.

Councilman Davis - I don't know that we know that, but there's a good likelihood that it would be built around.

Councilman Mumpower - But to development that property, would you not have to tear it down?

Mayor Bellamy - I'm not sure.

Councilman Mumpower - I think you know you'd have to tear it down and if you tear it down then you destroy that point of access so it creates some real limitations on it.

Mayor Bellamy - That would be part of the process that if they tear it down then they have to put it back and it won't be at the City's expense.

Councilman Davis - And it's very possible that that would be in the RFQ. And I suspect that the value of that building might also include that restroom that has been improved. So we would have the option of accepting or denying in this process.

Mr. Powers - I think any development agreement for the redevelopment of that property could contain any stipulations that Council was interested in. And if that was, throughout any redevelopment process, that the redeveloper provide public restrooms, that certainly could be a part of the process.

Mayor Bellamy - I think it would not only be restrooms, it would have to have adequate access to the Parking Deck. Because I think we would not want to have a parking deck where we are used to having that connectivity and that connectivity gone away. Councilwoman Cape.

Councilwoman Cape - I would just caution us that redevelopment of a site like that could involve temporary lack of access through there. We would have access on the other streets. And my limited knowledge says that likely the bathrooms would be destroyed, even if they are rebuilt and put back there. The ones that come off, you know, these stands are not like port-a-johns. They are constructed, urban bathrooms that would be lasting through the renovation process. And that's just my concern too. It was just brought to my attention sitting there asking them to redevelop this building and then seeing this. This is not an insubstantial amount of money. Especially if we've got something that could sustain through the process for a similar amount of money. So I do have reservations that that will stay in place through the design process. And then we will be out of bathrooms at that point in time. As far as where we can put them, we've got spots in Pritchard Park that we are looking at re-designing. We also have a spot right next to the Rankin Avenue Parking Deck. There are places downtown that could be easily accessible on City property for the location of something like this. Those are just my reservations and I support getting bathrooms downtown 100%.

Mayor Bellamy - Councilman Freeborn

Councilman Freeborn - With these off the truck stalls, do they not require plumbing?

Councilwoman Cape - Of course they do.

Mr. Powers - They do.

Councilman Freeborn - So we have to put them in a place - we have to pay for plumbing. The logistics of getting something like that in place is going to take us a lot longer and it probably - I would even say, at the rate we're going on this, redevelopment of this property would happen before we would have the port-a-johns in place.

Councilwoman Cape - They're not port-a-johns.

Councilwoman Freeborn - Okay. They're great looking port-a-johns, but anyway, I really think, I know this is a lot of money, but this is one of the highest request needs for downtown right now. And I think we would really be putting a lot of people off by not going forward with this, thinking that we might potentially redevelop this building sometime 3-4 years from now. I understand your concern and I think it's well placed, but it's kind of silly for us to not take urgent action that is needed now because we might do something in the future.

Mayor Bellamy - Councilman Newman.

Councilman Newman - I guess I would just say too that I was just down in Georgetown, South Carolina, last spring with a little trip with my family and Georgetown is this quaint little town, historic downtown, and they had one of these facilities that we are talking about. I don't think I'd ever seen one before, but it really works very well and fit well into the historic downtown. I am

persuaded by the potential cost end, but more so the fact that we may again lose the public restrooms downtown because it sounds like we are going to get people coming to us with a specific recommendation to do a Request for Proposals to redevelop this property. So it just seems like we are planning to do two different things at the site that are going to be, at least for a period of some time, are going to be incompatible. So anyway, I would support looking at this other option as well.

Mayor Bellamy - So it sounds like we have a motion on the floor and request to staff to get us some additional information regardless of the motion.

The motion made by Councilman Davis and seconded by Vice-Mayor Jones carried on a 4-3 vote, with Councilwoman Cape, Councilman Newman and Councilman Mumpower voting "no."

Mayor Bellamy - There sounds like there is enough support for us to get additional information on additional options for additional restrooms downtown. It never hurts to have too many restrooms downtown.

City Attorney Oast - Mayor, because that last motion didn't receive a 2/3 vote, it needs to come back.

Councilman Newman - Then can we re-vote on it again because I'll change my vote if it means that things can move forward. If we're going to do it, I'd just assume we go ahead.

Mayor Bellamy - Actually since you were on the negative part, somebody on the positive part of the motion would say that they would like to re-vote again, we can re-vote again. Councilman Davis, Vice-Mayor Jones or Councilman Freeborn, would you like to re-vote?

Councilman Davis - I'd like a re-vote.

The motion made by Councilman Davis and seconded by Vice-Mayor Jones carried on a 5-2 vote, with Councilwoman Cape and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 303

ORDINANCE BOOK NO. 23 - PAGE 303

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE DOWNTOWN COMMISSION ANNUAL REPORT

Urban Planner Stephanie Monson - Thank you Mayor and members of the Asheville City Council. I'm Stephanie Monson with the Office of Economic Development. As staff to the Downtown Commission I want to thank you for your consideration this evening and I also want to give special thanks to Jan Davis who is a full fledged member of the Downtown Commission. I also want to thank the Mayor for coming to the Downtown Commission's Annual Retreat last month. She gave a lot of precious feedback regarding the possibility of a master plan for downtown Asheville. I want to share two things with you tonight. The first, you may have already seen. We sent it to you in February. It is actually the annual report of the Commission. The second thing is actually just an introduction. We do have a new Chairman of the Downtown Commission, Mr. Pat Whalen. He's going to come up and give a presentation to you tonight.

Mr. Pat Whalen, Chairman of the Downtown Commission - I'm Pat Whalen, Chairman of the Downtown Commission. Thank you for the opportunity of speaking to you. The Downtown Commission is excited about the work you have assigned to us because we believe downtown can help the City face and deal with a lot of its challenges. A little history is in order, I think. Your

Downtown Commission was originally called the Asheville Revitalization Commission. It was called that for a reason. Your downtown was dead for 30 years. Our motto, as represented by downtown, was "that will never work here, don't even try." There were years of efforts to resuscitate downtown. One of the things we tried was aluminum - lots of aluminum and that didn't work. We also considered a giant downtown mall. And sensibility voted that down. Other communities talked about doing festival marketplaces, pedestrian malls and big bang projects like that. We did our own big bang projects, which were great projects and brought a lot of hope to downtown, but didn't generate a lot of people. Along with those big projects, local government provided great leadership in the 1980's and early 1990's, approving liquor by the drink for restaurants, the City approved sidewalk dining; the City built parking garages without which we wouldn't have the prosperity we have today; and keeping major public buildings downtown, which has been a big part of downtown's success. Local entrepreneurs responded to those efforts by government, but we were still missing people. That was then. Now we have a great livable downtown. We've discovered the missing piece which was having people live downtown, doing what downtown residents do. People responded to the opportunity and downtown became the fastest growing residential area within the City limits. In 1990, there were just 7 residential projects downtown and in 2005, there were 27. Obviously there are many more on the drawing board. People were tired of Anywhere, USA, and they responded to the small, diverse local businesses we have in our downtown and the pedestrian-friendly, eclectic place which our downtown is. People returning generated excitement and people built new buildings. Why does downtown matter to the rest of the City? There is good news about downtown and how does it matter to the rest of the City as well. The downtown is the beating heart of our community. It is also how outsiders judge us and it's a reflection of how we thing of ourselves. Studies have been done showing the way downtown goes directly correlates with the whole region's economic health. We've seen it here and in 20 years we've gone from "that won't even work here, don't even try" to being named over and over again in the Top 10 and Top 20 lists for the country. Would any of that be happening if we still had that boarded up, abandoned downtown I showed you in the earlier slides. Numerous other studies have shown the direct connection between downtown vitality and prosperity for the region. There is a simple dollars and cents calculation as well. We did a study of the taxes generated per acre by various kinds of real estate use, ranging from undeveloped property in the County, which is generated at $30 per acre to City residential generating near $4,000 an acre. Biltmore Park - $4,000 an acre and up to the Asheville Mall generating $18,000 an acre. When we studied what downtown was generating, we had to change the scale. You see the Asheville Mall at $18,000 an acre. The entire CBD is averaging over $32,000 an acre. The City Center close to $60,000 an acre. And, going up to downtown mid-rise projects, really over 10 stories, can generate over $1.5 Million an acre annually in taxes for the City, County and our schools. That translates into 2 acres of downtown mixed-use generating the same tax revenue to the community as the 64-acre Asheville Mall. Or, one 3-acre project in downtown generating double the tax revenue of Biltmore Park's 183 acres. By 2025 our community is supposed to add 80,000 people. And if they move into downtown, they can be accommodated in approximately 350 acres, which is the size of that little CBD in the center of that map, or they can take whatever color your projector has converted that big splotch in the middle of the northeast corner of the County, which is over 68,000 acres. By citing people in our smart growth downtown, we also save on public infrastructure, we protect our air and water and conserve energy. We have an obligation as a community to be part of the national solution on issues like global warming and declining petroleum supply. This is how dense, urban development would affect our use of resources in this community if 80,000 people move here. This is how it compares to suburban development and the production of things like CO2, miles driven, gasoline used, and kilowatts consumed. I've talked about now and then - what about our future. On the Commission we feel like we have an opportunity, with good planning, for downtown to reduce the tax loads on our neighborhoods; conserve our land, air and water; help preserve our architectural heritage; improve our economy and job opportunities for our people; reduce unnecessary costs for infrastructure; and provide good homes for our people and good locations for our local businesses. But we may not be ready to take advantage of that opportunity. Our goals for the Commission this year are to (1) help the Council and the City develop an updated Master Plan for Downtown; (2) to complete our promised Phase 2 guidelines

for the Downtown Design Guidelines which would help us meet those goals I discussed on the prior slide; and (3) to provide better communication and service to Council on pressing community issues. The last master plan for downtown was done in 1922. There are many vacant lots and underutilized property in downtown. The City has dozens of acres of property which could contribute readily to how downtown and the community develops. We have specific questions we need to get answered, which are not currently answered by any of our planning documents and would help us accomplish the goals I talked about earlier. We may need more staff resources to meet these challenges I have discussed. You can see in 1991 we had 5 staff equivalents when the downtown was valued at $104 Million. Now in 2007 we are down to 3/4 of a staff equivalent and we have $552 Million of value in our downtown. The new downtown buildings proposed for 2006-2007 equal the tax value of all the downtown buildings that have been built over the last 100 years. We need a downtown master plan which will require a master plan consultant. We need to plan our physical environment to help deal with social issues, which we are all familiar with. And help Asheville's economic development to where people have good jobs and can afford reasonable livelihoods. The cost of hiring a consultant would help us plan the Center City we would like to have for the next 100 years would cost less than one moderately priced condominium downtown or less than one year's taxes on a well-planned 1/2 acre lot downtown. Downtown's vitality presents an unprecedented opportunity for this community. We would like to help City Council take advantage of that opportunity. We believe Asheville can be a model for the nation of what a small city can be.

Mayor Bellamy - Thank you and well done in 10 minutes or less. Thank you so much for that. Council, any questions for Pat or Stephanie? And we'll let Councilman Davis start since he is liaison.

Councilman Davis - Let me make a small statement before we begin the questions. First of all, Pat, great presentation. We were all worried about that with that many slides. It was very graphic to look at the buildings we all remember downtown and the aluminum fronts and stuff like that to see what we have today. This Commission works very hard and I think we had a very good retreat. There are some Commission members in the room and I would like for those folks to stand if they would. These people are very dedicated and they meet on a very regular basis and they form task forces. We appreciate the work that you do. And sometimes with commissions as often as commissions do, they feel a little under appreciated and a little over worked. And these people are doing a good job and they care about it. They love the downtown. When we came through our retreat, there was a little bit of angst. I think there is always a little concern when we start asking for consultants at this day and time, but I think Pat very graphically points out that it's a fairly inexpensive price to pay for something that we've only got one shot at. I think that's what his presentation is saying here. I've very reluctant to be a person who advocates consultants, but the realities are that we don't have the staff to make this City a better Center City. We react instead of being proactive. I appreciate what Pat said and appreciate the way you're delivered it and I think you make a very good case. With that, questions.

Mayor Bellamy - Councilwoman Cape.

Councilwoman Cape - Pat, I've very supportive of us doing this work. What do you think the time span is? What do you think the process looking like?

Mr. Whalen - Depending on when we get the go ahead, obviously, because we need to create a structure for what we expect from a consultant. This would be a public process. Here in Asheville we do very exhausting public processes which can be very helpful to the end product. I can see putting out an RFP for a consultant and structure that on the Commission with input from staff and City Council. I think that's something that can be done in a 3-4 month period. The process itself, again, we would want the consultant's input on that, but it could take anywhere from 6 months to one year. We really do, it has been since 1922, we have amazing changes in the community. We have a Center City Plan that was done by staff back around 2002, 2003. Back when that Plan was done, nobody projected things like that slide, where I said in two years

were going to equal the tax value of everything that has been built in the last 100 years. Also that Plan depends on a Downtown Development Office keeping track of what's happened to meet the changes and there is no Downtown Development Office anymore unfortunately. So, we kind of have a new day and need a consultant to do that time period. I can't tell you off the top, but I'm obviously saying something like 10 months to 1.5 years. That is the period I'd expect.

Councilwoman Cape - And at the end of that 10 months to 1.5 years, the product of what we will receive, will it be just a plan or will it have - I guess this is one of the things we can decide - will it have components of, say, the forms, the ordinances that structure the plan. Will it be a framework for delivering the product of the plan or will it just be the plan and then we have to go through the delivery. How do we get the document to deliver the plan to us. Do you understand what I'm talking about?

Mr. Whalen - I do. And I really, I mean, my goal and my goal from talking to the members of the Commission, I think, are to get the answers to questions like these - specific answers to questions like these. I don't know whether that will include forms. It's really more of an issue of how we get these things in our downtown which I hope all the community will agree are the kinds of things you want in our downtown. And what we need is a specific roadmap for how to accomplish that, particularly as it relates to public property. I'm not talking about starting to have a million new zoning regulations for downtown. I don't think we need that. There is an issue for how the public space is dealt with so it enhances and helps us accomplish these things in our community. The plan really needs to be very specific about how it recommends things to the City on doing those things.

Councilwoman Cape - So since we already have the Downtown District, one of the products that can come out of it is defining what public space, and what we want the public space to be. And then could that be formulated into the forms of an ordinance or something for the downtown area?

Mr. Whalen - Certainly, if I misunderstood you. When you're talking about forms, we clearly have to end up producing some ordinances. I know City Council loves to wrestle ordinances.

Councilwoman Cape - I would just hope that as we finish this, that would be part of the deliverable is that we would have a product that could be then put in place instead of taking another year to create the product. Because if we are looking at more buildings this year, we're already going to be behind by the time we get the product.

Mr. Whalen - I think all of us on the Commission respect the need for speed on this, as well as thoughtfulness, and that it does not become some never-ending process that doesn't produce a product which immediately starts impacting how our downtown grows.

Councilwoman Cape - That would be my input on what I would like to see.

Mayor Bellamy - As we continue to question, I did want to highlight one thing for the members of the community who are watching, as well as for Council Members, that this presentation that we are receiving from the Downtown Commission is not everything they have done. They have given us their annual report and we get that monthly. The goal today is to hear what they want to do with their time for the City of Asheville. And, as Council Members, they need to hear if that doesn't work, or that works for us, or these are other things we would like to see you take on as a Commission. The goal ultimately is that we are walking together - the Council and the Commission - in the same direction accomplishing the goals that we would like for our City. And so, it would be good if we could give good feedback so we will know the next steps that we need to take to say what we want to happen, happen. Councilman Freeborn.

Councilman Freeborn - I really want to thank the Downtown Commission for bringing this forward. I think this is pretty timely. When I talk with downtown developers, a lot of what is being asked here is concerns they have. How do we address the amount of development that we are going to see in our downtown over the next few years? How do we address the public infrastructure aspects to that? And how do we do this in a coordinated effort so that it is not just hodge-podge development that most people may feel dissatisfied with by the end of the day? My question to the Mayor and Council is, at what point in time do we want to go ahead and show our support and get this process going?

Mayor Bellamy - I think articulating that support to move it forward will help me dictate the process. Like next week we are going to talk about the budget and where we are. So, we are going to do some one-time capital expenses, i.e., invest in this, or a consultant, and/or other things, but we need to make sure that staff knows some of the things we have in mind or would like to see on our list of potentially being supported by some of the successes we've had. Or, we can do it in a budget process which starts in May which is a little more detail and we can look at everything together. So, I just need to know what Council likes or doesn't like or doesn't want to do so we can lay out that process. And so I have one atta-boy and I know Jan is an atta-boy.

Councilwoman Cape - Mine was an atta-boy.

Mayor Bellamy - Okay.

Councilwoman Cape - Mine was an atta-boy and there are a couple of other things that I would ask as we do this RFP. What would be the items that would encourage and incentivize people to develop downtown? What could we offer as a City for that kind of thing, or in the areas we want them to come to, rather than neighborhoods or out in the peripheral. And secondarily, we've got affordable workforce housing there, and that's really important, but we also need to maintain affordable entry level entrepreneurial places. What makes Asheville so unique is that we have home-grown businesses and we do not just want to be replaced by everybody who sees the golden apple from Gap, or larger corporations. So maybe looking at something like a formula ordinance would be good for downtown. Those would be additional questions.

Mayor Bellamy - Councilman Mumpower

Councilman Mumpower - Mayor, is your question whether we want to invest in a consultant, or?

Mayor Bellamy - Yes, that will help. Say if you don't want the consultant, do you feel like it can be staff driven and you would like to see more staff. I need to know what is on your mind as far as I like the idea, but the Commission members should do all the work. That would help guide the next step for us to put before Council again.

Councilman Freeborn - There are two things that I think we really need to spend money on.

Mayor Bellamy - Let's let Councilman Mumpower finish.

Councilman Mumpower - That was the end of my comment.

Councilman Freeborn - Going off what Councilman Mumpower is saying, two things we really need to spend money on, and I know they sound kind of weird because just like Jan was saying, we hate to spend money on studies, but if we spend our money on a study that produces a result and a plan that we can actually follow and provide good leadership in developing infrastructure in a community, I think that's what we need to spend our money on. A downtown master plan - we need that. We also need a new UDO. I think the community has voiced that

both on the development side and our citizens. Those are two things we need to spend money on this year. And I really hope we can find the money for both of those.

Mayor Bellamy - All right. Councilman Mumpower.

Councilman Mumpower - It would be hard to argue with the success of our downtown. I think you can't argue about where that success came from. Some of it we had hands on and some of it - a lot of it - we did not. We're not the only city in Buncombe County or Western North Carolina that has succeeded. About every one of them are. Hendersonville, ..., Weaverville. They've all gone through essentially the same renaissance that we have and have essentially the same period of time that we have - smaller scale. But economics and the natural urban flow of this world that we live in played, to my way of thinking, a bigger part in our success than anything. The point of all that is, I don't think we have a good history of take consultant's reports and turning them into action. You are talking about a lot of money. If you look at the big pool of money, it's a small piece. But there are lots of hands reaching into that pool of money, wanting it for various good and maybe not so good things. So I would not speak in support of investing monies on consultant dollars at this point. If we can narrow our focus down a bit. We've been there before. We've done things, I recall from my experience, and I know this gentleman does and others. As you illustrate so well in your slide presentation, we've created these great things that people didn't come to. I'm not in support of creating new reports that lead us down places of marginal value and would rather see us narrow our focus before we consider spending city dollars for that purpose. Thank you Mayor.

Mayor Bellamy - Councilman Newman.

Councilman Newman - Great presentation. Thanks for everything you are doing. I guess I would also. I mean there is a whole bunch of different things in there, on your list of things to look at, and each one of them - or at least many of them are - you could have a pretty intensive study on each one of them. I mean, I'm very interested in the question of how can we create a world-class mass transit system for a small city. Really great question. That could be a study in and of itself. I do think that there are several of these items where there are some separate analysis going on related to them and we have hired and spent a lot of money to hire folks to help us evaluate the City-owned property. And the conversation we were just having about public restrooms, we are getting some initial information back from that. There has been a lot of thinking about the parking and there are several parking projects that are getting underway. And it looks like we are going to try to do one on some property we own. I'm open to doing what you are talking about, but I wonder if it could be narrowed down a little bit more. There are several of these items, maybe there are some other commissions, maybe like the Transit Commission who should take some of these pieces and develop it. Maybe there are some of these other things that need to be studied, maybe other folks are studying. We've got this Energy & Environment Commission and they are really looking hard at the green building sustainable piece. I just wonder, since there are so many things on the list, that maybe the Downtown Commission should do some of them, but it looks like a lot of work here and I wonder if it's biting off a little bit more than one commission needs to. There are two things I am real interested in getting folks thinking about. We know our community is going to grow. I know your presentation makes a great case for why encouraging much of that in the urban core as possible, if we are going to grow - that that's a great place for that to happen. So I definitely am very interested in, you know you talk about how many people could fit in there and how much growth have we really taken downtown. That is one piece I really would like to see more thinking on, more modeling on. How much infill development can our downtown really absorb? And how much as a community are we willing to absorb in the downtown? I think those are questions I don't see anybody else really wrestling with those questions, and so I think that is one piece, speaking as one member of Council, I really hope you will consider. I know you are wrestling with it and would love to see more drilling down on that. Just one other piece. I know that this is going to be an item that is going to be, we're going to hear a presentation about in I forget which Council meeting it is but in the near future, we are going to hear some feedback from people like the design center. Those folks who are looking

at the I-26 Connector and how that interfaces with the downtown. And I'm sure a lot of your members are involved with that as well. I think that is just one other piece that I think is extremely vital and extremely time urgent because there are decisions being made right now and that are going to be made in the very near future that are going to create great opportunities for downtown or not. So, I don't necessary have a question, but I wanted to share that thought of how that process interfaces with your downtown - if there are ways to have synergy on that, I think that is a vital question for the future of downtown.

Mr. Whalen - Can I interject a response at some point, without interpreting the flow of the Council?

Mayor Bellamy - You go right ahead. That's quite all right.

Mr. Whalen - In terms of Dr. Mumpower's point, I do want to be clear that we are not talking about hiring a consultant to come in here and produce a master plan for downtown. As a consultant's job. We really want a planning consultant to help the Downtown Commission and our community produce that plan. So I don't see this as a consultant's product, I see it as the community's product. In terms of your points, Councilman Newman, the issue of all these other commissions doing work and the design center. As far as we're concerned, from the Downtown Commission, those are wonderful resources to be a part of the process. We don't intend. This isn't our baby, this is the City of Asheville's baby and all the people who live here. We want to include those people. The design center could be a big part because a lot of this is talking about our downtown design issues. And in terms of transit and the things you seem are a lot to bite off, they are a lot to bite off, but all we're talking about however is the way we're going to deal with those issues in the Center City area. And obviously we want input from people who are wrestling with those things on a city-wide or regional-wide or county-wide basis as well.

Mayor Bellamy - Vice-Mayor.

Vice-Mayor Jones - Just short and sweet. Echo everything being great about the presentation and powerful frankly in terms of the environment and our future. I guess I saw that the investment in the consultant would be kind of this orchestrating of the resources that we already have and maybe leading them to deeper questions based on their expertise. So I don't really see it as an either/or. I see it as kind of a coming together. I am very supportive. I think we should be clear that we are not talking about a study, we are talking about a plan. It's a different situation. I also will be the first one to jump out there and say that I'm hoping in the budget process that we do look at increasing some staff for this office because I think there is a lot of wheels that are being spun and I'm wondering that if a piece of those we could be a lot more efficient with a little more investment in staff. If you just think of all the things that have come before us in the last few months in terms of downtown social issues, you know - the cleanliness campaign, and on. And we almost back-tracked today. After nine months about talking about these public restrooms, I really would have jumped straight over the dais had we done that, and I think you brought up good points. But I wonder if we had a little more investment in staff if we wouldn't be kind of recycling these questions up here, because this is not the best place for those kinds of operational conversations to be. Painfully worked out. So, I'm on board for the consultant and I hope we can get a good deal on it. I hope we can get started soon and would like to really look at getting some additional support for the Economic Development Office downtown. I will say too, that, I wasn't here to see all that, so those were powerful slides to see because I didn't experience that. My Asheville experience has been all what we see now. I'm relatively new to the area. But I do think that we owe some tribute to some people, and maybe there is some forum that we can thank those folks. I know Leslie Anderson was Downtown Development Director during a lot of this and there are some people in the audience that had a lot to do with downtown. Julian Price had a vision and there are names I don't even know that I think we probably need to recognize - I know Roger McGuire. I didn't have the privilege of knowing him either. So, as we think about going forward, I think we also need to recognize the people that have kind of launched us on our way.

Mayor Bellamy - Okay. I think before I call on Councilman Davis you brought up a good point about celebrating those who did help with our downtown. I think it's important to point out that Leslie Anderson did work for the City and she was very hands on at that time with the administrative offices over here and Doug Bean and the vision for downtown. And I think having that additional staff that could hold the hands of developers to be able to address the concerns of the community dealing with the transit issue, because at that time, the transit station that we have beside the Post Office was actually at Pritchard Park. So, we talk about issues with Pritchard Park, but there were significantly more issues at Pritchard Park at that time. And so, when we had the budget cuts in early 2000, we had to dwindle the staff downtown in the Downtown Development Office and that is what happened. That is why you saw that gradual decrease, thinking that eventually we would ramp up here at City Hall, but we've kind of stayed stagnant up until recently. So you do point out good points and I have that on my list to celebrate. Councilman Davis.

Councilman Davis - Lots of great points have been brought up and I think that it can be summed up very well from where Councilman Newman was coming from on Page 58 of the report. It's hard to see on the projection screen. But, the former Chairman, who has just recently stepped down - Peter Alberice - is in the room, came up with this flow chart. And it really distilled what we were talking about. This thing came up at the retreat and we started looking at it and the idea, very clearly, suggests that a master plan can be developed by using a consultant to incorporate these principles - the economic development end of it, physical environment and social issues. These are things we are wrestling with. It's too big to bite off by a volunteer commission or even to enlarge our staff. So, we felt like clearly the best way to do this would be the drilling down of what Brownie is talking about by the public, with the consultant at the helm. Because this is precious stuff and has organically grown over the years. This is stuff that happened because the good people, and a lot of them on this Commission, made an investment in the downtown and have brought it to where it is, but we are running out of those opportunities. And this is the point in time where we as a City are starting to look at not selling off public land, but perhaps leasing it or making it available for public/private partnerships and will have a great deal to do with the way the City looks in the future. That needs to be incorporated into what is going on out here with the private sector. And we have social issues, large things that are outlined and bullet-pointed here that this is just a big-ole project that needs to be approached sooner rather than later. And I think the cost of this depends on the scope of what we are looking for and I would hope that when we leave here this evening, we have given staff the idea of what we need in the RFQ to move forward with. The scope of what we are looking to do and what we are hoping to accomplish. So, I think it's real positive stuff and I think for anyone to give a big nay-say is not giving good thought to what needs to happen in this City in the future. We have limited resources out there to use and if we make wrong mistakes we are seeing big buildings come before us all the time and I think, if they build them, will they come? That's a big question at this point. I think we need to have some direction greater than we are.

Mayor Bellamy - Council, it sounds like there is enough to move it forward. How about the next process would be for the Commission to really take what they have heard from Council and focus it and go ahead and take it to the PED Committee so you can help with guidance and have Council input and then we will go ahead and put in a process for the funding, and look at some of the pricing. Councilman Newman.

Councilman Newman - What is a moderately priced condo?

Mr. Whalen - A moderately priced condo would be between $200,000 - $300,000. We don't want to build an expensive condo, that would be a mistake.

Councilman Newman - I would just say that is a pretty big sticker shock for me. That's a lot of money. I would like to set some priorities and figure out if there is a more moderately priced condo on the market that we could potentially look at.

Mr. Whalen - We could buy a really, really cheap condo somewhere, but again, that 1/2 acre of downtown planned well pays for it in a year.

Mayor Bellamy - Thank you very much.

B. DISTRICT ATTORNEY'S OFFICE OVERVIEW

District Attorney Ronald L. Moore (presented Council with a packet of information) - I moved here in 1980 and watched the downtown change and it has been amazing, although the question then becomes do you become a victim of your own success, as you said. Whether it's your infrastructure or criminal justice system, which I'm hear to talk about. When you were talking about 80,000 more people in the next 20 years in our County, I just see what we are going to have to do over in the Courthouse. But at any rate, I sent some information over today. I did not put it on slides since I'm not that quite sophisticated. Next time I come, I will try to do that. But I do want to highlight a few things. There are 42 District Attorney's in the State. Buncombe County is a single county district. As of January, I'm allocated 13 Assistant DA's. And we've been very blessed to have gotten two this past year. We got a new judge so we started running another court to try to ease the crowding. The Fire Marshal has been visiting us over the last several months to tell us we need to do something with all the people in the hall. With all the people we are dealing with. We deal with tens of thousands of people on a yearly basis. We run anywhere from 3 to 8 courts every day. Today, I believe, we had 6 courts running. Tomorrow we'll have 5-6 running. So we are full at the seams and a lot of it is driven by population. The crime rate has gone down through the years. Asheville generally has a crime rate that is better than most of the towns in this state. You can't look at a one-year snapshot, you have to look at 3, 5, 7, 9 years. Because you could have 2 or 3 homicides, or whatever, that would change your rate over a one year period. I included a chart for you, marked Exhibit A, that shows a snapshot of the last 12 months, the number of people that have been sent to prison. It's the 8 most populous counties. Basically I took the counties with 200,000 or more people and then I looked at the population figures which are included in the back which I found on line. And you can see that we sent more people per capita than anyone in the state, amongst those counties. The state average was 322 and we're at 420. We sent twice per hundred thousand. We sent twice as many as Durham, for example. We sent more people, well we only sent 14 less than Mecklenburg County in the last 12 months. So we send a lot of people to jail. We send too many people to jail. We need more people to behave themselves. Deterrents are what we need, which I will talk about in a minute. We need more police officers to have more deterrents so that people won't commit crime. Then at the bottom of that sheet, I think you have received this before because I was talking to the Police Department awhile back about arrests and things like that, and in the Police Department's file you see our reports every year. All city and county police departments. I suggested to them that they look at comparing those per officer per municipality. And you can see that the City and County here are almost twice the average state-wide and they are better than any of these jurisdictions. So, we arrest a lot of people here. One of the things that I thought would be instructive, I was looking through a file and in fact a case we were supposed to try tomorrow, but the attorney has some illness and can't do it, is on Exhibit D. This is a typical drug arrest. Someone coming out of Pisgah View that we arrested that had ecstasy and mushrooms that wound up testing out. But you can look at this and see the amount of work for this officer who is assigned to the DSU unit put in. One, the observations he was doing. Two, the stopping of the car and waiting for back-up of the drug dog. The exchange he had with the person arrested. Taking him to jail. Processing that. Then writing this report. This is a very thorough report. A very well written report. This is not the only piece of paper he sent to my office, but it's pretty instructive. You can't go out and make an arrest every 5 minutes is the point I'm trying to make to you. I thought that might be of interest to you. The second document, Exhibit B, is we generally keep up with our habitual felons. We have a full-time habitual felon program that removes people who continually comes through court. January and February of this year, we sent 13 of them to prison. Trafficking, manufacturing (and that involves meth labs), in fact we sent one off yesterday. We sent 4. And then sexual assault, we dealt with 17. Fifteen of

them who actually went to prison. Two were put on probation. I've included a sentencing chart. A lot of people don't understand our sentencing system we have in this state. We changed it in 1994. Formerly all our sentences were in years You would give someone a 10-year sentence for breaking into a home and the concept back then, the criminologist said we need to give people incentives so that every day you serve on the front end you get a day off the back That would be 5 years in the middle. You could get extra time for working in the kitchen or on the road. So, when I first started practicing law in the 1980's, you serve 40-45%. So, if you got a 10-year sentence for breaking into a home, you would serve 4-4.5 years. By the time I became DA in 1991, because of the overcrowding in prisons, you were serving about 15%. So you were serving 1.5 year on a 10-year sentence. There was a public outcry about "you're lying to us, you're giving people 10 year sentences and they're back home in no time," so we set up a Sentencing Commission in this State that looked at structured sentencing, which is what we have now. You can see the sentencing that we classify our felonies A through I. And then you see columns going across the top and that is how many points you have. Basically, that is your prior convictions for the most part. So whatever class of crime, whatever column you land in, that is where the judge has to choose a defendant's sentence. Cases were fed into a computer and they can tell you in this State how many breaking and enterings we will have on an average year. How many cases of selling cocaine. How many forgery and utterings. How many homicides, etc. We have a lot of breaking and enterings. That affects more people directly than any other property crime. We have a lot of drug sales, drug possessions. So they fed it into a computer and so breaking into a home is classified at the lower end - Class H. Someone breaks into your home now, where formerly they could get 10 years, now they may get 6-8 months. And they will do all of the 6-8 months, but that's all they are going to do. Misdemeanors, down at the bottom, where we basically decriminalized misdemeanors, other than drunk driving or serious misdemeanor assaults. I know from time to time you pass ordinances here in town and those are Class III misdemeanors. You can look at the very bottom of the page and see what our legislature has said what happens with a Class III misdemeanor. Up at the top, where you see the letter "C" or "I" or "A", "C" is a community punishment, "I" is intermediate, and "A" is an active. Unless there is an "A" they cannot go to jail. So if you pass a misdemeanor Class III, unless you have five or more convictions, you cannot even go to jail and a lot of people we deal with, especially people who are itinerant, we don't really know who they are or if they came from another state, we will not be able to pull up their misdemeanor record. So a lot of times, we don't have the ability to give them a minute in jail. Sometimes when you have misdemeanors, I know that are of a concern to you about things that go on downtown. This year, we are paced to handle 4,000 cases in Superior Court. That is where we try our most serious cases. Probably another 1,000 in probation. So, roughly 5,000 cases. That is not people. That is about 2,000-3,000 people in that range. But we have 47 weeks of court generally. And so, you see we do 100 cases a week basically, which is 30-50 people. That is every week. Now if we have a murder trial that lasts 3-4 weeks, you can see that we have to catch up on that to stay our average. That is the kind of situation we are dealing with. We do 50-75 jury trials a year. Last week I think we had a couple of jury trials. This week we'll get one tomorrow, because of the sickness of the attorney we won't be able to do. We have a lot of programs that we try to defer people from going to prison, whether it's drug court, worker's check program, deferred prosecution. We're always looking for other alternatives. The jail today has 452 people. I look at the list every morning. It's probably designed to hold 375-400. Prison has 38,144 people in prison today. We are about to have a crisis in prisons again. We had one in the early 1990's. That was when we started turning people loose serving small percentages. The legislature passed a bill to build 6 prisons back in 2000. The last two went on line last year. They were all 1,000 bed prisons. We have 80 prisons. They hold about 38,000. We are very inefficient in this State on how we build our prisons. It came out of the depression era where prisons were employers in small counties. We have prisons that only hold a few hundred people still in this State. We don't have 1,000 prisons, except the newest ones. To build one of those prisons is $85 Million and to operate it is $25 Million. But there are no more prisons on line. The prisons next summer will be, if nothing else happens, will be 1,100 over capacity in this State. There is pressure on the legislature, there are bills introduced. I was talking to one of our representatives today. There is going to be pressure on the legislature to reduce sentences instead of being 6

months for entering into your home, it's going to be 5 months. Not because it's good public policy, but because unless they build some more prison beds, that is where we are going to be. So, the criminal justice system is in a mess in terms of the funds. Now everyone wants us to lock up everybody that comes to court, but it costs. The criminal justice system is expensive. If you want people to go to jail, then sentences don't need to be cut and prison beds will have to be built. If we don't do anything in our State, then we are going to have more people than we have room and there is going to be pressure for the legislature to let folks out. That is where we are. There is an article in there that is pretty good. And there are some other items in there. The bottom line is that we have a lean criminal justice system. Most places have one prosecutor for 10,000 people. In this State, it's about 18,000. But that's by design. If you give us more people and more courts, we will send more people quicker to prison. And that has not been the public policy of this State. But at any rate, I do want to brag on the police here. I know they get a lot of criticism from time to time. I've worked with them now for 16-plus years on a daily basis and I've been out at night with them for 16 years, in the middle of the night in housing areas. The DSU group is one of the best things you've done here. They are out everyday. And they are lying in the bushes, they are spraining their ankles when they are chasing people, fighting people. The report I showed you was written by one of the DSU people. It takes time, it takes energy, and it takes commitment, but it's a tough job. People are going to - as long as drugs come into this country and I'd say 90% are coming across the border is my observation based on what we have seen the last 4-5 years, we are going to have drug issues. And deterrents is one of the best today is getting more officers that are highly visible. We will continue to process what they bring to us. Our labs are backed up. The SBI lab we were getting reports 8, 10, 12, 14 months and now we are down to maybe 4 months. We have done so well in the western part of the State, when I went to a DA meeting a couple of weeks ago, the lab director from Raleigh said that "we're sending cases to you from Raleigh and Wilmington." They send 1,500 cases up here to be tested. And I told him I didn't think that was a very good idea because the lab personnel will have to go to Wilmington to testify and they will lose a day or two worth of work. That makes no sense to me. But those are the kinds of things we deal with everyday. But I do want to say the officers work hard and they do a good job here. Asheville has a good police department and they need to be supported and they need to be supported financially. Most of them have to work second jobs. They need to be supported with enough help to get the job done. Our City has grown. Our County has grown. And that is what I've observed. When we deal with so many more people in the justice system because so many more people live here. I wish I had more time, but I'll entertain questions.

Mayor Bellamy - Thank you so much. Councilwoman Cape.

Councilwoman Cape - Thank you very much. Part of the question I have, and it sounds like you said, first of all I want to know if you say we have a better crime rate. Does that mean we have more or less crime.

Mr. Moore - Less. Our rate is lower.

Councilwoman Cape - I must say though it really is a sad state of affairs that we send more people to prison. In my heart, there are children, many of them, that have gone in the wrong direction and so it is a larger social issue than just putting them in prison that we have to look at addressing in a more constructive way, hopefully. And that's up to us to start being productive with how we help kids stay in school. All of those things. How they have hope outside of what they have right now. Go ahead.

Mr. Moore - The three themes we see everyday is the lack of education (people's lack of job skill), drugs and alcohol, and peer pressure. And a lot of those relate to the young people as they are coming up and the directions that they take. I had to go up and handle a matter in juvenile this morning. This kid is 16, so he is now out of juvenile if he commits more crimes. He was going to Swain recovery. He had a drug and alcohol problem. I sat there and talked to him and his momma and his attorney for about 15 minutes in the back room and said "look, you're on

the wrong path. I see how this works. This is your last chance, or you will spend most of your adult life in prison."

Councilwoman Cape - You know I sit on a lot of economic development boards and the conversation exists that we have people coming here that want to hire people. We have good jobs that people can have if they stay in school. And so it is incumbent on all of us to help kids understand that and help see that there is an opportunity for them, other than fast food job, or a life of crime. The thing that I am curious about and have had some conversations about people and would like to have more conversations are the ideas of alternative sentencing processes that have. I know the drug court is one and it works real well. But we have some of these misdemeanors. I'm a part of the Police and Citizen Advisory Committee also and we had a presentation by the Police Chief one day and he said one of the hardest thing is when there is no consequences. The police stand in the face of crimes all the time and people are almost like, essentially spitting on them, like who cares, what's the big deal. Nothing is going to happen to me. As a mother of a teenager, I know there has to be consistent consequences. If you're going to have laws, there has to be some consequences. The consequences you have to offer are eroding because of the pressures. What are the options for this community? I know in other places they have citizens courts, not courts like vigilantes, but where there is community consequences. If you are a consistent litterer, you spend time picking up. First of all you come to grips with your part of this community and you face your peers and then you spend a lot of time picking up litter. What are our options? What are other things we can do as a community?

Mr. Moore - I've always wanted a pile of cow manure outside the Courthouse, you can move it from one circle to the other, but I didn't think you'd let me get away with it.

Councilwoman Cape - We have lots of little things that can be done.

Mr. Moore - I've probably talked to 200 kids a year and their mothers and their attorneys trying to decide what to do to see what alternative there is. I go through the night court line and will have some 16 year old who has done some reckless act and will talk to them and try to develop a sense of what is the appropriate thing. I will send them to wash fire trucks. We wash a lot of fire trucks in this town. But misdemeanors were so decriminalized. Formerly misdemeanors would carry 6 months to 2 years, but when we changed the system, we put it at such a low end, that there is not much of a consequence. The only people you can really put into alternative sentences at the misdemeanor level, are people who care about having a record. We probably put 600-700 people a year on deferred prosecution where generally first time offenders, low level crimes, if they will go and do community service, then we will dismiss their case. People who have been around crime, they don't really care about a low level misdemeanor because they know that the State of North Carolina does not treat it very seriously.

Councilwoman Cape - So, I guess I would ask that if we could partner in any kind of way. If the City of Asheville could be a partner in any kind of way in helping this situation of making. If we are going to have laws on the books, it's counter productive for there to be no impact to breaking those laws.

Mr. Moore - I was on the Sentencing Committee for six years. And you could ask that a law be changed. Arson was one I always tried to get upgraded because we treat it as a property crime and I view it as a crime of violence because you don't know if somebody is in the building, you don't know if a firefighter is going to get hurt. And Wilma Sherrill would introduce bills to try to raise it. And the first thing that happens is any criminal law bill in Raleigh goes to the Sentencing Commission and they use their computer, they know how many arson cases there are, how many burning of churches, whatever, and they will tell you this will cost - I think in the case of arson, it was five hundred and some prison beds over 10 years. So every time you try to make a change, that is the first line if inquiry in Raleigh is how many prison beds does this equate to. So that is the difficulty. Here, like in many communities, is our jail is full. So a judge has a tough time taking the next 25 litterers and saying, if they qualify - it's not putting them in jail, it's the threat of

putting them in jail. That is where you get the deterrents. The threat. That is where you get people to comply with alternatives. You have to have a threat - the carrot and the stick if you will.

Councilwoman Cape - You can't make people comply with alternatives without jail being the other option. What if their consequence is you do the ... well, I guess if you don't do the alternative, then you go to jail.

Mr. Moore - Right. And you have to have people who care about that or that it is a realistic threat. In a lot of cases and in a lot of people that we deal with that are doing these types of things, they don't have the instinct in them to walk over to the trash can - they are going to throw it on the ground. That's just the way they are. So, I don't have an answer for you.

Councilwoman Cape - You paint a pretty hopeless picture.

Mr. Moore - Well, for low level misdemeanors, there is not a whole lot of consequence.

Councilwoman Cape - What about as we move up? I'm also thinking of the young kids who get into this entry level drug dealing. What are the options for this community? Understanding the legislative restrictions we have. Are there any options for us to partner with you in alternative sentencing, community justice, whatever those tools are? Are there any options for us?

Mr. Moore - I think job programs are one thing this town has always needed. For kids in the summer, especially.

Councilwoman Cape - Before they get into trouble.

Mr. Moore - Or even if they have gotten into a low level the first time. A lot of kids that are first timers, we put on deferred prosecution and basically deferred prosecution is a contract between me, the defendant, their lawyer and the judge that if you do these things, whatever they are, sometimes it says stay in school, sometimes it says work, sometimes it says get your GED, do community service, whatever it might be, pay restitution if somebody has broken a window on your car. We may give them deferred but we wanted them to repay you. You can certainly add go get a job, and if they do that then the case is dismissed and they get it off the record. They can still go into the military or they can still go to school in certain places that might not let them in if they had a record. Again, it's a carrot and a stick. There has to be somebody who cares about the consequences we have.

Councilwoman Cape - Well Mayor Bellamy, towards that end, if there is anything that we can do to participate, I would like us to explore that.

Mayor Bellamy - All right. Councilman Mumpower.

Councilman Mumpower - Mr. Moore, thank you for being here. We appreciate your efforts on our behalf. In terms of things that we can do, you mentioned more officers on the street as a deterrent.

Mr. Moore - Yes, sir.

Councilman Mumpower - We know better than most of us in this room that as these officers arrest people and find them back on the street quickly, they find themselves recycling the same folks over and over again. It's a morale buster and it leads to complacency on all levels. This is not a good guy, bad guy thing. It's not about lazy DA's or lazy judges or lazy officers. It is about a dysfunctional system that you articulate very well. What can we do? You mentioned job programs, more officers. What can we do to tackle what amounts to a paralysis. When you look at what you are really describing here, a system that has to rely on plea bargains, a system that

can't provide prompt justice because, as you suggest, can't provide accountability. What can we do to tackle that paralysis of a system that is funded as roughly 48th in the country. I think you have a good quote, we have a 1980 criminal justice system in the year 2007. What can this City Council do to help you and your compatriots up there in that system to address that?

Mr. Moore - Before I respond to that, can I say, given when we arrest people repeatedly before we get to deal with them, bond in our state and our nation is not to keep people in jail. That is not what we're allowed to do. Now if we can show they are a danger to the community or it's first degree murder, then yes, we can keep them in. But all other crimes, the purpose of bond is for people to show up in court. So that is the argument that is made in court on a daily basis - "My client has lived here all their life. They had 4 crack rocks, or whatever it is. Judge they are not going anywhere. They have a job at Bojangles or McDonalds, or working in a park facility or whatever it might be. They are a good person other than this one little deal, so let them out." There was a case a week or two ago, a guy you wrote an e-mail about. I forget his name - Jeffries I think, that had been bonded out four times. And I got to looking at his stuff and we got him in prison last week. And the feds are going to pick up his new case. So he's going to be history, I believe. But the point being, he had made an $8,000 bond on the case we handled a week or two ago, so whether he had $8,000, or whether somebody put their home up, or whether he had 15% to pay a bail bondsman, I don't know. But that is the continuing problem we had. That is one of the reasons we started the habitual felon here. We started it full-time in January 1997. The legislature gave me an Assistant DA and the County gave me an investigator here to help with violent criminals, habitual felons and things like that and we started a task force. So we do 40-60 a year and those are people that had come through continually and to define a habitual felon under our law, they are coming through the Superior Court system at the felony level for the 4th time. They have committed their first set of felonies, then maybe one felony, then maybe breaking into 10 homes, it may be breaking into 50 cars and we deal with those cases and that counts as one for habitual purposes. So after they have done that three time and they are on their fourth trip we can treat them as a habitual and any felony will do. So most people who go off as habitual felons here are going for 70-90 months, somewhere in that range, opposed to going off for 6, 8, 10 or 12 months. So it's at that level that we can finally do something with them. But, it's not much of a deterrent, especially we're about ready to get out of the group, but for awhile where you had the old time criminals who were used to getting 20 years and serving 8 or 10 or 7 or 8, and then they get these 6 month sentences, I think we almost create a situation where the system became a joke for those going to prison because 6, 8, 10, 12 months was no big deal. They'd been used to serving 5-10 years and at their age they are out now. But with the young kids coming up, 6, 8, 10 months, it's almost a right of passage for some of them, I think. But, if you want a justice system that functions, you have to adequately fund it. We spend more on indigent defense than we do prosecution. We have a public defender's officer here that does a good job, but they only handle 40-50% of the cases. I handle a 100% and I only have a couple more Assistant DA's than they have public defenders. So that is the type of. We are spending a lot of money there. We have inefficient prisons. I mean there is a whole overhaul. If we don't look at, and I think we are going to put together a group in this County to look at our system. We've got to look 20 years out because we are going to have 80,000 more people. We are building the jail next door that probably will be full in a matter of months, because people are making bond and because there is no room at the inn.

Councilman Mumpower - Your point. We did put it on our legislative agenda asking our local delegation to look as hard as possible on this issue. You're behind on technology. Most of your basic computer system is what, the early 1990's now?

Mr. Moore - They have spent a little money. If they spend a million or two here and there we do great with technology - that's how cheap it is in terms of the overall. But again, the number one issue that I see is the prison beds are full, the pressure to lower sentences, and the citizens will have less respect for the system if we do it again, after telling them in 1994, "trust us, truth in sentencing, here is what we're going to do." Breaking into your home hasn't suddenly become a

6-month punishment as opposed to a 7-month punishment. That is no way to run a criminal justice system.

Councilman Mumpower - One last question and I think this Council will continue to encourage our legislators to look at this roadblock to the functionalism of our criminal justice system. What percentage of felonies are plea bargained?

Mr. Moore - Probably 98%. We try about 2% of our cases and if we have 4,000 cases, we try in this County 50-90 Some years it may be on the high end, some years it may be on the low end. So we try state-wide, nation-wide somewhere between 1.5 and 3% of our cases. That's all we can try. Again, I have 47 weeks of Superior Court. We try a 3 week murder case and there we go.

Councilman Mumpower - I offer no criticism with that question. It just points to the fact that maintaining accountability for people that get involved in criminal activities is tough under that system and by the time we catch up with so many of these young people, they are career criminals. And they are lost.

Mr. Moore - What you also have to do, and we did this when we got in 1991, prior to my getting in there were not that many trials. We tried 11-12 murder cases the first 12 months I was in office. I only had 6 Assistants then. But we established that we could and will try you. And we still do that. Habitual felon. If you don't plead guilty, we are going to try you or you can take this 70 or 80 months, or whatever the number is. And so, we will go through a cycle with sex offenders the same way. You can see on the sheet I gave you we had some people who got 300, 400, 500 months. They had a trial and the judge ... them where we offered them 100 months or 200 months, or whatever the number might be. You have to be willing to try them which we are, but you also have to figure out what the settlement value is on a frequent occasion because we can't try everybody.

Councilman Mumpower - Mr. Moore, one last question. If I did crack cocaine and was caught and convicted, how many times, an estimate, would I have to be caught and convicted to do jail time?

Mr. Moore - Depends on what judge on what day. But if you look at the chart on "C", if you sell crack cocaine, it is a Class G. If you have never been in any trouble before, you're in the first column and you could get 16-months sentence active. But, as a practical matter, very few people go the first time. If you get caught a second time, you will move over a column and face a couple extra months, but if that is the system we operate under. Again, the judges get memos on how many people are in jail. I have probation officers come in from time to time who tell me in one ear that they would like to see this person be revoked, but because of the pressure from the Probation Department out of Raleigh, when they staffed it with their supervisor, they were told to say, let's do this to give them one more chance. We have one of the highest revocation records here. They are always telling me they are getting memos, nasty-grams, about Buncombe County because we revoke a lot of people. That means a lot of people got on probation, but we were able to revoke them. Again, we handle 4,000 cases at the Superior Court level every year.

Councilman Mumpower - Thank you Mr. Moore.

Mayor Bellamy - Vice-Mayor.

Vice-Mayor Jones - I just want to talk a little bit about, because there are so many levels and we've kind of touched on the hardest core today as well as those folks who are just entering the system and how do you either deter them from entering, or you stop it before they are so far down. I definitely heard you say that one piece for you of deterrents is more police officers. I'm actually of the mind-set, in addition to obviously, this visibility of our law enforcement, that there are environmental - and nothing is perfect, and nothing is fail safe - but if we are investing in

some environmental deterrents, for example, and we know a lot of them. Like the red light camera. That ultimately deters people, I think If they are getting caught by traffic, and you can kind of say that traffic is not the most important thing. We know, this is what we know. We might not like it. As someone who likes her little glass of wine from time to time, if we raise the alcohol tax, we know that drunk driving goes down. This is what we know because of the correlation between people being able to get alcohol. Anyway, in addition to more police officers and better computer systems, that we've got to put all these pieces in our brain. A silly thing, and I think one of the reasons why my house has not been broken into is that I always have a dog. My house is not fool proof, but if somebody is going down the street, my house is going to be less attractive. And I'm not saying that everybody go out and get a dog. But you see where I'm going. How can we as a community start talking about these other types of deterrents to help you out and to help our pocketbooks out? That is part one. What do you believe, in your experience, are effective deterrents for some of the entry level problems that we are seeing?

Mr. Moore - Starting kids with a good education. Probably the number one thing we see. And I've gone into schools and mentored under Big Brothers and Big Sisters. I have a young child and I've been in the schools a lot. You have kids that come to school that nobody is helping them at home and you can see some of them coming. I coached Little League Football and Baseball when I first moved here. I had two kids that I saw that I thought would be violent. They are both in prison. One for murder and one for drug dealing and assaulting people. But you could see them at age 10 or 11. That's where you have to start in the community with the little kids. A couple things you said, one, you said the drinking and driving. Buncombe County has one of the highest conviction rates in the State. We have for 40 years here. We're always in the 90% range. You are talking about raising the taxes. Well, go to Raleigh and try that and the lobby will be all over you. There should have been a no-brainer to take the pseudo-ephedrine off the shelf to do something about meth labs. And we had a tremendous fight down there. I was down there several times and the merchants were against it because they made so much money. One of the examples they gave was at the truck stop in, I think, Oklahoma and how much money they made versus selling Coca-Cola vs. selling ephedrine or pseudo-ephedrine products. It was unbelievable. So the merchants fought us even though you talk about a public health crisis that the meth labs and things like that that we had. So, it's very hard to do that. I think invest in education is the number one thing. I think to try to get kids trained, if they are not going to go to college and get their Masters, then do the vocational. We almost made a turn away from that in the State, and I think we are catching ourselves and go back and have a vocational track in school. I think education is the key to the drug and alcohol issues and the other education in those. I think people smoke cigarettes less now than they used to, so it's got to be an educational issue.

Vice-Mayor Jones - Can I have one follow-up? How do you feel about, if we raise the driver's license age to age 18? How do you see that as potentially a deterrent?

Mr. Moore - To punish the parents.

Vice-Mayor Jones - Here's an idea. If you have to do driver's license in school, thus then you have to stay in school.

Mr. Moore - I think the driver's license is one of the biggest carrots you have to try to get people to do right. But we have situations now where we have graduated license and I have people in my office all the time, the kid did something dumb, and if they are convicted of it or it's not reduced, then they are going to be back in the situation at age 17 than they were when they first got their license. And that is only going to punish the parent who needs to carry them to this activity, or whatever it may be. So, it's not an easy answer, but that is one of the few things. So, if you raise the age of staying in school, then that is a whole another issue.

Vice-Mayor Jones - Do you think that would help?

Mr. Moore - I don't know. I didn't have the time to think that out fully. But, those are the things, whether it's staying in school, your license or whatever. We will have to adapt how our schools are run if we are going to keep people in school. Some people drop out, I think, because they get so far behind.

Mayor Bellamy - I agree and I think for me I don't have any questions about your statistical data that you presented. The numbers are what they are. But what you said hit home to me. The education of our students. That, more than anything, is important. If you look at the statistical data of how many drop-outs we have in the system now in the jail right next door, you would be astounded at home many high school drop-outs we have. For me, it's an SOS to our community. We have to have more mentors and tutors assisting our school system to help educate our kids.

Mr Moore - And another thing we did when we cheapen their sentences, people that we send for selling crack cocaine for 6, 8, 10, 12 months or for breaking into a home, they don't stay long enough like they used to, to get into the vocational or the education, or even some of the drug treatment. You know we have the DARE program in prison, but if you have a 6 or 8 month sentence and you spend two months in jail before you got there, you don't have time to go through the program. That is one thing we have done with the way we have done our prison system. We don't help people like we used to. When I was in Law School, I went to .. prison a couple of times, right across from the State Fairgrounds. There you could get your certificate to be a barber, you could learn to be an upholster. You could get out and make $10-$15 an hour upholstering furniture. So we had vocational programs, but now, because so many people stay for such a short period, and the majority of people, we sent 28,000 people to prison in the last 12 months in this State. Well probably 20,000 of them have circulated out in a 1-1.5 year or so. So they are not staying long enough for us to do much with them in prison, other than we go there and feed them 3 meals a day and they get out, not necessarily coming out with a plan on behaving themselves.

Mayor Bellamy - I think our emphasis should be definitely on police officers, but prevention and education of our citizens. If you have an hour a week to go tutor a child, invest it. You are paying for it sooner or later in either your time or your taxes. I think it's important that people to look beyond themselves and get back to helping someone else - help our children. I think that's important. To create jobs for our teens. That's imperative that we have more jobs for our teenagers in this community so our teens can have some resources to be able to see themselves in a different light. Councilman Newman.

Councilman Newman - We have a population of folks who get arrested, not just 2, 3 or 4 times, but about 40, 50, 100 times. And in some cases, most of them are not real serious things.

Mr. Moore - Drunk and disruptive would be number one.

Councilman Newman - Things like that. Obviously not the most serious crimes in the community. We are trying to do things to really address some of the root causes of that - mental health, plan to end chronic homelessness, and things like that. We are trying to be proactive on that. And seeing some initial good results from it. But for folks who are not taking some of the options the community is presenting them, is there, in light of the situation with the crowding in our prisons, is there any way that we can hold those folks more accountable than we are now?

Mr. Moore - I've been practicing law here now for 26 years or so, and we have always known who the 10 or 15 people are who will, when it's cold, they are coming to jail. Or after their check comes the first of the month, they spend it and they are going to come and be with us. And what happens with those people is, they get down in the court after 10-15 days, whenever their case cycles through and they are going to plead guilty and get time served. And then we are going to see them again in a week, or the next first of the month when the check comes. That is a fact of life that we have seen again and again. What you do about that, I don't know I have an

answer for you. The mental health issue is another whole ball of wax. Our State, because they just did away with the system without being prepared to deal with the consequences, we have more and more people we're seeing that have issues that have to be dealt with and have no where to deal with it. So I don't know that I have a good answer for you there. But you are going to have a group of people, at least historically it would appear, that are going to spend 200-300 days a year in jail because they are going to get arrested and get out for a week or two - maybe until their check comes and they have enough money to go buy some alcohol. We all know who they are.

Mayor Bellamy - Vice-Mayor are you going to wrap it up for us?

Vice-Mayor Jones - I really appreciate your being here even though we're all like, what can we do. We want to help and we want to be part of the answer. But I did want to end on one positive note that is coming out of your office. There is more than one positive thing, but this is an initiative with Assistant DA ... with Gang Prevention and specifically kind of getting to the groups that are having the early indicators of gang activity and trying to get to them on the front end. So I think that is a fabulous collaborative effort and so I think she deserves a lot of credit for her leading that up and hopefully that is something we can replicate in a lot of other ways to get to the issues we are talking about.

Mr. Moore - She worked very hard and has spent many hours. In fact we talked about that before I came over here today. You know, just like you are talking about a consultant to give you a plan, if we had somebody who had the time to write grants all the time you could get lots of money like this. But, most of us have full-time jobs and having time to do that is a problem. But this is one that she took on, on behalf of my office, and did very well. Thank you.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO REVISIONS TO THE ADJUSTMENTS TO ENFORCEMENT PROCEDURES

This public hearing was originally scheduled for Council consideration on March 13, 2007, but was continued to this date at City staff's request.

Councilman Freeborn - Is there a reason why we need to delay it? What was the justification?

City Attorney Oast - If it's what I think it is, there were some fine-tuning that needed to be done at the Planning & Zoning Commission meeting so it went back there first. Then the Planning & Zoning Commission took action on it at their last meeting and it will come to you on May 8. There were a couple of changes that were recommended. Most of them came from my office.

At staff's request, Councilman Mumpower moved to continue this matter until May 8, 2007. This motion was seconded by Councilman Davis and carried unanimously.

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING FOR THE PROJECT IDENTIFIED AS EAGLE'S LANDING LOCATED AT 179 JOHNSTON BOULEVARD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT FOR A 26-LOT SUBDIVISION WITH SETBACK, LOT SIZE, AND OPEN SPACE MODIFICATION REQUESTS

ORDINANCE NO. 3459 - ORDINANCE TO CONDITIONALLY ZONE THE PROJECT IDENTIFIED AS EAGLE'S LANDING LOCATED AT 179

JOHNSTON BOULEVARD FROM RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT TO RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT FOR A 26-LOT SUBDIVISION WITH SETBACK, LOT SIZE, AND OPEN SPACE MODIFICATION REQUESTS

Urban Planner Alan Glines said that this is the consideration of an ordinance to conditionally zone property located at 179 Johnston Boulevard, for the project identified as Eagle's Landing, from RM-6 Residential Multi-Family Low Density District to RS-2 Residential Single-Family Low Density District/Conditional Zoning for a 26-lot subdivision with setback, lot size and open space modification requests. This public hearing was advertised on March 30 and April 6 2007.

From Staff Report: This site is located in the city limits on the west area of the City. The surrounding neighborhood is zoned residential multi-family low density (RM-6). Until recently the two parcels were a single property with a smaller home on it. The request is to change the zoning to residential single family high density (RS-8) to provide a cottage-style major subdivision. The plan will provide 25 home sites. Five of the residential units will be sold at an affordable rate. The existing home will be relocated and will be remodeled to follow the patterns provided with the project. None of the units in the development will be larger than 1,500 square feet. Most of the units are being offered at between 1,000 square feet and 1,200 square feet. A small number of units will be offered at 700 square feet. The affordable units will be the one and two bedroom units. Although three bedroom units will be offered, the majority of homes will be two bedroom units. The site plan provides a cul-de-sac design and a sidewalk along one side of the street. The developer is seeking modification from City Council for several items: lot size, side setbacks and a reduction in open space. The lots require a minimum of 5,000 square feet in the RS-8 District. Of the 26 lots in the subdivision proposal, 20 of them will need a modification of the lot size. Although one lot requires a 1,600 square foot modification, the average request is for about 600 square feet. In addition the development will require a side setback from the six feet standard setback to five feet. This will accommodate the placement of the homes and driveways. Finally, the developer is seeking acceptance to provide 4,200 square feet in open space instead of the 13,000 square required in the UDO (500 s.f. per home). Without the open space modification two additional lots will be required to meet this number and so two fewer affordable units will be provided. All in all the reduction in lot size, side setbacks and open space modifications are not expected to diminish quality of life in the community. The houses are smaller by design and fit well on a smaller lot.

A number of site elevations are provided with this proposal. The homes are smaller cottage style plans that should blend in well with the character of the area. The developer has committed to use quality materials including hardi-plank and shingle, board and batten siding, standard wood shingles, heavy bracket and porch detailing and asphalt roof shingles. Some of the windows, trim and details may vary from that shown on the elevations. Some of the market rate homes may be modified from plan to allow such things as an extra rear addition to accommodate individual preferences. In addition some stand alone rear garages may be added for some of the market rate homes but will meet setback requirements. The units will range in size from one, two, and three bedroom units. If approved, the elevations will govern the style of the homes built in the development. Major deviations from the elevations provided in the presentation will require reconsideration by reviewing boards.

Staff has reviewed the request and feels that the plan provides a positive addition to the community. The units will be smaller and will fit in with the surrounding area and provide residential units at lower cost. Five of the units including the existing home (to be relocated and refurbished) will be offered at an affordable rate. The Comprehensive Plan encourages proposals to provide workforce and affordable housing in the community. This plan does that. The designs of the homes will be compatible with the wider community. The Technical Review Committee (TRC) reviewed the project and noted minor items to be revised on the plan. A sidewalk section along Johnston Boulevard will require additional grading. The developer has the

option to provide a fee in lieu of sidewalk if approved by the Engineering Department. The open space for the development will be provided on lot 24 on the plans. The three large existing trees located there will be preserved as a part of the open space amenity. These trees are the most substantial trees on the entire project. The developer has committed to providing variety within the development by limiting the number of any one plan that is built and also by not allowing the same design to sit side by side to another. By varying the materials the development should take on a 'craftsman character'.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposal has been reviewed by the TRC and will not endanger public health or safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The development of the site will alter it. The current site is open and rolling without a lot of existing vegetation. The development is compatible with the topography of the site.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The development is expected to building value in the community through home ownership.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The development with its single family cottage homes will be in harmony with the surrounding neighborhood. On the whole the proposed lots will be smaller than neighboring residential lots but the houses will be of similar scale.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   This type of residential in-fill development with affordable units is supported by the comprehensive plan and other official plans adopted by the City.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   Utility infrastructure is in place to support the development. The property is not located on a bus line but there is a line a few blocks away. The property is located in the City limits and will be served by police and fire protection.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The development is not expected to generate undue traffic or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

This conditional zoning request was recommended for approval by a 6-0 vote by the Planning and Zoning Commission. Two people spoke at the Planning & Zoning Committee meeting, with their comments centering on technical issues related to the project.

Pros:

- In-fill development is recommended in City adopted plans.
- The project provides affordable units.
- The housing units are compatible with the surrounding area.
- The modifications requested for development are not expected to negatively impact quality of life.

Cons:

- Open space is limited for this development.
- Sidewalk infrastructure is needed in areas like this to provide connectivity throughout the community.

The Planning and Zoning Commission voted 6-0 to recommend approval of the conditional zoning proposal with project submittal materials and the TRC staff report included as conditions. Staff concurs with that recommendation.

Mr. Glines - Thank you Madam Mayor and members of City Council. We are reviewing a project of two parcels along Johnston Boulevard, totaling about 3 acres to be rezoned to Residential Single-Family High Density/Conditional Zoning. Another image is Exhibit B. There is a single home on the site that is mostly cleared and there is a few existing trees here which will stay for open space. The plan is for a cul-de-sac development with 25 house sites. A total of 26 lots. One of the lots will be used for open space. The project includes street trees and the usual subdivision products, including sidewalk and City infrastructure. The lots in an RS-8 District typically require a minimum of 5,000 square feet. Of the 26 lots in the subdivision, 20 of them are requesting modification of the lot size, averaging of about 600 square feet. In addition the development will seek a side setback from the six feet standard setback to five feet. Finally, the developer is seeking acceptance to provide 4,200 square feet in open space instead of the 13,000 square required in the UDO (500 sq. ft. per home). Without the open space modification two additional lots will be required to meet this number and so two fewer affordable units will be provided. All in all the reduction in lot size, side setbacks and open space modifications are not expected to diminish quality of life in the community. The houses are smaller by design and fit well on a smaller lot. I have some details about the house sizes and the scale. It is a cottage sized subdivision. None of the units are larger than 1,500 sq. ft. The average will be 1,200 sq. ft. The smallest units will be 700 sq. ft. There are about 800-900 sq. ft. units. One and two bedroom units. There are lots of amenities such as front porches and detailing that will encourage strong community. As I said, five of these units will be provided at an affordable rate. That will be the one and two-bedroom units. It provides a community need with affordable housing. Another note about the details and materials used. The developer has committed to use quality materials including hardi-plank and hardi-shingle, asphalt shingles for roof, board and batten siding, and other details to make those homes comfortable and attractive with the craftsman and character. Staff has reviewed the request and feels that the plan provides a positive addition to the community. The units will be smaller and will fit in with the surrounding area and provide residential units at lower cost. Five of the units at an affordable rate, including the existing home (to be relocated and refurbished). The Comprehensive Plan encourages proposals to provide workforce and affordable housing in the community in an infill design setting. The designs of the homes will be compatible with the wider community. The Planning & Zoning Committee did review this request and recommended approval with a vote of 6-0 and staff concurs with that recommendation. Thank you.

Mayor Bellamy - I will open the public hearing at 6:51 p.m. Are there any members of the community wishing to address Council on this particular item?

Mr. Tom Overholt, developer and builder - I just wanted to ask for your consideration because we are going to try to do affordable, which we all know is very, very difficult in this day and age with the cost of land. We are trying to keep it not upscale, but not cheap so that people can feel proud when they drive in their own community. At the same time, we can't offer quite as much land wise, and what-not, to be able to make the numbers work, so this is profit driven, but it's not profit driven to the point we know there is less money in this type of project. So we are having to scrimp and save with different items we are asking for, like reduced lot size and still be able to get a decent sized house by ... and setbacks. We ask for your consideration on this tonight.

Mayor Bellamy - Thank you. Any other members of the community wishing to speak on this matter? All right. I'll close the public hearing at 6:56 p.m. Council, any questions, comments and/or a motion? Councilman Freeborn.

Councilman Freeborn - Quick question for Mr. Glines. Where is the closest bus stop to this location? How far away is it? Do you know?

Mr. Glines - Let me check on that.

Mayor Bellamy - It's probably either Deaverview or Leicester Highway.

Councilman Freeborn - Is it more than 1/4 of a mile?

Mr. Glines - I think it's less than that. I think there is one on Bear Creek. I might need to verify that.

Mayor Bellamy - I don't think the bus runs down Bear Creek. Actually it doesn't go on Bear Creek. I think it's on one street over, but you may need to check on it. Oh we have someone with a bus map. Just give it to the City Clerk.

Mr. Glines - Sorry, I don't know that answer.

Councilman Freeborn - That's okay. I should have checked that before I came in today. I apologize.

Mayor Bellamy - The bus may go up Bear Creek and cut to Deaverview.

Mr. Glines - ... one of our maps in City Hall. I didn't note the line, but I did note that we had one not so far away. At least I felt that way about it.

Mayor Bellamy - It would be the one that goes to Camelot and Deaverview and further out to the DMV - that bus route. That will be my route on "Strive Not To Drive Day" and I don't have my car because it's at Jan Davis'.

Assistant City Manager Richardson - It looks like Deaverview or Patton Avenue would be the closest.

Councilman Freeborn - Okay. Thank you.

Mayor Bellamy - Any other questions? Councilman Mumpower.

Councilman Mumpower - There is no one here from the public to raise questions about this development. It looks like a nice thing. It's pretty intense though. It's not a dramatic zoning change, but still the level of density is much more dramatic than the surrounding environment. Any flags that have been brought to your attention by the folks who live in that area?

Mr. Glines - No. One neighbor just had called to ask about infrastructure for stormwater and stormwater controls in this area. And a second neighbor did call to comment that they wished they were going to build larger homes, for property value sake. I kind of explained that with the housing need in this community for affordable housing, that this was a great product and it should add value through home ownership.

Councilman Mumpower - Mayor, on that basis I move for the adoption of Ordinance No. 3457 to conditionally zone property located at 179 Johnston Boulevard, for the project identified as Eagle's Landing, from RM-6 Residential Multi-Family Low Density District to RS-8 Residential Single-Family High Density District/Conditional Zoning, along with the requested UDO modifications, subject to (1) the site plans and conceptual home elevations included as conditions; (2) The project shall comply with all conditions outlined in the TRC staff report; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits.

Mayor Bellamy - Is there a second?

Councilman Newman - Second.

Mayor Bellamy - Any further questions or comments? Councilwoman Cape.

Councilwoman Cape - I just have a few. Alan, could you outline just what the differences are. I want to talk about that here. If that RM-6 on 3 acres we could have 18 units, with multi-family dwellings typically, right?

Mr. Glines - Correct.

Councilwoman Cape - Okay, so that's a difference. We are going from 18 to 27 individual units.

Mr. Glines - 25.

Councilwoman Cape - 25 units. We are going from lot sizes, in the RS-8 from, the lot size is typically 5,000 and we are going down to 600 sq. ft.

Mr. Glines - On average they are seeking a request to about 4,400 sq. ft.

Councilwoman Cape - So they are asking us to take away 90%. I guess, I'm seeing some complications in that, I mean, I love a good plan for putting houses in a nice place. And we're also going from 13,000 sq. ft. of open space down to 4,000. So we are putting a lot of people in a very small place and we're reducing the amount of open space we are giving them for compacting them together to virtually 1/3 of what we have decided is decent, open space for people to live around. Those are the areas where I'm having concerns about. Where is the closest park? One thousand, five hundred foot square houses are not necessarily a couple. We are looking at families. Where are the kids playing? On the street? That's a lot of houses for a street. Where are the parks? Where is this trade-off that makes this work?

Mr. Glines - I just wanted to point out that most of the lots are within 4,000 sq. ft. of the proper size. They are about 4,000 sq. ft. lots. Most of them.

Councilwoman Cape - You said they were 600. Oh, you're dropping 600. Okay, I thought that was pretty ridiculous. I didn't see how that was working.

Mr. Glines - There is one lot that is 1,600 sq. ft. of modifications, meaning that it's about 3,400 sq. ft.

Councilwoman Cape - So the modifications are what you were taking off. Thank you.

Mr. Glines - In the RM-6 District too, the other thing that is a challenge is there is a lot frontage requirement that is greater than 50 feet. It's 70 feet. And I'm going to look at staff to make sure that is the correct amount. I believe that is right. So, on a street like this with a fairly shallow width, it's not so wide, you would really be cutting out - you would have to have 70 feet on the street and you would have a lot fewer lots than 18. So we are still cutting back because RM-6 has a different standard.

Councilwoman Cape - I like it but I am a little concerned that there is too much with very little space. If we could take one or two out and put a children's play area. Someplace where the kids could go. The houses are 10-feet apart?

Mr. Glines - This is probably on par with some of the best west Asheville neighborhoods with the scale of lots.

Councilwoman Cape - I didn't hear that part. I'm sorry, what?

Mr. Glines - There's some great neighborhoods in west Asheville that we could probably study and see what the density is and how tight the lots are. Some of them go deep. The only modification from a visual standpoint won't be side to side, but the depth of the lot. Most of the lot depths are shallower which is why they are smaller than 5,000 sq. ft. They don't go 100 feet back.

Councilwoman Cape - So it's the side to side. But once again.

Mr. Glines - It's the dept of lot. The side to side works pretty much as a standard RS-8.

Councilwoman Cape - Where is the closest place for kids to pay? People to play? I mean where are the kids playing? In the street?

Mr. Glines - I guess the closest place for kids to pay is the old elementary school, which is up the street. It's just a little ways up.

Councilman Freeborn - And are there sidewalks?

Mayor Bellamy - There are no sidewalks.

Mr. Glines - They will do a sidewalk for their front. I know that's a challenge on Johnston Boulevard is sidewalks in general in that part of the community. That part of the community was sort of one of those recently annexed areas. I don't know exactly the year, but I imagine we are still catching up with community infrastructure.

Councilwoman Cape - This is the first generation of kids that will not outlive their parents because of diabetes and lack of outside exercise and ability to walk to school. I'm very supportive of doing infill. It creates a healthy neighborhood. I would really like to see one place, besides the street, for the kids to play in. Something. Is there anything the developer perceives that he would be able to offer us? I do have a question of what affordable means. Affordable is a tricky question. What are the five affordable? You're basically saying if you take away a few lots,

we lose the affordability. Can you tell me what the difference between the affordable and the non-affordable homes are?

Mayor Bellamy - If we could have the developer up. And the first question that was presented, could we take away one to two houses for open space for children.

Mr. Overholt - Let me address the open space first. If this was a 20-lot subdivision, no open space would be required. And if you consider that the average subdivision has 3-bedroom homes and usually the bedroom dictates the size of the family - that would be 60 bedrooms. This average is 2 bedrooms. So we have 25 homes with two bedrooms average and that impact would be 50 bedrooms. We are actually having a less impact than your ordinance that is already in place.

Councilwoman Cape - So, we have ten less kids and the size of the yard differences.

Mr. Overholt - The size of the lot is about a 5,000 sq. ft. lot. I don't know what all you can do approximately. It might be 4,500.

Councilwoman Cape - Is there not a place to put a playground down at the corner or down at the end?

Mr. Overholt - A playground could be put on the open space lot?

Councilwoman Cape - Where is the open space lot?

Mr. Glines - The open space lot will be right here. It's where the existing trees are located that we are going to save.

Councilwoman Cape - So there is an open space lot? Would you consider building a playground for these kids?

Mr. Overholt - Well, I would have liability issues. The City has not agreed to take it if I build it.

Councilwoman Cape - Is there going to be a homeowners association in this subdivision?

Mr. Overholt - Probably. Because there is some common space.

Councilwoman Cape - So could the homeowners association. I just want a place to get the kids out of the street. You know, it's a little thing, but.

Mr. Overholt - It's a 5,000 sq. ft. It's a regular lot. It's probably the best one because it has the best trees.

Councilwoman Cape - About twice the size of this room?

Mr. Overholt - It's much bigger. I'd say it's bigger than that.

Councilwoman Cape - That would be a nice place. I didn't see that lot and I apologize for not seeing that sooner. That's good.

Mr. Overholt - As far as a playground and even maintenance of the lot, it looks as though it will fall back possibly on the homeowners. That hasn't been decided at this point.

Councilwoman Cape - That's okay. I guess they can decide as a community if they want to build something or just let the kids play outside. There are sidewalks getting to that?

Mr. Overholt - There are sidewalks. The sidewalk is across the street and comes around half-way. I believe the sidewalk was put over there. It could be put on that side of the street probably without any problem. It's just that the topographical is more difficult. There is a tree we are really trying to save that is close to the street. We actually moved the street trying to save it and it would be much more difficult to put the sidewalk on that side.

Councilwoman Cape - What about a crosswalk speed-bump kind of raised thing? Before we get there. If not, people are going to ask us to put it in.

Mr. Overholt - It's a very short street.

Mr. Glines - Do you mean off-site like on Johnston Boulevard?

Councilwoman Cape - Oh no, I'm talking about right across from that lot to your connecting sidewalk on the other side so that everybody who is walking on your sidewalk can cross the street. One thing we looked at on Burton Street is a raised sidewalk crosswalk. It kind of serves the purpose of slowing people down and seeing who is walking on the crosswalk much easier. What did they say, $6,000 for something like that. So the idea is that you are building a sidewalk on one side for topographical. Is there someway we can make it a safe crossing for kids to get across the street? I don't want to micro-manage your project, but these are the kinds of things that makes folks - here's our opportunity to say, can we make it a nice place to live. We are putting a lot of houses in here.

Mr. Overholt - I'm not sure what it would take to make it safe. I believe the cars will be going very slowly. It's like one block long. I have a feeling that the kids are going to be in the street whether we ask them to or not. I don't anticipate this being a large children community because of the type of response I'm getting. It's a lot of single people that have been contacting me and wanting to be put on a list and what-not. It's people that have been trying to buy houses and can't buy houses.

Councilwoman Cape - Single people often get married and want to stay where they are. That's what makes a nice place. It's where people can stay. What is the affordability aspect?

Mr. Overholt - The affordability is your standards that we have to meet. I think recently it has been changed. They originally were $100,000 for a one-bedroom; $120,000 for two; and $135,000 for three. In order for us to build that, obviously, it's probably going to be our cost is greater than that. But I'm agreeing to do at least five for the concessions. The rest of the houses may not be in that price range, but they will still be affordable by today's standards.

Councilwoman Cape - $150,000? And then the other ones, what are they selling for? Just curious.

Mr. Overholt - Well, we are still, because we don't have approval yet we don't have the plans completed, but we are expecting somewhere between $150,000-$250,000.

Councilwoman Cape - One last question. Alan, is there no landscaping required around the peripheral of this project? You are changing the density pretty dramatically?

Mr. Glines - There is not a standard for single-family subdivisions ... street trees.

Councilwoman Cape - This is almost a change of use which we are looking at with the landscape standards. It's an increased impact even though it's a funny thing on our chart it goes from RS to RM as an increased impact but this is a lot more houses. Is there no sense that is going to be a problem?

Mr. Glines - We don't have a standard for that. I don't think it's really going to be a problem. I think in the past we have allowed single-family subdivisions to meet the minimum, which is the street at this point and there is not another buffer required from single family and other single family uses.

Mr. Overholt - Could I address that too? The house sizes are very similar to the neighborhood. The lot sizes are not as similar. The house on the property that we are going to move was only 850 sq. ft., which is plus or minus very close to a neighborhood. That is adjacent to it.

Councilwoman Cape - I see some places where you see two lots per one lot. It's going to feel thicker.

Mayor Bellamy - Councilman Freeborn.

Councilman Freeborn - I'm okay.

Mayor Bellamy - Maggie, who made and seconded the motion?

City Attorney Oast - I have Councilman Mumpower as making the motion and seconded by Councilman Newman.

Mr. Overholt - May I make one comment on the motion before it's complete?

Mayor Bellamy - yes.

Mr. Overholt - When you mentioned about the elevations, we had talked about there will be minor changes to the elevations to these houses. I don't know how strictly you're interpreting that.

Mayor Bellamy - That is a great question.

Mr. Overholt - We want to be adding some brackets to some of the houses. Some of the houses won't have brackets. Some of the houses are shown with metal roofs which we won't be doing. They will be a single roof and that type of thing. So, some of the houses have smaller porches. We may want to have a little larger porch. There are just some changes. We will keep the overall concept of the house, but there will be some minor changes because there are different architects in houses.

Councilman Mumpower - Mr. Glines, would you recommend any language on which to modify the motion to support this gentleman in this effort?

Mr. Glines - I tried to include a comment about the materials to be used and some modifications that would be allowed. What I would say is that if we had houses that were unrecognizable to the general eye, so to speak, of looking at them and they are nothing like we are looking at on these plans, then we will be bringing something back to you. We will be watching that carefully.

Councilman Mumpower - So our current language provides the flexibility he suggested he needs?

Mr. Glines - I believe so.

Mr. Overholt - The other comment I have, we've been building for many, many years and we have done projects where we thought something was a seller and early on we found out that people weren't interested in that design. And we do want to be able to add a designer, if we have

to, to be able to meet what the people needs are. I need to know what my requirements with that if we decide to do that.

Mr. Glines - I would say something like this picture of the house with rock in front. It's not one of our materials. We're not going to see this in rock because of the cost, but it will be made out of other materials that we have listed in the staff report.

City Attorney Oast - And if you wanted to, you could add language such as the houses will be characterized by pitch roofs, with shingles, porches.

Councilman Mumpower - With the eyeballs that will be on this and on this gentleman's presentation, I'm comfortable unless Mr. Glines' offers caution with the existing language. But thank you Mr. Oast. Mr. Overholt, you've done exactly what we ask people to do. You have provided some nifty ... housing and made good use of the land and did it without assaulting folks in the neighborhood and we appreciate what you're doing.

Mayor Bellamy - I also want to say that your clarifying questions were great. I'm glad you asked those because it clears it up for staff, for Council and for the community so we know the expectations going in. And I think that's important to make sure that everyone is on the same page as we move forward.

The motion made by Councilman Mumpower and seconded by Councilman Newman carried on a 6-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 23 - PAGE 305

C. PUBLIC HEARING TO CONSIDER REZONING A PORTION OF PROPERTY LOCATED AT 18 AND 20 MEADOW ROAD FROM CI COMMERCIAL INDUSTRIAL DISTRICT TO URBAN PLACE DISTRICT

ORDINANCE NO. 3460 - ORDINANCE TO REZONE A PORTION OF PROPERTY LOCATED AT 18 AND 20 MEADOW ROAD FROM CI COMMERCIAL INDUSTRIAL DISTRICT TO URBAN PLACE DISTRICT

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone a portion of property located at 18 and 20 Meadow Road from CI Commercial Industrial District to Urban Place District. This public hearing was advertised on March 30 and April 6, 2007.

From Staff Report: The property under review with this application is split zoned between Commercial Industrial District (CI) and Residential Single Family High Density (RS-8). The CI portion of the property is located at the bottom of the slope adjacent to Meadow Road. The property had a metal building on the property and this was recently removed. A smaller residential style building was also located on the site but has now been removed.

The property is located along the route of the Wilma Dykeman Riverway Master Plan that was adopted by City Council in 2004. The Plan is a vision document that encourages redevelopment of the river area and valley floor to be a mixed-use district in Asheville. Part of the proposal is to improve the roadway system along the French Broad and Swannanoa Rivers with improvements to be called the Wilma Dykeman Riverway. Mixed-use and recreational opportunities are proposed in the document. Staff have identified that the Urban Place District is appropriate for many areas of this district. Even though the property is not located in the River District Design Review area, the River Design Committee has commented that the areas along Biltmore Avenue and surrounding areas should be part of a mixed-use node. The area could have special pedestrian significance because it is near to Biltmore Village.

The rear section of the property is zoned RS-8. This section of the properties would be difficult to access from Meadow Road and relates most closely with the St. Dunstan's neighborhood. Any access for this portion of the property would come from an un-opened right of way from Roebling Circle.

The Urban Place District emphasizes a mix of uses within the district and in the same building. A strong emphasis is placed on how the buildings relate to the street and create a streetscape that is pedestrian friendly. Buildings are also required to be two stories to support the mixed-use goals for the district and to add value to the area. As with other mixed-use districts in the UDO there are also some design and operational standards which ensure that that the building is pedestrian friendly and interacts with the street. Parking is allowed but not between the street and the front of the building. A higher density is allowed in Urban Place to encourage an urban vitality and provide an array of housing options.

The Commercial Industrial District is established to allow a wide range of commercial and industrial uses and was applied in areas considered as transitional districts and areas where redevelopment has potential. While a mix of uses would be allowed in the CI District, this is not a specific goal of the district.

The rezoning request was recommended for approval by a vote of 6-0 by the Planning and Zoning Commission. No one spoke at the public hearing.

Based on the above analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The rezoning proposal meets goals of the comprehensive plan to encourage redevelopment of infill parcels.
- Urban Place District supports the goals of the City Council adopted Wilma Dykeman Riverway Plan.
- The City Council Goal and Vision Plan encourages the economic development and growth of the river area.
- The portion of the property zoned RS-8 provides a natural buffer from the St. Dunstan's neighborhood.

Cons:

- No items of concern are noted

The Planning and Zoning Commission at their meeting of March 7, 2007, voted 6-0 to recommend approval of the request. Staff concurs with that recommendation.

Mr. Glines - We have a request to rezone a portion of a lot located at Meadow Road from Commercial Industrial to Urban Place. The rear section of the property is zoned RS-8 and will remain so with this proposal. (Using a map) This is Meadow Road here, this is the property in question and in the rear section you can see the blue line that cuts the zoning line, that is in the rear. This is sort of up in the St. Dunstan's neighborhood that you classified as a local historic district. This is Biltmore Avenue and this is sort of Biltmore Village just off the plans to the south.

The property is located along the route of the Wilma Dykeman Riverway Master Plan that was adopted by City Council in 2004. The Plan is a vision document that encourages redevelopment of the river area and valley floor to be a mixed-use district in Asheville. Part of the proposal is to improve the roadway system along the French Broad and Swannanoa Rivers with improvements to be called the Wilma Dykeman Riverway. Mixed-use and recreational opportunities are proposed in the document. Staff have identified that the Urban Place District is appropriate for many areas of this district, including this site. Even though the property is not located in the River District Design Review area, the River Design Committee and some of our

reviews that we had has commented that this area and areas along Biltmore Avenue would be likely areas for a mixed-use node. This site could be a part of that. The rear section of this property will not be changed. It is at a different grade and is part of this parcel, but will not be affected by this rezoning request. The Urban Place District emphasizes a mix of uses within the district and in the same building. A strong emphasis is placed on how the buildings relate to the street and create a streetscape that is pedestrian friendly. The Commercial Industrial District is mixed use commercial district. It can accommodate a mix of uses, although is not really a goal of that district. The Planning & Zoning Commission did review this request and recommended approval by a vote of 6-0 and staff concurs with that request.

Mayor Bellamy - Thank you. Does any member of the community wishing to address Council on this matter tonight? Yes, sir.

Mr. Nathan Bryant - I'm with Carlton Architecture here in Asheville. We're representing the applicant on this property. I just wanted to follow Alan's report by saying that we are excited about this proposal to rezone this to Urban Place. We feel that this is a more compatible use to the neighboring St. Dunstan's neighborhood. We wanted to be ahead of the curve implementing the Dykeman Plan. This is what you want and this is what we want to do as well. We will utilize smart growth techniques such as pedestrian scale streetscapes, ground level retail and mixed use constructions. I urge you to vote in favor of this rezoning. Thanks. If you have any questions, feel free.

Mayor Bellamy - Thank you so much. Any other members of the community wishing to address Council on this matter this evening? I will close the public hearing at 7:15 p.m. Council, any questions, comments or a motion? Councilman Freeborn.

Councilman Freeborn moved for the adoption of Ordinance No. 3460 to rezone a portion of property located at 18 and 20 Meadow Road from CI Commercial Industrial District to Urban Place District and find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 309

Mayor Bellamy - Can I have a motion to go into closed session? We are going to do that while we take our break.

At 7:19 p.m., Councilman Mumpower moved to go into closed session for the following purposes: (1) To establish or to instruct the City's staff or negotiating agents concerning the position to be taken by or on behalf of the City in negotiating the terms of contracts for the acquisition of real property on Victoria Road by purchase, option, exchange or lease. The statutory authorization is contained in G.S. 143-318.11(a)(5); and (2) To consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville; State of North Carolina; County of Buncombe; and Gabriel Ferrari. The statutory authorization is contained in G.S. 143-318.11(a)(3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:48 p.m., Mayor Bellamy stated that the closed session would continue after the completion of the agenda for the regular meeting.

D. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO REVISIONS TO THE LANDSCAPE STANDARDS

Assistant Director of Planning & Zoning Shannon Tuch said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) relating to revisions to the landscape standards. This public hearing was advertised on March 30 and April 6, 2007.

From Staff Report: Staff has identified challenges to reviewing required landscape plans; specifically, staff has noted that in reviewing plans it is extremely rare that the existing landscape standards are interpreted and applied correctly. This results in multiple revisions and re-reviews and requires additional time to be spent on the project for both the applicant and City staff. Additionally, City Council has requested that staff examine the 'Alternative Compliance' component of the landscape standards and propose a more objective set of standards to apply when a project requires additional flexibility. Lastly, the existing standards are virtually unchanged from those adopted almost ten (10) years ago and are somewhat out-dated; the new draft will better reflect current practices and current city goals and objectives. This draft is intended to replace, in its entirety, the existing Landscape and Buffering standards (Sec. 7-11-2).

To examine the existing standards, staff felt it best to assemble a group of individuals who could review the existing standards and help identify opportunities to clarify, update, and/or enhance the existing standards. This "Landscape Committee" met every other week for almost four months and would often reference common practices in communities across the country; committee members included:

Planning & Development - Shannon Tuch, Scott Shuford, Alan Glines

Public Works - Mark Foster (City Arborist), Richard Grant (Assistant Director)

Tree Commission Representatives – Peter Loewer (Botanist), Peter Gentling (Retired Physician), Bob Gale (Landscape Designer & Environmental Planner), Starr Silvis (Water Quality Engineer), Bill Jones (Nurseryman)

Design Professionals – Suzanne Godsey, RLA (Site Work Studios), Stephanie Pankiewicz, RLA (Land Design), Jason Gilliland, RLA (Land Design)

Additionally, staff has presented this draft along with a summary of the changes at the last CIBO meeting in January and has also circulated the same draft to a number of other design professionals in the area as well as to representatives of CAN and CREIA. As a result, a number of additional comments have been received and addressed in this latest draft.

This ordinance is intended to replace the existing *Landscaping and Buffering* Section (Sec. 7-11-2) in its entirety, with this new revised and updated version.

The following is a summary that describes the changes proposed by the planning staff, influenced by the Landscape Committee. Some of the more significant changes have been noted with an asterisk (*).

**Re-organization/Re-formatting* – The Committee and staff all agreed that it was in the City's best interest to produce a revised *Ordinance* that was easier to understand and apply. Paring down and re-organizing the content of the section was proposed by staff with input from the Committee. The Committee was particularly helpful in identifying opportunity for illustrations and construction details. The illustrations in this draft are very rough and will be replaced by more refined computer generated drawings as part of an effort to uniformly replace all drawings in the *Ordinance* at a later date.

Purpose Statement – The Committee felt quite strongly that the existing purpose statement was too generic for Asheville's unique plant diversity and geology. This revised statement is the work of several Committee members and has not been altered by staff.

* *Buffering Between Zoning Designations (not uses)* – This was one of the most significant changes and was proposed by staff for the Committee's consideration. The rationale behind the change was to support a stronger relationship between parcels to minimize the number of non-conformities and to encourage the re-development of non-conforming uses to better support the development goals of the community at large. The Committee was concerned over the possible reduction in the total amount of plant material required for a project but agreed to support the change with the enhancement of other standards.

* *Elimination of the 5' Planting Strip Requirement* – Staff proposed the elimination of this requirement due to the frequency of misinterpretation and misapplication that was responsible for a large number of revisions that consumed staff time as well as that of the designers and developers. Again, as with the changes to buffers, the loss of plant material by the elimination of this standard is proposed to be counter-balanced by enhancing other standards.

* *Enhanced Requirements for Parking Lots* – the total number of trees and shrubs has been increased by 25% (trees) and 100% (shrubs). Additionally, new requirements were added to improve the growing conditions of the plant material while maintaining flexibility in site design.

Establish Compliance and Maintenance Standards – Staff worked with the Committee to develop some basic pruning standards not formerly addressed in the *Ordinance*. Additionally, compliance with these standards has been strengthened with the simultaneous development of a separate set of "destruction" fines that would apply to excessive pruning, topping, or unpermitted removal of required landscaping. This amendment to Enforcement (Article XVIII) will be handled separately and prepared by the City's legal department. In the interim, the fine table shown will be utilized.

Changes in Plant Specifications – these changes were recommended by the Committee to better reflect the standards used in the plant nursery industry.

Changes in the Species Composition of the Buffers – again, these changes were proposed by the Committee to better reflect naturally occurring plant communities. These changes resulted in less evergreen material but more mid-sized material in order to continue to offer effective buffering; total plant numbers were slightly increased.

* *Providing Objective Standards for Alternative Compliance* – Recent scrutiny over the City's application of "Alternative Compliance" has guided staff to develop objective standards for consideration. Given the varying standards and circumstances in which they are applied, plans reviewers were polled for the most commonly applied alternatives to develop a list specific to each standard. Additionally, opportunity for consideration for other alternatives is provided through a review by the Asheville Tree Commission who will act as an advisory board and provide a recommendation to the Planning Director. For those who disagree with the recommendation may then appeal that recommendation to the Asheville Board of Adjustment.

* *Required Tree Preservation/Building Landscaping* – The Landscape Committee and staff were interested in exploring the possibility of requiring tree and shrub preservation as a new requirement to help off-set some of the proposed reductions; however, developing a simple and fair standard proved to be extremely challenging given the varying nature of possible development proposals. As an alternative, staff has proposed a new standard of requiring 1 tree and 4 shrubs for every 1000 square feet of building footprint. This is intended to help balance the loss of plant material through the elimination of some buffers and 5' planting strips.

This ordinance is intended to replace the existing *Landscaping and Buffering* Section (Sec. 7-11-2) in its entirety, with this new revised and updated version.

Pros:

- Provides a format that is easier to read and comprehend – reducing review times.

- Eliminates problematic standards that offered little value while enhancing other standards that will result in increased health of the urban landscape.
- Provides objective standards for alternative compliance and creates an appeal process that was previously unavailable.
- Establishes a separate set of fines for the improper maintenance or unapproved removal of required landscape material (public education will be provided prior to the initiation of these fines).
- Better reflects City adopted goals/objectives and current practices.
- Encourages 1) the redevelopment of non-conforming uses in commercially zoned areas; 2) preservation of existing plant material; 3) smaller building footprints.

Cons:

- Some projects may result in more landscape material than currently required.
- Some projects may result in less landscape material than currently required.
- Will require a period of learning and adjustment by staff, developers, and designers.

Planning and Development staff recommends City Council approve an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville establishing landscape and buffering requirements.

From Memo dated April 10, 2007, from Ms. Tuch - Recommended Changes to the Landscape Standards Amendment (Sec. 7-11-2): Planning staff has been engaged in an ongoing, collaborative effort with representatives of CAN, and other members of the community, to address a number of comments and concerns regarding the proposed amendment to the landscape standards. The large majority of these comments have been easily accommodated or addressed in various revisions and the interest and input has been greatly appreciated believing that this effort has resulted in a better, more comprehensive product.

Most recently, several new comments have been raised that staff feels can be easily accommodated and incorporated into the recommended draft. Staff was already working on several of these items when new comments were received from Mr. James Judd. In most cases, staff feels that all items raised by Mr. Judd can be easily addressed through minor revisions to the current draft. The following is a summary of those revisions presented in the order of Mr. Judd's most recent comments:

1) 7-11-2(e) *Alternative Compliance.*
As Mr. Judd indicated, we have "agreed to disagree" as to whether alternative compliance requests need to be quasi-judicial. However, staff has continued to work to address some of Mr. Judd's concerns and would like to revise the subsection 7-11-2(e)(5) *Other alternative compliance* requests to read:

All other alternative compliance requests not identified in this subsection may be reviewed by the Asheville Tree Commission who will act as an advisory board to the Planning Director. The applicant for such a request shall notify by mail all adjacent property owners at least 10 days in advance of the meeting of the Tree Commission where the request is to be considered. The notice shall state the time and place of the meeting, and shall include a general description of the request. The Commission, upon consideration of such a request may recommend approval, approval with conditions, or denial of the request. After receiving the recommendations of the Tree Commission, the Planning Director shall make the final decision on such requests, and shall provide a copy of that decision to any adjacent property owners who have requested one. Under no circumstances may the Tree Commission recommend or the Planning Director approve an alternative that reduces the standard requirements by more than 50%. Applicants or other aggrieved parties may appeal a recommendation to the Asheville Board of Adjustment as outlined in Article VI of this chapter.

a. *Alternative compliance standards.* No request for alternative compliance under this section may be approved unless the information provided in support of the request shows the following:

i. The site in question is affected by physical conditions or constraints, not attributable to proposed site design or building design, that make compliance with the standard requirements practically impossible.

ii. The physical conditions or constraints are not a result of the applicant's own actions.

iii. The proposed alternative will not present a safety hazard.

iv. The proposed alternative will, upon maturity, provide landscaping that is equal to or better than the standard requirements.

v. The proposed alternative is designed to address plant health and vigor.

vi. The proposed alternative is reasonably compatible with the natural and topographic features of the site.

2) 7-11-2(d)(1)g *Corner Lots and Through Lots.*
Again, as Mr. Judd has mentioned, staff had been working on a refinement to this standard and would like to propose that we remove a portion of last sentence and add definition of "pedestrian oriented"

Pedestrian oriented design. Means a building design and orientation that is conducive to pedestrian access and comfort. These designs shall at a minimum include the following features: buildings shall be oriented towards the appropriate access corridors; access corridors must be identified on the pedestrian thoroughfare plan, evenly distributed windows shall be provided at the pedestrian level; no uninterrupted expanse of wall greater than 20'; a well defined, operable public entrance on side of building with direct access to a public sidewalk or courtyard within 15'.

3) Non-Screened Fences with 50% buffer yard reduction.
The current version of the ordinance [7-11-2(d)17d] contains the ability to reduce the buffer yard by 50% with installation of a fence or wall under the condition that trees/shrubs are spaced closely in front of the wall to screen at least 50% of the fence. The proposed ordinance covers this in the alternative compliance section [7-11-2(d)1e] but has NO requirement for screening of the fence with trees/shrubs. It is my impression that staff has knowingly removed this It is very tough to understand why we are reducing the buffer yard by 50% in exchange for getting a blank wall or fence possibly RIGHT on the property line with all of the shrubs / trees hidden behind it. Why should this be allowed or why is it even necessary to not abide by the current standards? A requirement for plantings along a fence is, in fact, included in the new draft where it reads, "buffer widths and plantings may be reduced by 50% with the installation of a 6' high, opaque privacy fence. . ." This results in more vegetation than what is currently required. Not requiring plantings to be placed on the outside of the fence was an intentional change suggested by the committee due to typically encountered site constraints. This can be amended to require the plantings to be placed on the exterior of the fence, should the Council desire this.

4) Fence Screening for Dumpsters etc. Should specify that the trees and shrubs for screening the fence needs to be "on the side which faces the abutting property owner" [7-11-2(c)6]
Staff addressed this in the new draft requiring that the "landscape . . . screen at least 50% of the fence or wall" but this can very easily be further clarified to state that the requirement is to screen

the "exterior" of the fence or wall. Staff is happy to make this adjustment.

5) Alternative Buffering from Street Should consider adding similar fence screening wording as proposed above. Should consider if a 3 foot high berm covered with grass is the intended standard for "completely covered with vegetation". [7-11-2(d)2]
Requiring the vegetation on the exterior of the fence or wall is very easily accommodated, staff can easily make this adjustment.

Regarding the second comment, berms are often covered with other plant material besides "grass" and can include ornamental shrubs, hedges, trees, groundcovers, or any combination of theses materials. Staff would prefer for the standard to remain as proposed to encourage more ornamental alternatives than a simple "grassed" berm.

6) Applicability [7-11-2(b)] This section discusses what developments must be brought into full compliance with Article 11. I am concerned about the following:

- Cohesiveness with the new Article 7-17 on nonconforming items. To be cohesive with Article 7-17 need to at least define Appraised in the context of 50% renovation and need to put a time span on accumulation of costs.
- Because it requires compliance to all of Article 11 and not just Landscaping (7-11-2), this section was slated to be moved (and made it at least to Planning & Zoning) to the beginning or Article 11 (7-11) instead of being at the beginning of 7-11-2

Staff revised this portion of the draft to conform with a recent amendment to Article 11 (approved 11/28/06) that sets forth applicability standards for the entirety of Article 11, including the landscaping section. This information is duplicated in 7-11-2 because there is an existing requirement (new additions/expansions less than 50% of pre-existing structure) that is applied only to landscaping and not to the other sections of Article 11 – staff felt it best to duplicate the information rather than cross-reference. The 11/28/06 amendment also included several definitions, including one for appraised value. Mr. Judd's other comments regarding the accumulation of renovation costs is addressed in Mr. Shuford's amendment to Article 17 but can also be addressed through a minor amendment to Article 11 – this is a good suggestion but should be covered in both 7-11-1 and 7-11-2. Staff is happy to make this adjustment.

Amend 7-11-2(b)(1)(c) and 7-11-1(c) to read:
(c) Renovations with a total cost exceeding fifty (50) percent of the appraised value of the building. The value of any expansions, enlargements, or reconstruction of such structures over a three year period shall be cumulated in calculating the fifty percent threshold.

7) Other Alternative Compliance Standards Should add a standard that the problem wasn't created by the developer. Should add the current standard that the alternative compliance should be "as good as or better than normal compliance".
Suggested change is incorporated into the revised Alternative Compliance section above.

8) Driveway Openings recommend adding stronger wording to make it clear that openings through the buffer yard for driveways should be minimized as to distance through the buffer yard. Had proposed specifying maximum angle of driveway crossing. Staff added drive aisles (parking lot) and driveways as prohibited. My concern is that Council's intent is very clear. Historically, Mr. Shuford has used the lack of clarity to approve driveways and parking aisles in the buffer yard which circled 3 sides of a development while calling this a driveway opening even though driveways and parking lots (per zoning district which includes spaces and aisles) were prohibited in the buffer yard.
Mr. Judd's alternative had recommended a detailed description of the angle of the driveway opening and BOA options for those driveways that did not meet this description. Staff felt this was an excessive amount of detail and preferred the flexibility of a general driveway opening that

could cross a buffer. We did attempt to address (at least) some of Mr. Judd's concerns through a prohibition of drive aisles and driveways in buffers. The detailed standard that Mr. Judd recommended can be incorporated, should Council desire this.

Mayor Bellamy - Thank you and good evening. Mayor Bellamy, Council members and members of the public. I would like to make this introduction be pretty brief so that we can reserve some time for some questions as we go. But as the Mayor has already indicated, this item before you is the consideration of an amendment to Article 11, and specifically it is subsection 7-11-2, which is devoted entirely to the City's required landscaping. I am pleased to be here before you tonight because presenting this draft represents a lot of hard work by a lot of different individuals in our community. The work began last summer with the assembling of a committee of a diverse group of professions, all volunteers, who met with staff regularly to research and examine the different landscape standards. In addition to the work that these volunteers did, there were a number of people in the community who also helped on their own reviewing various drafts and providing some input. We have also taken the opportunity to present these drafts to different organizations including CIBO and some other groups and again, to any other part who was interested. We worked pretty diligently to incorporate a variety of concerns and comments from these different parties into the draft you have before you tonight. To summarize, our landscape standards have remained virtually unchanged since the UDO was adopted. Evolving practices, technologies and goals have warranted the consideration of an amendment. Now the amendment that you have, basically to summarize, seeks to improve the clarify and applicability of the standards, this includes changes to our alternative compliance process which has been the subject of some attention over the last year or so. We also propose to remove complicated standards that we feel have offered little benefit and possibly even conflict with some other goals. We propose to enhance other standards that we think will be more effective and easier to apply. And to create some new standards that will improve the aesthetics and health of our urban landscape and which will also provide incentives to retain existing vegetation on site. Staff feels as though this amendment will allow for some more optimal and efficient use of land while allowing for more flexibility in site design. As such, we are recommending that you approve this draft tonight with some recommended changes that were included in the memo that was addressed to you earlier today. I'll only add that the work regarding our landscape standards doesn't end with the adoption of this amendment. Once this is approved, staff will complete the work that has been devoted to developing some construction details that will ultimately be included in our Standards & Specifications Manual. Currently we have no such details and so work has already been initiated and we will complete that. Also I believe it was noted in your staff report that the illustrations that are in your staff report are pretty crude, rough illustration. We are working on all revising all of those illustrations to be in a more consistent form throughout the ordinance. That will include all illustrations in the ordinance, not just in subsection 7-11-2. (Used illustration example) But just to give you an example, one of the illustrations you had basically represented this scenario and this is a more refined version. This is what we expect to produce for you as we move through that process. (Using 3-D illustration example) Additionally, the illustrations are what would be included in the document, but we are also looking at creating a 3-D short of virtual development scenario - where you have commercial against residential. This will be a 3-D version that will be accessible through the City's website. It would allow anybody who was wondering what exactly we are talking about with these landscape islands, what does a buffer look like, how does it get applied. And allow you to zoom in on specific views representing those different standards. This is just a snapshot of one of those views. Another thing that staff will initiate once we are beyond the amendment process is we would like to work with the Landscape Committee, the Tree Commission and the City Arborist to develop some seminars to educate landscape contractors and other interested parties in regards to the new pruning and maintenance standards. And we would like to do this before enforcement of those fines that are imposed in the table are actually initiated. Lastly, the Asheville Tree Commission has been working with staff in updating the City's recommended species lists. That is a process that has been underway. I think they've almost got consensus on what needs to be included in the list and what doesn't. So we expect that to be revised very

shortly. That concludes my summary and you may now proceed with opening the public hearing for public comment.

Mayor Bellamy - All right. Thank you. I'll open the public hearing at 7:48 p.m. Do any members of the community wish to address Council on this matter?

Mr. Joe Minicozzi - I'm President of the Coalition of Asheville Neighborhoods.

Mayor Bellamy - Mr. Minicozzi, are you requesting 3 minutes or 10?

Mr. Minicozzi - I'll try to do it in 3. We have actually been in conversation with Shannon today. We want to see this go forward and we want to see the changes that were recommended to you. We just have some comment as far as the alternative compliance standards that were written in the document. I don't have what is before you tonight. I only have what went before the Planning Board. Basically it leaves a lot of room for interpretation in the alternative compliance standards. There is still some discretion that can be made. It's not fully clear with objective standards as far as where the leeway is. I'll draw your attention to, this is one here. It just says vertical separation is completely covered with vegetation. My question to you is "what kind"? Is it just grass? If the standard stated that you have to have trees and shrubs and all this other stuff, but you can exchange that with the berm or a mound that is just covered with grass, does that meet the standard. There are some things that we need to work out with Shannon. I don't know what the best way to do that, or the best way to communicate this and still get the policy moving forward and not slow things down. These are questions that we have on the alternative compliance. And finally with that. The process of trying to use, or utilize the Tree Commission and whether or not that meets the full standards of a quasi-judicial hearing. Here you are changing numeric requirements and is the due process being followed in that And that's a question we have. I don't know whether it was resolved this afternoon between Shannon and James, but I did want to have that as part of the record and part of the conversation. Thank you.

Mayor Bellamy - Thank you. And just so you know, Shannon did do another amendment to the information that was presented to Council that specifically addressed point by point the matters that James Judd and representatives of CAN put forward. For instance, the example that you just put up, staff's response was "Regarding the second comment, berms are often covered with other plant material besides "grass" and can include ornamental shrubs, hedges, trees, groundcovers, or any combination of theses materials. Staff would prefer for the standard to remain as proposed to encourage more ornamental alternatives than a simple "grassed" berm. And so I think that typically they are trying to get to some of the issues you have presented.

Mr. Minicozzi - It should say that. It should say exactly what you mentioned, so that there is no discretion or unpredictability. I, as a developer, may say it's got grass, so it's vegetation. And the intention of the policy may be to have shrubs, trees, ornamental flowers, whatever. But if that's the intention, it should be there in the document.

Mayor Bellamy - It should say specifically what the preference would be. Got it for clarity. That is good. That will be up to us to negotiate that into the motion that is made. Because staff did answer each of the questions specifically with something that is easily able to be clarified. Does that make sense Council?

Councilwoman Cape - If you don't mind Mayor, it did get a little confusing with me. Could we ask Shannon to clarify? I see their point completely with this one. If you just say vegetation, you could have ... and that wouldn't suffice much for landscaping buffering. So how, if we are trying to say we are putting landscaping buffering in to protect - these aren't just visual - it is landscaping for - what is the intent of the landscaping in this place?

Ms. Tuch - You have to consider the context in all these situations. In this particular case, the standard applies to the alternative buffering from the street, which is basically shrubs,

usually combined with street trees in between, say a parking area and pedestrian sidewalk. Typically. So, this is an area that already has trees and shrubs. So, what this allows is the creation of a berm, in lieu of the shrubs. And what we're saying is we want that covered in vegetation. It could be grass. It could be perennials. It could be a combination of shrubs and perennials. It could be a combination of trees. I believe our intent was to preclude the ability for somebody to do grass, when it's combined with trees, because that would be an effective buffer. So, it's an easy amendment to make to simply put in the description that the Mayor read earlier, at Council's discretion.

Mayor Bellamy - Okay. How about if we take additional public comment and maybe there are other issues we need to address and the Council can put in there. Any other members of the community wishing to address Council on the landscaping requirements? Councilman Davis.

Councilman Davis - May I address one more point that Joe brought up?

Mayor Bellamy - I promise you that if you let me see if there is anyone else, then we can go right into this. Any other members of the community wishing to speak? I will close the public hearing at 7:50 p.m. Councilman Davis, go right ahead.

Councilman Davis - I thought it was a great question about the quasi-judicial nature of the Tree Commission's findings. I don't think at any time during this process that the Tree Commission had ever thought that they would be the quasi-judicial body that would hear this. They would make a recommendation to the Zoning Administrator and the applicant could, of course, appeal his or her decision. But the Tree Commission would not be that hearing body.

Mayor Bellamy - Okay. That is a good piece of information, but I think that if it's not stated in our ordinance, it could be misconstrued. So, how about we put that little language as part of our ordinance that the Tree Commission isn't quasi-judicial, but their information or recommendations are just that.

Mr. Minicozzi - The comment was that if we have numeric requirements of the Code, like I have to wear a black blazer, one black blazer, and to adjust that number that becomes a quasi-judicial hearing. Now we are exposing the law in changing numbers. And in the alternative compliance, the whole section of the alternative compliance does that, so it becomes a quasi-judicial hearing and the Tree Board - I don't know if that has the capacity to become. In theory, once you start changing numbers, it goes into the Board of Adjustments. So at the very end, the last number is another form of alternative compliance without numeric requirements in it. So, is that a quasi-judicial process - yes or no? And, the Tree Commission doesn't have the authority to make those decisions.

Mayor Bellamy - Got it. Councilwoman Cape.

Councilwoman Cape - Can we ask Bob? Bob, what is the process? I mean he's saying that if we made adjustments, it becomes quasi-judicial. It seems like it should go towards the Board of Adjustment if that is the case.

City Attorney Oast - I think that as long as the ability of the staff to make determinations is confined within certain parameters, or the Tree Commission. I think that what we need to guard against is unbounded discretion. In the cases that we are looking at here, the discretion is very much bounded. First of all, the situation won't arise that much, that frequently. Secondly, staff has to make certain objective determinations in the course deciding whether alternative compliance is applied. And finally, the amount of alternative compliance that they can authorize is limited. The changes that we have made in response to Mr. Judd's comments would provide that the applicant who wants to get this alternative compliance has to notify the adjacent property owners of the Tree Commission's meeting. The Tree Commission in this case is merely advisory. The Commission makes recommendations to the Planning Director. The Director then

makes the decision and has to notify anyone who requests a copy of the decision. That decision can then be appealed to the Board of Adjustment. The case in North Carolina that covers this situation is County of Lancaster v. Mecklenburg and that is pretty much the process that was outlined in that case.

Mayor Bellamy - Sidebar. Maggie if you could make sure that when you do the minutes, you transcribe that verbatim. This conversation verbatim.

City Attorney Oast - I guess is what I want to say is I understand Mr. Judd's due process concerns. I think that we have addressed those in the manner that the law permits us to. And addressed a lot of his concerns about the adjacent property owners having notice and the ability to participate and know when a decision is made so they can appeal it.

Mayor Bellamy - Councilwoman Cape, did you have a list of questions?

Councilwoman Cape - That was where the issue comes up. If people do have opposition to it and at what point in the process can they say they have opposition to it. You're saying that we can designate description that staff has bounds to make decisions upon and that these have been designated. Now I would like, since this has been brought up to us, do you have and accept what is being said here?

Mr. Minicozzi - The hard part for me is that I don't have what is in your hands. What I have is the ordinance that went before the Planning Board. And when I read this item. (Mayor Bellamy gave Mr. Minicozzi the memo from Shannon Tuch dated April 10, 2007.)

Councilwoman Cape - I'd be happy to read it to you. If you don't mind Mayor Bellamy, they would say "All other alternative compliance requests not identified in this subsection may be reviewed by the Asheville Tree Commission who will act as an advisory board to the Planning Director. The applicant for such a request shall notify by mail all adjacent property owners at least 10 days in advance of the meeting of the Tree Commission where the request is to be considered. The notice shall state the time and place of the meeting."

Mr. Minicozzi - But when that body meets, when you meet on a conditional use permit, like you're about to have tonight, you have to have standards for giving that conditional use. You have items to meet and those are your rules to make that decision. That statement allows the board to make a discretionary decision without any rules. So the Tree Board meets and they pass judgment with the Planning Director. What framework do they have to make those decisions? Can they all of a sudden decide we're the Tree Commission and we don't like trees today - all the trees come down. Does that meet the objective zoning standards of the requirement?

City Attorney Oast - There are standards in paragraph (a).

Councilwoman Cape - Under (a) compliance standards exist. The only problem that I see in this, Mayor Bellamy, is the aspect of we are talking about street frontage landscaping? Is that right? You said that these were the berms, or are you talking about any alternative compliance in this?

Ms. Tuch - The draft that you have describes what the typical standards are. Towards the end of the draft, it describes alternatives that are codified. So, if you can't meet the basic standard, here are some special exceptions so if you can meet these objective standards, then you can be approved. All other cases would go to the Tree Commission.

Councilwoman Cape - My biggest concern is that a lot of times the people who are directly upset by this are not the people who live on either side of it. It's the people who drive by.

So we put up zoning signs in communities to say this is going to be zoned. Is there a possibility of having an alternative compliance sign that goes up as a notification?

Mayor Bellamy - One of the things that has to be blatantly clear in this revision is what is codified, and actually list what exactly our alternatives and who has the authority to determine when that can be triggered. When it can be triggered that they cannot technically meet the requirements that are set forth here and what triggers them to be able to go to the alterative. And that list of alternatives has to be crystal clear.

Ms. Tuch - And that is in the draft. We do have very specific guidelines by which certain standards can be applied. When, of course, we are talking about a lot of different scenarios. A lot of different kinds of landscaping requirements, whether it's from street trees, to buffering from the streets, to parking lot landscaping, to screens around dumpsters.

Mayor Bellamy - You know in our trusty-dusty UDO there is list of uses for RM-2, RM-6 districts and every conceivable use is listed in one part of the UDO. We used to have a list up here at our places, that for RM-6 everything that is conceivable could be developed in the RM-6 district was listed. Is that possible? If you have a berm, these are the alternatives. If you have a required shrub or trees, these are the alternatives. Not all over, but in the places that it's referred to, you could see appendix item j. That way it is crystal clear what is available for an alternative and who has the authority to allow that to happen.

Ms. Tuch - I think if I understand you correctly, that is what we are proposing in this draft. What we did is we pulled staff and we asked all the people who reviewed the landscape plans, what is the most common alternative compliance scenarios that you encounter, so that we can incorporate those into an actual standard, rather than have to review it as an alternative compliance. That's in this draft. It's all of those all unusual a-typical situations that we are trying to address in the section that Mr. Judd referred to. What we have attempted to do is bound what could possibly be reduced or waived or altered and that is what Mr. Oast is referring to. We put a maximum limit on that. So we feel as though we have addressed those concerns and a concern legally, by putting some parameters on that. And we also created the opportunity for the public to be notified so that if there were a concern, it could be appealed. And it could be appealed to a quasi-judicial body which would be the Board of Adjustment, not necessarily the Tree Commission.

Mayor Bellamy - Okay. I think that needs to be pin-point accurately spelled out in the ordinance. The steps by which an individual or a property owner can appeal for a change, or have the opportunity to state I can't meet this need and staff said this, so what is my next step. And someone that is an adjacent property owner who doesn't agree with the ruling or the alternative put in.

Ms. Tuch - It is put in there, but we can make it even a little more crystal clear.

Mayor Bellamy - Councilman Newman.

Councilman Newman - I think this looks good. Getting this additional information right before the meeting and we were getting some e-mails from folks from the Coalition of Asheville Neighborhoods earlier in the day. And we had a meeting starting at 3:00 p.m. right up to the beginning of this meeting. Are we being asked to approve this tonight? Yes, that is want is anticipated, correct?

Mayor Bellamy - Yes.

Councilman Newman - Would it be possible, for myself, I would appreciate having just a little more time to look at this information and process the information that staff has presented

with us tonight. Would it be possible for us to continue this for one week or two weeks to just process this information a little bit better before we take a final vote on it?

Mayor Bellamy - Let's go ahead and carry that out before I hear any other comments and questions from members of Council, because I don't want to do this again. Keeping in mind, we have opened and closed the hearing and have covered all information that has been presented. So that would just be an opportunity for Council to digest all that we have been given. So, the issue on the floor, if no other comments about the ordinance, is the vote. Do we want to delay that at least a week, two weeks is a bigger bear. Like my terminology? To the 17th. Am I okay with notification - there is not a public hearing, but there is a vote. Am I okay with the notification process?

Ms. Tuch - Mayor, I'm out of town on the 17th.

Mayor Bellamy - So we're going to stop all City business because you're out of town? Where is Alan Glines? Sorry about the comedy.

Councilman Mumpower - Mayor, is it absolutely necessary to postpone this item?

Mayor Bellamy - We're going to carry that out in just a second, but Bob. First of all, technically can we continue it for a week and meet any notification requirements?

City Attorney Oast - Yes.

Mayor Bellamy - Okay. Council I have one request. Is that in the form of a motion for a continuance?

Councilman Newman - You mean if we're going to come back and Shannon's not going to be here? There may be some questions that arise and there is no one that can answer the questions. Do you think we need you?

Ms. Tuch - I think that would be the best if it were me.

Mayor Bellamy - Then we will have to delay this until May 8. Only because the 24th we already have four UDO amendments that are comprehensive in nature.

Councilman Newman - Then I have a process question related to this. I hear the staff saying there are several different things that they are thinking about tweaking additionally, or do you think it's already there enough?

Ms. Tuch - I think we have been very successful in working with - Mr. Minicozzi I think is getting involved sort of a little bit late in the game. But the majority of my correspondence has been with Mr. Judd, most recently with Mr. Judd. And I think we have been very effectively addressing his comments. There may be a couple points where it may be simply, we're not going to recommend that, but it's something that can be incorporated and adopted, should Council direct that.

Mayor Bellamy - All right. Councilman Newman is there still a desire to continue?

Councilman Newman - The question is, if we did just go ahead and vote on it tonight and it were approved, it sounds like there still may be some tweaking done to it to look at some of this?

Ms. Tuch - Well, we have tweaked it. And that is the memo that is before you. Our hope was that you would be able to approve this with the revisions outlined in this memo. Now there are a couple of items on this memo, and I can go through those if you like, that Mr. Judd

preferred a different alternative than what staff was recommending. And that is something that Council can make a decision on.

Mayor Bellamy - And keeping in mind that if we approve this and you write it out in UDO format, we can still bring it back and tweak it on May 8 or later. Council still has that opportunity because it's a UDO amendment and we can change it. So, Councilman Newman, I want to make sure you're where you need to be so we can move forward.

Councilman Newman - For myself, I would prefer to take a couple more weeks. It's just hard to read information.

Mayor Bellamy - If you will make a motion, we can carry it out to May 8.

Councilman Newman - I make a motion that we continue the matter until May 8.

Mayor Bellamy - Is there a second? Motion dies for lack of a second. Councilwoman Cape was next.

Councilwoman Cape - I actually have been digging into this and so these amendments have been very helpful. So there is an area where you say, should Council desire, I do want to understand, I do think that when we put up a landscape, it's people on the other side, not our project, that need to be protected. I personally would rather see trees, than a fence. So, is it not standard that the landscaping, the beautiful landscaping side is on the people on the receiving end?

Ms. Tuch - Currently our standard is that you can reduce your buffer width by 50%. So, I'll just give you an example. If you have a 20 ft. wide buffer, you can reduce that to 10 feet with the installation of an opaque privacy fence. What is required as far as vegetation with that fence is one shrub planted every 8 feet on center on the exterior fence. You are looking at shrubs. So, the majority of those situations we've found were adapted infill, the shrubs didn't grow well. When people tried to, oftentimes there was existing vegetation on the adjacent property owner's property and to try to dig holes for trees or shrubs sometimes created more root disturbance than what the fence post would require. So what we've done is we have increased the amount of landscaping that would be required with that fence. First of all we've made restrictions on when you can use a fence. Currently there are no restrictions of when you can use a fence. It's just allowed by right. We are putting parameters on when a fence can be used as an alternative. And then with that, we have increased the amount of vegetation. So, understanding the common scenario that we encounter with running into problems with vegetation actually being able to grow in those sort of shaded environments, it's not always that way but typically it's pretty common, that we thought it best to just require the landscaping. We'd encourage people to put it on the opposite side of the fence if we could, but now that we are requiring trees in addition to a fence, the thought, by the committee at least, was that the trees would grow and branch over. There would be more visual interest than just a blank fence. We can change that. It's not a standard that would be difficult to change to require the landscaping on the other side. But, that will probably result in more alternative compliances going to the Tree Commission because we are going to encounter those scenarios where vegetation is not going to grow.

Mayor Bellamy - Councilman Freeborn.

Councilman Freeborn - On the section going back to the Tree Commission making a recommendation to the Planning Director making the final decision. It goes down to say "applicants or aggrieved parties may appeal a recommendation to the Asheville Board of Adjustment as outlined in Article VI of this chapter." I'm not finding that. I just want to know when is an aggrieved party going to know that a decision has been made and at what point in time are they able to appeal the decision. Because that is something that has come up and I want to make sure that we are addressing that and that it's crystal clear.

Ms Tuch - With one glaring exception - I shouldn't say that - there are a few cases where people will approach the department and say why isn't that subdivision like we saw earlier. Where is the buffer? Why isn't there a buffer? And then we have to explain there was no buffer required. We do run into that occasionally, but we are attempting to address that by requiring that the applicant notify adjacent property owners as they would be the most likely aggrieved party. So they would be notified. They would not know that there is an alternative compliance being requested and they would have the opportunity to come to the Tree Commission, hear the request and voice their concern. If they don't like the outcome of that recommendation, they can appeal that to the Board of Adjustment.

Mayor Bellamy - The key thing being that they will be notified if it's an alternative compliance request.

Councilman Freeborn - Okay. I'm just going to repeat what you said, Mayor, just to make sure I'm not dense. You're saying that if the decision is made that it is alternative compliance, then the adjacent property owners are going to be notified.

Ms. Tuch - No, they will be notified that the request is being considered. So they'll have the opportunity to come to the Tree Commission meeting, hear the request, contact the owner ahead of time. Just like you would with any other public hearing notification process that we have now. They would be able to learn what that request was. If they agreed with that request, then problem solved. If they don't agree with the recommendation, then they would have the opportunity to appeal that.

Councilman Freeborn - At what point in time are they going to know a decision is made? The Planning Director ultimately makes the decision. So the decision is made by the Planning Director and neighbors are not notified unless they.

City Attorney Oast - Unless they have requested a copy of the ruling. And it says that right in the provision.

Councilman Freeborn - How will they know that a ruling has been made?

City Attorney Oast - It says that " the Planning Director shall make the final decision on such requests, and shall provide a copy of that decision to any adjacent property owners who have requested one."

Councilman Freeborn - But at what point in time? What is the timeframe to which the Planning Director will make a decision like this?

Ms. Tuch - Truthfully and in reality, same day. Only in extremely extraordinary conditions would I envision that the Planning Director would disagree with the recommendation of the Tree Commission.

Councilman Freeborn - The reason why I am kind of belaboring this is because the average citizen doesn't know that. And the average citizen is going to go to the Tree Commission, hear what happens there, maybe it's approved, maybe it's not approved. They still don't know what is ultimately been decided and then they go home and wonder what's going to happen. It isn't until activity starts or a project is finished before they may realize that a decision had been made one way or the other. Then are they out? Is their ability to appeal that decision gone? Is it too late? We just need to make sure that the mechanism. If we are making these amendments to our UDO, we want to make sure that it's crystal clear to people and that we are not seeing the same problems coming before us time and time again.

Mayor Bellamy - Council. One thing is, it's just like tonight. This is on our agenda. The public was notified that we are having this meeting. And the public was notified of the changes that were made to some extent. And staff did another presentation to Council tonight But it's on the citizens to find out did they vote for it or did they not vote for it And I think what you are asking staff to do is carry it all the way through Staff has done a good job, supposedly on a new part of this, to notify the community or the adjacent property owners that there has been a request for an alternative compliance. Is that correct?

Ms. Tuch - That is correct.

Mayor Bellamy - So, it seems to me that somebody who really cares would pick up the phone and say what was the end result of the request.

Ms. Tuch - And I'll add that you might want to think about the Planning & Zoning Commission. They are an advisory body. They make a recommendation to the City Council. Same situation. The public wouldn't necessarily, if for some reason staff didn't agree with the recommendation of the Planning & Zoning Commission, the public wouldn't necessarily know that unless they requested that information or when the extra mile to investigate it in the staff report that went before Council. So, when you deal with advisory bodies, that is the burden that the citizen has to bear.

Vice-Mayor Jones - I wonder if there is some minor adjustment if we can do this. I have a similar concern.

City Attorney Oast - I do want to point out is that you're getting here that you don't currently have is notification that the request is going to be considered and the ability to obtain a copy of that decision.

Councilman Freeborn - I like all that. I think that's great. I'm just wanting to make sure, at what point in time does the clock run out for the aggrieved party, because that is the question I have asked and have not received an answer.

City Attorney Oast - It would be 30 days after they get a copy of the decision.

Vice-Mayor Jones - First of all, we're talking about alternative compliances. It's not like there is going to be 1,000. So, if we are going to have that list of folks who are adjacent property owners that we're going to send a notice of the meeting, what is the harm of firing off to the same list the decision, with the specifics about if you would like to appeal, here is the timeframe. Because I also - I don't know if we got your answer about what is the recommendation outlined in Chapter VI of this chapter.

Ms. Tuch - That is one detail that we can spell out and make crystal clear in this amendment is to describe that per Article VI that an aggrieved party has 30 days from the receipt of that decision to appeal this to the Asheville Board of Adjustment. That is an option we can do to make it much clearer.

Vice-Mayor Jones - That seems like a very simple thing. If we are already going to be notifying folks, then just.

Ms. Tuch - One thing that is different is we are asking. Because we are trying to balance customer service with a more public process. So we are asking that the applicant be the one to notify adjacent property owners. And that is a little different than what we currently do for other public hearings. As far as who is responsible to notify those individuals and how and when.

Councilman Freeborn - I think we should just take ownership and notify the adjacent property owners. If a request comes in for alternative compliance. If it is something that happens rarely then it shouldn't be that big of burden on us as an organization.

Ms. Tuch - It's a bigger burden than you may think. We receive a lot of alternative compliance requests. Now we are attempting to reduce the potential for those numbers of requests by codifying some of this information and basically creating some disincentives to pursue an alternative compliance. But, I think you are still going to see quite a number of requests.

Councilman Freeborn - Okay, in that case, let's try to approach it in a different way. What about if we just notify on the requests that are granted. If we say a request has been made, it's up to the applicant to notify their neighbors. We don't know if they've notified their neighbors or not - we're taking their word at it, I'm assuming.

Ms. Tuch - There are ways for us to find out. We could request, as part of their submittal, a copy of the certification or we could require that they do confirm delivery. There are ways that we can ensure that they did notify.

Mayor Bellamy - Councilwoman Cape.

Councilwoman Cape - I still go back to the idea that the way we could cheaply notify people is put an alternative compliance AC sign on a stake in the landscape area and anybody driving by who has problems with it goes to the project development website and says what is the alternative compliance being asked for. That way anybody who drives by, I mean, we do it for rezonings all the time. We don't notify every single person in the town that we are doing a rezoning. We have a big Z out there.

Ms. Tuch - You would see significantly more signs than you are currently seeing.

Councilwoman Cape - And then we would be in trouble with signs.

Ms. Tuch - Well, we would have signs everywhere and there is a fair amount of staff time that's taken, mileage, vehicles. A fair amount of coordination is taken to do that. As I mentioned, what we are attempting to do is balance customer service and efficiency with a more public process.

Mayor Bellamy - Council, Councilman Newman offered the opportunity to look at this thing a little more closely and have staff look at this and you call with any conditions or concerns that you may have. Because we've gone around the mulberry bush a little while on this particular issue and so I don't think there is a resolution to this. So, I would ask if someone on the board to reconsider that opportunity that we've been provided to be able to look at this a little bit closer to address any concerns that may be out there. And if not, it would be nice to have a motion to go ahead and approve it understanding that we will look at it again in the future.

Councilwoman Cape - I would like to make a motion that we approve this as presented with the changes given to us this evening, with a couple of little changes myself. So, my motion is to approve the landscaping ordinance with the changes staff gave us this afternoon. On the issue of non-screened fencing, where possible for plant protection, it will be planted on the abutting property side. Now if that could be added in there just as a caveat. And then on the screening of dumpsters, be on the exterior of the dumpster fencing. And seeking the best practice in notification of the community about alternative compliance.

Mayor Bellamy - I think that's wonderful. Is there a second to that motion with the three caveats that were included? Councilman Freeborn.

Councilman Freeborn - I'll second it for the sake of conversation.

Mayor Bellamy - I'd rather you not if you're not going to support it.

Councilman Freeborn - I may support it or may not. I think this is better than what we have now. I just want to know are we going to - is staff going to come back to us at any point in time with this?

Mayor Bellamy - No, not until Council would like to see it revisited.

Councilman Freeborn - Okay, then no, I'm not going to second this.

Mayor Bellamy - All right. Is there a second?

Vice-Mayor Jones - Your modifications were with non.

Councilwoman Cape - My modifications were just where possible, when there are fencing, instead of this little buffer, that where possible for plant protection, that it's facing the abutting properties. So that rather just a finished fence, they have landscaping on the abutting property sides, where possible for healthy plantings. Because if we just put that in there, it leans people in that direction, I think. And then it makes sense that we would want people to screen the outside of the dumpsters rather than the inside of the dumpsters, so we might as well say.

Ms. Tuch - That was part of our recommendation.

Councilwoman Cape - Yes, but you asked us to comment on that. So I'm commenting. You said, if Council likes. So, I'm adding it. And then best practice for public notification.

Mayor Bellamy - All right. Councilman Davis.

Councilman Davis - I can get there with the exception of the buffering on the outside of the fence. Because there is a problem with that in that the neighbor very likely will have problems in the future because it's inaccessible for someone to trim the hedges and maintaining it without going onto property they don't own. I just have difficulty with doing that. The rest of the proposal is good.

Councilwoman Cape - Well it should be on their property?

Councilman Davis - How would you be able to with the fence. How could you access it to trim it properly?

Councilwoman Cape - You walk around on the outside of the fence on your property to get to it?

Ms. Tuch - We're talking about a 5-foot strip. I'm sorry, that was another concern raised by the subcommittee, was that it is on the practical side, it's unlikely that someone is going to go prune a limb off a tree and not trespass across someone else's property.

Mayor Bellamy - Councilman Davis, are you there?

Councilman Davis - I'm there with the exception of that.

Mayor Bellamy - Any compromise?

Councilwoman Cape - I would be willing to compromise. I want people to be happy with the landscaping and it's a little disconcerting to have a fence as your new neighbor.

Mayor Bellamy - All right. The motion dies for lack of a second. Is there another motion?

Vice-Mayor Jones - I might second that if I ask Shannon one more question here. When you said there are a lot of other alternative compliance. I mean we're talking about subsection of other alternatives. So there's a whole list of alternatives we have all identified. Here are the big things people ask, here are the most common ones. In that last thing, other. We would see a lot of requests around that? The paragraph we are talking about is after, alternative this, alternative that, alternative this other.

Ms. Tuch - Right. It is our sincere intent and hope that this will reduce the number of alternative compliance requests. But currently I would say almost 50% of all of our site plans request some sort of alternative compliance. We are talking about.

Vice-Mayor Jones - Of those that are applying, how many are in this last other, other?

Ms. Tuch - I mean I can't predict, but I would say probably, of those, a good 20-30%.

Councilman Freeborn - Could you give us like actual numbers?

Ms. Tuch - This will be a total ballpark, but if our average, I will look to other staff. If our average number of site plans in one month might be, let's see, we probably get 8 large, probably 3 a week in small, so we are looking at another, so maybe between 30 and 40 applications a month. About 20 of those, I guess, would include some sort of alternative compliance. And of that 20, my guess would be anywhere from 5-10 in a month would not fall in one of those categories. It could be less than that, because I do think that some of these standards may create a disincentive for someone to ... alternative compliance. They may choose a different development option. They may choose a different project, a different building type, so that it could comply. So it might be less than that. Our hope is to be between 3 and 5.

Mayor Bellamy - To throw another little monkey wrench into the discussion. One of the issues that I have a concern about is the landscaping between new subdivisions and existing subdivisions. One of the things that we're seeing is more infill development and the changes, like we just did tonight, say it's higher density, is it addressed in here that we're going to do some additional buffering requirements for additional - it may be the same uses, but a higher density, but they are residential in nature.

Ms. Tuch - Not exactly. Well, yes and no I should say. What we are proposing is to buffer in between similar zoning designations. So if you are a low density single-family and you're adjacent to a high density multi-family, and you're high density multi-family going in, you may have to buffer against that low density single-family, even if you are a subdivision. But, traditionally we don't require single family lots to buffer against single family lots. Because single family is one and two family dwellings and they are exempt from the landscape standards. Always have been. Now the one exception to that is the conditional use permit projects and those conditional zoning projects that come before Council, because those are open to conditions.

Mayor Bellamy - Where do I change that requirement? In our subdivision ordinance or our landscaping ordinance or both?

Ms. Tuch - Probably both. And those are both things we can accommodate.

Mayor Bellamy - Okay. Council I would like to see this thing delayed, first of all. But since we can't get support to have that happen, I would like to see us work out a way where we are able to put in additional landscaping requirements for single family developments that don't come before Council. Because that is an issue. Take for instance, Kenilworth. They had

presented a subdivision that doesn't have to come before Council. It does not have landscaping requirements to the extent that had it come before Council would have provided additional landscaping for the community.

Ms. Tuch - The Kenilworth project is actually a lower density than the majority of the homes around it.

Mayor Bellamy - Right, but they had cut a lot of trees in order to do that development.

Ms. Tuch - They did. Now one thing to keep in mind, we also do have our steep slope, which would help protect tree preservation on steep slopes. We also are coming before Council at the end of this month is a subdivision amendment which makes single-family subdivisions over 50 lots a Level III, which would be a conditional use permit. So the Kenilworth project coming before you next year would be a conditional use permit and would, in theory, be open to conditions.

Mayor Bellamy - But the one we have now, the one we are faced with now, doesn't have the landscaping requirements and did remove a lot of trees, doesn't have the additional buffering requirements around the subdivision, thus is not a warm and welcome subdivision development in that neighborhood. And so, what I'm trying to say to us as a Council is we really need to address those concerns about what happens when you remove, you do remove a lot of trees, but you don't have to replace a lot of trees back in a subdivision. That is a concern and we do need to address it. And so, Shannon that would be something - I'm not asking you to work out right now, but we need to go ahead and get a recommendation and come back to Council with that.

Ms. Tuch - Sure.

Mayor Bellamy - Councilman Freeborn.

Councilman Freeborn - I'm willing to support a motion to postpone it to May 8 to address those concerns.

Mayor Bellamy - There is no motion on the floor so would you like to make a motion?

Councilman Freeborn - I make a motion to postpone the vote on this amendment to the UDO to May 8.

Mayor Bellamy - Is there a second?

Councilman Newman - Second.

Mayor Bellamy - Any further questions or comments? Councilman Mumpower.

Councilman Mumpower - I believe the deliberations on this ordinance highlight the complexity of what we are trying to do. It's a miracle that Asheville has become as beautiful as it is without the control of this Council and others. And I'm going to come out and say it, I think this represents some of the indulgence by this Council in creating complexities that will add costs and when you add costs you limit how many people can afford to live in Asheville. And that's about creating an elite community. You can call it anything you want to, but to me this is indulgence. And I certainly hope we will make an effort to do what we promised to do, which is to simplify the UDO and not create further controls on how it will suit our personal agendas.

Vice-Mayor Jones - Are you saying the whole ordinance as proposed is an indulgence? Or our deliberations are an indulgence?

Councilman Mumpower - Both, but the ordinance as a collective whole is an indulgence from my perspective.

Mayor Bellamy - Councilman Davis.

Councilman Davis - I know a lot of people worked very hard in getting this ordinance to the point it is and we're running across a small hump here and I don't think it's indulgence, I think it's a good exercise in getting to a better place with something we have a lot of difficulties with. I happen to have a great deal of faith in the Tree Commission that they are going to, in their deliberations, err on the side of the plants. I know those folks very well. And it would be inconceivable to me sitting here to think that they would do something else than should be done. And I have great faith that they can handle this job. I'd like to see us go ahead and move forward with it.

The motion made by Councilman Freeborn and seconded by Councilman Newman to continue this matter until May 8, 2007, carried on a 4-3 vote with Mayor Bellamy, Vice-Mayor Jones, Councilman Freeborn and Councilman Newman voting "yes" and Councilwoman Cape, Councilman Davis and Councilman Mumpower voting "no."

Mayor Bellamy - The meeting on May 8 will only cover the new information provided, which will be limited to the items that deal with subdivision issues, the hump that we were over, and that's about it. Ms. Tuch if you can take a note of that and hit the highlights and move it forward, I would appreciate it.

Councilman Freeborn - Is a notification in that as well?

Mayor Bellamy - Whatever those humps, that was a problem, so yes.

E. PUBLIC HEARING TO RECEIVE COMMENTS ON THE CITY'S DRAFT ACTION PLAN WHICH SETS OUT THE PROPOSED USE OF $3,854,970 IN FEDERAL COMMUNITY DEVELOPMENT BLOCK GRANT AND HOME INVESTMENTS PARTNERSHIP ACT FUNDS IN THE YEAR BEGINNING JULY 1, 2007

Mayor Bellamy - Mr. Oast will read a statement into the public record for the community to hear about Mayor Bellamy's conflict of interest. Vice-Mayor Jones will carry out the motion.

City Attorney Oast - Will there be a motion to recuse you after I read the statement?

Mayor Bellamy - After you read the statement, I will ask for a recusal.

City Attorney Oast - Thank you Mayor. Under North Carolina law, all members of City Council, including the Mayor, are precluded from voting on matters in which they have a financial interest or that involves their own official conduct. They are also prohibited from entering into contracts with the City or otherwise having a financial interest in such contracts. Further, recent amendments to the zoning enabling laws have expanded and clarified the issue of council member conflicts of interest with respect to land use decisions. Under State law, a Council member may not only not participate in the vote on matters in which they have a financial interest, they may not attempt to influence the vote or the administration of the contract. Where an employee of an agency that receives funds from the U. S. Department of Housing and Urban Development (HUD) becomes a member of the governing board of a unit of local government that makes decisions regarding those funds, federal regulations require the additional step of reporting the situation to HUD, and requesting an opinion as to whether that employee's governmental service is consistent with the intent of the regulations. When such opinions are requested, exceptions are made as appropriate. Mayor Terry Bellamy is an employee of Mountain Housing Opportunities, an organization that receives funds from HUD, through the City

of Asheville. Although she is not directly involved in any HUD-funded activities, her election to Council in 1999 and as Mayor in 2005 triggers the application of the regulation requiring us to seek the exception with respect to Council actions involving the City's receipt or disposition of HUD funds. Our review – including analysis of the regulation, conversations with HUD officials, Ms. Bellamy and other officials at MHO – has indicated that Ms. Bellamy, because of the nature of her job, is not in a position to benefit directly from the receipt of HUD funds by MHO. Even so, as Mayor and a member of Council, State law would preclude her from voting on any matters that directly affected MHO. While State law affects the ability of a member of Council to vote on particular items, the exception required by HUD affects the City's ability to receive and administer HUD funds, and HUD officials have advised that the exception should be requested on a case-by-case basis. In this case, the action for which the exception will be requested is the draft action plan regarding the proposed use of CDBG and HOME funds for the 2007-08 fiscal year (public hearing item E. on the April 10, 2007, agenda). This is brought to your attention now because public disclosure is one of the prerequisites of requesting the exception from HUD. Unless Council has questions or an objection, the City Attorney's office will send out the appropriate correspondence to HUD to inquire about and, if necessary, to secure the exception as soon as possible.

Vice-Mayor Jones - Is there a motion to recuse Mayor Bellamy?

Councilman Mumpower moved to recuse Mayor Bellamy from participating in this matter. This motion was seconded by Councilman Freeborn and carried unanimously.

(At this time Mayor Bellamy turned the gavel over to Vice-Mayor Jones and left the meeting.)

From Staff Report: This is a public hearing to gather citizen input on the Consolidated Action Plan for FY 2007-08, which sets out the proposed use of federal Community Development Block Grant (CDBG) and HOME Investment Partnership Act (HOME) funds.

The City expects to have available $2,184,696 in CDBG funds and $1,685,274 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2007. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 39 projects. Allocations are consistent with the Strategic Housing & Community Plan for 2005-2010.

If approved, the HOME funds and some CDBG funds will assist 464 housing units Consortium-wide. CDBG funds will also benefit more than 6000 low-income City residents through homeless services, housing counseling, business assistance, neighborhood facility improvements, and other needed services. Our partner agencies will contribute over $36,000,000 of other funding to these programs, leveraging $9.40 for every $1 of HOME and CDBG funds.

A summary of the draft Action Plan and notice of this public hearing was published on March 25, 2007. A 30-day comment period is required. At the end of this period, staff will ask Council to take action to approve the plan on April 24, 2007. The plan is due to be submitted to HUD by May 12, 2007.

Vice-Mayor Jones - Ms. Caplan, at this time will you come forward and give the staff report regarding this public hearing. I would like to remind Council that all we are doing tonight is receiving public comment and that we will take public action on April 24. Vice-Mayor Jones opened the public hearing at 8:44 p.m.

Community Development Director Charlotte Caplan - That is correct. I'm very pleased to present the draft action plan for the use of CDBG and HOME funding in the coming fiscal year starting July 1, 2007. I'll give you just a very short overview. The whole plan is available on the

City's website and you have a summary of all the funding allocations attached to your staff report. Funding recommendations for the CDBG portion were made by the Housing & Community Development Committee and for HOME funding by the Asheville Regional Housing Consortium. Very briefly, we are allocating just over $2 Million in CDBG funds. I would point out that $274,000 of that is contingent on a land sale and will not be released until that land sale takes place. But 23 programs will benefit with a wide variety of purposes. All benefiting low income residents of the City of Asheville. HOME allocations total $1.7 Million. Sixteen programs are recommended for funding. These are for affordable housing only and they cover not only Asheville but the whole of Buncombe, Henderson and Madison Counties. Transylvania County did not put in any applications this year. I would like to point out that contributions from partner agencies that will be carrying out these programs amount of $36 Million. That is a leverage ratio of over 9 to 1. Projected outcomes over the next year or two years, we expect to see construction or repair or downtown payment assistance or other assistance on 464 affordable housing units. We expect to see 105 small businesses assisted. We expect to see public services that will benefit about 4,800 low income residents. And, two improvement projects to be carried out in the West Riverside Weed & Seed area. Many of the allocations are similar to last years. There is merit in consistency in funding from year to year. But, we're definitely seeing some new trends taking place. In housing, I believe we are seeing a move away from single family housing development. Land and construction costs have risen very rapidly over the last two to three years and it's becoming increasingly difficult to build housing at prices that people in our target population, that is 80% of area medium income, can afford, without really very large amounts of subsidy. So, we are seeing an increased emphasis on multi-family construction, both for rental and home ownership. And on down payment assistance to be able to help buyers buy existing housing. We are also seeing new initiatives for implementing the 10 year plan to end homelessness. Within the plan, a new grant to Homeward Bound, that is the new name for Hospitality House, for rent assistance and supportive services to help chronically homeless people come off the streets and into permanent housing, with supportive services. And finally, there is an emphasis on revitalizing West Riverside Weed & Seed area. Last year, I saw some funding in the middle of the year for improvements at Pisgah View Apartments and this year we are addressing much needed renovations at the Burton Street Community Center and traffic calming on Burton Street. There are a number of people here from the West Riverside Weed & Seed area who have very patiently waited up to this point. We think all together this is a very exciting and productive year for the Housing & Community Development programs that the City supports. I'll be very happy to answer any questions after the public comment.

Vice-Mayor Jones - Thank you Ms. Caplan. I'd like to open it for public comment. If someone from the public would like to come forward? And if you would, please state your name for the record?

Mr. Ernie Eden - I'm a commercial real estate broker and have been for some years. And also have been involved very much in affordable housing, particularly cooperative housing. And I come here this evening to talk about two specific items. One of them is, I noticed in looking through your plan that there is no mention of cooperative housing and that's understandable because it is a very unusual form of home ownership. It's sort of half way between individual ownership and rental. There are about 1.5 Million families living in cooperatives around the county in all income levels and in the paper I have presented there are a number of details for why they are a good idea. The hour is late and I want to reduce my time here in front of you. I've been involved in management and creation of cooperatives. I am in a trade association of the National Association of Housing Cooperatives for some years in Washington and they are the best way of housing people according to HUD, according to the residents, and according to all the studies that have been done. So I encourage you to take a look at this at your leisure and pay attention to it. The other item is that by expanding the geographic areas that you have designated for areas to pay attention to in terms of your housing programs, you could be getting into the community a whole lot more funds from the outside than is currently available. On the last page of this paper I have outlined two programs - the Federal Home Loan Bank of Atlanta and also the N.C. State Qualified Allocation Plan, which deals with housing. Both of those give

the applicants points when they do something in an area that the City or County has designated to be an area of impact. And you don't necessarily have to put any money into it, but you may be able to get money from the outside by expanding your areas. I have spoken with Ms. Caplan about this. If there are any questions, I would be happy to answer them, or if you want to be in touch with me later, that's fine. Thank you.

Vice-Mayor Jones - Thank you.

Councilwoman Cape - Vice-Mayor, may I respond to this briefly? Just to say these were not projects that we were doing ourselves. We would love to see some cooperative projects come forward for us to consider to help support. So these are not our list, these are what projects came to us and we made our choices from.

Mr. Eden - Okay. I understand that. I guess I'm really just doing this more in terms of the future in terms of laying the ground-work. There is a lot of language typically that speak of either single-family or rental condominiums and cooperatives are sort of blend and the rules don't always fit. So that is my point primarily.

Vice-Mayor Jones - Thank you very much. We appreciate that. Anyone else?

Ms. Gloria Johnson - Mayor Bellamy and Asheville City Council, my name is Gloria Johnson, President of the Burton Street community and resident of west Asheville and currently reside at 87 Burton Street. I'm speaking on behalf of the citizens on the Burton Street community we are concerned with the current conditions of the Burton Street Community Center. Taking into consideration those funds for upkeep and repair may be limited it appears that our particular community center has been overlooked at it pertains to disbursement of funds for facility and maintenance. We are aware that other community centers throughout the Asheville area have, are, or are in the process of receiving resources for facility renovation and general maintenance. Consider how important this center is for the youth and the senior citizens. In our neighborhood it is disheartening to see this facility in such a state of disrepair. Even today I went to the community center. There is some yard work going on. This is good, but we need more than just a band-aid fix. Just a look good for awhile. Our center needs more permanent improvement. Some examples of needed improvements are as: floors - repairs or replacement; windows - replace lock or entire window unit; restrooms - both men and women; general activity areas - weight, play rooms need new recruitment and supplies; outdated heating and cooling system; basement area used for city-wide storage; electrical outlet needed for computers for after-school program; kitchen appliances and serving areas needed. We are here to make you aware of these needs. When you consider how the block grant monies will be distributed and used, we have made tremendous strides in cleaning up our community. However, your continued support on these matters are imperative. The citizens of the Burton Street community need to know from you that they are not forgotten. Your serious consideration of these concerns, and your effort and ... there will be a major boost for everyone in our community. As a community sportsman, I would like to compliment Mayor Bellamy, along with our Police Chief Hogan, Officer Mike Godwin, Alan Dunlap, whom I believe has retired, Lt. Rae Ferguson, Officer Wilkie, Sergeant Faye Harper, Officer Connie Roberson, Officer J.T. Riker and Captain Splain for not only helping to clean up our drug problems, but also become a part of our community. They help pick up trash from the streets and sidewalks. They help to repair some of our elderly citizens' homes on their days off. We would like to invite all City Councilmen to visit our community. We are proud of the Burton Street community and the great turnaround that has taken place in our community. On behalf of our entire community, we thank you for your time.

Vice-Mayor Jones - Thank you Ms. Johnson.

Councilman Newman - Can I make one comment? Ms. Johnson, I agree with everything you've just said. Folks are not aware that the recommendation is for $155,000 in funding for the renovations to the Burton Street center. That is part of our recommendations at this point.

Obviously we are not going to vote on this tonight, but the Committee is recommending supporting that project.

Ms. Johnson - Thank you.

Ms Teresa McPherson - Good evening City Council. First I would like to thank you for this opportunity you have given us to express the love and compassion we have for our community I am Teresa McPherson and have been a proud resident of the Burton Street community for two years. Most of the residents in our community have been here for many years and have tirelessly struggled to make it a better place for the generations to come. I have first hand knowledge of what a wonderful community we live in. In July 2006, I became deathly ill and this community rallied together in prayer and support. They raised in excess of $1,600 to help me with my bills during my illness. It is rare in this day and time that you will find people in a community who will come to the aid of another. I would truly not want to live anywhere else but in this community Not only have they come to my aid, but many others. There are some things that we cannot do alone. This is why we ask for your help and support in allocating CDBG funds to help revitalize our community center. It is an old facility with a rich history to be shared and cherished It is a facility where our residents gather for meetings and festivities to keep us as a family It is a facility for our children to play and grow in the spirit that their parents and grandparents did so. But we will not be able to hold onto this history if we are not able to get these funds for our center There are so many needed repairs that we cannot do alone. Because we struggle to keep our own households going, a heating and air conditioning system is needed, the walls and floors are buckling and the bathrooms and the kitchen are in much needed attention. We want a facility where our children can gather in a safe place and be proud of where they come from. Our children deserve better. The residents here pay taxes just like anywhere else. If we don't start repairs on the center now, it will be too late. Please help us to save this part of our history. Thank you.

Ms Sharon Martin - Good evening. My name is Sharon Martin. I'm a resident of the Burton Street community It's been interesting going through the area and listening to the conversations that had been had tonight. Beginning with the item that you discussed off the Consent Agenda about the bathrooms downtown. And Mr. Newman you brought up that it's $155,000 that's been asked for for the center and two bathrooms cost $113,000 downtown. So, in saying that, I'm just asking you to be prepared to spend a lot more money than $155,000 to bring the center up to where it needs to be. And I understand it wouldn't come out of CDBG funds and I understand how that whole process works. Just want you to know that the center needs a lot more than $155,000 We really count on the City to allocate the funds to bring it up to par. And it is truly, right now, we have air conditioners hanging out the window about to fall onto the sidewalk. So it does need a lot of attention. And then the other thing that came up was the District Attorney coming and talking about crime. And we have an amazing community and I don't know really how to explain how amazing our community is. But there are members of our community who work tirelessly picking up garbage to keep our community clean, inviting the youth in our community onto their property and paying them to do work so that they have activities to engage in and money to put into their pockets so that they won't feel like they have to turn to nefarious activities to earn wages or to deal with their boredom. And we have members of this very same community who have amazing ideas to implement and the center could be the heart of that. So, we just ask that you know that we are going to come back to you and ask for more and we believe that we deserve more. The community has done a lot of work to turn it around. The police have done a lot of work with the community to turn it around. But I don't want our community to be overlooked so I'm glad the attention is there. I appreciate your time tonight. Thank you.

Mr. Dwayne Barton - My name is Dwayne Barton and I had a list of the kids wrote up this afternoon, but seems like everybody covered it. I'll just say that when the renovations do come for the center that the young boys, that they be involved in that. Maybe we can create some kind of friendships to help train the young people in the community to help rebuild the center. And let

this be a starting point to maybe a program we can do throughout the City. And turn Burton Street into like a training facility for those. A place where young people, specifically, can come and find work and be introduced to different programs and activities. And put money in their pocket and keep them busy over the summer and during the school year. As far as education with the schools, for help for some kids there needs to be reinforcement in the communities because a lot of times kids living in homes where the parents might not have the time to be that reinforcement, but we need actual programs in the community that can help push the kids along. A program that ties in with what they learn in school and they come home from school and tie it into an on-hands type training that can follow-up with some educational goals. I think that is what is needed more than anything. That's all I have to say.

Councilwoman Cape - Vice-Mayor, I have to say something about Mr. Barton. Because he didn't just ask us to do something that he doesn't do. He does that in his community. He pays young men, young boys, to come and work in his sculpture garden. And they get to work there if they have good report cards, is that not right Dwayne? This is someone who is walking his walk and someone who I have great respect for when we ask that our children are cared for. This is a man who is doing this work and I think he needed to be pointed out to our community as an example of what it means to be a good community member. So, Mr. Burton, I thank you immensely for your service to your kids. And, I do want to point out that the Parks & Rec Advisory Board the other day - there has been a discussion about an overall parks and recreation master plan process. And so part of that is the recognition that all of our recreational facilities are in some state of needing an overview. We have a new Parks Director, Mr. Roderick Simmons, and part of him getting an opportunity to understand what our systems are, and what the needs are, is in this. It will be an overview of all our Parks and Recreation Department and we will be looking at all the needs. This particular amount of money was allocated because it was outlined as something that was kind of stop it from falling down right now. Like fix the major things that need to be fixed right now.

Vice-Mayor Jones - I thought it was a very generous and unprecedented allocation. So I think a lot can happen for $155,000. Is there anyone else from the public that would like to say something?

Ms. Sandy Davidson - Member of the Burton Street community from birth. The one thing that we are thankful for the money and hope that you will approve it. But one thing I want to say and this is to Mr. Mumpower as well, is that Burton Street once you knew had a very bad name and I'm sure some people in this audience right now still think of it as a drug community. But we worked very hard to clean that up. We still have some areas there, but we have worked very hard and are very proud of our community. And this is just another lump to make us feel a little more proud of our community.

Vice-Mayor Jones - Thank you for your work in your community. Other members of the public wanting to speak? Seeing none, I will remind you that there is no action to be taken, so I will close the public hearing at 9:06 p.m. Just so you know, we will be taking the vote on April 24.

(At this time, Mayor Bellamy re-entered the meeting and Vice-Mayor Jones returned the gavel to Mayor Bellamy.)

V. UNFINISHED BUSINESS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE THOMS ESTATE LOCATED ON BEAVERDAM ROAD, WILD CHERRY ROAD AND ELK MOUNTAIN SCENIC HIGHWAY FOR RESIDENTIAL DEVELOPMENT TO CONSIST OF 132 SINGLE AND MULTI-FAMILY DWELLINGS

ORDINANCE NO. 3461 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE THOMS ESTATE LOCATED ON BEAVERDAM ROAD, WILD CHERRY ROAD AND ELK MOUNTAIN SCENIC HIGHWAY FOR RESIDENTIAL DEVELOPMENT TO CONSIST OF 132 SINGLE AND MULTI-FAMILY DWELLINGS

City Attorney Oast - This is a continuation of a public hearing which you began last month. If anyone wishes to speak who was not sworn in last time, you need to come up and be sworn in. If you were sworn in last time, you don't need to be sworn in again. Mayor, this is for the presentation of new information and you would be within your rights to advise anyone who is not addressing new information to cut their remarks short. I am advised that the applicant intends to present some information that may require a little bit more time than 10 minutes and I would ask that you give them that time, but also caution them to stay on point and only present new information.

Mayor Bellamy - Anyone else who is here, but was not sworn or affirmed, please come forward to have that process done tonight?

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast - Mayor, before Mr. Pennington gets started on his part of the presentation, I'm not going to repeat my usual cautions to you, but just ask that you remember them in making your decision. And finally, we did receive a protest petition with respect to this action, but because this is not a rezoning, a not map amendment, it is my opinion that the protest petition does not apply to this situation.

Mayor Bellamy - All right. There is a ruling that the protest petition does not apply and so we don't need a super majority of approval for this to move forward. Mr. Pennington.

Information in front of Council - Letter from Mr. Ryan Blau dated March 28, 2007 - "Dear Mr. Pennington, following is a summary of the modifications that have been made to the Thoms Estate Master Plan following the City Council hearing:

1. The multifamily condominiums (22 units) have been eliminated.
2. Duplex units on the upper hillside have been replaced with single family home sites.
3. Single-family attached units have been added in the southwest meadow (previously multifamily and single-family detached). A slightly different road configuration was designed to accommodate this change.
4. Four public pedestrian access points are proposed. Sidewalks and trails through the site will be open to the public.
5. Roads will remain private and vehicular traffic may be controlled after daylight hours.
6. A community park is no longer proposed due to apparent lack of interest for such a park. Instead a greenway easement will be secured along Beaverdam Creek.
7. The developer will be selling small lots with building envelopes rather than constructing every home. Building envelopes will remain in approximately the same locations as shown in the previous plan.
8. Entry off Elk Mountain Scenic Hwy has moves south slightly to align with the existing main entry to the estate."

Information in front of Council - Memo from Nathan Pennington and Scott Shuford dated April 10, 2007 - "This conditional use permit request for a 132 unit single/multi-family residential development with development standard bonuses. The original conditional use permit request for a 162 unit development was heard by City Council on February 13, 2007. A motion to approve the request initially failed, but a subsequent motion to reconsider the conditional use permit carried and the item was tabled for an indefinite period of time due to a number of concerns that

were raised by citizens and Council members. The main issues that were discussed at length included:

- The need to adequately quantify stormwater control methods
- Accommodating fire/pedestrian access throughout a gated community
- Tsali Trail access point, traffic generation and infrastructure
- Overall density, multi-family structures, parking and building elevations along Elk Mountain Scenic Highway.
- More clarification and exploration by staff in relation to a possible public Park, preservation of the Killian House and greenway connection along Beaverdam Road.

"Since the public hearing on February 13th, the applicant met with neighborhood members and made a number of revisions to the development plan. Some of the main changes include but are not limited to the following: reducing the overall net density by eliminating the multi-family structures along Elk Mountain Scenic Highway, deleting the Tsali Trail access point and allowing for public pedestrian access throughout the site. The site is proposed to remain gated for public vehicular access except public safety vehicles or in emergency situations. Correspondence from the development team providing a detailed list of the site plan revisions is attached for your consideration.

"City staff including representatives from the Parks and Recreation and Planning departments, and a member of the Historic Resources Commission (HRC) met to discuss the possibilities for a public park and/or greenway connection and the preservation of the "Killian House." Positive feedback ensued from these discussions because of the strategic location of the portion of property along Beaverdam Road in relation to the proposed path of the future greenway connection in the area. The developer has shown a willingness to provide a greenway easement for this purpose. However, there would be costs associated with the city maintaining the area for the purpose of any passive/recreational use. Staff asks that Council consider requesting the developer finance the maintenance fees for the Killian House and associated land for a period not to exceed 5 years until such a time that the Parks and Recreation department is able to assume the maintenance of this area."

Urban Planner Nate Pennington - Thank you Mayor, members of the Council and members of the public. To re-familiarize yourself with this project. This is a conditional use permit for 132 units for single and multi-family residential development standard bonus located off Elk Mountain Scenic Highway, Beaverdam Road, Wild Cherry and Tsali Trail (Attachment to City Exhibit 3 - Location Map). It was originally heard by Council on February 13 of this year and continued until tonight. There were a number of issues raised at the initial meeting. I'll address some of those briefly: quantify stormwater control methods, accommodate pedestrian access, remove the Tsali Trail access point, and overall density was a concern as well as the multi-family structures along Elk Mountain Scenic Highway. City Council also asked staff to do some further exploration into the park area. Revisions to the plan before you tonight are outlined in the summary memo which I have included in your packet (Memo dated 4-10-07). Essentially the developer looked to reduce the net density and eliminate the multi-family structures along Elk Mountain Scenic Highway. The Tsali Trail access point has been deleted and there are 4 access points that are allowed for pedestrians to access the site. I have indicated those with the little stick-figures in green (City Exhibit 4). The property boundary is highlighted in red. The sidewalks that are required by staff and through the TRC process are outlined in blue. Those include a point from Beaverdam Road up to the entrance on Wild Cherry. A sidewalk along all Beaverdam Road along the subject property. Tsali Trail from Tsali Trail from the Creekside development all the way up to Elk Mountain Scenic Highway. And from Elk Mountain Scenic Highway to the subject property. Since the time you've last heard it, City staff also met with the Parks and Recreation Department as well as a member from the Historic Resources Commission to discuss the park area and it was decided it is located along a strategic area that the City is looking at to complete a greenway connection. The developer is willing to provide for a greenway connection and provide for the construction and the easement that would be required to secure this area.

That provides a brief overview of the project and the changes made by the developer. Let me know if you have any questions.

Mayor Bellamy - All right. Thank you very much. I will open up the public hearing at 9:13 p.m. and the first person we will hear from is a representative from the developer.

City Attorney Oast - Mayor, while Mr. Justus is making his way up here, I would ask that Mr. Pennington referred during his presentation to a summary memorandum that Council has been provided with and this map. I'd ask that those matters be included in the record, unless there is any objection.

Mayor Bellamy - All right. Thank you very much. Mr. Justus.

Mr. Craig Justus - Good evening Madam Mayor and members of the City Council. I'm Craig Justus. I'm here to represent the property owner and developer and resident. If you will recall, we were here on February 13, which was my birthday, and hopefully I'm waiting to get my gift tonight. After we received your comments and direction, we went back to the drawing board and considered our options, one of which is you know, was the easier process of going through a typical subdivision process that wouldn't require us to come before City Council. We quickly abandoned that because that is not our vision. We don't want a cookie-cutter development for this piece of property. It is a rare and unique piece of property. Instead we wanted to cluster the homes, preserve 36 acres of open space and present a neighborhood that would be attractive to the new residents. After we met on the 13th as part of our direction, we met with residents. First we met with Nate on February 16 to talk about the changes you had asked for or directed us to look at. We met with residents on March 1. We went back to Nate and Scott Shuford and talked to them about the resident's concerns. We went back to Nate and Scott on April 2 to present changes to the plan and again on April 2 we met with residents. So, we met twice with the residents and a number of times with staff after the February 13 meeting to come up with the design changes that we are prepared to present to you tonight, which we believe are material. And, we have incorporated a lot of comments in these changes and so if I can, at this point turn to Ryan and Drake who are the Design Workshop and Planning team. Thank you.

Mr. Ryan Blau - Good evening Mayor and Council. My name is Ryan Blau and my college Drake Fowler will represent a team of Design Workshop that has been working on the land planning side of the project for a little over a year now. And I wanted to do just a quick overview of some of the changes that we have incorporated (Applicant Exhibit 3). Nate did a pretty good summary, but we did have an overall density reduction of about a little over 18% (30 units) including the removal of the multi-family condominium product. We also reduced some of the density to the higher portion of the site, up in the northern section where it is a little bit higher in elevation. We also have accommodated pedestrian traffic through the site and will allow pedestrian traffic through the site. We have removed vehicular access to Tsali Trail and we still maintain roughly the same amount of green space as we had previously in the entire plan which is about a little over 36 acres. I wanted to step back real quickly and because we didn't get to talk at the last meeting, talk a little about the process and the framework we developed to create the plan that you have before you. We have done an extensive environmental analysis on the site. We start typically with a slope map and we identify those areas that we feel are not suitable for development. Those are the slopes in red representing slopes above 30%. Everything below is less than that, obviously, and we try to keep development to slopes that are under 30%. So you will see that reflected in the plan. We've also done an analysis on the drainage, so we understand where the existing drainages are, where the direction of the flow are, or where the run-off is heading. And so we utilize that in our stormwater management plan. Our engineers will speak a little more to that later. We also, in addition to those, took into account the sensitive and unique features of the site. We've done extensive site reconnaissance and have been on site many hours identifying the areas that we want to be able to protect and preserve. And all of these other considerations kind of overlay and create a development framework that we use to lay out the development. This assures us that we are protecting sensitive places and the places

were raised by citizens and Council members. The main issues that were discussed at length included:

- The need to adequately quantify stormwater control methods
- Accommodating fire/pedestrian access throughout a gated community
- Tsali Trail access point, traffic generation and infrastructure
- Overall density, multi-family structures, parking and building elevations along Elk Mountain Scenic Highway.
- More clarification and exploration by staff in relation to a possible public Park, preservation of the Killian House and greenway connection along Beaverdam Road.

"Since the public hearing on February 13th, the applicant met with neighborhood members and made a number of revisions to the development plan. And, we have incorporated a lot of comments in these changes and so if I can, at this point turn to Ryan and Drake who are the Design Workshop and Planning team. Thank you.

Mr. Ryan Blau - Good evening Mayor and Council. My name is Ryan Blau and my college Drake Fowler will represent a team of Design Workshop that has been working on the land planning side of the project for a little over a year now. And I wanted to do just a quick overview of some of the changes that we have incorporated (Applicant Exhibit 3). Nate did a pretty good summary, but we did have an overall density reduction of about a little over 18% (30 units) including the removal of the multi-family condominium product. We also reduced some of the density to the higher portion of the site, up in the northern section where it is a little bit higher in elevation. We also have accommodated pedestrian traffic through the site and will allow pedestrian traffic through the site. We have removed vehicular access to Tsali Trail and we still maintain roughly the same amount of green space as we had previously in the entire plan which is about a little over 36 acres. I wanted to step back real quickly and because we didn't get to talk at the last meeting, talk a little about the process and the framework we developed to create the plan that you have before you. We have done an extensive environmental analysis on the site. We start typically with a slope map and we identify those areas that we feel are not suitable for development. Those are the slopes in red representing slopes above 30%. Everything below is less than that, obviously, and we try to keep development to slopes that are under 30%. So you will see that reflected in the plan. We've also done an analysis on the drainage, so we understand where the existing drainages are, where the direction of the flow are, or where the run-off is heading. And so we utilize that in our stormwater management plan. Our engineers will speak a little more to that later. We also, in addition to those, took into account the sensitive and unique features of the site. We've done extensive site reconnaissance and have been on site many hours identifying the areas that we want to be able to protect and preserve. And all of these other considerations kind of overlay and create a development framework that we use to lay out the development. This assures us that we are protecting sensitive places and the places

that are unique and special to this site. In addition, it's just the environmental framework. We also look at the historical and community framework. Those are also under consideration. We looked at the site history and would like to use some of those site buildings, re-use them as part of the community so the site history kind of shows through on our plan. Regarding walk-ability, we considered different places where we could have community nodes, where the community can come together and have those chance meetings that happen in between neighbors. And this comes together into an amenity plan that we developed so that we can not only identify where those great green spaces are and open spaces, an amenity opportunity is that we can connect those with trails so that the community has access to those. And I'll turn some time over to my college who would like to talk about some details.

Mr. Drake Fowler - Good evening, my name is Drake Fowler. I appreciate you allowing me to speak on Thoms. As you know, at the last City Council, one of the issues was the community access and so you can see here, pulling those pieces out you can see the access points and how the community can access the site's sidewalks (Applicant Exhibit 3). Next I wanted to share with you, throughout the site we have created cluster hamlets. Even though they are apparently for aesthetic use, they also play an important role in our design in terms of a couple different ways. They are built in traffic calming measures. These are areas where the vehicle becomes secondary to the pedestrian. Secondly, they allow us to share driveways. Using that technique, we can reduce the pervious surface that driveways create by about 40%. And lastly they encourage interaction between neighbors, which I think we can all agree is a good thing. Next, we wanted to show you some of our conceptual designs for the entry. As you can see here is the greeting house and to the right of that, you can see that we have a pedestrian portal. Really the idea behind this is putting … measure into the vehicular entry into the site as the pedestrian entry into the site. And the concept of this design is putting the restricted access behind that, so that this design becomes more of the face of the community. And the restricted access would be only closed at night. Finally, you can see through some of our process and our brief description of the modifications that we've made, we feel that this is a complex plan and it has a multiple overlaying of systems on it. But, we feel that we went through a solid planning process in developing this and feel that through the revisions set forth to us from City Council and City staff and the community have come up with a good addition to Asheville's neighborhoods. Next, I'm going to introduce Michael Goforth, which he's going to go over stormwater and technical issues.

Mr. Michael Goforth - Good evening, Mayor and City Council members. My name is Michael Goforth and I work for Envision Associates here in Asheville and I've been hired by the developer to do the stormwater, grading and erosion control and public utility components of this project. As far as public utilities are concerned, the City of Asheville was granted a letter of commitment for the water service. They find that there is enough pressure and supply available in this area. Our basic unit will be connecting Wild Cherry Road to Elk Mountain Scenic Highway. There is a connection there, but this will help further up Beaverdam Valley should any complications arise on Beaverdam Road. It's kind of like you can pull water from two directions there. We are going to put in greater than 12,000 feet of new water line, utilizing a loop system to increase reliability. MSD of Buncombe County has granted a sewer allocation request to this as well. And again, we are going to put in approximately 9,300 feet of new sewer line. The two main areas that we have for concern for stormwater management are stormwater quantity and stormwater quality. And I will go through both of how we will handle those. For stormwater quantity, we are going to use 3 integrated stormwater management ponds across the site. It's important to stress that our post-development flow rates will be less than our pre-development flow rates and with that comes a reduction in the downstream channel velocities for the downstream neighbors along Tsali Trail corridor and along Beaverdam. I have met, along with the developer, many of the local residents in that area to address many of their concerns on site and have talked with them as far as their concern for stormwater on an occasion. For stormwater quality, we are going to approach this by a couple different means. The first aspect is we are going to be using community rain gardens which will help to filter out sediment. Those will be done on a localized basis throughout the development. The second part is a permanent pool of

storage in stormwater management ponds. This helps to slow down the water. It allows time for the sediment to deposit out of the water and produce a cleaner stormwater. The third phase is a slow draw down time of the one-year storm event. The one-year storm event is over 90% of the storms we have here in western North Carolina. In doing this, we will slow down the water tremendously through just the process of drawing that storm down on a slower rate. It will help out the downstream neighbors. Now I'm going to turn it over to James Vasso.

Mr. James Vasso - Good evening Mayor and members of City Council. My name is James Vasso with Mattern and Craig, 12 Broad Street. I'm a traffic engineer with Mattern and Craig. And Matter and Craig prepared a traffic study for this project, on behalf of Global Development Resources on December 14, 2006. Very briefly to touch on some of the aspects of that study being some discussion has occurred since then. That study that was originally prepared in December concluded that the development would not cause an undue to the traveling public along the surrounding roadway network and no mitigation improvements were identified. I'd just like to point out that the original study was prepared by a professional in the traffic engineering profession with over 30 years of experience. And that person was Ken Putnam who is now the current City Traffic Engineer. The study was reviewed and approved by the City Traffic Engineer at that time, Anthony Butzek. The study was also reviewed and deemed accurate by an independent traffic consultant, Mr. Don Spence, of Kugle and his transportation group. He was hired by some of the residents who were primarily concerned about the third access point on Tsali Trail. Finally this study had been reviewed and accepted by the traffic consultant that you currently have serving in the capacity of traffic engineer for this project, Ms. Gay Sprague of Sprague and Sprague. So, I just want to iterate that including myself, that's five professionals, five people in the traffic engineering profession, that have been involved in this study and have basically come to the same conclusion that it is an accurate and valid study. That original study indicated at the intersection of Merrimon Avenue and Beaverdam Road, which is one of the critical intersections in this study area, that the Level of Service for that intersection during the morning commute hour would be a Level of Service "C" under background conditions and build-out conditions. And it would be a Level of Service "D" in the afternoon peak hour during background conditions and build-out conditions. In simple terms, background conditions are what the traffic is going to be like in the year 2010 without this project The build-out conditions are what the traffic is expected to be at this intersection with this project added. And, the project traffic does not degrade that intersection from one level of service to the next. Now, we've all been through school and we're all patterned to think that "C" or "D" is bad. And in the traffic engineering profession, that's not necessarily the case. "A" is the best. "F" is the worst. Just like you learned in school, but it's widely accepted in the traffic engineering profession that you strive to design for a Level of Service "C" or "D", particularly in an urban environment. The reason is the Level of Service "E" describes the maximum flow that is attainable through an intersection before things start to break down. When you cross over from "E" to "F", that's when things no longer work. That's when you try to push too much traffic through the intersection or onto the facility and break down the ...cues start to develop and you have residual delay. Designing for a Level of Service "C" or "D" allows that facility or that intersection to have some additional capacity still left. And in an urban environment, obtaining a "C" or a "D" is widely accepted in the traffic engineering profession as what you try to attain. Since our last meeting, this development has been reduced in size from 162 units down to 132 units, which is over an 18% reduction. What that means as far as the projected traffic, over a 24-hour period that relates to a 13% reduction in traffic from what was originally presented. For the morning compute, the a.m. peak hour is also a 13% reduction in the expected amount of traffic generated. For the afternoon compute, it's an 11% reduction. So the result in traffic impact under this new plan of 132 units will be less of an impact than what was originally reported in the study that was prepared in December. Also there has been support for a single entrance on Beaverdam Road by several residents versus the two that are currently proposed on Elk Mountain Scenic Highway and Wild Cherry. The developer asked that I re-evaluate this scenario and provide an opinion. And I have. I have visited the site and have basically come to the same conclusion that several of the other professionals have come to before me and that is I would recommend against a single access point. And the reason being, having the one access point on Beaverdam Road would concentrate all of the site traffic to

one point versus disbursing it over the two points that we currently have at established intersections on Beaverdam Road. Also having a second access point is beneficial for emergency vehicles. Keep in mind that the previous City Traffic Engineer wanted a third access point for these very reasons and that has been taken off of the table. With that, I will wrap it up and be glad to answer any questions that you may have. Thank you.

Mr. Justus - That is all the professionals and the engineers that we would like to present tonight. Obviously all of the information that they have presented we would like to be considered evidence. Just to summarize, we came away from the meeting on the 13th with concerns that were expressed, one being the multi-family condo development and what it did in terms of compatibility. We eliminated that. I have photographs of the single attached structures that we are proposing which are similar to the areas in Walnut Cove (Applicant Exhibit 4). So we eliminated the multi-family concern. The other thing was the pedestrian access. And Councilwoman Cape said what options can we look at and I was looking at the minutes from the meeting that we attended and the staff recommendation in terms of options and it was in your staff report was "keep sidewalks open for public access." We have done that. Although you might not have been able to see it on the pedestrian access plan, there are four points of access into the property for the community to utilize our sidewalks period. You asked, actually staff asked for consideration to allow the gates to be open from sun-up to sun-down and at any time requested by emergency management officials. We have agreed to do that. Speaking of gates, by the way, if you noticed with the entryway design, the gates you will not see. They are internal to the project. So we are not putting them out there to say don't come into this community. Internal to the project. They are open during the daytime and we have this gate house, this nice attractive feature where you don't see the gates. We're also putting in sidewalks, as you know, along the exterior of the property as indicated. So, we have come up with a pedestrian and access management plan that we understand is a fair compromise from staff In terms of the stormwater. That was a concern. Mayor Bellamy indicated last time that we had not covered that. We are doing better than what is out there today. That is what we are holding ourselves to, which I will hazard to say better than what your ordinances require us to do. Much better than what your ordinances would require us to do. But that is what we are willing to do. Finally, traffic was a concern. And I will just say, what else can we do? This project is zoned RS-4. We are well under the density that RS-4 would allow as a right. You have five professionals, three of which are either working for the City now or have worked for the City, all of which have said this project will not be a problem for traffic. I don't know what else we can do. What we did was we reduced our density. And I understand there were fairly strong comments about the property and traffic. I don't know what else we can do, but to have five professionals say that we are not a problem as it relates to traffic. At the end of the day, we did not want to present a traditional subdivision plan for the people that would live in the community. We felt that was not a good thing. That was not the vision we were trying to get. We were trying to cluster homes to preserve 36 acres of open space and green space and do the right thing. That required us to come before you and ask for permission to cluster homes. We are willing to do this and we think the dialogue has worked to an even better plan than we had before, even though we thought the other plan was just fine. This is a better plan taking into account the considerations and the directions that this Council gave to us. We believe we have met all 7 standards for the issuance of a conditional use permit. We are asking you to do that tonight and go ahead and give me by birthday present. Thank you.

Mayor Bellamy - All right. Any other members of the community wishing to speak tonight? Yes sir.

Mr. Brad Brock - Good evening Madam Mayor, Council members, staff. Thank you for the opportunity to share my opinion on this matter once again. My name is Brad Brock. I am a local residential real estate broker and resident of Wild Cherry Road. On Tuesday, February 13 we all sat in these chambers and we went through a marathon session of very articulate discussion over this development. Mr. Smith and his associates left that Council meeting having heard the following things. The condos were a stumbling block to approval, however, it was not

their existence, but the placement that was the main issue it seemed. There was an idea to flip-flop the parking lot and the condo building. The Tsali Trail entrance was considered redundant and should be removed. Council was unsure if a donated park and transit stop would be a benefit or a liability to the City. And gates were a problem with the majority of Council and have caused you to consider the gated community on a larger scope. The developer has come back with the following plan. The removal of 22 attached condos and a few more homes, reducing the number of units and the removal of the Tsali Trail entrance. Increasing the square footage of the remaining homes affectedly increasing the impervious surface footprint. Pedestrian access on Wild Cherry and Elk Mountain Scenic Highway and gates. Along with a request that the neighborhood support them in exchange for the aforementioned concessions. I would stand in support of an ordinance allowing gated communities as a conditional use. There could be valid reasons - the prevention of high volume traffic cut-through being one. But I do not see a good reason for approving a gated community could be so that the developer could make more money and sell his product for a higher price point. And to hear developers using the crime deterrent as a talking point is a reason for inclusion of gates in a plan makes me wonder. If we have such a virulent crime problem in this city that we have to wall off our residents, we need to stop all other City business, other than law enforcement, eliminate all this rampant crime and then get back to the business of guiding the growth of our community. Yes, Asheville will continue to grow and develop. Yes, more and more people will continue to discover us. Realize that we are still from a national prospective an under valued real estate market. And yes, there will be more density and more traffic on our streets and highways. But we control this process though you, our elected officials, we, the residents of Asheville make the rules. Our City's growth should be citizen-directed, not developer-directed. Unfortunately many of the developments in our area are created by out of city and out of state developers. They have no long term interest in our community other than from a portfolio perspective. They are here to make money, plain and simple. There is no need for us to follow the cookie-cutter plan of any city which happens to go to a popularity and development frenzy. Gated communities are symptomatic of that lack of foresight.

Mr. Skip Pearlman - Mayor Bellamy and member of the City Council, my name is Skip Pearlman. I live at 28 Elk Mountain Scenic Highway. This is going to be my vice-president in charge of technology this evening and I might pull a chair up for her to handle the slides for me (Neighborhood Exhibits 3 and 4). And before we get started, I have one little housekeeping that I will give to Ms. Lipe. This is Pearlman Exhibit 1 and Pearlman Exhibit 2.

Mayor Bellamy - Mr. Pearlman, are you speaking as an individual or a representative of a group?

Mr. Pearlman - Mayor Bellamy, thank you for reminding me of my oversight. I'm looking for 10 minutes.

Mayor Bellamy - I just want to be sure that the individuals whose hands are promptly raised that you are giving up your time. I just want to make sure, okay. Thank you.

Mr. Pearlman - To begin with I would like to address Exhibit 1 which is a letter Robert Dungan, a local attorney, had addressed to the City Attorney Mr. Oast. And I believe, if I'm not mistaken faxed you a copy Mayor Bellamy. Just refer to the last paragraph, I think that's pertinent enough without going through a huge song and dance about this. "I ask that you take these arguments into consideration and advise the Asheville City Council that the Thoms Estate Property conditional use permit cannot legally be granted within a general use district. In the alternative, I ask that you advise the City Council that the requested conditional use permit has been challenged by a qualified protest petition and therefore can only pass if approved by a super-majority vote." Well, we obviously have a difference of opinion and where that leads us in the future, I have no idea, so I will proceed with the balance of my presentation. We believe that a protest petition is in order and that it is a valid proposal before you. But that is for you to decide. So we'll start with my exhibit page 1, and I'm not going to have you endure a word for

word resuscitation of this presentation, so away we go. The following is the purpose of the conditional use process as called for in Section 7-16-2 (a). The bottom line is that all conditional use at minimum meet the conditions set forth in this chapter. In order for Council to approve this project, the project must meet all of the seven conditions as set forth in Section 7-16-2 (c). Condition 1 will pass that, that seems to be in order. Condition 2. That the proposed use of development of the land is reasonably compatible with what surrounds it. I don't think it's reasonable to accept that the proposed rank of duplexes on Elk Mountain Scenic Highway is consistent with the massing and pattern of single-family SF4 development that is shown across the street across the side of Elk Mountain Scenic Highway. And basically what I'm referring to are these duplexes (using a map in Neighborhood Exhibit 4). Twenty of them on Elk Mountain Scenic Highway and they have as shown a 5,000 sq. ft. footprint. And I don't think that's consistent at all with what is across the street. Now the next slide will show these 20 buildings and I'm sorry it doesn't show up but there is a red outline projected all over these buildings which show the size that can be put in there. And the reason that is there is the developer has called for in his plan - he reserves the right for a 6-foot minimum distance between houses. So I put this in to show you that with a 6-foot minimum distance between houses, this guy can even expand the proposed footprint that he has put down there. Let's go onto Condition 3. That the proposed use of development of the land will not substantially injure the value of adjoining or abutting property. Now we've all heard that the project will be of high quality. And if so, then a guarantee of high quality needs to be a part of the conditions of approval. At a minimum, a package of design guidelines should be submitted to prove this finding. Without submission of architectural standards, the proposal fails to meet this condition. Condition 4. That the proposed use of development of the land will be in harmony with the scale, bulk, coverage, density, and character of the area of the neighborhood in which it is located. I contend that the proposed site is inconsistent with the pattern of development on Elk Mountain Scenic Highway. If you can read that in the yellow. But you can see on that plan that the plan drawings have buildings that represent development, however, the plan actually allows for buildings to be six-feet apart from each other. The setback standards for the side setback in SF4, that's across the street, is 10-feet from the property line or 20 feet from building to building. Because of the lack of consistency within the context of what is across the street, the proposed development fails to meet this condition for approval. Condition 5. That the proposed use or development of the land will generally conform with the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City. One thing I note here, there is no mention of housing affordability in the developer's plan. Going down to Land Use Goal 111, the City should permit and encourage transit supportive density along and adjacent to major corridors and at logical transit nodes. The majority of the density is on Elk Mountain Scenic Highway or deep up into the site. Close to half of the density is about a 1/2 mile from the nearest transit facility which is located down at the old Killian House on Beaverdam Road. In my opinion, it will probably be the most under utilized bus stop in the City of Asheville. (Land Use Goal IV) The City's open space standards should require the connection of open space areas where feasible and logical. Global Development has done the right thing to preserve the steepest and highest elevations and have submitted the plan in the form of clustered development consistent with smart growth objectives, however, I want to point out to you what they have submitted. The open spaces should be connected as a system of open spaces and should flow as an unobstructed floor plan for wildlife. GDR has presented a wildlife corridor, yet there are six houses within Phases III and IV where they meet, obstructing the path of wildlife and diverting them to adjoining property. What I'm speaking of is right here (Neighborhood Exhibit 4). See this little triangle right here. That property does not belong to GDR. It's an adjoining property under other ownership. So here go the critters marching up this open space and bam, they hit these six houses - sure they can go through the adjoining property and the backyards of these other houses and then go onto Reynolds Mountain. However, there is no guarantee there is an open corridor for these critters to move back and forth, north and south. This illustrates it even more vividly. I don't think that is a contiguous open green space plan in my opinion. (Land Use Goal X) The City should revise its subdivision regulations to require pedestrian and where feasible, vehicular connections within the subdivision and between the subdivision and adjacent property. We're talking about gates and streets here. That is a hot potato. It's a lightening rod issue and

I'm not here to comment on that one way or the other. Fortunately I have your collective wisdom to adjudicate that issue. Now, objectives of sustainability. The footprints for many of these houses range in size from 3,017 sq. ft. to 3,500 sq. ft. with the duplex units along Elk Mountain Scenic Highway having a footprint of 5,000 sq. ft. Now by my rough calculations and I'm not a great mathematician or an engineer, I figure the old plan had approximately 317,000 sq. ft. under roof. The new plan has approximately 383,000 sq. ft. under roof. That's an increase of 21% and with the 6-foot dividing line between houses, it could even be larger. Had the applicant proposed smaller structures, they could have come closer to meeting this objective and consumed less land.

Mayor Bellamy - We have the rest submitted in writing and we will look it over while we are here.

Mr. Pearlman - Yes you do. And thank you very much for your consideration. I appreciate your hard work and everything that you do for the City of Asheville, regardless of the outcome. Thank you so much.

Mayor Bellamy - Any other members of the community wishing to speak tonight?

Ms. Susie Berl - Madam Mayor and members of City Council, good evening. My name is Susie Berl. I live in the Creekside community immediately adjacent to the Thoms Estate. I'll speak for 3 minutes. This evening I wish to speak on three items - open space protection, sidewalks, and stormwater runoff. Open space protection. I commend the developer for setting aside over 36 acres as open space. These areas will certainly help provide some nice views for future residents. I also further appreciate the developer's having retained this open area even while he is dramatically increased the density of the built area. Nonetheless, to retain open space as open space requires legal restrictions. These areas need to have conservation easements assigned to them with the City retaining the development rights. Only then can we be assured that the property's density won't change in the future. Second, sidewalks. Council members should have received from the Clerk a packet of information with the neighbor's desires and signatures for sidewalks on the east side of Elk Mountain Scenic Highway. Please note Selene Thom's attorney's interest in the use of brick or porous material and his interest in using monies paid in lieu of sidewalks on Wild Cherry to be used. To allow for a continuous sidewalk from Beaverdam all the way up to Robinhood Road. Staff is checking into this possibility. Please direct them to do so for the safety of the neighbors and the livability of the neighborhood. Third area, stormwater runoff. As citizens have noted in earlier public meetings, we are concerned about stormwater runoff from the site. This matter has been addressed this evening by the developer who has pledged care during construction. And I believe that they will try to hold to that pledge. I am concerned, however, about what will happen after the developer has completed the project and has left the site. I would ask City Council to require that GDR place restrictions in the deed when he turns the property over to the homeowner association. The association will need to maintain the rain gardens and catch basins so that they do not fill with sediment and cause downstream flooding. Thank you very much.

Mr. Sam Wheeler - Mayor, Councilmen. Thank you again for this opportunity to be here again tonight. Once again I'm here to support this project. I supported it in the past and I've supported it from the very beginning. My name is Sam Wheeler and I'll speak for 3 minutes. I live at 38 Tsali Trail and my property has for many years bordered Selene Thoms property and we have for some time now looked forward to this project. We think it is going to be a tremendous enhancement to the community and to that area in north Asheville. This is a pristine piece of property that many have spoken about. I hope most of you, if not all of you have been out to see this property. It is a rare opportunity in north Asheville and I commend the developer for the work they have put into this to make it the least dense yet an economically doable project that can be done up there. It could be done a lot more, a lot more housing, a lot bigger footprints, and the only reason why they are here before you is, as expressed, is because they chose to do something less and different and it requires a special condition, as you are all aware. So, I am

and my family is very excited about this project. We all know, and if we are honest and the community is honest, at the end of the day, if there is even one new house put on those 100-plus acres of property, there would be several people here to object to that. So it's never going to meet, no matter how hard the developer tries and how much the community and the developer talk, it's never going to meet all of their demands. Any new development is a bad new development in a lot of people's eyes. In fact that it spills out in front of somebody's front yard or on somebody's road that they use every day, it's going to be a bad thing if there is one car or ten cars. So the developer is never going to appease everybody and get it all right. There is a happy medium and I think this developer has gone to great lengths to meet the community's demands and do what is in the best interest of that piece of property as well as what is in the best interest of Asheville. And as probably one of the closest neighbors and one of the people who will most greatly impacted, whose children are going to grow up next to that piece of property, I trust that you will do the right thing. Support this because it's not going to get much better than this. Thank you.

Mr. Sean O'Connell - Mayor and Council, thank you for letting us speak on this again. As you know I've been a part of this process for quite a few months. I'm Sean O'Connell. I live at 17 Edgedale. I think there has been a lot of positive improvement. I will tell you that as you look at these plans and as you educate yourself, lower density is great, but one of the things that a lot of us did like about it was the open space. And so it just looked really crowded for a lot less homes and the size of the buildings on this new plan are exponentially bigger than the original buildings. So there is a 20% increase in total footprint square footage. The idea that we are preserving this great green space is a big concern. I would like to recommend a few conditions that I don't think were part of the new plan. One is that it would be a huge asset to all the downstream neighbors to mandate the homeowners association does maintenance on the rainwater ponds. Once they fill up with sediment, which they always do, they are no longer effective. And literally our backyards will have a small little stream goes through. I don't think it will be a big cost to the homeowners association. It's not something that has to happen every year, but it can be and should be mandated. I don't know all the details of the steep slope ordinance that will probably be in front of you soon. But I do know that is a huge concern for everybody and if it would be possible to have a condition to make sure that the steepest slopes in Phase 4 that they meet the conditions of the steep slope ordinance if and when it passes. It would be fantastic. There has always been conversation about Tsali Trail. And one of the things that I've heard from many folks is also the construction vehicles. If you deem it to be important to eliminate construction vehicles on that small little Tsali Trail, it would be great. Because right now there is the ability for trucks to come and go on Tsali so just having that in writing would offer a lot of protection. And then finally, mandating that the green space that is on this plan stays that way. I don't know a lot about this process, but I would like to make sure that we all protect the part of the plan that we all like. Thank you for your time.

Ms. Susan Seeler - My name is Susan Seeler. I live at 17 Wisteria Drive, which is a street that parallels Elk Mountain Scenic Highway. And although we've heard many assurances here about our traffic being reasonable, it appears to me and others in the neighborhood that there are some areas of concern that have not been looked at and that I would like to point out here this evening. In looking at the revised plan that has been presented for the Thoms Estate property, it appears now that a very high percentage - 80-90% of the development may use the Elk Mountain Scenic Highway for access and egress to the development. The concerns that were expressed back at the February 13 meeting were primarily about the Beaverdam Road traffic. We are not concerned about the relocation of the highest density of development on the Elk Mountain side of the property which according to - if you take the engineering estimates of traffic, will put in the vicinity of 1,200 additional vehicles per day onto Elk Mountain Scenic Highway. This traffic in turn will need to turn onto Beaverdam Road, an intersection which is already dangerous, especially if turning left. We request that a left-hand turn lane be installed at this intersection. Areas of additional concern to us that were not addressed in the previous traffic study are the following. The impact of traffic flow from Beaverdam Road onto Kimberly Avenue. The impact on access to and from Beaverdam Road from Dover Drive, St. Eugene's Catholic

Church's school as well as the YMCA. The impact of the traffic on the Beaverdam/Merrimon intersection has already been addressed and we continue to have concern about that. And am especially concerned now with the proposed high increase of traffic on Elk Mountain Scenic Highway is the intersection of Inglewood Road and Elk Mountain Scenic Highway. This intersection is very narrow and dangerous. Inglewood Road is one of two roads for access of 800 members to the Asheville Country Club. This is a heavily traveled road for access by club members. So the neighbors would like an additional traffic study to be done, including impact at the above mentioned sites and we would like to be assured of corrective traffic measures prior to approval of any more development in the Beaverdam Valley. Thank you very much.

Ms. Elaine Light - Good evening Mayor and Council members. Thank you for letting me speak about this issue. There is no question that we live in very uncertain times. We all of politics - things are crazy. My name is Elaine Light. Developers of gated communities exploit the generalized fear and anxiety by marketing their projects as safer and friendlier than traditional urban or even suburban neighborhoods. Their ads and brochures are sprinkled with words like village, community, nestled, cozy to suggest the friendliness and security and manageable scale there are supposedly missing from the outside world. No matter who builds them, gated and walled communities are intended as private havens. It is this separateness that draws the criticism. Planning consultant Daniel ... states "gating is an outgrowth of not wanting anything in our backyard that is different from us." Setha Low, author of the book "Behind the Gates, Life, Security and the Pursuit of Happiness in Fortress America" argues that the primary things people move to gated communities for is enhanced security and community (the oxymoron gated communities) never materialize and crime rates within gated communities tend to be similar to the areas around them." Ironically Ms. Low has shown gated neighborhoods are in fact no safer than other suburbs and many who move there are disheartened by this solidarity and restrictive rules of the community. While the desire to protect home and family is understandable, walls and gates inevitably lead to more segregation, more fragmentation and more isolation and the outcome is not a desirable one. Many experts say that the fear of crime only partially accounts for the proliferation of walled and gated communities. Equally important is the desire to protect and enhance housing values, which is certainly the self-serving motivation for the gated aspect of many proposed developments we have seen recently in the Asheville and Buncombe County community. And this one is no exception. I question the wisdom of imposing a gated community within a long established and very safe neighborhood. Please consider the overall impact of gated communities when you are deciding on this project. Thank you.

Ms. Nancy Ackerman Cole - Mayor and Council members and all you wonderful public servants, I wasn't planning on speaking tonight, but I'm glad I got the nudge to come and get sworn in in case. I'm Nancy Ackerman Cole and I live in the neighborhood, but not on Elk Mountain - I'm on Robinhood Road at 221 Robinhood Road. I was nudged to speak by something that Craig Justus said in his opening remarks and his presentation was certainly stellar and stunning. I'm a fortunate member of the Asheville Rotary Club. I've been a Rotarian for 20 years. We have in Rotary a four-way test and two of the tests are is it the truth and is it fair for all concerned. I just want you to know that some of the neighbors did meet with Global Development in March, but there was no second meeting as was stated by Craig Justus. And communicating and negotiating with that group has not been an easy or a fun thing to do. I want to live in a neighborhood like Burton Street. Where you not as impressed as I was with the character of that neighborhood description? I don't think our neighborhood wants hamlets and we don't want gates. We want a community and we have relatively come together and gotten to know each other through this process for which I am grateful. So, I heard Pat Whalen's report tonight and if we are going to have 80,000 people come by 2020, you all have some huge responsibility in planning. And to eliminate or reduce crime, we don't want to be whimsical in how we address development. We don't want to be whimsical in buying 80,000 dogs to go with these 80,000 people that are coming to reduce crime. I mean you want to be really thoughtful about how you approach crime issues and development issues. And so I would ask you to consider some of the things said by the neighbors tonight and even the presentation by the developer said

that we have a better product than we did a month ago. I would suggest that we could have yet a better product. There are a lot of ways to make money and a better plan would be nice. Thanks.

Mr. Justus - Madam Mayor, just in rebuttal. I'm a good Baptist so I have my cheat-sheet here from the meetings we had. I didn't catch the nice lady's name, but she was not at the two meetings with the residents that we had one on March 1 and April 2. Just to rebut some of the comments made. This whole gate issue to some degree is a red herring. They see it as something we want and they see it as potentially something that will kill the project and so they are against it. Suddenly gates become the issue. I recall from the last meeting, Councilwoman Cape, and I actually have the minutes said it wasn't a question about neighbors wanting to drive through the new community, only that they wanted to walk in this new community and be neighbors. And so, further on down the staff said that here are some options and I have listed those options and we have agreed to all of those options, in terms of opening up the sidewalks for pedestrian access 24 hours a day. Internal to the project, there are no gates at the entrance. Internal to the project there is controlled access. And it's at night time. So during the day time people can drive on the streets all they want. It's only at night. And I just ask the question, what would be the purpose of there anyway at night. They can still walk there at night, but what would be the purpose of driving there at night, unless there is an emergency and that condition we've already agreed with Wayne Hamilton and staff to keep the roads open. So I would just ask that question. Why? What's the big deal, especially in light of the fact that when we started the process there was no policy on gates. We spent the money in reliance on that and we made a tremendous effort to compromise based on staff direction and what we understood from Council, what your direction was. Multi-family, the condo was too big so we got rid of that and now we're at single-family. And suddenly the footprints are too big. They are asking to micromanage the size of single-family dwellings. That is a slippery slope I would think to micromanage the size of single-family structures. I think Mr. Pearlman called them duplexes. They are not duplexes. They are single-family attached structures. There is not a shared party wall. They are actually attached at the roof for utility purposes, but they are not duplexes. They are single-family structures. These meetings we had, Mr. Pearlman was there, bus transit did not come up as an issue. We are certainly willing to talk more about bus transit, but we put it at a logical place next to the greenway that we are donating to the community. As it relates to protecting critters. That's never come up in any discussion I will say about the protection of critters. We did the best we could by preserving 36 acres of open space and showing you a critter design access plan for those critters, but apparently it's not good enough. Finally, the two last things. The neighbors want protection. It's through this process and the permit you would grant that creates the protection. So the plan we presented to you tonight is the plan. So that means we could not substantially alter the plan, or materially alter the plan, without coming back before you. They talked about deed restrictions and homeowners associations and conservation easements. The permit that you would issue, hopefully tonight, with the plan in mind is the protection that they would need to have. Not anything more than that. And finally, let's get back to traffic again. Once again, I didn't mention the fact that total we have met with staff and residents about 22 times. And not included in that are e-mails with staff talking about traffic issues. And it's your staff that directed us what to look at as it relates to traffic. And ultimately, as I said before, five professionals said that our development would not cause any problem and we do not need to mitigate the traffic from our development. And I would just submit to you that the neighbors had plenty of time for all these months to hire an engineer, a traffic engineer, and they don't present a professional talking about traffic. Five professionals agree with us. At the end of the day we meet your standards and we hope you will grant this project so we can move forward and be a positive asset to the community. Thank you very much.

Ms. Julie Niwinski - I'm Julie Niwinski. I live at 52 Wild Cherry Road. I just want to say quickly that the second meeting was for 15 minutes with 2 members of the community. It was not a meeting with the whole group of community members that we had met with originally. So we don't consider that a second meeting, just as a factual thing. I'd also like to point out that maybe five traffic engineers say that the traffic is okay on Beaverdam Road, but there are thousands of residents who drive it every day, several times, who disagree with that strongly. I don't know how

you quantify that. I just wanted to say that quickly. And, we were commended last time for not being personal, but we believe that the man who spoke so eloquently about raising his children in our community has his house on the market and I disagree with that. Thank you.

Mayor Bellamy - Any other members of the community wishing to address Council on this matter? All right. I will close the public hearing at 10:12 p.m. Council, any questions, comments or a motion? Councilman Newman.

Councilman Newman - I have a question of something someone brought up about the requirement that the future homeowners association maintain the rain garden and other stormwater facilities. That's clearly that responsibility. How do we make sure that does happen?

Mr. Pennington - Let me backtrack just a little bit and perhaps Bob Oast might comment on this too. I need to clarify something. This falls under the State Statute for the Planning Community Act, so everything that was brought up with the red lines that are on the site plan. Again, we are looking at someone actually owning a structure and the dirt underneath it. I believe the red lines represent the maintenance area that would be maintained by the homeowners association. There have been a couple similar planned communities - one was done out on Biltmore Lake off ... Stone Circle and all the infrastructure is in now and currently the homes are under construction there. Very similar to that design. That could certainly be a condition that we could attach to this. Similar to the Weirbridge project where we added on that condition that they maintain the stormwater controls.

Councilman Newman - Is the technology around that and practices around that understood well enough that we can put in there - we will require you to maintain these stormwater facilities. But is there enough detail in the description that we can really go in there and make sure that we do hold them to a real effective level of management of those facilities.

Mr. Pennington - I believe so. We can let the City Stormwater Engineer who is here as well as their professional to speak to the best management practice of using rain gardens.

Councilman Newman - I don't need all the details of that, but I am certainly supportive of that of making sure we add the best language we can into that to make sure that that happens. What about the question of maybe having more sidewalks on Elk Mountain Scenic Highway. The current scenario as I understand it correctly, is that the developer is going to do some payment in lieu?

Mr. Pennington - Correct.

Councilman Newman - And the folks are saying we would really like to have more sidewalks on Elk Mountain Scenic Highway. Is there a way we can get more invested there rather than just having the payment in lieu fund?

Mr. Pennington - Let me say this and then I'll defer to the Engineering Department again. Our normal practice is to require sidewalks along frontages of the proposed subject property. In this case you've got Wild Cherry for instance, where it sort of jagged (City Exhibit 4). So that is where we would have accepted the fee in lieu of. The agreement with Selena Thoms, I don't see her attorney here to speak about what was decided amongst them. We can certainly discuss that but Engineering's generally the department who reviews sidewalks.

Councilman Newman - If anyone else here has thoughts on that, I would appreciate hearing. The only other question I have is, I guess this may be a Bob Oast question. One other question that maybe you can weigh in. Is it feasible or would you recommend supporting the idea of saying that they can't have construction traffic on Tsali Road?

Mr. Pennington - I don't know why they would have construction equipment on Tsali Road. It seems that the logical access points would be off Elk Mountain and Wild Cherry. There really wouldn't be any logical access on Tsali Trail since the ingress and egress has been eliminated now from the plan.

Councilman Newman - Would that be a concern for you if that was a condition?

Mr. Justus - No, that would not be.

Councilman Newman - Great. I guess my last question is a Bob question. And that is the question of, obviously the question about the gated access and things like that. The question has been looked at and we had a subsequent discussion with Council about the issue as a stand-alone policy matter separate from this project and made some decisions around that. But this project was proposed prior to those discussions, so my question is. Obviously this is a conditional use project so we can put conditions on it, so I guess my question is, but in light of the fact that our staff is telling us that we did not have an ordinance previously saying that you cannot - prohibiting gated communities, would denying the project based on it having a gate be a permissible reason to not support it? Does that question make sense? I guess maybe a more straight forward way of asking the question is, could you remind me whether we can decide whether or not this project has gates or not and to what degree in terms of pedestrian, vehicle, etc. Is that a decision we're empowered to make?

City Attorney Oast - I think that you can make that decision. As to whether it is ultimately be defensible in court is a question I can't answer right now. We would certainly be in a stronger position if we had a policy that clearly articulated what you could and could not do with gates. If you can somehow articulate a connection between gates or some limited use of gates in any one of the seven conditions listed for a conditional use permit, that would certainly put us in a stronger position. And while I'm thinking about this, let me go ahead and say something about the stormwater situation. And Mr. Pierce can add to this if I miss anything. But I think this is a facility which would result in the recordation of a maintenance and inspection agreement. It's kind of like what we had with the project out on Hendersonville Road where it would become the responsibility of the people who own property in this area to maintain the stormwater facilities. If they did not, the City would be empowered to go on the property and maintain them and do any necessary repairs at their expense.

Councilman Newman - Craig, do you have any thoughts about this question if it would be possible to get more sidewalks on Elk Mountain Scenic Highway?

Mr. Justus - I'm sorry, I didn't recall anyone bringing that up tonight?

Councilman Newman - Some people have contacted Council and said if you are going to do a payment in lieu, would it just be possible to spend that money adding. You are going to have to do the sidewalk along your frontage on Elk Mountain, would it be possible to go on down to Beaverdam Road or more up to Robinhood Road, rather than simply spending that money into the payment in lieu fund - actually spending it on building some sidewalks above and beyond what you would have to normally do on Elk Mountain Scenic Highway.

Mr. Justus - The problem Councilman Newman about that is we don't have right-of-way. GDR is the project. The project outline, or our boundaries are, we are providing sidewalk except along Wild Cherry where they said it basically is impractical to do it. Therefore, we're paying for that difference. If you are talking about obtaining the right-of-way up Elk Mountain Scenic Highway and then down Elk Mountain Scenic Highway. I'm not aware of that ever being imposed upon a private developer to go out there and acquire right-of-way. If you're talking about paying money into a fund so that the City could eventually go out and maybe condemn or acquire right-of-way, I guess we could talk about that. But if you're saying condition the project for us to put in sidewalks on property we don't own, that's.

Councilman Newman - I don't think that is the suggestion. I think that the idea is not that you would have to spend any more money. No one would be asking you to spend any more money than you are legally required to do. But if you were going to just put money into the fund, whether those funds. It sounds like there may be some neighbors who would be interested in donating their easements along Elk Mountain Scenic Highway and just going ahead and having the sidewalks built at the same time. Sounds like that is kind of a new conversation to you then.

Mr. Justus - We have been aware of the request that we contribute in some way to the sidewalks for considerable distance along Elk Mountain Scenic Highway. And what we have said all along is we don't have right-of-way in order to participate in that discussion. If there was something concrete in terms of numbers, we can look at fine. So it comes down to right-of-way and what numbers, Councilman Newman, are we talking about? Clearly we are abiding by what the City ordinance requires of us with sidewalks and in terms of what your standards are. We comply with that. If you are asking us to do something more, I guess we would need to have more detail. But we don't own that property that you are talking about and that is the problem. But we are willing, certainly, to talk about it. We don't want you to get hung up on it, but we don't have any detail about it.

Mayor Bellamy - Council, any other questions? Councilwoman Cape.

Councilwoman Cape - Can I ask staff a few questions please? Just because I need to understand what our options are. What is the process that the applicant would go through if we refuse this conditional use process tonight? To develop this land, what is the process they would go to? Do we have an application in place for the other subdivision already?

Mr. Pennington - No.

Councilwoman Cape - We are in the process of reviewing our subdivision laws but those won't be done for a couple of weeks. I'm just understanding the process the applicant would go through to address the steep slope issues that are coming up, the subdivision issues that are coming up, the stormwater regulations. I like many aspects of this in terms of clustering and open space, but I don't like the threat that it's a better project without understanding what the other project is. It's hard to really make a positive choice when you don't know what your choices are. And the difficulty I'm having is the vagueness of what our choices are. In other words, our steep slopes say we can't develop. There is a lot of land above 2,200 sq. ft. here that we can't develop on anyway. The slope issue. How many properties could they actually do anyway? Those are questions we are being told they reduced it by 30 houses, but it's difficult to understand what our options are. So explain the process.

Mr. Pennington - Okay, I can explain that for you. The application before you is the only application they have submitted for. There is no dual application nor do we really ever recommend any dual application. We try to really review the application at hand. Secondly, part of their design was to stay out of the areas that are above the 2,220 and 15% grade threshold. So they stay out of the steep slope areas as is written now, not as written or is proposed.

Councilwoman Cape - So they've stayed out of the above 15%?

Mr. Pennington - For the most part. They still have to meet their grading and they have to meet their density. But let me give you a couple numbers so I can help you understand more. The total subject parcel with the park area, and just so you know that park area is 4.26 acres, is 82.7 acres. That results in a net density of 1.6 ... units per acre. Without this park area, 4.26 acres, gives them 78.4 acres. That results in a net density of 168 dwelling units per acre. Ninety-two single-family residential and 40 single-family attached, which have the look and the feel of essentially a single-family residence. If you think of RS-2 and you think of RS-4, RS-2 zoning,

which this property has both, it has a little bit of RS-4 and mostly RS-4. But if you think of it in terms of density, that's well below what is traditionally allowed in the traditional subdivision.

Councilwoman Cape - Okay. And just a clarification. You have said that they, for the most part, except for maybe Phase 4, is all below 15% grade?

Mr. Pennington - Yes. I'm hoping that the developer will catch me if I'm wrong (City Exhibit 4). There is a phasing .... But essentially Phase I towards the bottom here. Phases 2 and 3. Phase 4. Phase 4 is when you really start getting into the areas that are above 2,220 feet. That is when we really start restricting them in regards to grading and residential density.

Councilwoman Cape - Has that already been applied to that plan? That restriction.

Mr. Pennington - Yes. We've done those calculations separately so you have your calculation for those areas that areas that are above and those areas that are below this thresh line.

Councilwoman Cape - You know it's been stated loud and clear from this Council that they are against gates of any kind. The options before us are to turn this down and hope we get our gated subdivision in, or work with this one piece now before they put an application in. If that's the main thing we are contending with. I do have some concerns about the increase in size. You're selling building envelopes. I guess this becomes a question for the developer. So you're selling building envelopes that say that you've having high quality product, but there is no definition of what this high quality product is. It's just a building envelope space. That's kind of an interesting concept that I have not seen on a conditional use before with Council. You know, to me what we are seeing here is not that much better than what we saw two weeks ago. So that is just where I'm at.

Mayor Bellamy - Councilman Mumpower.

Councilman Mumpower - Mr. Oast, are there any modifications that you wish to offer us on your observations on the protest petition validity?

City Attorney Oast - No, I did review Mr. Dungan's letter. It's the shortest way to put that. I just disagree with him. This is not a map amendment, it is a conditional use permit.

Councilman Mumpower - We rely on our guidance. I would make a number of pointed comments because I certainly feel that way right now. It is a persistent disappointment to note how many Asheville neighbors feel comfortable in trying to insert arbitrary control over property that they do not own. I am extremely disappointed with that I see tonight. And I see it at other Council meetings. There is a ... difference in what is offensive and what is harmful. There is a big difference in what we want and what we earn from our own labors. This is not our property. And I tell you, I think we ensure our liberties and freedoms at no greater level than we ensure our neighbors. And that's just the opposite occurring here. We talk all the time about how developers come to this community and try to loot the City. I just see just the opposite occurring tonight. I think the neighbors are trying to loot the developer to their own special interests. And I find that abhorrent. This is about development by committee. Development approval by committee rather than the application of fair practice and consistently applied ordinances. And you cannot develop the City on these bases. In terms of the fence, I think that if you have a fence in your yard, then you believe in gated communities. You just believe it on a smaller scale to suit your own personal needs. I think a lot of like that security and we like it for obvious reasons. I don't particularly want to live in a gated community, I don't think I ever will, but this is not about what I want. I don't think it should be about what anybody wants, it should be about our governing ordinances. That said, we had no governing ordinances in place when these folks began this process that said we do not accept gated communities. We are applying a policy decision after the fact on these folks and that is not fair. I don't care who we're doing it to. It

would be fair to a single neighborhood and it's not fair to a big developer. I think they've made a real strong effort, frankly stronger than I think they should have, to accommodate the indulgences of a lot of folks. They're taking that gate and putting it out of the way and they are talking about at night. Again, whether one likes it or not, it's an effort to try to accommodate folks. I think that accommodation has to work both ways. We live in a busy growing City and everybody has to make an effort to try to help one another. I hear none of that attitude tonight. I hear a whole lot of people having their own special interest about what they want. I believe that these folks have met the seven conditions at a more than satisfactory method and am prepared to make a motion to that affect, at the appropriate time. Thank you.

Mayor Bellamy - If you would like, you can go ahead and carry it right now.

Councilman Mumpower - I move, with the caveat, Mr. Pennington maybe you can help me. Any special conditions that have come up in discussions that I might want to add that are not on our current staff report?

Mr. Pennington - Sure. One is that we talked about the maintenance of the stormwater rain gardens and other best management practices. That they be maintained in perpetuity by the association.

Councilman Mumpower - Is that the appropriate language to use to ensure that? Is that the standard that we've applied to other folks? Is there a better way to do that? Or is that adequate?

City Attorney Oast - I think that is something the ordinance takes care of and that there is no need to say that. Mr. Pierce is a lot more familiar with this than I am.

Councilman Mumpower - Okay. So is there another one?

Mr. Pennington - If you wanted to talk about to make sure that the gates would allow unimpeded access to emergency vehicles and pedestrians, you might say something like, all gated entrances must be operated in such a manner as to allow for the unobstructed ingress and egress of pedestrians and emergency vehicles throughout the subject property.

Councilman Mumpower - Do you see any problems with that language Mr. Oast?

City Attorney Oast - (shook his head no.)

Councilman Mumpower - I want my motion to include that language also. Any other caveats that you would encourage us to.

Mr. Pennington - No, sir.

Councilman Mumpower - Okay. Thank you very much for your help. I make the motion (which motion is: to approve the conditional use permit adopting the proposed master plan, with the requested modifications to number of dwelling units per building, setbacks, sidewalk and road design, for the Thoms Estate subject to the following conditions: (1) The main "spine" road must maintain a 50 foot right-of-way; (2) A cross access agreement must be executed between the Thoms property and the property to be retained by Selene Thoms for fire access purposes; (3) The project shall comply with all conditions outlined in the TRC staff report; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (7) This

Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; (8) All roads shall be public roads or private roads built to City standards; all applicable State Building and Fire Code standards must be addressed in the final road design and layout, and (9) all gated entrances must be operated in such a manner as to allow for the unobstructed ingress and egress of pedestrians and emergency vehicles throughout the subject property.

Mayor Bellamy - All right. Is there a second?

Councilman Newman - I'll second it.

Mayor Bellamy - The motion has been made and properly seconded. Any further questions or comments?

Councilman Newman - I have one other question about the public access to the City streets. So there is going to be full pedestrian access allowed on the streets. And there is also going to be vehicular access allowed during the daytime, right? Are there details around exactly what daytime is, or hours, or what that means?

Mayor Bellamy - Councilman Newman, is that a question for the developer to answer?

Councilman Newman - Whoever has given thought to the subject. I think if it is not detail enough, then we should define that in some way or at least establish a process of defining what that is.

Mr. Justus - I would just ask you to include that in the condition. Staff recommendation on the compromise was sun-up to sun-down. If you want to defer that to staff in working out the hours of that operation, that would be fine too. But that was the compromise staff laid out February 13.

City Attorney Oast - If we said at least sun-up to sun-down, I think that would take care of it.

Councilman Mumpower - I would be supportive of that amendment to the motion tonight.

Councilman Newman - I guess the only other - going back to this question about the sidewalks. Is the staff aware of some of the ideas of potentially doing, of using some of the payment in lieu of the money, or otherwise trying to get more - I think there is support for the idea of getting more sidewalks on Elk Mountain Highway. Either using the payment in lieu money or does staff have any thoughts on that? Or, are you aware of contemplating doing that potentially. Do we have to use our payment in lieu of money in this area? Is that something that we can potentially accomplish as part of what happens here?

City Attorney Oast - For payment in lieu of sidewalks, we do have to use the money that we gather that in the area of town where the project is. It may be possible to structure the order such that the money paid in this case is used on Elk Mountain Scenic Highway, if the property can be acquired.

City Stormwater Services Manager Chad Pierce - I would like to make a small clarification. The section that they are paying the fee in lieu of on is for the juts, where the red boundary kind of juts and makes contact with Wild Cherry. So it's very fragmented and that is kind of why that decision was made. It doesn't make a lot of sense to build 50 foot here and 50 foot here. So, those are the only spaces they are paying the fee in lieu of, that they would be required to build sidewalk. All the other sections where they have property frontage on public streets, they are building the sidewalk.

Councilman Newman - So it's a pretty small payment in lieu?

Mr. Pierce - (shook his head yes.)

Councilman Newman - Okay. One other question while I have you here, if you're the person to comment. There was a suggestion made about the left-hand turn lane on Elk Mountain onto Beaverdam. Has that been looked at? Do you think that the traffic volumes warrant that, or consideration of that?

Mr. Pierce - I will have to defer to the traffic consultant Gay Sprague for that.

Ms. Gay Sprague - Would you repeat that question for me please?

Councilman Newman - A question was raised about if there is going to be additional traffic on Elk Mountain Scenic Highway, is it to the level that warrants a left hand turn lane, I believe I have that right, onto Beaverdam Road.

Ms Sprague - I haven't done that exact. I'm Gay Sprague with Sprague and Sprague and have been hired by the City to review the traffic impact study. That analysis was not included in the traffic impact study and I have not done a separate analysis. What they did do was look at the delay of that left-turn and it was at an acceptable level of service. The idea, I did a quick little calculation, and forgive me it was by hand, but the kinds of shifts in traffic that were discussed a few minutes ago would increase the project traffic by about 16% on Elk Mountain. Because these are all small numbers even if you shifted some of the percentage, they are still pretty small numbers.

Councilman Newman - Okay. The one **other condition I would like to suggest would be the no construction vehicles on Tsali Road.** Would that be an acceptable amendment?

Councilman Mumpower - Do I see nodding heads back there? Is that doable and reasonable? Yes, sir. I will accept that friendly amendment.

Councilman Newman - I don't have any other questions. I would just say that these are tough judgment calls about this. It is a lot of new traffic on Beaverdam Road. The problem with, you know, it's not so much this project is putting a lot of new traffic on Beaverdam Road by itself, you know, in the big scheme of things. But, when we have these mountain valleys and every new development has to funnel down one road, that is the concern, the cumulative impact of projects like this going in. But I think that with the zoning we have here, I think this is a pretty good project in terms of meeting the objectives of the zoning that is there, preserving a lot of open space - a meaningful amount of open space is part of the project. I personally voted to support the policy of not having gated communities last week. But I think that there is a degree of fairness that these people brought this project forward before that policy was in place. So I don't know that it's fair for us to retroactively impose that on projects that are already in the pipe-line. I think that having pedestrian access to all of the streets, as well as vehicular access during all the day-time hours is a pretty good compromise on that point. So, in the future if this project came forward, if it started next week, I would say, no for public access. But in terms of requiring that now, I don't think that is the right thing for us to do. So, those are my thoughts on it.

Mayor Bellamy - Okay Council, we have a motion and have gone on at least 17 minutes. Can we go ahead and wrap up what we have to say quickly?

Councilwoman Cape - I would ask for one friendly amendment to this, if I may. And that would be that the Phase 4 of the steepest slope development would meet our new steep slope ordinances. Since this will be the final phase of the development process.

Councilman Mumpower - I'm not willing to again back-track on a policy issue. I don't think it is fair to the developer or anybody coming forward who is going to fear the same kind of behavior from us.

Mayor Bellamy - All right? Any further questions or comments?

(Final Amended Motion: Councilman Mumpower moved to approve the conditional use permit adopting the proposed master plan, with the requested modifications to number of dwelling units per building, setbacks, sidewalk and road design, for the Thoms Estate subject to the following conditions: (1) The main "spine" road must maintain a 50 foot right-of-way; (2) A cross access agreement must be executed between the Thoms property and the property to be retained by Selene Thoms for fire access purposes; (3) The project shall comply with all conditions outlined in the TRC staff report; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (7) This Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; (8) All roads shall be public roads or private roads built to City standards; all applicable State Building and Fire Code standards must be addressed in the final road design and layout; (9) all gated entrances must be operated in such a manner as to allow for the unobstructed ingress and egress by pedestrians and emergency vehicles at all times, and must remain open to all other vehicular traffic during daylight hours (sunrise to sunset); and (10) no construction vehicles on Tsali Trail. This motion was seconded by Councilman Newman.)

The motion carried on a 4-3 vote, with Councilwoman Cape, Councilman Davis, Councilman Newman and Councilman Mumpower voting "yes" and Mayor Bellamy, Vice-Mayor Jones and Councilman Freeborn voting "no."

Mayor Bellamy - Bob, do we have to vote on this again?

City Attorney Oast - Because this was voted on back in February and remember you voted on it and reconsidered it. That means the ... motion has been voted on so there is no need to go through it again.

Mayor Bellamy - It's done. It passes.

Ordinance Book 23 - page 312

B. RESOLUTION NO. 07-82 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE AIR SPACE AT 11 BOSTON WAY

Mayor Bellamy - Sam Power, if you could do items "B" and "C" together and only go over the new information.

From Staff Report: This is the consideration of a resolution authorizing the City Clerk to advertise an offer to purchase air space at 11 Boston Way.

A bid has been received from Kessler Asheville LLC in the amount of $11,665 for the purchase of air space at 11 Boston Way.

The property at 11 Boston Way is the former Exxon Station across from the Biltmore Estate entrance. The project which is called Bohemian Hotel at Biltmore Village proposes to construct a four (4) story, 89 key boutique hotel. The project received approval from the Historic Resources Commission on October 11, 2006, approval from the Technical Review Committee on

November 6, 2006, and approval of the building plans by the Building Safety Department for a Building Permit subject to acquisition of the air space for the balconies.

The air space for the balconies over the sidewalk totals 890± S.F. beginning at approximately 18 feet above the sidewalk and projecting over the sidewalk 5.25 feet. Past appraisals indicate that the value of air space for balconies projecting over rights of way is 20% of the per square foot land value of the property from which the balcony projects applied to the horizontal area of the airspace. This method was used to extrapolate a value for the air space using an appraisal of the property at 11 Boston Way dated February 13, 2006, adjusted for time. The estimated value of the air space is $11,665.

The bid from Kessler Asheville LLC is to acquire the air space for the balconies for the sum of $11,665.

On March 27, 2007, Council asked staff to research the practices of other cities with regard to balconies projecting into rights of way. The following is the results of the inquiries to other cities along with staff's recommendation with regard thereto:

In the past several years as the downtown has become more and more popular as a destination for tourists, a place for off hours recreation, and location for both living and working, balconies have become a subject of interest to developers seeking to provide the amenities people desire. Although balconies are not a new invention the opportunity to expand the useable space in a structure through balconies projecting into the right of way has generated requests to purchase air space for the balconies. The response of staff thus far has been to facilitate such requests both from the plans review process as well as conveying requests to City Council for approval. In general staff believes that balconies are a positive addition to the urban environment. Not only do they add vitality to the streetscape, they provide a desirable amenity for marketing downtown as a place to live, work and visit. This may be an incentive to investors to invest in new construction as well as renovation of existing buildings to meet the market demand.

Past experience has shown that the placement and appearance of balconies is important to the general public. For instance large low hanging balconies may be undesirable to some, whereas such a balcony may be appreciated by others as shelter from the rain and shade from the sun. There are of course public safety concerns as well. It is important therefore that such issues be addressed in the plan review process. Staff believes that balconies should not only be safe and functional, but an attractive interface between the public and private spaces.

On March 27, 2007, City Council considered requests from two developers to purchase air space for balconies to project into right of way as follows:

Kessler Asheville LLC	11 Boston Way	890 square feet	$11,665
Urban Capital LLC	82 Patton Avenue	216.6 square feet	$3,350

Staff utilized a method of calculating the value of the air space based on previous appraisal experience intended to make the process more efficient while ensuring that the City would receive fair market value for the air space. Council expressed concerns about the value rendered by the method as well as the desire for information as to how other cities handle requests for balcony encroachments over right of way. It is the understanding of staff that the matter should be brought back for consideration after gathering data from other cities.

In summary, none of the responding cities actually sell air space for balconies. Two cities, Gatlinburg and Aspen do not allow balcony encroachments into the right of way. Aspen does allow an encroachment license for old improvements for a flat fee. Wilmington grants revocable encroachment agreements for a flat fee of $250, while Greenville, SC allows a 40 year encroachment agreement with 3 ten year renewals for a total of 70 years. Charleston's real estate manager indicates she is not aware of any balcony policy because she has not had the

issue come up. Roanoke, Chattanooga, Spartanburg and Columbia had not responded as of the date of this memorandum.

Although we have not uncovered much data with regard to balconies over rights of way, staff believes that selling the air space for balconies is preferable to encroachment agreements for several reasons:

1. A balcony is a permanent improvement and the sale of the air space is a permanent solution. It does not leave an issue to be resolved by someone else at a later date.

2. A sale generates revenue at fair market value in exchange for the air space; the data we received indicates that encroachment agreements do not.

3. A sale of the air space enlarges the taxable area of the improvements.

4. Along with the sale, the purchaser assumes responsibility and liability for the air space.

The subject projects have been through technical review and approved for building permits subject to acquisition of the balcony air space. Staff believes the subject requests meet the need for safety, functionality and esthetics. The information gathered from other Cities provided no comparable data for the purpose of estimating value. Having reviewed the information, staff believes that the sale of air space for the proposed balconies is appropriate and that the methodology used is reflective of fair market value. Staff recommends reconsideration of the resolution on April 10, 2007, however, staff is committed to providing documentation acceptable to Council for evaluating these requests and would invite further guidance as the need may be.

Pros:

1. The sale will be at fair market value.
2. It will facilitate an increase in the tax base.
3. It will accommodate characteristics of the building design intended to conform to the historic nature of Biltmore Village.

Cons: There is no negative impact.

Economic Development staff recommends adoption of the resolution which will initiate the sale of the air space through the upset bid process.

Economic Development Director Sam Powers - Thank you Mayor and members of Council. The Real Estate Manager is out of town tonight so I will be providing this update to City Council. On the 27th of March, City Council considered a request from two developers to purchase air space for balconies to project into right-of-ways as follows: 11 Boston Way - 890 sq. ft.; and 82 Patton Avenue - 216 sq. ft. Staff had utilized a method of calculating the value of the air space based on previous appraisal experience that was intended to make the process more efficient while still ensuring that the City would receive fair market value compensation for the air space. Council expressed a desire for more information as to how other cities handle the request for balcony encroachments over right-of-way. Staff contacted several cities and our responses indicate no consistent method. I think as you can see after looking at this chart, the cities that responded to us gave a number of different methods. Some communities that responded used encroachment agreements. Some communities did not allow encroachments. But our method, although it didn't uncover a lot of data in regard to balconies over right-of-way, we believe that the methodology that our staff came up with for selling air space is preferable to any encroachment agreements for several reasons. A balcony, since it is a permanent structure, the sell of the air

space is a permanent solution. The sale generates revenue at a fair market value in exchange for the air space. The data that we collected indicates that encroachment agreements do not do that. The sale of air space enlarges the taxable area of the improvements and along with the sale the purchaser assumes the responsibility and liability for the air space. The subject projects have been through the technical review and approved for building permits, subject to the acquisition of the balcony air space. Staff believes that the subject requests meet the need for safety, for functionality and aesthetics and that these amenities are desirable to creating more vibrant, urban places. The information gathered from other cities provided no comparable data for the purpose of estimating value. Having reviewed the information, staff believes that the methodology used is reflective of fair market value and the recommendation from staff is for approval of the resolutions.

Mayor Bellamy - Thank you Mr. Powers. Any members of the community wishing to address Council on the new items that have been presented tonight? Hearing none, Council is there a question, comment or a motion?

Councilman Mumpower - Mayor, I originally asked to have this pulled from the Consent Agenda because I had concerns. I think staff has been patient with us in trying to follow through on those concerns. I'm not sure we got all the answers that we hoped for, but on the basis of the staff report, can this be a joint motion Mr. Oast, or do they need to be separate?

City Attorney Oast - It's two resolutions and not on the Consent Agenda. I think you need to do them separately.

Councilman Mumpower - I make a motion to (approve the resolution authorizing the City Clerk to advertise an offer to purchase air space at 11 Boston Way).

Mayor Bellamy - Is there a second?

Councilman Freeborn - Second.

Mayor Bellamy - Any further questions or comments?

Councilwoman Cape - Just one quickly, if I may Mayor. I am very supportive of this motion but I would like to hope that we are not creating a precedent that everybody that comes before us with a balcony request - that it will continue to be a per project. Because there are situations where we do not want to create a tunnel on City streets. I don't believe these two particular projects create that tunneling aspect. But I just want to let it be known that we will need to consider balconies and their affect on the public space every time they come forward.

City Attorney Oast - And I think under the law it would have to be that way.

Councilwoman Cape - I just wanted to send the message that depends where they are and whether they work or not.

The motion made by Councilman Mumpower and seconded by Councilman Newman carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 304

C. RESOLUTION NO. 07-83 - RESOLUTION AUTHORIZING THE CITY CLERK TO ADVERTISE AN OFFER TO PURCHASE AIR SPACE AT 82 PATTON AVENUE

From Staff Report: This is the consideration of a resolution authorizing the City Clerk to advertise an offer to purchase air space at 82 Patton Avenue.

A bid has been received from Urban Capital LLC in the amount of $3,350 for the purchase of air space at 82 Patton Avenue.

The property at 82 Patton Avenue is the former First Union Bank building. The project which is called Capital Center proposes to renovate the building into office condominiums. Along with interior redesign the building will receive a new facade which will include balconies extending out over the sidewalk in a bowed pattern to a maximum distance of 4' with a view of Pritchard Park. The project has received Level 1 approval from Planning & Development, unanimous approval from Downtown Design Review and the plans have been approved by the Building Safety Department for a Building Permit subject to acquisition of the air space for the balconies. The air space for the balconies over the sidewalk totals 216.6 ± S.F. and begins at approximately 16 feet above the sidewalk. Past appraisals indicate that the value of air space for balconies projecting over rights of way is 20% of the per square foot land value of the property from which the balcony projects applied to the horizontal area of the airspace. This method was used to extrapolate a value for the air space using the tax assessment for the property at 82 Patton Avenue. The estimated value of the air space is $3,350.

The bid from Urban Capital LLC is to acquire the air space for the balconies for the sum of $3,350.

On March 27, 2007, Council asked staff to research the practices of other cities with regard to balconies projecting into rights of way. The following is the results of the inquiries to other cities along with staff's recommendation with regard thereto:

In the past several years as the downtown has become more and more popular as a destination for tourists, a place for off hours recreation, and location for both living and working, balconies have become a subject of interest to developers seeking to provide the amenities people desire. Although balconies are not a new invention the opportunity to expand the useable space in a structure through balconies projecting into the right of way has generated requests to purchase air space for the balconies. The response of staff thus far has been to facilitate such requests both from the plans review process as well as conveying requests to City Council for approval. In general staff believes that balconies are a positive addition to the urban environment. Not only do they add vitality to the streetscape, they provide a desirable amenity for marketing downtown as a place to live, work and visit. This may be an incentive to investors to invest in new construction as well as renovation of existing buildings to meet the market demand.

Past experience has shown that the placement and appearance of balconies is important to the general public. For instance large low hanging balconies may be undesirable to some, whereas such a balcony may be appreciated by others as shelter from the rain and shade from the sun. There are of course public safety concerns as well. It is important therefore that such issues be addressed in the plan review process. Staff believes that balconies should not only be safe and functional, but an attractive interface between the public and private spaces.

On March 27, 2007, City Council considered requests from two developers to purchase air space for balconies to project into right of way as follows:

Kessler Asheville LLC	11 Boston Way	890 square feet	$11,665
Urban Capital LLC	82 Patton Avenue	216.6 square feet	$3,350

Staff utilized a method of calculating the value of the air space based on previous appraisal experience intended to make the process more efficient while ensuring that the City would receive fair market value for the air space. Council expressed concerns about the value rendered by the method as well as the desire for information as to how other cities handle requests for balcony encroachments over right of way. It is the understanding of staff that the matter should be brought back for consideration after gathering data from other cities.

In summary, none of the responding cities actually sell air space for balconies. Two cities, Gatlinburg and Aspen do not allow balcony encroachments into the right of way. Aspen does allow an encroachment license for old improvements for a flat fee. Wilmington grants revocable encroachment agreements for a flat fee of $250, while Greenville, SC allows a 40 year encroachment agreement with 3 ten year renewals for a total of 70 years. Charleston's real estate manager indicates she is not aware of any balcony policy because she has not had the issue come up. Roanoke, Chattanooga, Spartanburg and Columbia had not responded as of the date of this memorandum.

Although we have not uncovered much data with regard to balconies over rights of way, staff believes that selling the air space for balconies is preferable to encroachment agreements for several reasons:

1. A balcony is a permanent improvement and the sale of the air space is a permanent solution. It does not leave an issue to be resolved by someone else at a later date.

2. A sale generates revenue at fair market value in exchange for the air space; the data we received indicates that encroachment agreements do not.

3. A sale of the air space enlarges the taxable area of the improvements.

4. Along with the sale, the purchaser assumes responsibility and liability for the air space.

The subject projects have been through technical review and approved for building permits subject to acquisition of the balcony air space. Staff believes the subject requests meet the need for safety, functionality and esthetics. The information gathered from other Cities provided no comparable data for the purpose of estimating value. Having reviewed the information, staff believes that the sale of air space for the proposed balconies is appropriate and that the methodology used is reflective of fair market value. Staff recommends reconsideration of the resolution on April 10, 2007, however, staff is committed to providing documentation acceptable to Council for evaluating these requests and would invite further guidance as the need may be.

Pros:

1. The sale will be at fair market value.
2. It will facilitate an increase in the tax base.
3. It will accommodate the connectivity of public and private space for a more robust downtown environment.

Con: There is no negative impact.

Economic Development staff recommends adoption of the resolution which will initiate the sale of the air space through the upset bid process.

Councilman Mumpower - Again, based on the persuasiveness of the staff report, I make a motion to (approve the resolution authorizing the City Clerk to advertise an offer to purchase air space at 82 Patton Avenue).

Councilman Freeborn - Second.

Mayor Bellamy - Any further questions or comments?

The motion made by Councilman Mumpower and seconded by Councilman Newman carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 – PAGE 305

D. ASHEVILLE POLICE DEPARTMENT DRUG ENFORCEMENT PLAN

From Staff Report: This is a comprehensive and detailed plan for increased drug enforcement, improved neighborhood safety, and a discussion of the possible elimination of all open air drug markets in Asheville includes both immediate and long term components.

The Police Department's continuing efforts directed at overall improvement in the quality of life for residents constantly seeks information regarding new trends, gathers information based on factual information and statistical analysis to determine best practices for a high functioning organization. Any and all relative information is used to develop strategic plans for programs and practices to provide the highest level of service which involves many community partners. All residents rightfully expect the same level of service for their tax dollars. Balancing the need to maintain equal service to all and to redirect efforts to areas where more significant problems exist is a fine balancing act. Incremental steps are designed for thoroughness and operation within the parameters of what is reasonable based on allocated resources.

Pros:

- Increased police presence in high crime areas, particularly where known illegal drug business is conducted
- Increased cooperative programs between community partners involved in an overall holistic approach to a better quality of life for those negatively affected
- Easier facilitation of programs involving health care, home security, child care , youth skills building, positive mentoring by appropriate role models leading to community ownership for safer communities
- More open and trusting relationships between police and residents
- Decrease in illegal drug business in Asheville neighborhoods
- Decrease in crime in general when residents take ownership, partnering with police

Cons:

- Budget Ramifications
- Redirection of attention from some neighborhoods to targeted areas

Staff recommends that City Council make selections from options presented based on conclusions that will provide the best outcome for Asheville neighborhoods with available resources.

Police Chief Bill Hogan - Good evening. Because of the late hour I will be as quick and brief as I possibly can with this. I was asked to expand the presentation I gave you on the 7-point plan. This is kind of what this will do, but it will be very quick and I won't bore you with the details. The things that the Manager asked me to do was to go back, because he wasn't here, and re-visit the wording on the discussion that occurred during the budget allocation for the two years where the money was set aside to what eventually came the Drug Suppression Unit, but it was just a general statement to direct me to assess the problem and project solutions. August 1, 2004, we created the Drug Suppression Unit by using 12 emergency response team officers, 1 vice officer and 1 lieutenant. And the following year, an additional 5 officers were allocated for that project.

Vice-Mayor Jones - How much did that add up to dollar-wise? The allocation of 5?

Chief Hogan - I would have to go back and research. I think the first year was $600,000. And then the second year would have been something like $250,000 or thereabouts. That was

additional cars which would have added to that. As far as looking to the future, I'm going to skip over this and come back to this because it speaks to the budget and you'll see it again. Let me talk about historically what we have here in terms of what we've done. We took the prior 29 months before we established the Drug Suppression Unit and between the 9 months that the Drug Suppression Unit has been in effect and what you see is felony arrests have increased by 36%, misdemeanor drug arrests have increased by 44%. What's missing from this because our data 29 months prior to what it did not capture that we can today, are criminal citations. So in reality, what I can't tell you is a comparison between criminal citations, simple possession oftentimes is written on a criminal citation, so that is not there. So that 44% increase in reality is probably higher. I just want to point out as well that this does not represent the arrests simply of the Drug Suppression Unit. The Drug Suppression Unit establishment has stimulated a lot of activity with patrol officers and others that have really stepped up to the plate and engaged themselves in making those kinds of arrests and really working on the drug problem. The other thing I want to mention to you is that during this analysis, on average we had 18 vacancies per year. We had a lot of turnover, baby-boomers moving on and things of that nature. The 7-point plan, I'm not going to spend a lot of time on. I went through this with you a month, month and a half ago. (From power point being used: The Seven Point Plan is (1) increase criminal interdiction traffic enforcement; (2) increase drug investigative special operations; (3) increase current DSU staffing by 25%; (4) increase partnership with U.S. Attorney's Office in federal drug case prosecution; (5) invest additional resources in crime prevention/neighborhood enhancement in public housing and high crime areas; (6) increase community policing and outreach initiatives; and (7) explore additional policy considerations.) So really I want to jump to explore additional policy considerations and build upon what the 7-point plan was talking about. I will tell you that all the things we talked about doing, we are in motion trying to enhance and work on all those activities. Let's look at the current service enhancement recommendations. (From power point being used: The current service enhancement recommendations include (1) crime prevention officer dedicated to public housing; (2) City Hall security officer; (3) two additional beats; (4) five detectives, two forensics techs; (5) 10% sworn personnel over hire; and (6) two telecommunicators, three telecommunications supervisors.) What you are looking at, quite frankly, is what the Police Department has recommended as potential budget enhancements to the police operation. You have already approved the Crime Prevention Officer dedicated to public housing. There was a lot of discussion about City Hall security - there have been conversations I've had with the City Manager to add that and enhance that. I know we've had a lot of meetings within City Hall, Public Works, and other City facilities to enhance our security. We propose two additional beats which I'm going to spend some more time on. The five detectives, I'm going to talk about that in greater detail. The 10% over hire and then the 2 telecommunicators. I'll go over each one of those with a little more detail so you understand why we are proposing what we are proposing. We are proposing an increased beat. We have currently 4 beats in our 3 districts and we are recommending additional beats in the south/central district and the west district. And there is a reason for that. One, you can see that C-1 beat is downtown has 19% of the workload of the entire City. A-4 beat, which represents 13% of the total calls and that encompasses Pisgah View and also the Haywood Road area, so that they have a lot of attention. But one of the reasons we are doing this is we started analyzing our response time for calls for service - priority 1 calls. And that is really got us looking at this. Currently in the central district we have an average response time of 8.5 minutes to go to a priority 1 call. In the west district it's 8.6 minutes. That's the average. There are some actual beats now that are averaging 9.5 to 10 minutes response time. We're talking about priority 1 calls, where someone says I need the police now. So we started analyzing this and incrementally looking at improving our response time as with the Fire Department or any other entity. We are challenged in this community, as you've probably heard, by the geography and the topography of this area. It does slow down our response time. This is not a gridded-off city with streets and avenues that give you a lot of flexibility. Sometimes we have to follow those roads as they wind around the mountains. And obviously this increase will allow us to continue to work on that 2-1 ratio and ensure that we concentrate our activities in high crime areas. I will also tell you that we have been looking at other departments and how they are analyzing this. And through our planning and research function, contacting other law enforcement agencies, we are finding we

are right on the money in trying to target about a 5% response time on emergency calls for service. That's why it is being recommended in the budget. The increase in the Criminal Investigation Division, I think I mentioned to you that we had one more detective in 1989 than we do today. Our workload obviously has increased dramatically. As we've had some discussions previously, there was some talk about participating in the FBI Task Force. One of those detectives would be geared for that. And one of those individual detectives would, we are training a detective now for that forensics - I mean the computer forensics detective that would do the job porn and those things. We are training one now, but that is a whole new area of responsibility. As you can see our case load is 286 calls per detective. That's an average of 5.4 hours per case. And we are also carrying 25 cold case homicides, missing persons, that are missing under suspicious circumstances. We compared ourselves to 11 agencies on the east coast - Del Ray Beach, Florida, up through Cary. Anyway, 11 different agencies. And what we found is that their detectives carry 149 cases and they spend on average about 10.4 hours per case. The bottom line is, the more time you have to work on a case - a simple case you will spend less time on. But if you have a homicide, you will spend a lot of time on - multiple detectives. The long and short of it is, the more time that you have to work on a case, the better quality case you can do, the more detailed investigation you can do. That is why it's being recommended as well. We're obviously, with the increase in calls for service, criminal activity and our drug activity, our forensics technicians who process crime scenes and handle evidence as far as collecting that and submitting it, are having greater demands placed on them. As you can see, we talked about the NarDrug Test. This is a new technology. We have sent two of our forensic technicians to that training and we are supposed to get the unit in later this month and we will start using that and see how it works. But we believe from what we all saw with this system, we are waiting for a court challenge on it, it's very effective and people are pleading guilty on these cases. And if someone does challenge it, they stand ready with the scientists, chemists and attorneys to represent the department that gets challenged on it.

Councilman Mumpower - Chief, that's very important.

Mayor Bellamy - Councilman Mumpower, let him go through the whole presentation and then we will come back.

Councilman Mumpower - Certainly Mayor.

Chief Hogan - The 10% over hire. This is another thing we talked about. Based on the fact that because of the turnover, that continuous turnover, it became very clear that we've had vacancies in patrol, we weren't really able to fill the 5 additional vacancies in the Drug Suppression Unit that were awarded in the budget of 2005-2006. We have done so as of today by the fact that we are using that over-time strategy that I talked about in the 7-points of getting there. But that's the only way we have been able to do that. What that would do for us and what you can see, some of the challenges we face, we are going to have resignations and we're going to have retirements, and we're going to have folks that fail to complete training, or get into the training process and don't realize police work wasn't what they thought they wanted. So that is going to generate some turnover. What's not even reflected in the permanent turnover is injuries and family medical leave. As we've hired younger and younger officers, we'll probably have more family medical leave as they take off for the birth of children and stuff, both male and female employees will do that. So this basically gives us the opportunity to maintain all the districts at full strength, if we over hire, also maintain the Drug Suppression Unit and our Detective Division. We have, right now, vacancies in the Detective Division, Patrol and would have had in the Drug Suppression Unit had we not taken this latest strategy. So that is another recommendation that is in the budget for your consideration. It's not cheap obviously. Here's another area that is often overlooked but we feel it's important to point out that we are recommending two additional telecommunicators and 3 telecommunication supervisors. We have a tremendous amount of traffic volume, radio traffic and phone calls coming into our facility and by looking at the workload that we are understaffed and we traditionally, have been understaffed as far as supervision. We have two supervisors and that's not nearly enough to supervise a 24-hour operation. We need

maturity there to make sure there is a supervisor on site at all times - that is where the 3 comes from. You can see the statistics that we have there. But the one thing I really do want to point out to you as we have done this research, at our peak activity time, we can have as many as 40 officers on the street transmitting on one radio frequency or one talk route. That is not safe. That means the officers can't get on the radio. We are at the point in time that the size of this City and the complexity and the calls for service, we need to have two talk groups. We have done national research again, we are seeing an 18 to 1 ratio. That means 18 units in the field to one telecommunicator or dispatcher monitoring those calls for service. And that is why we are making this recommendation as well as part of our budget. But here's the shocker for you. If you go down through those and look at the list, you see that those enhancements to the Police Department to enhance our response time to critical calls, by adding the two beats, enhancing the tech, 10% over hire is obviously very expense, but you are looking at $2,346,393. (From power point being used: The cost summary is as follows: (1) crime prevention officer - $46,735; (2) City Hall security officer - $46,735; (3) two additional beats - $619,350; (4) five detectives, two forensics techs - $538,199; (5) 10% over hire - $887,965; and (6) two telecommunicators/3 supervisors - $207,409. For a total of $2,346,393.) These are things we have talked about as a staff about where do we go from here. You can see what we have recommended in this budget, but these are things that we looked at and toyed with numbers for the future and what we could incrementally do in the coming years, quite frankly. (From power point being used: The incremental steps of ongoing workload analysis indicates: (1) incremental enhanced enforcement in public housing; (2) incrementally and enhanced policy presence in downtown; (3) incrementally and enhanced and improved traffic enforcement throughout the city (traffic issues are 30% of our workload); and (4) always maintain 10% sworn personnel over hire so no service gaps exist.) That is to focus our emphasis on public housing by creating a housing unit by putting additional personnel dedicated to that one service. As I indicated downtown, I know you receive complaints from time to time and we as a police department receive complaints from downtown - not enough police presence. That is another area we see that as time goes on we are going to look at it. And then obviously looking at traffic enforcement throughout the City. It does represent 30% of our entire workload. It is probably the greatest complaint we receive for calls for service from citizens complaining about speeding, stop signs, and wanting police officers out there to take enforcement. The obviously whatever we do about increasing our staff in the Police Department we would look at maintaining 10% over hire to manage that. The next slide is basically saying the same thing. It would be in a following, multiple years and looking at what we add to trying to address this issue and then adding a little more and incrementally adjusting and seeing what impact it has on the various neighborhoods or the downtown. (From power point being used: The long term performance improvement of ongoing workload analysis projects: (1) continued personnel enhancements for enforcement in public housing moving toward safety and improving quality of life; (2) continued personnel enhancements for downtown moving toward greater safety; and (3) always maintain 10% over hire so no service gaps exist.) Finally, this is talking about how we are going to talk about measuring some of our successes in what we are looking at. (From power point being used: The ongoing analysis for high performance of measures of marked improvement: (1) results long term will be less arrests; (2) success might be displacing drug dealing outside the city; (3) displacement is starting to occur; (4) peer review; and (5) comparison with high performing police agencies.) And again, we are looking that as we make improvements, we should see less arrests. If we have greater police presence out there, arrests should subside. If we are actually deterring the criminal activity. Success would also be described and displacing the drug dealers outside the City. We know that we are displacing some of them now. We know that they have moved in, quite frankly, some trailers in the County and it's a safer operation for them at this point in time. I'm not sure it will continue to be with Sheriff Duncan, but that's where some of them have gone and we know that for a fact. The peer review, I just had a conversation with John Emerson, the special supervisoring agent for North Carolina DEA, and he is working with me to bring some individuals in to look at what we do and how effective we are at that and try to bring some other additional best practices or ideas in comparison to what we are doing today. So we are open for any input. Then we are also comparing ourselves with high performing police agencies. We are looking at standards of comparison to include tangible and non-tangible variables. It's important for us to maintain what

you see there is Commission on Accreditation for Law Enforcement Agencies (CALEA) to make sure we live those standards. We are working on the customer satisfaction survey that will be going out. It is a CALEA requirement that we will be working on and obviously continue data analysis to see what kind of impact we have. And then finally, these are issues, in the course of what we've been working on have more of the social aspects and things you have expressed in interest in. I just want to tell you that the City departments are collaborating and are going to reach out to other entities in this community to work with us to come up with some solutions and ideas on how we can enhance child care, jobs and job enrichment programs, and looking at how we can improve and increase coordination of social service programs in high crime areas. You see The Healing Place and the Wet Shelters. That is how we take drug addicted or folks that are under the influence of alcohol off the street. We just don't turn them away at the door because they are under the influence. And there has been a lot of conversation with that. CIT training is well underway - we're going to sign an agreement with that. That is for law enforcement officers to be better trained, at least 25% of the field units to be trained, in engaging persons with mental health problems so that it came about of trying to prevent excessive force situations with law enforcement and people who are mentally disturbed or mentally upset at that point in time. Drug Court. That has the potential to increase. More activity. I know they are getting ready to have a graduation. I sit on the board with that. I think they can take more individuals than they currently have, so we are going to work to help that. And, as has been discussed numerous times, the need for state level addressing the judicial system as far as funding and additional initiatives. And that is my report. Thank you.

Mayor Bellamy - Councilman Mumpower.

Councilman Mumpower - Thank you Mayor. Chief, thank you for treating our policy mandates seriously. We appreciate you're following up on this fact, sincerely. Can we do all that? We'll see. There is probably some fudge in there. We are talking about 10% over hire to the tune of $875,000. We may have to negotiate on that.

Chief Hogan - I understand completely. These were recommendations to you to try to tell you how we thought we could best improve our operation and ensure consistent personnel in the field. But I understand that is a lot of money to be talking about.

Councilman Mumpower - You gave us just what we asked for and now the accountability is ours to help you do what you are going to try to do. A couple side notes. I'd be interested in our ability to track and provide feedback on drug tips. A lot of folks feel like they have voiced concerns and they might not go into a dark hole, but they don't know.

Chief Hogan - Yes, sir, I know you've asked that question before and I checked with my personnel and they are getting back with complainants and letting them know. Sometimes when we get drug tips they don't happen, the feedback doesn't happen as quickly as most people would like. But generally if you don't get quick feedback that means we're working on it and there are some good results coming down the pike hopefully.

Councilman Mumpower - The other issue, you mentioned NarTest. Most folks don't know. What is the delay on SBI drug analysis now?

Chief Hogan - Well, I think you heard Ron Moore indicate that, we were backed up approximately 12-14 months in drug analysis and that meant the case couldn't move forward in court until we got a conformation that it was cocaine, or whatever the drug might be. They added more chemists and started catching up - getting it down to I think a 4-6 month range, with the promise, I think last August, and then in December they said we'd get down to 1-2 months. And, I think District Attorney Moore indicated that he heard that 1,500 additional cases have been transferred from other parts of the state up here to be analyzed in the western part of North Carolina. Which means that the one who takes the time to analyze those drug cases, but also travel to testify as necessary when those cases are heard.

Councilman Mumpower - NarTest is a short-cut around some of those?

Chief Hogan - NarTest will allow us, it is almost like an intoxilizer in measuring the blood alcohol in a system. It has been accepted by the courts. This, through a light and the size between the light and the prisms, you get a different light reading and an image based on the type of chemical make-up of the drug. It works very effectively on cocaine, crack cocaine, they are working on methamphetamine , that is the one that is up in the air right now, works on heroine, works on marijuana very effectively. And like I said, they are ready. We be a beta test site, they've already got some out there. The science from everything I have seen is solid and they are ready for their attorneys and chemists to testify to that. And anytime we have a case that is going to go to trial, free of charge, we can send that sample to them and they will analyze it again in the traditional way with the spectrograph that they do at the SBI and give us the same results and come and testify.

Councilman Mumpower - Fantastic. Great resource. You mentioned some performance measures, quality assurance measures. I would like to toss out an interest, as one member of Council, in exploring the possibilities for subjective measurements. For example, feedback from the Manager of each of our public housing developments and develop a forum of some sort. I've talked with Mr. Bell at the Housing Authority about this. Some objective forum for subjective evaluation of what their sense of drug activity is in their development. I think this is for you, not for me, but if there were some subjective ways to do that, I'd think sometimes those produce information that somebody more objectively has .... And one final question, on the DSU we initially started with 12, added 5 which have been tough to sustain that, getting ready to add how many more?

Chief Hogan - We're adding the 5. We were budgeted the 5, but we never got the vacancies down to fill those. So we are filling the 5. I believe the initial funding was intended for 6, but we went ahead and put the whole emergency response team in there which was 12. We put a vice officer in there and we put the lieutenant in there.

Councilman Mumpower - So that gives us 17. Is that enough to do the job?

Chief Hogan - I think that when we put these 5 in here we will see an incremental impact on what we are having. We've had the funding, we've just not had the bodies to put them in place. Quite frankly I'm pretty excited that as we work on the schedule on the coverage, we see a dramatic increase in coverage when we have the Drug Suppression Unit officers out here. I think we will see some real benefit from that.

Councilman Mumpower - Thank you for your enthusiasm. Thank you for your creativity. You can feel it. We appreciate it very much.

Mayor Bellamy - Chief, we have some other questions. Vice-Mayor.

Vice-Mayor Jones - Particularly in lieu of the presentation that we had earlier, it's pretty - this is not about you, this is about me pondering - discouraging thinking about the only way to deter crime is through more police officers. And just recently I had the opportunity to see a 360 view of our City and how spread out is it and how many neighborhoods there are. I mean it was beautiful, but it just made you understand that we can try to find $2.5 Million, but unless we are doing some pretty significant other things, investing in other ways, I just wonder about the return on our dollars. I'm not just about the deterrents being more police officers out there. Obviously for operations and closing cases and for things like that, you've made some great cases and we've got to figure out. But, my question to you is, could - and maybe in another presentation - do you have the knowledge or the resources to also perhaps suggest some investments in our community around environmental deterrents. And I'm not even sure what that is, but maybe it's this crime prevention officer and running something on our City channel. Like what people can do

to keep the crime from happening and also - you're also keeping people from deterring crimes. If you make it hard for them besides a policeman walking up and down the streets all the time. So, I think that has got to be a piece of this. Is the whole deterrents part. And if the there are policies that would help for us to advocate in addition to some of the judicial reforms, that we could be taking to our legislators, let's talk about those too. Because I just don't think this will even get us where we want to go if we could write the check tomorrow.

Chief Hogan - I think that when, again when District Attorney Moore was before you this evening and started talking about issues, he talked about education and school drop out. You've probably heard me say that 70% of all the folks that are in prison did not graduate from high school. So it's education. We are looking at social issues that I guess have been with us throughout I guess my career and I think throughout life. But I know that kids run a greater risk of running and talking that wrong path when they come from a home where the home is broken or dysfunctional, particularly dysfunctional. Because I've seen a lot of single parents raise good kids in tough circumstances. But if those kids don't stay in school and they get out of school, they don't have a lot of options. A lot of these job and child care things we are talking about, not that we as a City can solve all these, but I think hopefully collectively that we can work with other entities in this community. We can work with other social service agencies to focus on additional things. Because I think you are absolutely right. Police alone won't do it. There is a segment, in my years of experience in law enforcement in 4 different cities, there is always a segment that will become involved in criminal activity. But the vast majority of citizens are law-abiding citizens. They obey the law. They do the right thing. And we're here to deal with the ones that don't.

Mayor Bellamy - Chief, I have some solutions I want to bring up. One is when we are looking at the cost analysis that you put forward. Is it possible to get a breakdown of how that money will be spent, looking at the two additional beats and how that will be played out so that we can see the disbursing of the workload.

Chief Hogan - Sure.

Mayor Bellamy - One of the things that I'm hearing from some of the officers who are working really hard on the Drug Suppression Unit or who are trying to help with drugs is the amount of overtime and how that conversation plays out. And consistent schedules. Recently I spoke with one and the concern was while we're doing a good job of adding additional coverage, their living expenses are going up in that they have to have more baby-sitters to watch their children, their cost of living. So how do we balance their needs with our needs in making sure we are compensating them properly for them to be able to do or respond to the issues that they are dealing with successfully. I also want to get a breakdown specifically of the Drug Suppression Unit's arrest vs. the overall department. So we can kind of track the numbers. For me I want to start 12-1-05, but start tracking the true numbers of how we are doing, so we can monitor the progress that we see within the Unit as well as within the Department.

Chief Hogan - The Drug Suppression Unit monthly breaks down, they break down their arrests by patrol and by Drug Suppression Unit. They also break down arrests in the Housing Authority. So we can look at it three ways right now.

Mayor Bellamy - I'd appreciate that. Also, I want to look at, when you look at the dispatchment of the calls for services, that you talked about. Could we have more of a breakdown on what we currently have in place and for how long we've had this issue? And, what your solution would be for the dispatching of calls as well as the national average? If we could have that in a graph so we can kind of look at where we've been, where we are and where we need to go.

Chief Hogan - When you say the calls for service, are you talking about what is coming into the communications center?

Mayor Bellamy - What is coming into the communications center, the number of people that we have on staff during that time and that ratio.

Chief Hogan - I will tell you one of the things that has happened. For the first time since I've been here we have been able to staff the command staff fully. And quite frankly we have been able to give attention to the communications center that we have not been able to give it before. In terms of analyzing the workload and looking at our records management functions and some of those support functions. And that is where some of this information, as we started working on the budget, came forward. With direction, it was time to look at the Detective Division, look at that workload. It was time to look at the communications center. Those are critical functions that we need to make sure they are staffed properly. That is how that came about.

Mayor Bellamy - One thing that wasn't mentioned. How many sworn officers do we have serving our APD today?

Chief Hogan - We are authorized 190 sworn personnel, with this new crime prevention officer. And we probably, I know we've just had a retirement today and one person who came to see me who will be on disability retirement very soon, so I'm thinking about 5 or 6 vacancies right now.

Mayor Bellamy - Five or 6 and that is with the new class we just graduated?

Chief Hogan - Yes, mam.

Mayor Bellamy - And that's sworn. How many non-sworn support staff?

Chief Hogan - I believe we have 52 non-sworn.

Mayor Bellamy - In looking at what you gave us as far as the numbers for the traffic load - 40% of the case load was traffic, do we have a breakdown of increases or decreases in what we are receiving, as far as are we seeing more red light violations, or speeding? What is the analysis for that. If we can get that additional information.

Chief Hogan - Sometimes we do a crash analysis. Where we're taking like the top 10 crash locations and we'll analyze the cause. And that is kind of what directs the districts to work traffic enforcement in certain areas. Is it speed problem? Is it a red light problem? So if we have intersection crashes, we look at the angle at the crash and determine what is causing that. Is it folks running stop signs? We do have some of that if that is what you are talking about. As far as the number, I can give you a breakdown of the number of citations we issued for what different types violations. Is that what you are looking for?

Mayor Bellamy - Right. Also, I want to look at, with the fines that are collected, does all that go to the state or the school system? Where does that money go?

Chief Hogan - Different states do it different ways. In this state, court costs go to the court and the fines - all fines, go to the schools. And other communities I've been in, I know when was in Delaware, we had a municipal court - it's called Alderman's Court - we got the court costs, we hired a judge, we got the court costs and we got the fines.

Mayor Bellamy - Is there anyway we can look at something like that here?

Chief Hogan - That would have to be state approved and probably a tough sell, but it is something that we can look at. Absolutely. I works in other states, I know that.

Mayor Bellamy - Okay. Best practices. The bottom line for me is making sure we are measuring as much stuff as we can measure to look at where we are not doing as well to see

what we need to beef up as a Council to make sure you have the tools that you need. And one of the things we have been beat up about is the lack of coordination between the Housing Authority and the City of Asheville. So what I did was I got the Housing Authority to give me all the tools they are currently using to address drugs and crime and I would like for our staff to go over this and adopt as a Council these policies that they have in place. And I can give you some time to look at it, but so that we are coordinated in our efforts succinctly. And that when we talk about accountability, this Council will have approved the same things that the Housing Authority has in place. There are a couple that I'm not supportive of, but maybe we can work through some of those issues. I'm definitely looking at their ban list and making sure that we have an updated list for our officers to have access to on our computer some kind of way with the integrated system so that when people are arrested or detained on property and they've been banned by the Housing Authority, we have the right to get them for trespassing. So I want to make sure that we have a good agreement between the Housing Authority and the City in writing so that we can act as their agent when they are not around to say these people are trespassing. Another example would be the SPTED principle that the Housing Authority is using. I would like to know. I know we have a person on staff, I would like to see if we can beef up his training to ensure that we have the latest techniques and that we are utilizing that in the neighborhoods.

Chief Hogan - The crime prevention officer that you approved just recently, we are going to fill that position just as quickly as we can and that individual will be focused on the Asheville Housing neighborhoods and any other neighborhood that has a high drug issue. But the SPTED will be a big issue for that individual. Right now, Lt. Chris Young who is head of the Drug Suppression Unit, is spending a lot of time regularly with all the managers of the housing. We are having a lot of communication that I don't think we had before and I think it's taken us to another level. Obviously we will continue to work on that.

Mayor Bellamy - One of the bigger issues that the Housing Authority has in place and I think we support, they do have a curfew for all residents. For children they have to be in at one hour and for adults they have to be in at another hour of the night. And if we as a Council adopt that policy, you are saying that you are willing to enforce it. I think we can see a lot of the crime issues between Midnight and 7:00 a.m. drastically reduced. So I think it would be incumbent upon Council to support the initiatives of the Housing Authority through a vote to make sure that we are doing all that we can to support that agency.

Chief Hogan - And that is something that we work with legal on in terms of making sure that what the Housing does we can constitutionally do. And that might be ordinances, a curfew ordinance, that applies to us and I'll have the ability to enforce that.

Mayor Bellamy - That's right. I talked to Bob and I'll give him a little time to look at these issues, or Mr. Euler, to be able to come back to Council with some recommendations. A couple of other things. It's been talked about tonight about the tip hot line. Have we considered an idea of maybe having just a voice recorder where people can call in - there's no ID - where people can call in and they know that this is a safe line. That there's nobody to be able to trace who's calling. Just to give information. And on that line you won't get follow-up on but you can tell more honestly and forthrightly what is happening in your neighborhood without having to talk to a police officer and tell your name or disclose any information.

Chief Hogan - Our tip line is recorded. I don't believe we have anyway of doing phone number access or tracing or tracking that. I can check on that. Or, we could put it off site if that would give folks more comfort.

Mayor Bellamy - I just want to make sure that people feel as comfortable as possible to get as much information as possible about what is happening in their communities. Not just public housing, but in their communities where there are drug and crime activity.

Chief Hogan - I can say we are getting a lot of tips. More outside from public housing if I think I can recall. Sgt. Lawford, who is here on the detail tonight, handles that and they have a board now. They log them all in, the tracking and the reporting back to what has been done and the communicating with the original caller if they leave their name and number. If not, we still follow-up on the tip.

Mayor Bellamy - With the information you just presented tonight and we looked at the analysis or where you want to do more information data, can we coordinate the efforts between the analysis that we get to see if there is a spike in burglaries in a certain part of the neighborhood to make sure that the community policing efforts - that individual police officers are meeting with neighborhood residents to inform them of what is happening in their neighborhoods. So they could be doing community walks, community watches, so they can be aware of - maybe we saw 3 in the last month and this is what you should watch out for - make sure your cars are locked or your windows. So that it makes sense that we get the analysis, and that the residents are getting it so that they can be proactive for future endeavors. So making sure that our community policing efforts are lined up with the analysis of crime so people understand what is going on.

Chief Hogan - One of the things we have talked about and I'll throw it out for consideration is using our reverse 911 where we can notify, identify certain streets in neighborhoods, with a message of that kind of information and get it out more quickly and it's timely. Clearly in terms of crime prevention and clearly in terms of our community resource officers, we do crime analysis. We do alert the officers to trends and patterns and it would be my hope and expectation that they will carry that to a particular neighborhood if they see a pattern in that neighborhood. But all of that is good and we will wretch it up and I'll go back and look at that.

Mayor Bellamy - I would appreciate that. I've sent you copies of e-news letters ... that provide information to residents about what is happening. I went to Statesville recently to look at one of the programs for drug addicted sex offenders and how they are transitioning back into the community. And one of the things we saw there was the church was really strong in helping. What are our efforts in reaching out to the faith based community?

Chief Hogan - I've had a number of conversations and more should be coming, and more will be coming, particularly with the black ministerial association. And we have talked just about some of those issues on a host of things of how we can work together, quite frankly, and partner. Not only just in recruiting and hiring minorities, but talking about being the strength and help rally church members around the issues in a neighborhood.

Mayor Bellamy - I appreciate that. Council, thank you for allowing me to ask these questions, ... making sure I put my two-cents in on this issue particularly because I don't like to be called out. Any other issues? Councilwoman Cape.

Councilwoman Cape - Just real quickly. Chief, when you come back with some cost analysis, would one of them that you could give us be how your 10% hire would off-set overtime costs? Because we see this $887,000 but how much are we paying on overtime that that would off-set so we know what the real figure is.

Chief Hogan - Well, the over-time will definitely go up and taking the 5 out of patrols and putting them in DSU. We traditionally have certain overtime for special events. That will continue. What the over-hire will do will eliminate vacancies in the field that have to be filled through overtime.

Councilwoman Cape - That is what I'm talking about. How much are we going to save from that to make this number not look so bad.

Chief Hogan - I'll go back and analyze that. Part of it is, are you saving money or are you working short? It's probably a combination of both.

Councilwoman Cape - That's where I'm trying to see where that number really is. And second, may I question, are you talking about a city-wide curfew, Mayor?

Mayor Bellamy - No. The Housing Authority already has it in place, but we want to support it. It's not ours. It's the Housing Authority's and it's already on its books and it would be nice if the City of Asheville Police Department were empowered by the policy makers to be able to help them enforce their policies.

Councilwoman Cape - Right, because at this point we can't. I see. Just clarification. Thank you.

Mayor Bellamy - Everything that I gave you on the hand-out was Housing Authority's. What they already have in place or would like to see, as they also support an additional unit, specifically for Housing Authority. Councilman Freeborn.

Councilman Freeborn - Chief, I really appreciate this. Every time you come before us it's a great opportunity to learn. If you could, would you prioritize this list of budget requests and tell us which ones, you can do that tonight or at a later time, but give us a good idea as we are going into the budget season to understand what is your top priority on this list. And also, I can understand the need and desire to want to try and do a surge, but would we also do this in an incremental approach as well and what would be the positive or negative impacts to that.

Chief Hogan - I'll be glad to do that. I could probably do it off the top of my head right now, but I prefer to sit down and ponder it and share it with my command staff and talk about how we would prioritize this, because all these, depending on who you talk to are great needs. And they are all legitimate needs, but I would like to ponder it and I'll come back.

Mayor Bellamy - Councilman Mumpower.

Councilman Mumpower - Councilman Newman was.

Mayor Bellamy - Councilman Mumpower, did you have something else?

Councilman Mumpower - Patience please, Mayor. There is not two rulebooks up here. There is one for all of us.

Mayor Bellamy - Excuse me? I'm not understanding. I have the ability to recognize the people who want to speak and I called on Councilman Mumpower.

Councilman Mumpower - With some degree of courtesy. Chief, would it be inappropriate to ask that you come back to us as we go forward, would it be a helpful thing to ask if you were to come forward on a bi-monthly basis and give the Council a brief report on your efforts? Would that be a helpful, constructive thing?

Chief Hogan - I would just want to have sufficient time to pass to know that we've had some time to put some things in place and be able to show you positive results. But from time to time, surely, if you want me to come back and share with you what we are doing on a quarterly basis or something like that.

Councilman Mumpower - Council, I would speak to bi-monthly to keep us real current. We're about to hopefully invest significant dollars and I think that is something we really want to pay attention to. And finally, Chief, I think you're speaking to us about an effort to hold people who break the law accountable, with an understanding that if we don't create greater

accountabilities, we don't create deterrents, and if we don't create deterrents we are training ... criminals into too many of our neighborhoods. And we waste a lot of our time chasing the same people over and over again and we lose a lot of good people. So I'm grateful for your effort to highlight that to create that accountability - we can do all of these other things, but it does take police manpower and I hope we can get behind you - not incrementally. I think that good word used earlier - let's create a surge and then hold you accountable for doing the good work that you are intending to do for us. So thank you and thank you Mayor.

Mayor Bellamy - Councilman Newman.

Councilman Newman - Chief, one question that I would have about your presentation would be one of the points that I think kind of is most hopeful about is the scenario that one of the performance measures of marked improvement over time would be that the results of long term - in the long term, less arrests. And because while we want to hold people accountable, first the people who are really committing dangerous situations in neighborhoods, I think that we also sort of share the sense of okay so we are going to spend a lot more of taxpayers money and the result is that a lot more people are going to jail. If we could spend a lot more of our resources and make neighborhoods safer and drive down the number of - and deter crime - obviously that is the win/win that we are looking for. I would be much more enthusiastic about writing larger investments here, if we can be effective in deterring crime and have less arrests because while we would be investing more dollars in officers on the street, if it means that we are driving down crime and having less - having to build fewer jails in the future that is a trade-off that is easy to make. So, just going forward, not tonight, I'd like to hear more analysis about how that dynamic really works. It seems like in the short-run if we invest in more officers we have all these results about we've arrested 40% more people than we did two years ago. And maybe that is a good short-term indicator. But when do we get that? Where is the point of making the neighborhoods safe and drive crime down?

Chief Hogan - I think the hope is that as you create more police presence in the neighborhoods and through crime analysis you target the presence when the presence needs to be there, that it becomes a deterrent to commit that crime in that neighborhood. I will tell you that folks who are intent on committing crimes are going to commit crime. What you do in a community, unfortunately, is make it difficult to do that and sometimes it's displaced for that or it just can't be done as frequently as it was done in the past. So, it is by incrementally trying to create a greater police presence where we need to be to be a deterrent. And that is a big challenge.

Councilman Newman - One follow-up question on this for tonight. Is there research around, there will always be some percentage of people who make these bad choices and get involved in this activity, but part of what intuitively seems like we are trying to do is provide enough presence in neighborhoods where maybe some people to that, but they don't do it in these neighborhoods, and they don't. Is there research that shows over time we can help prevent other people from so easily making those bad mistakes because there is just so much criminal activity in the neighborhood they live in that they end up getting. Is that how you drive down crime over time?

Chief Hogan - That's part of it. I will tell you, you saw a great example this evening with Burton Street. Burton Street some years bad had a tremendous crime problem. What that was a wonderful partnership between citizens who took an interest in their neighborhood, took ownership in their neighborhood, partnered with the City and the Police Department and others to really take back the neighborhood. And working in collaboratively, we have success there. We've got to try to replicate ownership in other neighborhoods. And that will be our challenge and having sufficient police presence to back up what they are trying to do. But that is a motivated neighborhood full of enthusiasm and they are a pleasure to work with because of that. They really are.

Mayor Bellamy - You know the success of that neighborhood had come because Sgt. Wilkie, for one, helped organize them with the community walks. But the residents, like you said, were empowered to go and talk to drug dealers and tell them to move on. As well as they continue to call the police, whether they came quickly or not, and they were consistent in their efforts. Another example is the West End/Clingman Avenue neighborhood, where you had a significant increase in prostitution. The more homes that were built and the more community residents who were involved in clean-ups and getting to know their neighbors and the more buy-in they got from each other, that made a huge difference. So it wasn't just police only, it was a comprehensive approach in looking at this issue. Chief, I just want to say thank you for being here tonight and being able to stand up to our questions and helping us get to a better place on this issue, because I know each member of Council wants to make sure that we get to a better place on this issue.

Chief Hogan - I think we all do. Thank you very much.

E. CONSIDERATION OF SCHOOL BOARD INTERVIEWS

Vice-Mayor Jones - I think we need to determine who we want to interview next week. I would just remind Council that we've got two vacancies so let's kind of be realistic in the number of folks that we want to interview. The Mayor has requested that we appoint the night of the interviews if everyone is amenable to that. That I think would help the School Board. Is that okay in terms of the timeline? And the final thing before I get suggestions for interviews, Mayor, is that Councilman Mumpower and I met, the Boards & Commissions Committee, and we suggest that we start the interviews at 5:00 p.m. and then have the Council meeting afterwards. So that way the applicants will know when to be here and we have a firm starting time. That is our suggestion.

Mayor Bellamy - That's fine. We have the budget part from 3:00 - 5:00 p.m., so we can start promptly at that time.

Vice-Mayor Jones - Good, super. Councilman Mumpower, I'll start with you for, who would you like to interview for School Board.

Councilman Mumpower - I don't have any recommendations, Vice-Mayor.

Vice-Mayor Jones - Councilwoman Cape.

Councilwoman Cape - I would like to suggest Jackie Hallum, Todd Weatherly and John Legerton.

Vice-Mayor Jones - Councilman Davis.

Councilman Davis - I would like to add to that Brian Sarzynski.

Mayor Bellamy - Add Precious Folston.

Councilman Freeborn - Mine have already been named.

Councilman Newman - I'm fine.

Vice-Mayor Jones - Okay, so that is 5 interviews that will start next Tuesday the 17th.

Mayor Bellamy - And we will make sure they start at 5:00 p.m. Thirty minutes each or we've got quite a bit of answers so would you call change that and is it 30 minutes each?

Vice-Mayor Jones - Thirty minutes each.

Mayor Bellamy - Okay, thank you very much.

Vice-Mayor Jones - Just in case we weren't clear for new Council people who haven't been through this. This is our chance to ask other questions and so what we have done in the past is we come with the prepared ones and we kind of keep going till we run out of time. So just know to come with some questions you are interested in.

Councilman Freeborn - Is it possible to have shorter interviews than 30 minutes? Do we ever finish early?

Vice-Mayor Jones - I think in fairness we need to decide that up-front. So do we want to do 20 minutes that's fine, but.

Mayor Bellamy - I think 20 minutes.

Vice-Mayor Jones - Okay, 20 minutes.

Mayor Bellamy - Twenty minutes each. And as you schedule those, will you put a break of 5 minutes in between each one. The reality is we need time to get people shifted around and the next person to come up.

VI. NEW BUSINESS:

A. ORDINANCE NO. 3462 - ORDINANCE AMENDING THE ANIMAL CONTROL ORDINANCE TO PERMIT THE CEREMONIAL RELEASE OF BIRDS

From Staff Report: This is the consideration of an amendment to the animal control ordinance to permit the ceremonial release of birds.

Over the last several years, there has been increased interest in the coordinated release of birds as part of certain outdoor events. The birds released are doves, pigeons, or some other species trained to return to its nesting place. The proposed ordinance would permit those releases only at an otherwise permitted outdoor event, where it can be demonstrated that the birds are kept in accordance with certain standards promulgated by recognized organizations, and where it will not imperil the public health.

The City's Animal Control Ordinance requires that pets or other domesticated animals be kept restrained or under the owner's control, except in certain specified circumstances. The proposed amendment would add to the list of exceptions.

Pros:

- Recognition of symbolic display that is used with increasing frequency.
- Requires that birds be kept in accordance with recognized standards.

Cons:

- Some birds may be injured or lost in connection with releases.
- Incremental administrative burden in permitting and approval.

If Council approves of this ordinance amendment, adoption of it is recommended.

City Attorney Oast - This is a proposed amendment to our animal control ordinance to permit, or at least to clarify Council's position with respect to something that is beginning to occur more and more frequently and in public events. And that is the ceremonial release of doves or trained pigeons or birds of that nature that are trained to return to their nesting place.

Mayor Bellamy - Okay. Any members of the community wishing to speak on this item? Hearing none, Council is there a motion?

Vice-Mayor Jones - I move approval.

Mayor Bellamy - Is there a second?

Councilman Freeborn - Second.

Mayor Bellamy - Any further questions or comments?

Councilman Mumpower - Yes, I'll make a comment. I don't think we should be in the business of bird control. I'm embarrassed by the Council's consideration of an ordinance on the ceremonial release of birds. Thank you Mayor.

Vice-Mayor Jones - I don't want to belabor this, but do you understand what this is? ... raises doves and likes to release them and currently she is not allowed to do this right now. She's not allowed to run her business.

Councilman Mumpower - Because we have an ordinance that prohibits.

Councilwoman Cape - Because your animals can't be more than 8 feet from your body?

Councilman Freeborn - We're making it so she can operate business.

Mayor Bellamy - All right Council, one at a time. Councilwoman Cape.

Councilwoman Cape - These birds will be able to, they're homing birds, and they are released in a ceremony, they circle around and then they go home.

Councilman Mumpower - So why aren't we doing away with the ordinance that creates that control, rather than creating another level of.

Councilwoman Cape - Because we don't want people to let their dogs run around the street more than 8 feet away from them. We just had a flat pet thing - animal. But these are pigeons.

Councilman Mumpower - If I may Mr. Oast, ask staff a question. Would it not be possible to put a sentence into our existing ordinance accepting birds?

City Attorney Oast - That is essentially what we are doing.

City Attorney Oast - What the ordinance in general does is it requires animals to be under the control of the owner at all times when they are out in public. So, this would, and the way our staff has interpreted that means if you've got animals in a parade or some kind of public event, they have to be in your control. That has been interpreted to apply to homing pigeons, doves, and birds that are trained to return to their nesting place. This would, in effect, would accept those kinds of releases from the general prohibition of our ordinance.

Vice-Mayor Jones - And it's two sentences.

Councilman Mumpower - It's a paragraph. And again, I would suggest, you folks can go ahead and laugh all you want, but I think the embarrassment is of this Council to be investing our energies in this level of bureaucratic control.

Mayor Bellamy - That's why we're dealing with it. It was another council who did it and we are trying to clarify it so it can be addressed. With that, there is a motion on the floor. Any new information that needs to be discussed tonight on this issue?

The motion made by Vice-Mayor Jones and seconded by Councilman Freeborn carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 318

VII. OTHER BUSINESS:

A. MCCORMICK HEIGHTS PROPERTY UPDATE

Information in front of Council - Letter dated March 29, 2007, from City Manager Jackson to Mr. Ken Maxwell, Community Relations Manager with Progress Energy. "The purpose of this letter is to confirm earlier oral communications to you about the status of our offer to purchase McCormick Heights. After due diligence, we concluded in January that there were notable restrictions and encumbrances on the property. Extensive research and discussions with knowledgeable parties also led us to conclude the restrictions would impair our ability to successfully redevelop the property upon purchase. Under the circumstances of such restrictions, we expect you to proceed with other options for the property's disposition. While we respect your need to pursue what is in your best interests, our objectives remain to assist with relocation of tenants, the provision of affordable housing options, and private redevelopment and transformation of this neighborhood. Please feel free to contact us if you have any questions or wish to discuss this matter further."

Information in front of Council - Memo to Mayor Bellamy and City Council Members dated March 29, 2007, from Charlotte Caplan, Community Development Director. "This memo provides an update n the program approved to assist the 41 tenants at McCormick Heights find alternative housing. On January 23, 2007, the Affordable Housing Coalition (AHC) was awarded $120,000 in Community Development Block Grant funds to administer the program. The assistance being offered includes rental counseling and payment of eligible relocation expenses (moving costs, security deposits, first month's rent, utility deposits, etc.). The progress to date has been (1) 4 residents' meetings have been held; (2) notices explaining assistance have been distributed door to door; (3) 10 households have completed their moves to safe and affordable housing; (4) 7 households have found new housing and are scheduled to move soon (from a few days to a few weeks); (5) 8 households are working with AHC to find a new unit; (6) 3 households have made initial contract with AHC; and (7) 13 households have yet to make contact; efforts continue to get in touch with them. As managing agent for the property owner, the Housing Authority has issued seven eviction notices for non-payment of rent or other lease violations. Tenants have been made aware from the start of the program that anyone evicted from the property because of lease violations would not be eligible for relocation assistance through this program."

Mayor Bellamy - Council we had talked in closed session about not being able to purchase this piece of property due to the encumbrances that are currently on the property that would not go away for the City of Asheville until it was in foreclosure and there were substantial encumbrances that we didn't feel like we could overcome. Enclosed in our packet is a letter that the City Manager sent to Ken Maxwell, who is part of the managing entity. Progress Energy purchased tax credits for McCormick Heights so they own, I think 99% of the development.

City Attorney Oast - Usually it's a substantial percentage. I'm not exactly sure.

Mayor Bellamy - I think that is the case. And so I think that now we just need to publicly go ahead and vote to not purchase McCormick Heights for the record so that it will be clear to the community of our endeavors. And, as part of the motion I hope that Council will express an interest to work with the future owner of the development so that we can have affordable housing

some kind of way mixed into that, considering the fact that we are the largest property owner adjacent to McCormick Heights. And that it's under the leadership of Councilwoman Cape that has just increased with the potential buying of 30 acres. So we definitely are one of the larger property owners adjacent to McCormick Heights. So is there a motion to not purchase McCormick Heights tonight?

Councilwoman Cape - I want to do it in a positive way. I move that we release our obligation to the contract for the purchase of McCormick Heights based on the encumbrances and the due diligence that we did and that we encourage future property purchasers to consider the opportunities that exist because of the adjacent City-owned property.

Mayor Bellamy - All right. And before I call for additional questions or comments I'll open it up for public comments, if there is anyone who would like to speak on this matter?

Councilman Freeborn - I'll second that motion.

Mayor Bellamy - Hearing none, any further questions or comments on this issue? Councilman Newman.

Councilman Newman - Maybe as a friendly amendment for clarification. I think it goes without saying, but just express our sense that we are also going to be directing our City Manager and our staff to monitor the situation and seek dialogue with whoever does acquire the property to seek opportunities to potentially partner around redevelopment opportunities in that area that preserves affordable housing and those which are redevelopment goals in our plan.

Mayor Bellamy - And I think that having that announcement formally stated several times tonight, I think that's important.

Councilwoman Cape - I accept that friendly amendment.

Mayor Bellamy - Councilman Mumpower.

Councilman Mumpower - I would be amiss if I didn't say that it is an embarrassment we are having to back-track on this issue. From my view we got involved without doing proper preliminary research and in doing so we clouded this reality more than was necessary. We studied it for a period of time and we've also committed ourselves to moving folks from a development that it turns out we have no direct involvement in at all, to the tune of up to $120,000 and invested significant Council time and staff time and I hope moving forward that in our efforts to pursue development opportunities we will show greater caution and try not to offer complications to things that are already complicated enough.

Mayor Bellamy - With that said, I would like to say that I'm not sad that we got involved and the reality is that had the City not been involved, tenants would have been evicted at Christmas time, first of all, because they were going to be given a notice on December 1st to be out in 30 days. So obviously we had a due diligence period and during that period we were able to find out some of the technical issues that we did not know in advance, so that was why we had a due diligence period. And I also want to say to Council, thank you for your willingness to assist the individuals who were behind on their rent to finding a better, safer place to live in our community. And I look forward to us continuing to address some of the concerns that we have identified in McCormick Heights, and haven't identified in other communities, but we slowing addressing. And to say that the City shouldn't have been involved, the City still have $400,000 in the development in the way of HOME funds and so that is something we are going to have to look at to see how we can recoup those funds. So I don't see us not being a party to the development. So, Council, I thank you all for being willing to step in the fray, take the criticism, whether it's warranted or unwarranted, to be able to address concerns in our community. It was a learning process and I definitely learned a lot out of it. How people operate and how we can do

things better. So I look forward to the potential redevelopment. Any other things that want to be said for the record?

Councilman Freeborn - Mayor, I'd like to just show gratification to your leadership on this particular issue. I think anytime we are offered a chance to do something good in terms of - I'll even say - bail somebody out, and if it fits within our strategic goals, we need to follow through with it and do due diligence and that is exactly what we did. I want to thank you.

Mayor Bellamy - I don't want to say you're welcome yet, because the story is not finished. Believe me, there is more to be told to the story. It will come out later, but it's not finished. Anyone else?

Councilman Davis - The story isn't finished. I think we have had this going on back and forth about who shot John on this issue and the truth of the matter was it was not a good place for people to live. There is an opportunity here to create some of the things we are talking about - mixed income living, market rate, affordable housing. An opportunity for people to go to a better situation and I'm quite pleased we were able to bail those folks out. That's what those funds are for and I feel good sitting here having been a part of that.

The amended motion made by Councilwoman Cape and seconded by Councilman Freeborn (that we release our obligation to the contract for the purchase of McCormick Heights based on the encumbrances and the due diligence that we did and that we encourage future property purchasers to consider the opportunities that exist because of the adjacent City-owned property; and direct our City Manager and our staff to monitor the situation and seek dialogue with whoever does acquire the property to seek opportunities to potentially partner around redevelopment opportunities in that area that preserves affordable housing and those which are redevelopment goals in our plan) carried on a 6-1 vote, with Councilman Mumpower voting "no."

B. CLAIMS

Council information - The following claims were received by the City of Asheville during the period of March 16-March 29, 2007: Diana Sanders (Water), Enterprise (Information Services), Marcus Banks (Planning), Sandra Burton (Water), James Carr (Water), Avid Rent-A-Car (Police), Irene Wright (Water) and Pamela Simpson (Water). These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Joe Minicozzi - Madam Mayor and Council, thank you for allowing me this time to speak. I just wanted to bring forward a couple of things. These are all the code amendments that are going forward and we are trying to work this half-printed too, so it's about double the size of this in thickness. And we're trying our best to work with the staff to put our input in. We didn't want to see the situation that happened tonight, that there is a delay. We don't want to try to cause that. We are trying to get involved in these things and move them along as quickly as possible. A couple of things that I wanted to ask about tonight is getting clarification on the on-going issue of Greenlife and Staples issue. Just so that we can know what has happened with this letter with Chief Hogan. Is it policy, is it not policy? Has this been retracted? We've asked about 4 times now, whether or not this policy has been retracted?

Mayor Bellamy - And Council, that was not adopted by City Council, so we haven't retracted it because we have never adopted it. So it would be something that Mr. Jackson as the City Manager has oversight over. Because it wasn't adopted by this body. Bob, am I correct in stating that?

Mr. Minicozzi - It is a question of.

Mayor Bellamy - I just want to make sure that we hit your issues so that we can go ahead and.

Mr. Minicozzi - Obviously some of you may have gotten a telephone call today, but a lot of you didn't receive e-mails today. I received a call from Mr. Thompson and this is a ticket that he received for careless and reckless driving. He had 6 police officers issue him this ticket and when the police officer was issuing him the ticket the police officer said, well Mr. Thompson don't you want us to follow all the laws? And the pulled out the book and they went through the book and cited him with that citation. Which is fine. But 6 police officers. Mr. Thompson asked the police officers that if you are that interested in enforcing all the laws, why don't you go over and talk a look at all of the trucks on Maxwell Street. When I visited Mr. Thompson about 10 minutes after that, there were still trucks on Maxwell Street and in the 20 minutes that I was at Reid's house, there were 6 deliveries up Maxwell Street. And we're siting in this kind of ...-world right now waiting for Greenlife to bring something back and there doesn't seem to be any fire lit underneath them to encourage them to move forward. That is what I wonder. Could we just maybe do a quick blitz of enforcing the no-trucks on Maxwell Street to ensure that he is motivated to move forward. And that is all I ask for tonight - is it possible to start moving this. Is it possible to make direction to our City Manager to tell the police officers to enforce. Because when Reid asked about the trucks on Maxwell Street, the police officer said to him, and I quote "that's not my jurisdiction" even though Reid was given the ticket a block away. And you talk about customer service, you talk about how to deal with humans and you wonder why this guy blows a gasket. And it's just, this is, how do we interface with the reaction of our government that we pay for as citizens versus the quality of service that we get. And that's all that I ask for. Just some fairness in this and the business owners get treated the same way as the citizens do.

Vice-Mayor Jones - Can I ask one clarifying question? So the time that you were at Mr. Thompson's house, you said you saw 6 delivery trucks. Were they the big rigs and they came down?

Mr. Minicozzi - They were not the big rigs, they were the smaller box trucks and some vans. But, as you saw on the testimony that that is the lion share of the deliveries and they are going up and down that street all day. And the big trucks come in and they have a larger impact. And I was only there for 20 minutes.

Vice-Mayor Jones - So there were none of the big rigs. They were all the little trucks.

Mr. Minicozzi - Yes, just the smaller trucks.

Vice-Mayor Jones - Right now is that going to be solved with the compromise?

Councilman Newman - Well the big trucks and, I think there are 3 sizes of trucks, and the medium sized trucks would only be like ... delivery cars and not ... straight trucks will not be allowed once - that is if his design idea is approved by Planning & Zoning. It's sort of just an idea at this point. I mean it hasn't been formally approved or voted on by anybody. So that's contingent upon that process happening.

Mr. Minicozzi - In the meantime if there could be some communication that happens to the Police Department that if they get dialed in that they should enforce something. Because to have that kind of answer to a citizen that this isn't my jurisdiction that they just shrug it off when 6 police officers can give somebody a ticket for squealing their tires. Where is the fairness in that.

Mayor Bellamy - All right. I think there's probably another side to that story as far as why the police were there and that number. I know we've had some training officers - 2 in a car, and two cars, and maybe the third came by to see what was going on and that person didn't get out. I wasn't there so I can't speak to that. But your first issue you talked about, this Council did not set that policy that the Chief if choosing to enforce. So your question was, when will we rescind it.

We didn't create that policy. Now Mr Oast, legally, do we rescind something that we didn't do. Let's go ahead and deal with this so I can put this to bed

City Attorney Oast - Council adopts the ordinances and I think you would be stepping into Charter problems if you began to direct the Police Chief how to enforce the ordinances that you enact.

Mayor Bellamy - So the Chief is in his legal rights to send this out?

City Attorney Oast - I'm sure I've seen that letter before, but I'd need a chance to read it first.

Mayor Bellamy - All right. Let's give you some time to read it and make sure that we issue a press release to how to deal with this letter because it deals with enforcement. So we can have that done. So we don't have to deal with that. Let's just deal with it. I think that's important.

Assistant City Manager Richardson - Mayor Bellamy, I'll be happy to work with Chief Hogan as well as other relevant staff, and I will be prepared to provide the City Council with a summary report of our enforcement efforts over on Maxwell Street. And we will be happy to go back for a 60-90 day period, if you would like for us to - we have the capability to show you the number of calls that have come in and the response to those calls and any citations that have been given out. And we provided that information, but it has been some time ago. It has been a number of months ago.

Mayor Bellamy - That would be great and I think Council.

Assistant City Manager Richardson - In addition to that, I think there is quite a bit of information that I have collected from the Police Department regarding Mr. Minicozzi's statements. I'd be happy to talk with Council one on one after this meeting, or I will be happy to provide that information at this time regarding Mr. Thompson and the interactions he has had with the Asheville Police Department today.

Mayor Bellamy - All right. Councilman Mumpower.

Councilman Mumpower - Mayor question. Mr. Richardson, so it would not be fair to say that we have stopped enforcement efforts on Maxwell Street.

Assistant City Manager Richardson - No, sir. That would not be a fair statement at all. I'll be happy to go back with Chief Hogan and to provide the data on the number of calls, the volume of calls, and the times that our officers have been able to respond and the citations that were made.

Councilman Mumpower - We are continuing to pay attention?

Assistant City Manager Richardson - Yes, sir. That is my understanding and Chief Hogan and I have had a discussion about that as late as this afternoon.

Councilman Mumpower - Thank you.

Mayor Bellamy - Councilwoman Cape.

Councilwoman Cape - Mr. Minicozzi, when you were there today, were the trucks parked on the sidewalk?

Mr. Minicozzi - One was. It was a UPS truck, but I think that in that situation, the UPS truck usually gets a little more discretion because it is an immediate delivery. It was still parked on the sidewalk. It was less. It was the volume and the fact that they use Maxwell Street. It wasn't that they came. You know you've made comments several times to please use your parking lot and access the docks from your parking lot. But in none of those 6 trucks, did I see that. And that was just a snapshot of my day at that little window. Now whether or not I just happened to hit a mother-load I don't know.

Councilwoman Cape - You saw them coming off of Broadway onto Maxwell? Was that the direction?

Mr. Minicozzi - Broadway onto Maxwell and Marcellus onto Maxwell.

Councilwoman Cape - Okay. So, can we get a sense of timing for this project. Is there a time. I mean, we have asked Greenlife to engage with us on this, so it seems like time is of the essence that we like move this process along. Has there been any conversation to that effect?

Assistant City Manager Richardson - I'm not aware of any request, site plan review or anything of that nature that our Planning Department has been involved in. I know that our Planning Department has followed up with the Greenlife store officials and I believe that Mr. Swann understands that City Council would like to see this site redevelopment move forward.

Councilwoman Cape - Mayor Bellamy, we've had this issue kind of before with Target or other places that kind of lagged, and it seemed like it was quite effective when you put a time stamp on it at one point. I would ask that maybe we consider that. I think the issue of the letter that has always been confusing for me is whether or not that letter exhibits a change in the policies that are on our books. And if they do, whether or not the Chief has the ability to do that. And that is what is confusing for me about this letter.

Mayor Bellamy - Bob is going to get back with us.

Councilwoman Cape - You were going to give us that information.

City Attorney Oast - I have been reading the letter. I don't think that that letter suggests that the police are not going to be enforcing the law as it's written.

Mr. Minicozzi - It says that the only - the trucks parked as far as possible but still block a sidewalk, if you read this right here - the only exception. So he's making an exception to the law. I will not cite a ticket on a large truck.

City Attorney Oast - I don't think that's an exception to the law. I've read the law and the law allows a reasonable use of the sidewalks by adjacent businesses. That's a reasonable use of the sidewalk by an adjacent business. I don't think it is a violation.

Mayor Bellamy - Okay. Let's put it in writing. And as a Council we will get that back and we can either adopt it or take that interpretation or give it further interpretation, but you give us the law and you can examine it so we can forever and amen - this is what it is and this is how it is and this is our process till it's done.

Councilwoman Cape - I think we will be hard-pressed to ask people to walk around a truck into the street as a reasonable use of our sidewalks. But, that's just a comment.

Mayor Bellamy - What we do for one, we do for the others. So that's the issue on Maxwell Street and that's the reasonable use of the sidewalks. Make sure we do it on Wall Street when it comes to the Laughing Seed. We have to make sure if that is what we are saying, we're

not just saying it there, so make sure we're saying the right thing. I'm ready to up or down it and do whatever we're going to do. It's done. Councilman Newman.

Councilman Newman - Could we also, I mean Jeff has been great in working with Bryan and I when trying to figure out the different options. Could we check in with Greenlife and ask them if they have a date when they plan to submit their plans to Planning & Zoning? Because part of the idea when we were looking at this was if they can't implement some design solutions that will go a large way for making that better - because the big trucks will no longer be on Maxwell ever. Then we were prepared to implement a traffic calming plan on Maxwell that would physically prohibit the trucks from being there. It's not what we want to do. We think there are better ways to solve this problem. But we need a timeframe for when they are going to submit their plans or we need to go back to Plan B. So if you could check up on that, then that would be great.

Assistant City Manager Richardson - Yes, sir. I'd be happy to.

Councilwoman Cape - Do we set the timeframe?

Councilman Freeborn - Well we are going to be making budget allocations here soon.

Mayor Bellamy - Okay, let's just start with the communication process first. Let's finish up a couple of things and we will adjourn from our closed session. We should be through fairly quickly.

Closed Session

At 12:03 a.m., Councilman Freeborn moved to go back into closed session. This motion was seconded by Councilwoman Cape and carried unanimously.

At 12:30 a.m., Councilwoman Cape moved to come out of closed session. This motion was seconded by Councilman Newman and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 12:30 a.m.

Keisha Lipe
CITY CLERK

Jeffrey M Bellamy
MAYOR

Tuesday – April 17, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

SCHOOL BOARD INTERVIEWS

City Council interviewed William Todd Weatherly, Jacquelyn Hallum, John Legerton, Brian Sarzynski and Precious Folston for two vacancies on the Asheville School Board.

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 7-12, 2007, AS "ASHEVILLE-BUNCOMBE COUNTY SENIOR GAMES WEEK"

Councilman Freeborn read the proclamation proclaiming May 7-12, 2007, as "Asheville-Buncombe County Senior Games Week" in the City of Asheville. He presented the proclamation to Mr. David Herbert, Ms. Dee Black and Mr. Don Moritz, who briefed City Council on some activities taking place during the week.

B. PROCLAMATION PROCLAIMING MAY, 2007, AS "MOTORCYCLE AWARENESS MONTH"

Councilman Mumpower read the proclamation proclaiming May, 2007, as "Motorcycle Awareness Month" in the City of Asheville. He presented the proclamation to Mr. Roger Williams, who briefed City Council on some activities taking place during the month.

C. PROCLAIMING MAY, 2007, AS "REFLUX SYMPATHETIC DYSTROPHY SYNDROME AWARENESS MONTH"

Councilwoman Cape read the proclamation proclaiming May, 2007, as "Reflux Sympathetic Dystrophy Syndrome Awareness Month" in the City of Asheville. She presented the proclamation to Dr. Mary Sedgewick, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

A. RESOLUTION NO. 07-84 - RESOLUTION AUTHORIZING ELAINE EDEN DRIVE AND TREVOR TRAIL IN THE BREVARD ROAD AREA TO BECOME PUBLICLY MAINTAINED STREETS

Summary: The consideration of a resolution authorizing Elaine Eden Drive & Trevor Trail in the Brevard Road Area of Asheville to become a publicly maintained street.

Section 7-15-1(f)-4.a requires that streets dedicated for public uses be accepted by resolution of City Council.

Elaine Eden Drive & Trevor Trail are developer-constructed streets that have an average width of 22 feet and a length of 0.12 & 0.03 miles. Transportation and Engineering Department Staff inspected this street and finds it to be constructed in accordance with the approved standards.

Following City Council's approval of this resolution, Elaine Eden Drive & Trevor Trail will be added to the official Powell Bill list.

Pros:

- The City will receive Powell Bill funds from the NCDOT to maintain the roadway.
- Homes constructed on this roadway increase the tax base in the City.

Con:

- Powell Bill funds will not cover 100% of the cost to maintain the street.

City staff recommends City Council approve a resolution authorizing Elaine Eden Drive & Trevor Trail in the Brevard Road Area of Asheville to become a publicly maintained street.

RESOLUTION BOOK NO. 30 – PAGE 306

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution on the Consent Agenda and it would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Newman and carried unanimously.

III. PRESENTATIONS & REPORTS:

A. FAIR HOUSING COMMISSION ANNUAL REPORT

Mr. Isaac Coleman, Chairman of the Asheville-Buncombe Fair Housing Commission, said that former chair Mr. Jim McCulley recently died and he became Chairman. He recognized Jim's dedication and contributions to the Commission. Although he was confined to a wheelchair, he attended meetings and trainings and carried out his duties until his health failed and he was no longer able to carry out his duties.

During the period that he has been on the Commission, they have faced many challenges. Funding cuts from the Community Development Block Grant funds, Buncombe County, the U.S. Department of Housing and Urban Development and resulting staff shortages put a serious strain on our mission to address housing discrimination issues in Asheville and Buncombe County. One of the positions we lost was a person who was bi-lingual. This limited our ability to serve the Latino community.

In spite of these challenges, the Commission was able to investigate 743 complaints. One outstanding result of the Commission's work was to resolve all legitimate complaints without any court action. Court action tends to drag out the process of reaching a resolution causing the delay in housing the complainant and costing dollars for the litigation process.

This year, the Commission's goals are to reach those communities that we haven't been able to serve because of the language barrier through an aggressive outreach program. We

have to let people know that the Commission is here to address the issues that might arise around housing discrimination.

He recognized Bob Smith and the staff of the Asheville-Buncombe Community Relations Council for the tireless efforts of meeting the challenges of this work in spite of a funding and staff shortage and to thank the Council for the opportunity to serve.

In response to Mayor Bellamy, Mr. Coleman said that there are many different reasons for people filing discrimination complaints.

On behalf of City Council, Mayor Bellamy thanked Mr. Coleman for his report. She did say it was unfortunate, however, to have to deal with discrimination at this level.

B. GEOGRAPHIC INFORMATION SERVICES (GIS) PROGRAM PRESENTATION

Mr. Jonathan Feldman, Director of Information Technologies, said that the context of GIS is (1) geographic information services; (2) community/customer information systems; (3) financial information systems; and (4) human resources information systems.

MapAsheville is essentially GIS for the Web - (1) comprehensive GIS web-application services effort; (2) focus on both internal staff and public users; (3) 37% increase in public GIS web visitors - 9,500 new visitors; (4) 80% increase in usage rates among total GIS web visitors; and (5) approximately 20% decrease in GIS software maintenance costs over 2 years.

Using a graph, he showed the relevance to citizens and how it has dramatically increased.

One part of mapAsheville is the Developer Mapper: (1) visualization tool providing streamlined access to information concerning proposed and in progress large-scale developments; (2) increased service level for community stakeholders; (3) decreased time for staff to service request; and (4) coordinated effort between Planning, Economic Development and IT Services. The citizen response is (1) the basics - folks like to be asked to be involved, and the end product is more thoughtful, usable and used; (2) positive response from both neighborhood groups and business leaders; and (3) community leaders have publicly endorsed mapAsheville in print and on video.

Upcoming GIS public access applications include (1) priority places - (a) decision support and visualization tool for economic development; (b) contracted with vendor for development and implementation; and (c) estimated completion of early fall 2007; (2) steep slope analysis application - (a) collaborative partnership with Buncombe County and UNCA/RENCI; (b) analysis tool to determine applicability of steep slope ordinances to existing or proposed parcel; and (c) estimated completion of late summer 2007; and (3) crime mapper - (a) visualization tool providing generalized statistics in a requested area or neighborhood; and (b) estimated completion of winter 2007-08.

GIS Strategic Plan was authored and adopted by GIS Steering Committee (multi-department team chartered by City Manager's Office); and approved by City Quality Council. It is a unifying document for all City of Asheville GIS program initiatives and has aggressive objectives with defined performance measures for priority items.

The GIS Steering Committee's Strategic Plan include the following five goals (1) develop and sustain a City-wide GIS organizational structure that supports stakeholders; (2) focus on web-based GIS Services to meet organizational and community needs; (3) anticipate and plan for future program needs; (4) continue development of opportunities that foster education, training and partnership; and (5) provide excellent customer services.

Other internal GIS program projects include (1) mapAsheville - Sanitation inquiry application to manage 29,000 garbage cans ($1.5 Million in assets); (2) Bele Chere 2007 - online GIS mapping and public safety information management; and (3) auto accidents - Mapping and application services for mandated standardization reporting for Traffic Engineer and Asheville Police Department.

Service enhancements through technology in the Plan include: (1) an investment in automated services through information systems (GIS and others) can save dollars and time for citizens and staff; (2) look to other models of success (Stephen Goldsmith, Indianapolis) for guidance; and (3) "Do what we can with what we have" model, with room for additional investments, requested in Fiscal Year 2008 budget.

Regarding resources and backlog: (1) 6 to 8 month GIS project backlog - will continue as we include other information systems; (2) continue to accept long term projects and reprioritize per leadership requirements; (3) utilize partnerships to leverage resources; and (4) restructure department to better handle planned enhancements.

Mr. Feldman responded to Councilman Mumpower when he asked if there will be any budget items coming to Council in the near future.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS WESTMONT COMMONS PHASE II LOCATED AT 120 CHAMBERLAIN DRIVE FOR 72 APARTMENT UNITS

ORDINANCE NO. 3463 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR THE PROJECT IDENTIFIED AS WESTMONT COMMONS PHASE II AT 120 CHAMBERLAIN DRIVE FOR 72 APARTMENT UNITS

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 7:46 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Kim Hamel submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Ms. Hamel said that this is the consideration of the issuance of a conditional use permit for property identified as Westmont Commons Phase II located at 120 Chamberlain Drive for 72 apartment units (Attachment to City Exhibit 3 - Aerial Map).

This review concerns a proposed 72 unit expansion of an existing apartment complex (Attachment to City Exhibit 3 - Site Plan). The apartment units are to be housed in three buildings

and clustered along Eliada Home Road. Pursuant to Section 7-5-9(a)(1)(a)(3) of the Unified Development Ordinance (UDO), any manufactured housing community, camper/trailer park or other residential development containing more than 50 individual units is reviewed as a Level III Site Plan Review.

The subject site is located at 120 Chamberlain Drive in the northwest portion of the city limits. The property consists on one lot zoned INST (Institutional) and HB (Highway Business) and is comprised of 17.5 acres according to the submitted site plan and Buncombe County tax records.

The majority of the development lies within the INST zoning district with only the entrance road (Chamberlain Drive) located in the HB zoning district. All new proposed development will occur within the INST zoning district. The property is bounded to the north and east by a group home, vacant land and Eliada Home Road zoned INST, to the west by fast food restaurants, the Farm Bureau and vacant land zoned HB and to the south by a shopping center and group home zoned HB and INST respectively.

The INST zoning district was created to reserve land for the development of major educational facilities, and other complementary and supporting uses such as health related developments, office developments, and public services. Development standards for uses in this district are established to minimize conflict with adjacent land uses.

Type "A" and "B" buffers have been installed and maintained around the perimeter of the property as part of the original development approval in 2002. Improvements to the existing buffer along Eliada Home Road are being proposed as a part of this development.

At their February 5, 2007, meeting the Technical Review Committee (TRC) approved this project subject to the conditions in the staff report. Subsequently, the Planning and Zoning Commission unanimously approved this project subject to the conditions recommended by staff at their March 7, 2007, meeting.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case pursuant to Section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The majority of the subject property has an elevation greater than 2,200 feet above mean sea level and an average slope of 15 percent or greater. The initial development was not subject to hillside area grading standards because it was approved before the UDO hillside definition and standards were amended to include development in all zoning districts opposed to just residential zoning districts, transition overlay districts, and/or Planned Unit Development overlay districts in the city limits and ETJ. Further, the proposed development will occur in a relatively level area historically used for farm purposes. However, pursuant to Section 7-12-4(b)(2) of the UDO, subsequent phases of

a Level I, II, or III site plan projects where the site plan has been changed, or approved subdivisions where the lot design has changed, shall indicate the proposed contours, limit and area of grading, and percentage of site to be graded. 126,000 square feet of the total site is to be retained as required open space including a future playground to be located in the vicinity of Building 400.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
The proposed development of 72 apartment units would integrate with the existing apartment complex and transition well with the surrounding commercial and institutional elements including the shopping center and fast-food establishments. Staff feels that the proposed project would have no discernible effect on surrounding property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
There are a variety of commercial, institutional and multi-family residential developments in the area that would be consistent with the proposed development. Furthermore, the entire site is surrounded by type "A" and "B" landscape buffers and open space effectively mitigating the mass of the residential structures through buffering and distance separations.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The application of high density, infill growth supports several goals and objectives as described in both the ***Asheville City Development Plan 2025*** and the ***Strategic Operating Plan*** (See **Compliance with Comprehensive Plan** and **Strategic Operating Plan Considerations** in above staff report).

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The subject property has two existing points of access on New Leicester Highway via Chamberlain Dr. and Eliada Home Rd. In addition, technical review from other departments has not revealed any problems for providing an urban level of service to the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
A traffic impact analysis was prepared for the initial development of 180 units with the assumption that the property would be developed with 256 units. Based on the fact that the final development will be smaller than the original study, no additional traffic impact analysis is needed pursuant to the City Engineering Department. The proposed project is not expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The proposed development will provide an additional 72 units to the housing rental market.
- Provides another opportunity to further the City's goal of high density infill development.

Cons:

- It is unclear if any of the units will be offered at affordable rents.

Staff recommends approval of the proposed project and Conditional Use Permit subject to the conditions in the TRC staff report and those recommended by City staff.

Mr. Steve Bell, applicant, said that they felt like there were some deficiencies in Phase I of three-bedroom apartments and different floor plans. He is excited about the opportunity to expand the property and assured Council it would be maintained at a high level.

After rebuttal, Mayor Bellamy closed the public hearing at 7:53 p.m.

Upon inquiry of Councilwoman Cape, the engineer of record explained the temporary construction entrance.

When Councilwoman Cape asked about the cost of the units, Mr. Bell said that the unit costs will exceed $80,000 per unit, but they will offer apartments in a range that will be primarily for working people. In addition, he thought they would have a high percentage of retirees.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3463 granting a conditional use permit adopting the proposed master plan for Westmont Commons Apartment Complex, subject to (1) conditions recommended by City staff; (2) Access to Eliada Home Road shall remain permanently open throughout all phases of construction; (3) The project shall comply with all conditions outlined in the TRC staff report; (4) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (5) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (6) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (7) This project will undergo final review by the TRC prior to issuance of any required permits; noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 319

B. PUBLIC HEARING TO CONSIDER THE CONDITIONAL ZONING FOR THE PROJECT IDENTIFIED AS VISTAS OF WESTFIELD LOCATED ON DOGWOOD WOOD, FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL USE FOR A 124-UNIT MULTI-FAMILY DEVELOPMENT, IN ADDITION TO A DIMENSIONAL STANDARD (SETBACK) MODIFICATION

ORDINANCE NO. 3464 - ORDINANCE TO CONDITIONALLY ZONE THE PROJECT IDENTIFIED AS VISTAS OF WESTFIELD LOCATED ON DOGWOOD WOOD, FROM RS-4 RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT TO RM-6 RESIDENTIAL MULTI-FAMILY LOW DENSITY DISTRICT/CONDITIONAL USE FOR A 124-UNIT MULTI-FAMILY DEVELOPMENT, IN ADDITION TO A DIMENSIONAL STANDARD (SETBACK) MODIFICATION

Mayor Bellamy opened the public hearing at 7:57 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to conditionally zone the project identified as Vistas of Westfield located on Dogwood Road from RS-4 Residential Single-Family Medium Density District to RM-6 Residential Multi-Family Low

Density District/Conditional Use for a 124-unit multi-family development consisting of 2-unit, 4 unit and 8-unit buildings, in addition to a dimensional standard (setback) modification. This public hearing was advertised on April 6 and 13, 2007.

Mr. Esselstyn said that the applicant seeks the conditional zoning of 31.8 acres, currently zoned RS-4, to RM-6 CZ for a multifamily residential project with 124 units. The property is located on the east side of Dogwood Road in the Candler area, at the western extreme of the Asheville extraterritorial jurisdiction area (ETJ).

Multi-family residential with the proposed density would be a permitted use in the RM-6 district. The applicant is also seeking modification of two dimensional standards: the width of the front setback from 15 feet to 10 feet, and the width of the right-of-way from 50 feet to 45 feet. In requesting such modification, the applicant indicates parts of the design suggested to be exceptional development, as well as the reduction of disturbance that the modifications would allow.

The site is currently mostly undeveloped, with a mixture of pasture and wooded areas. In the recent past there has been a single residence on the lot. The property also contains a graveyard, the contents of which would be relocated according to NC statutes, with Buncombe County oversight.

The property contains moderate slopes, but none of the area would be subject to current hillside development regulations, due to altitude. A portion of the property (the southern end) is classified as special flood hazard area, however—both floodway and floodplain. This considerable area would be left as open space in the proposed plan.

The proposed design includes a mix of housing arrangements: five 8-unit structures, twenty 4-unit structures, and two 2-unit structures. All units would be for purchase, either as condominiums or as units in a planned development. The duplex and quadraplex units are designed to resemble large 1 – 1.5 story homes. Garage doors are located on the sides of these buildings and generally would not be easily visible from the street.

The proposed residential density would be four units per acre, no higher than what would be allowed under the current RS-4 zoning, but the RM-6 (conditional) zoning is requested to allow the multi-family dwellings.

The large vacant tract across Dogwood Road from this site's frontage has recently been reviewed and approved by Buncombe County for a large (approximately 260 units) multi-family development.

At its February 19, 2007, meeting, the Technical Review Committee (TRC) approved the project with the conditions listed.

At the March 7, 2007, meeting, the Planning and Zoning Commission voted unanimously to recommend approval for this project.

At both the TRC and the Planning & Zoning Commission meetings mentioned above, the applicant has expressed an interest in having one extra "directional" sign for the project in addition to what would normally be permitted. This is not a dimensional standard that can be modified as part of the conditional zoning (nor does staff feel that the extra sign is necessary).

Staff has received no communications from neighbors regarding this project. At the TRC meeting, one neighbor expressed his preferences about preservation of the extraordinary tree, the creek area, and about the design of the homes that would be visible from his home.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in Section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the TRC are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use is compatible with the surrounding natural features and topography. Grading and the use of retaining walls will be required, but the stream features and the remarkable tree will be protected.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   Staff does not expect that the proposed use would have anything more than a minimal impact on neighboring property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The immediate area currently has a pastoral character, which the proposed development would not preserve, but this statement would be true of many developments that could be pursued even under the current zoning. Further, the proximity to the interstate, the manufactured homes to the east, industrial zoning to the southeast, and the large development planned to the west all indicate conditions with which the proposed development would be in harmony.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed project would create multifamily residential housing opportunities near an interstate at a location that has been identified by DOT as a site for a future interchange. The Asheville City Development Plan 2025 encourages increasing development near such "nodes."

   Further, the Comprehensive Plan's Smart Growth Land Use Policies state that "Compatible, higher density commercial and residential infill development should be encouraged." The proposed development presents a suitable option for transition between the lower density residential to the east and the approved multi-family development on the west side of Dogwood Road.

   The Asheville City Council's Goals and Vision document supports "sustainable, high density, infill growth." While the proposed project is not high-density when the open space is considered in the calculation, the applicant argues that the multi-family design allows the clustering of units in a design that reduces the impact relative to a typical single-family subdivision that would be built under the current RS4 zoning.

As proposed, the project does not include a workforce housing or affordable housing element, thus it does not further the affordable housing goal espoused in the above plans.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
The project's location on Dogwood Road near Smokey Park Highway provides access to transportation facilities and other services. In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- Density would be no higher than what would be allowed under (current) RS4 zoning.
- Design of much of the development would resemble a single-family subdivision with large homes.
- Dimensional modifications for front setbacks and right-of-way width have been requested; these would reduce land disturbance and height of retaining walls.

Cons:
- Applicant has not indicated any intention of providing units as workforce housing or affordable housing.

Staff recommends approval of this request, subject to the conditions in the TRC staff report and the standard conditions.

Mr. Chris Eller, engineer with Civil Design Concepts, spoke about the unique design of the property. He said they have not increased the density that would be allowed in the RS-4 underlying zoning; however, this would enable them to cluster the units in a fashion that they can create more common passive and active open space. He would like to have the following two items left open until further information is received. One, we would like one additional small directional sign for the project. And two, staff has recommended curb and gutter along Dogwood Road. We feel this is not a potential place for that and while we are not requesting deviation from the sidewalk requirement, we would request that if the N.C. Dept. of Transportation (NC DOT) will concur, that curb and gutter not be considered for this project. City staff would be open to that if NC DOT is agreeable to that.

Ms. Phyllis Martin, adjoining property owner, spoke in opposition to the project due to its density, and lack of security and safety for senior citizens in the area if the units are rentals.

Mayor Bellamy closed the public hearing at 8:07 p.m.

Mr. Eller and City Stormwater Services Manager Chad Pierce responded to the numerous questions from Council regarding development in the floodplain and the potential of downstream flooding, in addition to the cumulative effect of downstream flooding as projects are built. When Councilman Newman asked Mr. Pierce if he felt confident that this specific proposal meets relevant standards for floodplain, Mr. Pierce replied yes.

In response to Councilman Newman, City Attorney Oast said that if Council adopts this ordinance and incorporates the TRC comments, those standards that will have to be met before the project can be permitted.

Mayor Bellamy said that City Council will have a general report for stormwater, flood control, etc. before July 1 from the Flood Task Force.

In response to Councilwoman Cape, Mr. Pierce said that a re-mapping process will give us the cumulative view of downstream flooding and those preliminary maps are due about mid-July.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3464, to conditionally zone the project identified as Vistas of Westfield located on Dogwood Road from RS-4 Residential Single-Family Medium Density District to RM-6 Residential Multi-Family Low Density District/Conditional Use for a 124-unit multi-family development consisting of 2-unit, 4 unit and 8-unit buildings, in addition to a dimensional standard (setback) modification, subject to the following conditions: (1) conditions recommended by City staff; (2) The project shall comply with all conditions outlined in the TRC staff report; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans must gain approval through the Planning and Development Department; (6) At the direction of the Planning Director, this Project will be reviewed by the TRC prior to issuance of any building [or grading, etc....] permits; and (7) two dimensional standard modifications: (a) the width of the front setback from 15 feet to 10 feet, and (b) the width of the right-of-way from 50 feet to 45 feet; noting that find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Davis and carried on a 5-2 vote, with Councilman Freeborn and Councilman Newman voting "no."

ORDINANCE BOOK NO. 23 - PAGE 325

V. UNFINISHED BUSINESS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING FOR PROPERTY LOCATED AT 47 RUTHERFORD ROAD FROM COMMUNITY BUSINESS II DISTRICT TO LIGHT INDUSTRIAL DISTRICT/CONDITIONAL ZONING IN ORDER TO ESTABLISH A CONFORMING OFFICE/WAREHOUSE USE WITH OUTDOOR STORAGE

Mayor Bellamy said that this public hearing was originally scheduled for March 13, 2007, but continued to this date at the petitioner's request. In addition, at that time, Councilwoman Cape requested additional information on when the property was zoned as part of the extension of the extraterritorial jurisdiction area.

Urban Planner Blake Esselstyn said that the applicant has requested a six-month continuance to ascertain whether the existing use would be out of compliance with future zoning anticipated to be complete within that timeframe. As Council is aware, the proposed zoning is being sought as a result of enforcement action; consequently, it is clear that the applicant is attempting in good faith to bring his property into code compliance. As a result, staff is recommending to Council that the continuance be granted as the future zoning for this property

may well result it coming into compliance as we broaden the uses to which such suburban property may be put.

Vice-Mayor Jones moved to continue this public hearing until October 16, 2007. This motion was seconded by Councilman Newman.

Ms. Lydia Scott, resident on Rutherford Road, urged Council to proceed with this public hearing as this is the second time community members have had to come to the Council meeting.

Upon inquiry of Councilman Newman, Mr. Esselstyn said that the principle additional use that made the property receive a notice of violation was the addition of outdoor storage (essentially a stack of telephone poles). In a situation like this, as long as the applicant is making good faith efforts to comply, we don't require that the use be removed. It is with that understanding that they were pursuing the conditional zoning that that use was allowed to continue. Rezoning to Light Industrial would essentially put the property in a district that would be a permitted use.

In response to Vice-Mayor Jones, Mr. Esselstyn said that Mr. Gerald Green (representative of the applicant) was at the Council meeting earlier, however, he had another obligation and apologized he was not able to stay for this action.

Councilman Newman withdrew his second.

Councilman Mumpower seconded the motion to continue to October 16, 2007, made by Vice-Mayor Jones.

In response to Councilman Newman, Mr. Esselstyn said that if the conditional zoning were approved now, there would be substantial improvements to the property, e.g., landscaping, total overhaul of the parking lot, additions to the building, etc. If the corridor were to be rezoned in six-months to a zoning district in which this would be a permitted use, all of that would have been unnecessary on the part of the applicant.

In response to Councilwoman Cape, Planning & Development Director Scott Shuford said that they are looking at all of our different corridors to determine whether they should be in an urban or suburban designation. This is one that, no doubt, will be in a suburban designation because of its location and surrounding uses.

After considerable discussion, Mr. Shuford said that Council's options are (1) continue the public hearing for six-months; (2) approve it for a 6-month period in which the applicant would have to upgrade the site to meet landscaping standards, etc.; (3) approve it in its entirety; (4) continue the public hearing for one week and give the applicant an opportunity to attend or nor; or (5) deny the rezoning.

The motion to continue the public hearing until October 16, 2007, made by Vice-Mayor Jones and seconded by Councilman Mumpower carried on a 4-3 vote, with Mayor Bellamy, Councilwoman Cape, Councilman Davis and Councilman Mumpower voting "yes" and Vice-Mayor Jones, Councilman Freeborn and Councilman Newman voting "no."

VI. NEW BUSINESS:

A. RESOLUTION NO. 07-87- RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE SCHOOL BOARD

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing two members to the Asheville School Board.

The terms of Ann Von Brock and Dolly Jenkins-Mullen, as members of the Asheville School Board expired on April 1, 2007.

On April 10, 2007, City Council instructed the City Clerk to arrange interviews for William Todd Weatherly, Jacquelyn Hallum, John Legerton, Brian Sarzynski and Precious Folston.

Councilman Mumpower supported an elected School Board and suggested we put on a future agenda a discussion of an elected vs. appointed School Board. Vice-Mayor Jones felt that City Council needed to have a community dialogue on this prior to Council discussion.

Councilman Davis suggested inviting Asheville City School Superintendent Robert Logan to a Council meeting in order that Council may ask him some questions. Mayor Bellamy said that the scheduling of that meeting is already in progress.

After Council spoke highly of the candidates, William Todd Weatherly received 0 votes, Jacquelyn Hallum received 5 votes, John Legerton received 3 votes, Brian Sarzynski received 2 votes and Precious Folston received 3 votes. Another vote was taken because two members received 3 votes - John Legerton received 3 votes and Precious Folston received 4 votes. Therefore, Jacquelyn Hallum and Precious Folston were appointed as members of the Asheville School Board to each serve a four-year term respectively, terms to expire April 1, 2011, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 – PAGE 313

B. SUSTAINABLE ECONOMIC DEVELOPMENT ADVISORY COMMITTEE

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Sustainable Economic Development Advisory Committee (SEDAC).

The terms of Bruce Tompkins, Carol King, Frank Taylor, Patti Glazer, Marvin Slosman, as members on the SEDAC expired March 1, 2007. In addition, Pat Whalen and Jack Cecil have resigned, thus leaving unexpired terms until March 1, 2008. In addition, Kimberly Hodges has resigned, thus leaving an unexpired term until March 1, 2009.

Councilwoman Cape, liaison to SEDAC, said that within the climate of the HUB and the creation of this new regional economic development organization, she felt the role of the SEDAC needs to be looked at and addressed. She asked Council to consider what the role is of the City's SEDAC in the climate of the HUB project. Secondarily, if we define a role for such a committee ourselves, how do we see that committee functioning. Do we see it as an advisory policy-setting body or is it a body much like we did with the Environmental Committee, where we said these are some ideas we would like to have and we need you to be our research team to dig into these and bring them back to us. If you look at the list of people who have been on SEDAC, many of them now are moved over to the HUB and the energy and the vibrancy they used to put into SEDAC is now in a larger area. Should Council decide that SEDAC should move forward, and she's not thinking that it shouldn't, she thinks 18 members of SEDAC is too large. In summary, she would like to know the process by which we look at what the role of the committee is, how many people are on it, and what we can do as a guiding body to encourage the best performance and usefulness of our committees.

Councilman Davis moved to postpone the interview stage until the Boards & Commissions Committee has had an opportunity to review the questions posed by Councilwoman Cape. This motion was seconded by Mayor Bellamy.

Vice-Mayor Jones said that she felt that the questions posed are important enough that it be a City Council discussion and not the Boards & Commissions Committee discussion only.

Councilman Davis and Mayor Bellamy agreed that the discussion be a City Council discussion.

Mayor Bellamy said that when City Council created SEDAC there was no other tool out there, other than the Chamber's Economic Development Committee, looking at manufacturing. That has since changed since the formation of HUB. Unless we have specific assignments for SEDAC, she felt that it has outlived its life. She said that Council will be receiving a presentation from HUB leadership in May. After we hear the HUB presentation and look at the bigger picture of what is trying to be accomplished, we will see that some of the same players are already engaged in the larger HUB process.

It was the consensus of Council to delay the interview process until after we hear the presentation by HUB leadership and after Council discussion about the role of SEDAC.

At the suggestion of Councilman Newman, Mayor Bellamy felt it would be a good idea to invite SEDAC to the same meeting in May that the HUB leadership will attend in order to ask questions to both bodies. If we, or they, identify some compelling activities we need SEDAC to work on, we move forward with the interview process. If not, then Council would make a decision acknowledging that.

Councilwoman Cape wanted to make sure that the SEDAC members know this is not a dispersion on any of them, but it's more of a sense of how HUB is taking off and how we are no longer just focused on just a City economic development plan - we are looking at partnering.

C. RESOLUTION NO. 07-88- RESOLUTION APPOINTING MEMBERS TO THE ASHEVILLE FILM COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing members to the Asheville Film Commission.

The terms of Alison Watson, Kathleen Kasben, Jim Lawrence, Donna Daniels, Robbie Williams and Michael Rangel expired on November 1, 2006. Ms. Watson is interested in being reappointed.

Vice-Mayor Jones said that after talking with the Chair of the Film Commission about the viability of the Film Commission, the Boards & Commissions Committee recommended moving forward with appointments. They suggested that after Council seats these individuals, we ask them to talk about the size of the Commission.

Based on Council knowledge, either personal, professional or by their credentials, it was the consensus of City Council to (1) reappoint Ms. Alison Watson; (2) appoint Mr. Alan Berger, Ms. Brenda Lunsford Lilly and Mr. Ty Hallock as members to the Film Commission to each serve a three-year term respectively, terms to expire November 1, 2009, or until their successors have been appointed; and (3) charge the Film Commission with assessing the size of their board. If they determine they need the two additional members, then Council will discuss it at that time. If not, then the Committee membership can be formally reduced.

RESOLUTION BOOK NO. 30 – PAGE 314

D. RESOLUTION NO. 07-85 - RESOLUTION AUTHORIZING CONVEYANCE OF PROPERTY AT CATAWBA AND BROADWAY TO HEALTH ADVENTURE FOR PUBLIC PURPOSES

City Attorney Oast said that this is the consideration of a resolution authorizing the conveyance of real property at Catawba Street and Broadway to the Health Adventure

Back in 2004, the City entered into an Agreement with the Health Adventure, Inc., for the exchange of property on the site of the Health Adventure's new proposed location at the corner of Broadway and Catawba Streets. Pursuant to the agreement, the purpose of this exchange is to allow the Health Adventure to use the old leaf dump site in connection with its outdoor programs, while the City will use Parcel B for the continuation of the Reed's Creek Greenway.

Since the authorization of this exchange, representatives of the Health Adventure and the City have worked out the details of the Agreement, and have been working on the details of the transaction. Personnel transitions in the administration of both organizations have extended this process. Also, there was a need to obtain a conditional rezoning of Parcel A to allow the Health Adventure to use it as contemplated, and this was completed in October of 2005.

The parties are now ready to proceed with the agreed-upon exchange. Pursuant to the Agreement, the previous resolution, and the statute referenced therein, the exchange was to be finally approved by Council following an advertised 10-day notice. If this process is followed, the earliest that Council could authorize the conveyance is May 8. Due to some unanticipated exigencies, however, the Health Adventure would like to complete the transactions by May 2.

Because this conveyance is to an entity carrying out a public purpose, there is a statute that authorizes the City to convey it in another way that will permit the closing to occur on or before May 2. This method requires Council to adopt a resolution and then publish a notice (as opposed to publishing a notice and then adopting the resolution). The sale cannot be consummated until 10 days after the date of publication. In view of the facts that: (1) the Agreement was approved by Council following a public presentation; (2) the property was conditionally rezoned following an advertised public hearing; and (3) the Health Adventure has been public about its plans with the Montford neighbors and with the community at large, authorizing the conveyance using this method appears to be an appropriate alternate way of meeting the objectives of the Agreement, and will allow the conveyance to occur in time for the Health Adventure to satisfy its exigencies. Had the "notice followed by resolution" process been followed, this likely would have been a consent agenda item in view of the previous Council actions and the wide public exposure The deed to the Health Adventure will contain appropriate restrictions limiting the use of the property to public purposes, and the conditional zoning restricts the use as well.

Pros:
- Follows through on previous agreement
- Allows City to proceed with completion of greenway
- Allows Health Adventure to proceed with its plans
- Allows closing to occur by May 2
- Project has been the subject of several public processes already

Cons:
- Changes process from notice followed by action to action followed by notice

If Council approves of this transaction, adoption of the resolution is recommended.

City Attorney Oast responded to Councilman Mumpower's concern about the urgency of this action at this meeting.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 07-85. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 308

E. RESOLUTION NO. 07-86 - RESOLUTION REQUESTING INCLUSION IN LOCAL BILLS PENDING IN THE 2007 SESSION OF THE NORTH CAROLINA GENERAL ASSEMBLY

Councilwoman Cape said that there were several bills which have been introduced in the 2007 Session that enables localities to adopt certain measures to help them achieve efficient and environmentally sensitive building practices. She asked for Council's support for the City of Asheville to be included in the coverage of House Bill 666 - "An act allowing Mecklenburg County to provide building permit fee rebates for buildings that are built to leadership in energy and environmental design standards" and House Bill 1097 - "An act to amend the Charter of the Town of Chapel Hill to permit the town to provide development incentives in exchange for reduction in energy consumption." We are not signing onto the particulars of what those programs would look like (that would be another conversation by City Council), it just gives us a larger range of incentives to offer towards our strategic goals.

Councilman Mumpower understood the timing issues, but felt that we are stepping out of normal procedure and would not be able to support this resolution.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Newman moved for the adoption of Resolution No. 07-86 This motion was seconded by Councilman Freeborn and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 310

VII. OTHER BUSINESS:

Councilman Mumpower (1) presented the new Drug Commission poster and asked for the community's help is coming up with effective posters; (2) announced the For Our Kids event at Bartlett Arms on Saturday, April 21, 2007; and (3) invited drug dealers who are tired of being on the streets to come to a program in Shiloh which meets every week and they will get them a coach, try to get them some education, and help them find a meaningful job.

Councilwoman Cape suggested contact information be placed on the drug posters. She also encouraged the community to participate in Earth Day activities this week.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Ms. Mary Steiner, resident near Pisgah View Apartments, presented Council with a drawing of illegal activities around Pisgah View Apartments. She urged Council to get rid of all drug dealers out of the projects. She felt that drug addicts target senior citizens. Mayor Bellamy said that she would refer Ms. Steiner's information to the Police Chief.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:25 p.m.

Tonia Lipe
CITY CLERK

MAYOR

Tuesday – April 24, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mr. Walter Plaue led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 7, 2007, AS "WORLD AIDS ORPHANS DAY"

Vice-Mayor Jones read the proclamation proclaiming May 7, 2007, as "World Aids Orphans Day" in the City of Asheville. She presented the proclamation to Mr. Ron Curran of the WNC Aids Project, who briefed Council on activities taking place during this day.

B. PROCLAMATION PROCLAIMING APRIL 24, 2007, AS "WILMA SHERRILL DAY"

Mayor Bellamy read the proclamation proclaiming April 24, 2007, as "Wilma Sherrill Day" in the City of Asheville. She presented the proclamation and a gift to former Representative Sherrill. Former Representative Sherrill thanked City Council for their work over the years and looked forward to working with them in a different capacity.

II. CONSENT AGENDA:

Mayor Bellamy asked that Consent Agenda Item "D" be removed from the Consent Agenda for individual discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETINGS HELD ON APRIL 10, 2007, AND APRIL 17, 2007

B. ORDINANCE NO. 3465- BUDGET AMENDMENT TO APPROPRIATE DONATIONS AND SMALL GRANTS RECEIVED BY THE ASHEVILLE FIRE & RESCUE DEPARTMENT FROM VARIOUS SOURCES

Summary: The consideration of a budget amendment, in the amount of $5,406, to appropriate donations and small grants received by the Asheville Fire & Rescue Department from various sources.

Asheville Fire & Rescue has received $5,406 in donations from various sources to date. This action requests that these funds be appropriated for departmental use.

Asheville Fire & Rescue receives donations and small grants from various sources throughout the year. These funds cannot be used to fund Fire Department general operations and must be appropriated to enhance fire prevention activities. To date, $5,406 has been received. Specific uses for these funds have been identified, including purchasing promotional items for fire prevention, items for fire prevention education classes, and the purchase of a brochure rack for fire prevention education materials. Approval of this budget amendment will provide the department with the necessary budget authorization to expend these funds.

PROS:

- These funds have been provided at 100% with no city match.
- Asheville Fire and Rescue will be able to work more effectively with fire prevention education with these funds appropriated.
- Citizen availability to fire prevention materials will increase.
- Target age groups (children and elderly) will be better reached with fire prevention messages.

CON:

- None identified at this time.

Staff recommends City Council approve a budget ordinance amendment in the amount of $5,406.00 to appropriate donations and small grants received by the Asheville Fire & Rescue Department from various sources.

ORDINANCE BOOK NO. 23 - PAGE 330

C. RESOLUTION NO. 07-89- RESOLUTION ACCEPTING THE BID AND AUTHORIZING THE CITY MANAGER TO EXECUTE AN AGREEMENT WITH CARL WALKER AND ASSOCIATES FOR SPECIFICATION AND OVERSIGHT FOR REPAIRS AND MAINTENANCE TO THE CIVIC CENTER PARKING DECK

Summary: The consideration of a resolution accepting the bid of Carl Walker and Associates and authorizing the City Manager to execute an agreement with Carl Walker and Associates for specification and oversight for repairs and maintenance to the Civic Center Parking Deck.

The City of Asheville owns and operates the Civic Center, Rankin Avenue, and Wall Street parking decks. The Civic Center deck was built in 1976 and the other two in 1988. In 2003 an assessment was conducted on the condition of all three facilities. Numerous conditions were identified that needed repair. The Civic Center deck, being the largest and oldest, required the most repairs. The assessment was divided into emergency repairs and non-emergency repairs. The emergency repairs were completed in 2005. Funds in the amount of $525,000 for the oversight contract and to do most of the non-emergency repairs to the Civic Center deck have been accumulated and are in the current budget.

Carl Walker and Associates will specify the details of the repairs to be made, assist in the preparation of bids, analyze and recommend the bid responses, oversee the quality of the repair work, and inspect and sign off on the completed contracts. The contract with Carl Walker and Associates is estimated to cost $75,000. The contractor estimates that they will be able to specify the work needed, draft requests for proposals and recommend appropriate contractors within 90 days of the management contract being signed by both parties.

Pro:

- Correcting problems in the decks now will prevent more costly repairs later and will extend the useful life of the parking facility.

Con:

- There will be some inconveniences to parking patrons as the work progresses. With proper planning these can be minimized.

This action conforms with the Strategic Operating Plan in Planning Focus Area- Goal #2- A Multi-modal Transportation System, Task #1: "Determine opportunities for managing traffic demand through changes to commuting patterns and transportation modes, land use patterns, signalization improvements, etc."

City staff recommends that City Council approve a resolution accepting the bid of Carl Walker and Associates and authorizing the City Manager to execute an agreement with Carl Walker and Associates in an amount not to exceed $75,000 for specification and oversight for repairs and maintenance to the Civic Center Parking Deck.

RESOLUTION BOOK NO. 30 – PAGE 315

D. PUBLIC PROCESS AND TIMELINE FOR PRITCHARD PARK RECOMMENDATIONS

This item was pulled from the Consent Agenda for discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEM PULLED FROM THE CONSENT AGENDA FOR DISCUSSION

PUBLIC PROCESS AND TIMELINE FOR PRITCHARD PARK RECOMMENDATIONS

Summary: Asheville City Council has charged the Downtown Commission and Recreation Board with appointing a joint ad hoc committee to develop and oversee a public process for Pritchard Park recommendations.

The purpose of the public process is to gain citizen input on the current use, management and operation of Pritchard Park in order for the committee to develop recommendations for park enhancements. The evaluation process includes analyzing what is going well with Pritchard Park, what needs improvement and what are the opportunities for enhancing the park as a community park amenity. Based on the community's feedback, the committee will make specific recommendations to City Council for park improvements. The committee will complete and disband its work when recommendations are delivered to City Council.

Progress to Date: Based on City Council's direction, staff has convened a joint preliminary meeting of the Recreation Board and Downtown Commission members. At that meeting, the Recreation Board nominated three members to serve on the joint committee (Adam Pittman, Wind Motika and Scott Barnwell). The Downtown Commission named three members to the committee at its April 13 meeting. The remainder of the committee will be comprised of Amy Sawyer, the coordinator for the 10 Year Plan to End Homelessness, and a member of the Asheville Police Department as well as any other community stakeholders the committee feels is necessary to conduct a thorough community process.

Recommended Public Process: The boards have approved the public process and timeline listed below.

Step	Description	Timeframe
Committee Formed	Boards nominate three members from each body to participate on the Pritchard Park Committee, request the Asheville Police Chief to nominate a seventh member and invite Amy Sawyer, the coordinator of the 10 Year Plan to End Homelessness to join.	Committee named by April 24 Subsequent meeting dates developed thereafter
Update to City Council	Present an update to City Council on the committee's formation and the steps in the public process.	April 24
Focus Groups	Invite key stakeholders to participate in a focus group process geared toward identifying key problems and opportunities.	Late April
Community Input Meeting	Host an open community meeting in downtown Asheville to gain input; incorporate small focus group exercises to gain input.	May
Committee Analysis & Recommendations	Pritchard Park Committee analyzes and evaluates public input in order to develop recommendations for City Council consideration.	Late May/Early June
Presentation to City Council	Pritchard Park Committee Chair presents recommendations to City Council.	Late June

The Downtown Commission, Recreation Board and City staff recommend City Council adopt the Pritchard Park Committee's proposed public process and timeline for Pritchard Park recommendations.

The following individuals spoke in support of allowing people to come together to share meals in Pritchard Park:

Rev. Amy Cantrell
A pastor of a church in Atlanta, Georgia
Ms. Denise Pendleton, small business owner and Asheville resident
A student at Warren Wilson College
Ms. Millie Riedel, Asheville resident
Mr. James Sheeler
Ms. Lindsey Popper

Councilman Mumpower said there is a struggle of what is loving and what is enabling. This is not about an absence of compassion for the homeless, not about food or about

indifference or economic separation. For a lot of us, it's about behavior. A lot of people come to Pritchard Park and indulge in various behaviors that are extremely inconsiderate of others around them. The equation works both ways - not only us being concerned about the homeless, but the homeless being concerned about their responsibilities to others. He personally does not believe that we uphold people by letting them beg on our streets, be publicly intoxicated, or letting them break our laws. He will support this, but he hoped we can challenge the Committee to not only be nice, but be realistic.

Councilwoman Cape was concerned about the swiftness of the process and hoped that if the Committee sees that it needs more time, that there is flexibility in the process to ensure that the goals are met and not kept to a strict timeline. Mayor Bellamy assured Councilwoman Cape that if the Committee requests additional time, that Council would be amenable to that.

Mayor Bellamy said that on May 29, 2007, City Council will be hosting a meeting on homelessness so this issue is far from over.

Councilman Mumpower moved to endorse the joint ad hoc Pritchard Park Committee and approve their public process and timeline for Pritchard Park recommendations, with the understanding that Council will leave it open to the Committee to make modifications to the process if necessary. This motion was seconded by Councilman Davis.

After a short discussion initiated by Councilman Freeborn and Councilman Newman of the key stakeholders, Councilman Mumpower and Councilman Davis each agreed to accept the friendly amendment to include Rev. Amy Cantrell and someone from the streets to be key stakeholders and invited to participate in the focus group process.

Mayor Bellamy reminded the community that this Council is not sitting idly by regarding the homeless. We are in the process of installing restrooms downtown; using the Housing First model, we have housed 33 individuals who were formerly homeless; we have a 10-Year Plan to End Homelessness and are funding said Plan; and the City of Asheville hosted a one day event to help our homeless bringing in several aspects all into one location.

The amended motion made by Councilman Mumpower and seconded by Councilman Davis carried unanimously.

III. PRESENTATIONS & REPORTS:

A. COMMUNITY RELATIONS COUNCIL ANNUAL REPORT

Dr. Larry McCallum, Chairman of the Asheville-Buncombe Community Relations Council (ABCRC), thanked City Council for allowing him to give the ABCRC's annual report.

The mission statement of the ABCRC is that "We are people helping people develop mutual respect and eliminate discrimination in our community."

The ABCRC works with members of our community in targeting the issue of discrimination in housing, public accommodation, and employment. The services of this council are available to all residents of Buncombe County and the City of Asheville.

The highest priority of the ABCRC is addressing issues of discrimination in housing, public accommodations, and employment. Activities and programs which foster mutual respect are also incorporated as a role of the Council. By doing so, the Council serves as a representative voice for those who cannot speak for themselves.

The ABCRC is currently focusing on the major issue of providing service to a more diverse community. The Latino and Russian Communities are underserved. The process of

building trust, understanding, and especially communication is hampered by the lack of funding for staff members to bridge this gap.

The Council seeks your help in funding these additional staff members for the next budget year.

The face of our community is changing and will continue to do so in a short period of time. It is an interesting fact that with people numbers also have a face. If we do nothing things will continue to change, but when the obvious is in view, it is essential that actions occur in accordance with change. Again he stated that they need Council's help in the next budget year.

He was asked to share with Council the Board's goals and objectives for the year 2007/2008. The following are the top priorities that were developed from their Strategic Planning Retreat:

Organizational Development

1. We want to seek additional funding, through grants, donations, fundraisers, and fees for services.
2. Initiate a marketing and public relations campaign that will communicate the services and mission of the ABCRC.
3. Improve the process for selection of board members and implement a more formal orientation and training for new board members.

Programming

1. Continue successful program targeting the elimination of illegal discrimination in employment, housing, and public accommodations.
2. Represent a voice for those who cannot speak.
3. Grow viably contemporary programs by inviting the community in through forums and workshops designed to keep the ABCRC at the center of community needs and issues.

Education

1. Promote quality education through cultural sensitivity, understanding, tolerance, and leadership training opportunities.
2. Promote inclusiveness of the faith community in the resolution of community concerns.
3. Improve the interaction between law enforcement and the public at all levels of the community.

More specifically for the 2007-2008 year our goals are to:

- Expand our outreach to more diverse communities
  - With your help we would like to hire additional culturally sensitive personnel.
  - This would allow us to increase investigations and testing to eliminate discrimination in these communities.
- Expand the awareness of the Community Relations Council
  - The Council is in the process of developing a marketing committee to promote the services of the council.
  - It is also a goal to add youth members to many of our committees to add their expertise and to grow the council.
- Promote quality education through cultural sensitivity, understanding, tolerance, leadership, and training
  - We currently have an Education Committee, but we want to redesign it for greater involvement
  - Continue our scholarship program – each year the Council awards two scholarships to students in the Asheville City and Buncombe County School Systems
  - Respond to requests for providing specific training in the areas of anti-bullying, gangs, and conflict resolution.

As Accomplishments

- The ABCRC held the second Annual African American-Latino Community Conference. This full day conference provides networking opportunities for the African American-Latino Communities and reduces racial polarization. We were pleased to have Congressman Heath Shuler and Representative Susan Fisher with us and we would like to have all of you in attendance this year.
- Developed the first Annual Law Enforcement Community Relations Award Program. This program's purpose is to develop a close relationship between law enforcement. This award is presented through nominations from the community.
- Secured a new source of funding with the Asheville Housing Authority. The Council will assist residents of the housing communities in community building, transitions to jobs and housing readiness.
- Established a closer working relationship with the religious community. Several meetings were held the organization of Christians for a United Community to partner on goals to reduce racism. Workshops were conducted that address racial tolerance at member churches.
- Investigated and closed with settlements over one hundred housing and employment complaints. These settlements totaled over $40,000, including back pay, lost wages, housing deposits, and other types of compensation.
- Assisted in the relocation of persons in North Asheville, West Asheville, and Central Asheville. The people were generally poor and are currently being relocated due to development. Council has been instrumental in getting developers and the city to assist in relocation. Council also assisted the residents in working with other essential outside agencies that helped with the relocation process.
- Council members were requested to and assisted with the peaceful "One America March" last May. The march involved over 4,000 people moving through downtown Asheville. To our knowledge, there were no incidents of violence reported.
- The Council awarded two scholarships for outstanding community service to two young people. The council has awarded eight scholarships to date.
- The Council was requested to and assisted with the coordinated state of "Black Asheville" conference held on February 17, 2007, at UNC-Asheville.
    - The Council presented this year's Distinguished Service Award to Virgil Smith.

He again thanked Council for this opportunity to speak with them and to share a few highlights of their year. What you have heard was simply the tip of the iceberg and to tell about all that was done would take more than the allotted ten minutes. They do appreciate Council's financial support. He hoped that Council will assist them in providing additional service to an increased segment of population who are not receiving their full services.

On behalf of City Council, Mayor Bellamy thanked Dr. McCallum and the ABCRC for their hard work on behalf of the City of Asheville.

B. AIA DESIGN CENTER PRESENTATION

Mr. Alan McGuinn, Co-Chair of the Asheville Design Center, said that bridging the French Broad is the most important public development decision facing WNC in our lifetime. This project has the opportunity to double the size of downtown Asheville. It provides an opportunity to link urban and economic development to transportation, highways and the community. It also provides an opportunity to connect downtown to west Asheville and Emma.

Showing slides, he reviewed the NC Dept. of Transportation (NC DOT) proposed Alternatives 2 and 3. Both Alternates 2 and 3 mix interstate and local traffic on Patton Avenue, this is against the Community Coordinating Committee (CCC) report. He showed Alternate 5 and Alternate 4. The shortcomings of Alternate 4 are (1) highest cost alternative; (2) excess

number (7) of bridges; (3) complicated interchanges; and (4) excess right-of-way size. The positive elements of Alternate 4 are (1) by bending 240 northward, Patton Avenue is opened with development sized parcels; and (2) with the straightening of Patton Avenue, development and connections can be made to West End/Clingman Avenue Neighborhood, Hilliard and the River.

He reviewed different Smoky Park Bridge scenarios, noting that a new bridge could establish an iconic image parallel to City Hall or the Vance Monument and it could reinforce the culture of place.

The Asheville Design Center's Alternate 4b proposal accomplishes (1) consumes less land; (2) returns right-of-way to the tax rolls; (3) provides for mixed-use development; (4) less impact on adjacent property; (5) allows for connection to local road network; (6) user friendly interchanges; (7) less highway movements; and (8) potential for a signature bridge.

A comparison chart of asphalt, right-of-way total area and cost/acres of asphalt were shown as follows: Alternate 4 - $371,000,000; Alternate 5 - $314,000,000; and Alternate 4b - $150,000,000.

Comparison charts were used to show by the year 2025, the City will have added 20,000 new residents and Buncombe County will have added 80,000 new residents.

We see this as an opportunity for our community and the region in that it will have (1) more usable land for potential development as identified in the 2025 Plan; (2) connecting west Asheville to the downtown; (3) multi-modal integrated transportation; (4) connections to the river; (5) utilizes Brownfield redevelopment; (6) less visual and auditory impact on Montford; (7) increased state, county and city tax base; (8) potential reclaiming of surplus right-of-way; and (9) transformation of the regional economic base.

He outlined the 57 group community stakeholders. Their recommendations are (1) NC DOT Alternates 2 and 3 should not be pursued any further; (2) the Asheville Design Center's 4b should be included in the NC DOT Environmental Impact Statement process; (3) the CCC report and AIA 10 principles of livability must be met; (4) the overall completion date should be maintained and expedited; (5) a multi-disciplinary team (Urban Design, Transportation Planning, Design Engineer, Landscape Architect, Planning) should be commissioned to produce a context sensitive solution; (6) excess right-of-way land should return to the community for development or park space; (7) construction if I-40/I-26 connection should be reprioritized with construction starting prior to the connector; and (8) focus highway resources on local transportation such as improved connection of Emma Road to downtown, improvements to Sweeten Creek, varied transportation options, etc.

The bottom line is that this (1) makes our community more livable; (2) realizes development opportunities; and (3) saves land, time and money.

Mayor Bellamy said that the NC DOT has asked Council to hear their presentation on this issue and that has been scheduled for May 8, 2007. At that meeting, Council will have the opportunity to take action.

Mr. McGuinn said that they had a 3-hour worksession with the NC DOT about a month ago. At that meeting, they didn't say our Alternative 4b didn't work, they said they needed more information to make sure that the scheme does work. So, they have been working to prove that it does work. They could use some help engineering-wise to prove that this really does work. That help could come from the NC DOT, the City or the County. We do need to work with the NC DOT on this process and have it included as one of their alternatives.

Councilman Newman thanked the people who have put in countless hours on this project. This is a specific design that the community can really fight for. The question is, from an

engineering standpoint, does it meet all the standards for a federal interstate project and does it accomplish all of the transportation objectives that are set forth for the project. He would be open for the City of Asheville to help in terms of getting the initial engineering analysis questions answered. If the initial engineering is viable, then the NC DOT can carry it forward and that key information will not be holding the project up.

In response to Councilman Newman, Metropolitan Planning Organization Coordinator Dan Baechtold explained what the process would be if Alternative 4b is found to meet the standards for a federal interstate project.

Councilman Newman asked City Attorney Oast to research the question of how the right-of-way land that the NC DOT acquired years ago (and compensated property owners for that land), would go back to the community if a different alternative is chosen. In addition, he felt that the City needed to develop a process for infill development if a different alternative is chosen.

In response to Council's willingness to help with engineering questions, Mr. Baechtold said that the discussion on May 8 might make it clearer in terms of what the NC DOT is capable of taking on as part of their process vs. what they would need outside assistance with.

When Councilwoman Cape asked what kind of in-house expertise the City could offer in terms of GIS or engineering support, Mr. Baechtold felt that the information the NC DOT would probably need would be a pretty specialized type of service from probably an engineering firm that is familiar with big highway design, and familiar with the North Carolina process of environmental issues.

It was the consensus of Council that staff spend the time between now and May 8 to see what might be needed and have some options available for Council to consider, based upon what they hear from the NC DOT. Mr. Baechtold can then also have available a list of firms that may be of some assistance.

At 6:44 p.m., Mayor Bellamy announced a short recess.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REVISING THE SUBDIVISION STANDARDS

ORDINANCE NO. 3466- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REVISING THE SUBDIVISION STANDARDS

Mayor Bellamy opened the public hearing at 7:04 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) regarding revisions to the subdivision standards. This public hearing was advertised on April 12 and 20, 2007.

Staff has noted that the subsections of the UDO related to subdivisions have remained virtually unchanged since the UDO was adopted in 1997. Much of the current code references standards or processes that have changed over the last decade and is in need of updating. While making these updates, staff has taken this opportunity to try to re-organize and simplify the information to improve clarity and comprehension. Lastly, as the City of Asheville grows and evolves, new citywide goals and objectives have been adopted; policy direction has been followed with the introduction of several new standards, along with the evaluation of another, to better guide residential development in the City.

The following is a summary that describes the changes proposed by the planning staff. Some of the more significant changes/additions have been identified with an asterisk (*).

Corrections – Existing standards were closely reviewed for inaccurate or lost references. Those references have been removed (where appropriate), corrected, or modified to reflect current standards and practices.

Remove Engineering/Construction Standards – these standards are covered separately in the *Standards and Specifications Manual*.

Update Definitions – add new definitions for "Planned Community" and "Gated Community".

**Re-organization/Re-formatting* – As with other recent amendments, all staff involved in the review of subdivisions agreed that it was in the City's best interest to produce a revised code that was easier to understand and apply. Paring down and re-organizing the content of the section was proposed by group of planning staff members who worked together to develop an outline that was easier to read and follow. Much of the former code was simply "cut-and-pasted" into the new outline with some new information added where necessary.

* *Establish a threshold for Level III Review for Large Single Family Subdivisions* – Heightened awareness and concern over the real and potential impact of large residential single family subdivisions has resulted in the requested consideration of those developments as Level III reviews. No special conditions beyond those already required for Conditional Use Permits (CUP's) are proposed.

Add New Compatibility Standard for 4-lot Homes. Staff is proposing to add new standards that would strengthen compatibility between new infill homes on small 4-lot subdivisions and the existing homes in the area.

Re-emphasize Enforcement of Subdivision Review by Plat – Currently, the division and transfer of land by deed is prohibited and constitutes a Class 1 Misdemeanor. This standard has been relocated to a more prominent and frequently referenced section of the code.

Provide timeframes for re-submissions and revisions to plats before re-application is required – Currently, no timeframe is provided and establishing one will aid surveyors and staff to properly process a request.

In addition to these proposed changes, staff also evaluated a recommended change to our *Alternative access for small (four single family lots or less) subdivisions* (Sec. 7-11-1(j)2) that would eliminate a separation requirement between these small subdivisions. The alternative standards for small subdivisions were created to encourage small-scale residential infill development that would have much lighter road and access requirements for the creation of new single family lots. A separation requirement of 1500 feet between these subdivisions was intentionally added to control the proliferation of lots with non-standard access and infrastructure. After consideration (see pros and cons below), staff is not recommending that the separation requirement be eliminated and is instead proposing to amend the established subdivision modification process to review alternative requests on a case by case basis; these requests would be reviewed and approved by the Technical Review Committee. Should the Commission wish to explore this further, staff would recommend the consideration of an alternative that would either 1) reduce the separation requirement, or 2) establish a standard(s) for waiving the separation requirement.

Lastly, City Council provided direction to staff to bring forward an amendment that would prohibit gated communities. This request was incorporated into an earlier draft of the new subdivision standards; however, at their March meeting the Planning & Zoning Commission

requested that this portion of the amendment be removed from the rest of the subdivision standards for separate consideration at a later date. Additionally, the Commission requested that alternatives that would restrict gated communities in lieu of a prohibition be presented. Most recently, the Commission reviewed this separate amendment for gated communities at their April 4th meeting where the amendment was once again continued to allow staff additional time to investigate a more defensible set of standards. A revised draft will be presented to the Commission at their upcoming May 2nd meeting.

In summary, this ordinance is intended to:

1. Replace the existing *Subdivision Plat Approvals* Section (Sec. 7-5-8) in its entirety, with a corrected and updated version. This version includes text that would allow for reduced separation between 4-lot subdivisions to be considered as a 'Subdivision Modification'.
2. Replace Article XV *Subdivision Regulations* in its entirety, with a newly revised and updated version.
3. Amend Article II to include a definition for "Planned community"
4. Amend Article XI (Sec.7-11-1(j)2) to include new standards for compatibility of new structures (Commission may also choose to amend this same subsection to change separation requirements).
5. Amend the existing *Site Plan Review* Section (Sec. 7-5-9) to establish a Level III review for subdivisions over 50 lots.

This draft has been circulated to CIBO, CAN, and CREIA along with other interested parties.

Pros:
- Provides a format that is easier to read and comprehend.
- Better reflects City adopted goals/objectives and current practices.
- Provides opportunity for influence on larger and higher impact subdivisions.
- Ensures the compatibility of new structures built on 4-lot subdivisions with other homes in the area.

Con:
- Large subdivisions would require a public hearing.

Eliminating the Separation Requirements for 4-lot Subdivisions

Pros:
- Will increase the opportunity for infill lots off of private drives
- Will require less impact from necessary infrastructure (however, there are no site disturbance limitations for single family home development)
- Will result in infrastructure cost savings

Cons:
- Will result in a significant increase in the number of lots with non-standard access
- Will result in a significant increase in the amount of non-standard (reduced) infrastructure that could not be maintained by the city (homebuyer to incur cost of maintenance)
- Will likely result in less connectivity, or opportunity for connectivity between subdivisions
- Cannot guarantee that lighter infrastructure requirements would result in a reduced impact to the overall site, or that cost savings incurred by developer will be passed on the homebuyer

Staff recommends City Council approve an ordinance amending Chapter 7 of the Code of Ordinances the City of Asheville establishing subdivision standards.

Mayor Bellamy closed the public hearing at 7:10 p.m.

Councilman Mumpower moved to approve the amendment to the UDO to revise the subdivision standards. This motion was seconded by Councilman Newman.

There was considerable discussion, initiated by Councilwoman Cape, about the separation requirement of 1500 feet between the subdivisions. Councilwoman Cape requested further information on the reasoning of the arbitrary 1500 foot separation since she felt this would be a good tool to create affordable housing, like cottages, and would allow for smaller roads, configurations and still allow us to utilize some pieces of land. She suggested that if there was another subdivision within 1500 feet and there were reasons why another one may be good in this area, perhaps they would have to get the community in the area to okay the project.

When Councilman Mumpower wondered if there was another objective way to limit the abuses of the 4-lot subdivisions, Ms. Tuch said that each case is different. The separation was a simple, easy to apply method for staff to control that unnecessary proliferation with the possibility for unique or special circumstances to be considered through the modification process.

In response to Councilman Mumpower, Ms. Tuch said that the 1500 feet separation was a figure arrived at by the Engineering Department, but it was probably an attempt to control the proliferation of 4-lot subdivisions.

Councilwoman Cape could agree with the ordinance as written now, if staff would have a willingness to come back and give some thought to what some of these considerations could be, e.g., not two built side-by-side on the same street, etc. She asked them consider a set of guidelines, not just an arbitrary number. Ms. Tuch said that they can establish some basic guidelines as a hand-out for developers. She also noted that the subdivision modification section of this amendment does sort of describe what justifies a modification.

Mayor Bellamy asked that as we look at whatever criteria there is for 4-lot subdivisions, they also have landscaping requirements so if there is not the 1500 foot distance that there be some type of buffering between the 4-lot subdivisions. Ms. Tuch said that the landscaping ordinance will be back before Council on May 8, 2007.

Councilman Mumpower was not comfortable with moving forward as he felt the 1500 foot separation is an arbitrary number. Therefore, he withdrew his motion to approve the ordinance.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved to approve Ordinance No. 3466. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 332

Mayor Bellamy announced that the following three public hearings overlap. Therefore, it was her suggestion, and Council's consensus, to hear the staff presentations, open and continue the public hearings after public comment and Council questions, and vote on the three amendments separately on May 8, 2007, which will give City staff the opportunity to allow staff time to respond to the public's and Council's questions. In addition, Mayor Bellamy asked that a page be set up on the City's website for citizens to review the questions and responses. It was noted that when the public hearing is continued on May 8, that the public comments will be limited to new information only.

PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REVISING THE OPEN SPACE REQUIREMENTS

Mayor Bellamy opened the public hearing at 7:34 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) revising the open space requirements. This public hearing was advertised on April 12 and 20, 2007.

This code amendment is intended to implement goals, objectives and tasks of the City Council's Strategic Operating Plan (SOP) related to the Natural and Built Environment. The SOP proposes enhanced recreational facilities, especially greenways as well as a fee-in-lieu program. The UDO currently contains requirements for open space provision for property being developed or redeveloped for residential and for tourist accommodation purposes. These requirements note the connection between development and loss of open space, and include measures to compensate for this loss. In practice, however, the current requirements are not especially effective in providing meaningful compensatory open space and may, in some cases, actually be at odds with City smart growth policies that promote a more urban development pattern. The proposed ordinance provides a more balanced approach to open space provision by better relating it to the use proposed for the property, the associated zoning district or districts, and any related park, greenway and open space plans and policies. Additionally, there is greater flexibility created by providing for fee-in-lieu of open space.

In summary, open space (1) expands open space requirements into smaller developments; (2) recognizes the qualitative differences between urban open space amenities and suburban open space amenities; (3) eliminates the open space "penalty" for denser residential or mixed use developments; (4) provides the developer with a fee-in-lieu option; and (5) helps implement the Greenway Master Plan.

The amendment has been routed to CAN, CREIA, and CIBO, among others, for review and comment.

Pro:

- Creates a simpler, more flexible set of open space regulations.

Con:

- Some projects may not be pursued due to expense of compliance.

Staff recommends City Council approve an ordinance amending the UDO revising the open space requirements. The Planning and Zoning Commission recommends approval of the proposed code amendment by a unanimous vote (6-0).

PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE CREATING RETAINING WALL REQUIREMENTS

Mayor Bellamy opened the public hearing at 7:34 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) creating retaining wall requirements. This public hearing was advertised on April 12 and 20, 2007.

Since the steep slopes and ridgetop ordinance will result in the increased construction of retaining walls to minimize grading and land disturbance, a separate ordinance regulating retaining walls has been developed in concert with that ordinance, although the retaining wall requirements will apply to a broader range of circumstances than just steep slope and ridgetop situations. We feel there needed to be some requirements to screen the walls, make them more attractive and to address their visual impacts. If you have retaining walls at a certain height, there are landscaping requirements that can be one of two kinds (1) you can provide foreground landscaping or (2) you can provide an attached green screen to the retaining wall to address the

appearance issues. In addition, there are provisions to allow the use of either the natural or artificial stone to serve as an aesthetic issue associated with retaining walls.

The amendment has been routed to CAN, CREIA, and CIBO, among others, for review and comment.

Pro:

- Provides a mechanism to address the impacts of retaining walls.

Con:

- Will likely add to the cost of retaining walls.

Staff recommends approval of an ordinance amending the UDO creating retaining wall requirements. The Planning and Zoning Commission recommends approval of the proposed code amendment by a unanimous vote (7-0).

PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING STEEP SLOPE AND RIDGETOP REQUIREMENTS

Mayor Bellamy opened the public hearing at 7:34 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance (UDO) deleting hillside as development requirements and replacing them with steep slope and ridgetop development requirements. This public hearing was advertised on April 12 and 20, 2007.

City Council has requested that staff develop new regulations pertaining to steep slope and ridgetop development. Council direction was to strengthen the regulations and broaden their scope. Steep slope and ridgetop development regulations, to be effective, must take into account a wide variety of factors. These factors include:

- Percent of slope
- Extent of grading
- Width of road corridors
- Residential density
- Nonresidential intensity of development
- Structure height
- Preservation of trees and other significant vegetation
- Geotechnical analysis for very steep slopes and identified landslide hazard areas

The ordinance has been crafted to account for these factors. City staff has developed this ordinance by examining "best practices" in numerous communities across the country. We have reviewed the ordinance components with a focus group of design professionals. We have received comments from the public via a well-attended public meeting and through email and other correspondence. We have also examined development in and around Asheville to ascertain what makes some steep slope development relatively innocuous and other such development conspicuous.

This ordinance is intended to replace the hillside requirements (Section 7-12-4) and augment the protected mountain ridges regulations (Section 7-12-3).

To summarize the Steep Slope and Ridgetop ordinance, it proposes to:

- Provide definitions for technical terms

- Designate steep slopes and ridgetop areas
- Apply to virtually all new development and to additions of a certain size
- Establish grading allowances based on degree of slope
- Establish road corridor width standards
- Provide standards for artificial slopes
- Limit structure height in steep slope and ridgetop areas
- Require preservation of trees and stands of rhododendron and mountain laurel
- Provide density and intensity limits
- Require geotechnical analysis
- Allow density and intensity bonuses for clustering or location of development on less steep areas

Issue of Concern:

Areas to be designated as "steep slope areas". Staff has been directed by Council to strengthen and broaden the steep slope requirements. Pursuant to this direction, we initially proposed areas previously designated as "hillside" areas (2,220 feet or higher in elevation and 15% or greater in slope) and added areas below 2,220 feet with a slope of 25% or greater. Once the impact of the added language was determined for nonresidentially-zoned properties (such as the Hospital), we revised the added areas to cover residentially-zoned areas only. This issue was considered by the Planning and Zoning Commission on several occasions, the last of which was April 4, 2007. After significant discussion, the Commission voted 6-1 (Byers opposed) to recommend the language in the ordinance apply the "steep slopes" designation to areas above 2,500 feet in elevation and having slopes of 25% or greater. This recommendation would strengthen the requirements for areas covered by the "steep slopes" designation but would reduce the area covered by such designation below either the staff proposal or the existing "hillside" regulations. The Commission was convinced by public comments that the areas covered by their recommendation were the most significant areas in terms of public safety and viewshed impacts, that there were potential impacts on affordable housing and general development cost, and that there were areas covered by the hillside requirements (particularly areas such as the Pioneer Welding site and parts of The Ramble) that would be negatively impacted by the staff proposal. He showed three photographs illustrating the effect of the adjustment in elevation on Reynolds and Town mountains.

Staff has concerns about how to align this proposal with the general charge from Council to strengthen the requirements and broaden their scope. This proposal strengthens the requirements but limits their scope. Alternative options for Council consideration are:

- Retaining the staff proposal from March 7 ("hillside" plus residentially-zoned areas below 2,220 feet with a slope of 25% or greater).
- Retaining the "hillside" area as the sole "steep slope" area (in other words, simply strengthening the requirements in the area already regulated).

The amendments have been routed to CAN, CREIA, and CIBO, among others, for review and comment.

Pro:

- Provides a more comprehensive and effective approach to steep slope and ridgetop development regulation.

Con:

- Will likely result in increased cost of development on steep slopes and ridgetops.

Staff recommends approval of the proposed code amendment after due consideration of the appropriate designation of "steep slope" areas. The Planning and Zoning Commission recommends approval of the proposed code amendment by a vote of 6-1.

He noted that depending on Council action, some tables, charts and illustrations in the Steep Slopes and Ridgetop ordinance will require adjustment prior to codifying.

On this issue alone since September, 2006, there have been (1) four Planning & Zoning Commission meetings; (2) one Planning & Zoning Commission half-day retreat; and (3) one community meeting.

Steep slopes & ridgetops - (1) where to apply; and (2) what to regulate: density, amount of grading, amount of tree removal, height and width of road corridor; height of structures; and appearance of retaining walls.

Where to apply - steep slopes: "Hillside" areas (previously regulated) - areas above 2220 feet in elevation and having slopes greater than 15%. Other "steep slope" areas - areas not designated as "hillside" but having slopes greater than 25% in residential zones. Using a map, he showed the approximate steep slope qualifying areas.

Where to apply - ridgetops: (1) "protected mountain ridges" (previously mapped and regulated); and (2) areas within 100 vertical feet of a ridgeline that is 500 or more feet above the adjacent valley floor when the ridgeline is designated watershed boundary.

What to regulate - density (1) regulate density allowed based on slope of property; and (2) standard density in RS-2 example is 2 units per acre. He used a slide showing the percent of slope in the City of Asheville and Buncombe County, noting that Buncombe County doesn't start their regulations until 25% slopes.

What to regulate - grading - regulate percent of grading allowed based on slope of property. He used a slide showing the percentage slope in the City of Asheville and Buncombe County.

Associated with grading is the cut and fill slopes that are created. The staff proposal is: (1) 1.5:1 cut slope, provided the vertical dimension is held to a maximum of 30 feet and "reforestation" vegetation is planted; and (2) 2:1 fill slope, provided the vertical dimension is held to a maximum of 40 feet and "reforestation" vegetation is planted.

What to regulate - tree removal (1) protection of trees on both the uphill and downhill sides of the sites to be developed; and (2) preserve both larger trees and large groupings of mountain laurel and rhododendron.

What to regulate - road corridor width. Our standards determine how wide that is width is because we might require sidewalks or an area outside the street pavement area for utilities. We think it would be appropriate to include a provision that would really limit that right-of-way to 32-40 feet right-of-way with a 20 foot pavement area.

What to regulate - height - measure height to the effective scale of the building and provide incentives - (1) height bonus for darker buildings (LRV =/<25) with 50 foot and downslope setback; and (2) bonus does not apply to ridgetop development.

The following individuals spoke in support of staff's recommendation of "hillside" plus residentially-zoned areas below 2,220 feet with a slope of 25% or greater for various reasons, but basically in order to ensure responsible development on high profile, fragile areas. There was a request (1) for a mandatory geotechnical analysis of any slopes of 25% or greater that are proposed for development in areas designated as high hazard or moderate hazard on the

Buncombe County Slopes Stability Index Map prepared by the N.C. Geological Survey; and (2) for factual data (science based information, altitude study, etc.) to be provided by experts.

Dr. Peter Gentling, north Asheville resident
Mr. Mike Lewis, north Asheville resident
Ms. Mia Evans, north Asheville resident
Mr. Aaron Thomas, Asheville resident
Mr. Jay Quinn, representing the Grove Park Sunset Mountain Neighborhood Association
Mr. Joel Bassett, Asheville resident
Ms. Heather Raybum, north Asheville resident
An Asheville resident
Mr. Joe Minicozzi, President of the Coalition of Asheville Neighborhoods
Ms. Beth Trigg, Montford resident
Mr. James Sheeler, Asheville resident
Mr. Jane Mathews, Asheville resident
An owner of steep slope property

The following individuals spoke in support of the Planning & Zoning Commission's recommended language to apply the "steep slopes" designation to areas above 2,500 feet in elevation and having slopes of 25% or greater for various reasons but basically in order to support the balance issue between sustaining our tax base in the community as well as looking at protecting the quality of life in our community:

Ms. Laura Copeland, representing the Asheville Area Chamber of Commerce
Mr. Paul Zurick, representing Biltmore Farms
A representative from Mountain Council for Accountable Development
Mr. Shawn Sullivan, licensed general contractor and Vice-President of the Asheville Homebuilders Association

Ms. Suzanne Malloy suggested Council take the existing proposal of 2220 feet up to 2500 feet, exclude the density requirements, and apply the grading standards, tree protection standards, alternative landscaping standards, some height standards, etc. Doing that, she feels that Council will actually be able to protect those areas and increase the hillside development ordinance standards.

Mr. James Wood, Asheville resident, commented on retaining walls. He commented as follows: (1) requested to put a maximum height, length and square footage on retaining walls; (2) make sure that retaining walls don't become eyesores from roadways; (3) request for more dense planting requirements to adequately cover the retaining wall; (4) American holly should also be preserved; and (5) planting of trees and shrubs is better than attaching a green screen.

Ms. Barber Melton, member of the Flood Damage Reduction Task Force, supported the staff's recommendation of "hillside" plus residentially-zoned areas below 2,220 feet with a slope of 25% or greater and read the following resolution adopted by the Task Force on April 20, 2007: "Resolution supporting City of Asheville Planning Department staff's recommendation to City Council regarding steep slope ordinance. Whereas, Asheville City Council established the Flood Damage Reduction Task Force in June 2006; and, Whereas, the Flood Damage Reduction Task Force was charged with to review and make recommendations to City Council on ways to reduce damage due to flooding; and, Whereas, City Council is considering amending the Unified Development Ordinance as it relates to steep slopes and ridge top development; and, Whereas, the Flood Damage Reduction Task Force has determined, based on expert presentation, that the development of steep slopes can have an impact on flood damage downstream. Now, therefore, be it resolved by the Flood Damage Reduction Task Force that they: Request that Asheville City Council approve City of Asheville Planning and Development staff's recommendation regarding the Steep Slope Ordinance, particularly as it relates to requiring these regulations impact properties over 2220 feet in elevation with a 15% average slope."

Mr. Robert Cox, owner of a steep slope lot on Windswept Drive, urged Council to not apply these standards to previously approved subdivisions.

An owner of steep slope property voiced the following concerns: (1) density bonuses are too great; (2) no mandatory requirement for using the low light reflective value materials and colors; (3) against the alternative landscape plan option; (4) fee in lieu of for open space requirements.

The following questions were raised by individual Council members, some of which were responded to by Mr. Shuford: if a density bonus is sought through an easement on sensitive areas, does that mean we would place a conservation easement on the property with a land trust organization or something less formal; was any consideration given to looking at a more focused area of the actual land that would be graded or the actual footprint of the development, opposed to looking at the entire size of the property; can you build multi-family developments up to 8 units in single-family zoned areas in order to encourage clustering; request for additional information on slide potential based on grades and examples in Asheville where the property is 25% or less where people have had serious problems with slides; would every development automatically get the density bonuses because by definition they have to preserve the amount of space that the steep slope ordinance requires them to set aside; is it possible to make the policies around things that will help developments blend in mandatory rather than incentives; request for additional information on what we can incentivize and what we can make mandatory; what are the options to strike a balance between the ability to construct affordable housing and provide additional protections for our ridges and steep slopes; request for comparison information on (1) if the City passes the Planning & Zoning Commission's recommendation, will Buncombe County have stricter regulations than the City and (2) if the City passes the staff's recommendation, will Buncombe County have stricter regulations than the City; under the staff's recommendation, how many existing homes would not have been built; request for Chamber of Commerce to provide Council with a list of names and contacts for the experts they consulted in order to support the Planning & Zoning Commission's recommendation; request to find out the particulars of the development on Cisco Mountain; could the development on Reynolds Mountain happen under our current hillside regulations; is the extensive road grading on Reynolds Mountain in the City of Asheville; data on whether elevation is really related to soil stability; would like an outside expert opinion on a grade reduction of the geotechnical analysis requirement; how many total acres are there in the City of Asheville; what is the process for pre-existing subdivisions and is there an opportunity for a variance or an appeal process for the owner; request for additional information on green screens for retaining walls and are there any existing green screens in Asheville; request that everyone share the educational research; is there a way to separate out the viewshed protection elements from the personal safety elements; need to come up with better mapping for the overlay hillside, steep slope process that is not just a number, but has some relevance to where there are good, sensible places to build in the community; information on the possible creation of development encouragement zones; how can we accommodate the regional beauty of our slopes and still have development where it needs to be done; request to find a way to restrict the type of development near the French Broad River (homes practically built on stilts); need to have steep fines or stop work orders if situations similar to the mudslide on Cisco Road happens; is our stormwater ordinance strong enough to prevent similar situations on Cisco Road; request for additional information on why the recommended retaining walls are so tall; how many houses do we have within Asheville that are in danger of sliding; what is the history of the Sunset Mountain development; request for information on taking control over other people's property without compensation; since the Town of Boone is currently in a lawsuit over their ridgetop and hillside ordinance (which is more stringent than ours), information was requested about whether the City would have to compensate developers or owners because they couldn't reap the total benefit of their land; and whether compensation is due to property owners if the City down-zones their property.

Mayor Bellamy asked that Council submit their questions in writing to staff in order to have them responded to and placed on our website.

In response to Vice-Mayor Jones, Mr. Shuford said that parts of Reynolds Mountain are in the City of Asheville. The area was subdivided in the County around 1999 and a portion was brought into the City. There was an extraterritorial jurisdiction area discussion with the Town of Woodfin about what part of Reynolds Mountain would go into Woodfin and what part would go into Asheville. There is a portion that is in Asheville. In fact, there are two homes that are at the top of the ridge that are very prominent. Those are in the City of Asheville, but again the lots were created in the County and not under the City hillside regulations. A good portion of Reynolds Mountain, since that time, has been annexed into Woodfin and the development that is primarily seen from US 19-23 is in the Town of Woodfin. He also noted that one of the reasons why portions of Reynolds Mountain went into Woodfin was to avoid our infrastructure standards.

Mayor Bellamy requested more stringent landscaping requirements in the subdivision regulations and for infill development. She felt that requiring additional landscaping is necessary even if the uses are the same. In addition she asked that we limit speculative grading as much as possible.

Councilwoman Cape moved to continue the three following public hearings until May 8, 2007: (1) revisions to the open space standards; (2) creation of retaining wall requirements; and (3) revisions to the steep slope and ridgetop requirements. This motion was seconded by Councilman Freeborn and carried unanimously.

At 9:57 p.m., Mayor Bellamy announced a short break.

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 07-90- RESOLUTION ESTABLISHING ENERGY AND CONSERVATION GOALS AND BENCHMARKS FOR THE CITY OF ASHEVILLE

RESOLUTION NO. 07-91- RESOLUTION ADOPTING LEADERSHIP IN ENERGY & ENVIRONMENTAL DESIGN (LEED) STANDARDS

Public Works Director Mark Combs said that this is the consideration of a resolution establishing energy and conservation goals and benchmarks for the City of Asheville and consideration of a resolution adopting Leadership in Energy and Environmental Design (LEED) Standards.

The Sustainability Advisory Committee on Energy and the Environment (SACEE) has completed City Council's directive on December 12, 2006, to (1) recommend energy conservation goals for City operations; and (2) recommend level of LEED certification for new City buildings.

The SACEE has worked diligently with ICLEI staff, experts in the field, and with other municipalities across the U.S. to formulate pragmatic and thoughtful recommendations which will benefit Asheville and its citizens. Two separate resolutions have been drafted outlining how staff should implement each goal.

For Directive 1 (energy conservation goal), the annual City energy usage snapshot is (1) electrical energy costs for 2001-02 is $2,989,127; and (2) fuel costs (gasoline, diesel, CNG) for Fiscal Year 2006 is $1,122,950 which equals 536,614 gallons. The recommendation is to reduce greenhouse gas emissions by City operations by 2% per year from 2007 emissions measurements until we have achieved an 80% reduction from baseline year emissions (2001-02). That would include (1) developing a Strategic Energy Management Plan; and (2) create a Sustainability Coordinator position to implement program. The rationale would be (1)

benchmarked other cities nationwide; (2) received input from ICLEI staff; (3) goal of 2% per year is reasonable and achievable; and (4) 80% cuts in emissions are being referred to as a "solution commensurate to the scale of the problem."

In summary, Directive #1: Define specific energy and conservation goals for Asheville: The SACEE recommends a 2% per year reduction (from Fiscal Year 2006-07 levels) until we reach an eighty percent (80%) overall reduction.

Pros:

- 2% is a pragmatic, attainable goal which considers staff and resource limitations
- Any change in culture is best implemented in slow, incremental steps
- Reducing energy usage 'avoids' rising energy cost expenses to the organization
- Asheville is taking a leadership role in the community (to share successes)

Cons:

- Capital funding may be required to accelerate investment in cleaner and more efficient vehicles, equipment and building systems.

This action conforms with the Strategic Operating Plan in Natural & Built Environment, #33.

He explained that the LEED is the national green building standard developed by the U.S. Green Building Council. He then explained the LEED point system and using a chart explained the different LEED certification levels and whether it is more expensive to build green. For Directive 2 (LEED standards for City buildings), the recommendations are (1) new, occupied City buildings greater than 5,000 sq. ft. designed and built to achieve LEED Gold Certification level; (2) new, occupied City buildings less than 5,000 sq. ft. be designed and built to achieve LEED Silver Certification level; and (3) for buildings greater than 5,000 sq. ft., if energy savings payback period is greater than 10 years, then design and built to LEED Silver Certification level. The rationale would be (1) studies indicate that the cost premium of the Gold level over the Silver level is only 0.3% or less; (2) a "Gold" building will lead to a much higher cost savings than a Silver certified building, outweighing the additional cost; and (3) community stakeholders have indicated that they want Asheville to be a leader in sustainability practices.

In summary; Directive #2: Develop Specific guidelines for future municipal facilities to be LEED certified, the SACEE recommends the following:

a) Buildings greater than or equal to 5,000 square feet will be built to LEED 'Gold' certification level;
b) Buildings less than 5,000 square feet will be built to LEED 'Silver' certification level; and,
c) Any building which cannot recoup the additional expenses for LEED construction standards within ten (10) years will be built to LEED 'Silver' certification level.

Pros:

- For a modest investment in building design and construction, significant energy savings will be realized
- As energy costs continue to go up, homes and commercial buildings (lease) which use less energy will financially benefit both owners and occupants
- Less energy production results in cleaner air (better community health, tourism, etc.) and conserves precious energy resources
- LEED-type building practices is a growing world-wide trend

Cons:

- Capital funding may be required for the additional costs in design and construction

This action conforms with the Strategic Operating Plan in Natural & Built Environment, #34.

The Sustainability Advisory Committee on Energy and the Environment recommends City Council approve a resolution establishing energy and conservation goals and benchmarks for the City of Asheville and a resolution adopting leadership in Energy an Environmental Design (LEED) Standards.

Mr. James Wood hoped that the City pushes for Gold standards and it sends a strong message.

In response to Vice-Mayor Jones, Mr. Combs said that LEED is becoming the prominent type of building culture and as that culture gains ground the building materials are far easier to get a hold of and volume is driving down the price.

Councilman Freebom was interested in seeing what our energy costs are today as an organization and if we reduce our gas emissions by 2% per year, how will that affect our bottom line. Co-Chair of the Sustainable Advisory Committee on Energy and the Environment Margie Mears said that they will provide Council with those numbers, as they are still gathering benchmark material. They feel that the first year savings is in the order of $80,000 or more.

Councilwoman Cape felt that the Council did a great job in selecting people for this Committee. They did the research Council requested and she commended the process.

There as a brief discussion, initiated by Councilman Mumpower, about additional fire stations being LEED certified.

Councilman Mumpower felt that if the numbers are correct, it wouldn't make sense to do anything but what is being proposed. On the other hand, the 2% per year until we reach an 80% reduction in a City that is anticipated to grow by 25% during that period, doesn't seem realistic, but arbitrary. He hoped this is not another fantasy goal. He would also speak against the Sustainability Coordinator. He wondered why the City Manager is not already challenging every department to look for ways to save money on energy.

City Manager Jackson said that it is not new that our organization is sensitive to energy costs and it's not new that our organization sets goals for economizing, fuel usage and evaluating ways to make our buildings more efficient. We are a high performance organization, but we have been short on the tracking systems and overall arching plans for these kinds of goals. He felt the Committee has been very beneficial and would be happy to work with the Committee to take this to the next level.

Councilman Newman felt this is a real important commitment the City is making. He believes there are huge opportunities for energy and economic savings, but it won't be easy. He said that the 80% reduction goal is not arbitrary, but based on what the large majority of the recycling community is telling us that we need to do in order to avoid the serious impact of global warming. By establishing this goal, we need our City employees to think about what we can do to reduce energy but we also need to the community to think about ways to be involved as well.

On behalf of Council, Mayor Bellamy thanked Councilwoman Cape for her leadership on this issue. She felt the goals are realistic and are based on good data. She asked that the next step for the Committee be to develop an education program for our community to be presented to Council. We need to make sure that community is involved and that they understand why it's so important to be involved. She suggested they use the Government Channel, eNews, and flyers.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Newman moved for the adoption of Resolution No. 07-90, establishing energy and conservation goals and benchmarks for the City of Asheville. This motion was seconded by Councilman Freeborn and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 316

Councilman Mumpower moved for the adoption of Resolution No. 07-91, adopting the LEED Standards (but not create a Sustainability Coordinator position to implement Strategic Energy Management Plan at this time, but include that discussion during the budget process). This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 317

B. RESOLUTION NO. 07-92- RESOLUTION AUTHORIZING SUBMISSION OF THE CITY'S CONSOLIDATED ANNUAL ACTION PLAN FOR 2007-08 TO THE U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

At the request of Mayor Bellamy, Councilwoman Cape moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Mumpower and carried unanimously.

At this time, Mayor Bellamy turned the gavel over to Vice-Mayor Jones and left the meeting.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution authorizing submission of the City's Consolidated Annual Action Plan for 2007-08 to the U.S. Dept. of Housing and Urban Development.

The City expects to have available $2,184,696 in CDBG funds and $1,685,274 in HOME funds to allocate for housing and community development activities in the fiscal year beginning July 1, 2007. The City's Housing and Community Development Committee and the Asheville Regional Housing Consortium have made recommendations for allocating these funds to 39 projects.

A summary of the draft Action Plan was published on March 25. A public hearing was held on April 10. With the end of the required 30-day comment period, staff asks that Council take action to approve the plan on April 24. The plan is due to be submitted to HUD by May 12.

Pros:

- Allocates $3,869,970 in compliance with federal rules and enables the City to utilize these funds
- Reflects the carefully considered recommendations of the City's Housing & Community Development Committee and the Asheville Regional Housing Consortium
- Directly addresses most of the priorities set out in the Strategic Plan
- Leverages other funding in the ratio of $9.40 for every $1 of CDBG and HOME funds

Cons:

- It is not possible to fund all of the applications received at the level requested.
- Funding for four programs is partially dependent on receipt of program income from a projected land sale.

Staff recommends City Council approve a resolution authorizing submission of the City's Consolidated Annual Action Plan for 2007-08 to the U.S. Dept. of Housing and Urban Development.

Councilman Mumpower said that we about to take approximately $4 Million from the federal government, and even though there are some good things in this package, we are taking money from people who don't have that money (they are about $7 Trillion in debt), and will speak against the motion just on that basis.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-92. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 – PAGE 319

At this time, Mayor Bellamy re-entered the meeting and Vice-Mayor Jones turned the meeting back over to Mayor Bellamy.

VI. NEW BUSINESS:

A. RESOLUTION NO. 07-93 - RESOLUTION SUPPORTING THE REQUEST OF RENAMING A SECTION OF LONG SHOALS ROAD BETWEEN I-26 AND NC HIGHWAY 191 TO "SERGEANT JEFF HEWITT MEMORIAL HIGHWAY"

Mayor Bellamy said that this request came from Representative Charles Thomas who is working with the Buncombe County Sheriff's Department. She said that in the past, the N.C. Dept. of Transportation has only named bridges for fallen troopers or law enforcement officers. Since there is a bridge on the same road in South Asheville, they have asked that City Council be open to either a bridge or a highway.

Said letter from Buncombe County Sheriff Van Duncan read that "on April 4, 2004, Buncombe County Sheriff's Office Sergeant Jeffrey T. Hewitt was killed in the line of duty while attempting to serve a mental commitment order in southern Buncombe County. Sergeant Hewitt was fatally wounded by a shotgun blast after being ambushed as he and other members of the Sheriff's Office approached the respondent's residence. Sergeant Hewitt's actions on that fatal night possibly saved the lives of the other Deputy Sheriffs. Sergeant Hewitt was an 11-yar veteran of the Sheriff's Office and a member of the Sheriff's Emergency Response Team as well as a 6-year veteran of the United States Marine Corps, serving as a Sergeant with the Military Police during Operation Desert Storm. Sergeant Hewitt's life tragically ended in the same community that he not only worked, but had also lived for a number of years with this wife Tracie and stepson Taylor, who continue to reside there. The Buncombe County Sheriff's Office requests that the section of Long Shoals Road (NC Highway 146) between I-26 and NC Highway 191 be renamed the "Sergeant Jeff Hewitt Memorial Highway" in memory of the service and dedication Sergeant Hewitt provided the Sheriff's Office as well as the citizens of Buncombe County. Long Shoals Road is a section of highway Sergeant Hewitt traveled every day, not only in a patrol car, but with his family. Tracie and Taylor continue to travel this road daily. Renaming this section of road the "Sergeant Jeff Hewitt Memorial Highway" will serve as a constant reminder of the ultimate sacrifice Sergeant Hewitt made in order to ensure a better quality of life for the citizens of Buncombe County."

Councilman Mumpower said that he fully supports honoring Sergeant Hewitt, but recalled that the City has, or is in the process of naming the park at the new Wal-Mart location in his

memory. He questioned doing both because there are others who have died in Iraq and Afghanistan who have made sacrifices as well.

Vice-Mayor Jones would support moving forward with this resolution as she felt the portion of the highway would have a greater significance for his family.

Councilman Davis noted that the Asheville Police Department was also involved in the accident of Sgt. Hewitt and should be commended for their work.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Davis moved for the adoption of Resolution No. 07-93 and asked City staff to research the memorial park at the new Wal-Mart location so that Asheville is only providing one memorial recognition for Sgt. Hewitt - and that recognition would be this request by Representative Thomas. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 30 – PAGE 310

VII. OTHER BUSINESS:

A. SALES TAX DISCUSSION

Mayor Bellamy said that on April 11, 2007, City Attorney Oast sent identical letters to Senator Martin L. Nesbitt Jr., Senator Tom Apodaca, Representative Susan C. Fisher, Representative Bruce Goforth, and Representative Charles C. Thomas expressing Council's position on matters relating to local taxation, tax equity, and the current Sullivan Act litigation.

Councilwoman Cape said that Council needs to have the discussion of (1) if we can settle the conditions that we asked for in Resolution #2 of Resolution No. 07-79, how would we determine to use the sales tax for the benefit of the community; and (2) if this tax money does come forward, what would we use it for.

Mayor Bellamy said that one of the conditions from Resolution #2 was "at least 30% - 40% of the sales tax revenues must be earmarked for programs and services that directly support low-wage workers and poverty reduction efforts, such as affordable housing, child care for working families, transit services, or other programs to boost wages for low income workers." City Council has been presented with a draft 10-year Capital Improvement Plan (CIP) for use of the 1/2 cent sales tax in the areas of public safety, housing, transit, Civic Center and sidewalks/ greenways, starting with $6 Million in 2007-08.

Mayor Bellamy said that she was in Raleigh last week and members of the Chamber of Commerce were talking to the leadership of the General Assembly about some possibilities for the City of Asheville to regain the 1/2 cent sales tax. It's important that the City of Asheville have a plan to use the money if received, opposed to it being assigned for us.

Councilman Davis felt that this draft CIP directly affects our ability to have a lower property tax rate and to provide a lot of amenities for our community that we need to provide. He felt that pay-as-you-go is a good thing, but there are opportunities here in this CIP that is funded that gets us to a better place quicker, which the whole community benefits from.

Councilman Davis moved to support the 1/2 cent sales tax to be used toward a CIP, with the details being worked out at a later date. This motion was seconded by Councilwoman Cape.

Councilwoman Cape noted that this is a draft CIP and wouldn't support putting public safety in these expenditures. Personally, she would like to see us concentrate on the items we said would relieve a burden for low-wage workers and poverty reduction efforts, through transit and affordable housing initiatives. She recommended that we consider a small line item in this for HUB contribution as we go forward with the economic development picture in this community.

Councilman Newman strongly opposed this. With this draft CIP, he felt we are not even trying to earmark a significant percentage of the funds on poverty reduction or focused programs that benefit low-wage working families. To put a little bit of money in the Housing Trust Fund and $100,000 for transit is a poor starting point for discussion.

Councilman Freeborn could potentially get behind something like this draft CIP. He has heard that we don't have much of a chance getting the 1/2 cent sales tax because the state is going to keep it. His preference would be that the state give it back to the people and let them spend it. He assumes, in the draft CIP, we would be floating a bond for $4 Million for the relocation of the transit center. He would need a lot more information about that before he would agree to anything like that. If we put money towards transit, it needs to be significant dollars. Regarding housing, he would like to see us put more money toward redevelopment projects. We need to be serious about breaking up concentrated poverty in our community and $400,000 a year isn't going to do it. The money for the sidewalks/greenways and the Civic Center is good, but he does have a concern of spending $10 Million for an emergency training center.

Mayor Bellamy said that conversations are being held about the 1/2 cent sales tax and we need to have a plan to use the money because there are other competing forces for our $6 Million, e.g., HUB.

Councilman Freeborn felt that City staff should have provided this information to Council ahead of time so that there could have been a more productive discussion.

Vice-Mayor Jones said that Asheville is already on record saying that they would support a new sales tax only under certain conditions, which were outlined in Resolution #2, including ""at least 30% - 40% of the sales tax revenues must be earmarked for programs and services that directly support low-wage workers and poverty reduction efforts" and the draft CIP does not address those conditions in the 30-40% range. Nothing against the HUB Project and as good as the goals may be, the $6 Million out of the pocket of the working people of Asheville is not where it should be funded from.

Councilman Mumpower said that there are no circumstances under which he would envision supporting a sales tax increase.

Councilwoman Cape said that we have stated clearly that there are things that we would like to see if this goes forward. It's also fair for us to say what we would use this money for. The draft CIP needs to reflect that. The option that we have here is that we can get really creative about how we can use this money because we can bond off this money if it's a steady revenue stream coming forward, e.g., a build out of the transit system, some significant redevelopment programs, parks and greenways, and the Civic Center. She didn't think using the $6 Million for HUB is smart, but there are very loud and strong people who are talking about that. She said it could be part of our funding stream, because the economic picture that the HUB will offer will help our issues of affordability, jobs, etc., as the ultimate goal of the HUB is to create jobs and a good quality of life. She would delete the public safety from the draft CIP and look creatively at what the funding mechanisms of this money with HUB having a little piece at the bottom.

Councilman Davis and Councilman Freeborn could support Councilwoman Cape's ideas.

Councilman Davis restated his motion to support the 1/2 cent sales tax to be used toward a CIP (not the draft one), with at least 30-40% of the sales tax revenue being earmarked for

programs and services that directly support low-wage workers and poverty reduction efforts, with the details being worked out at a later date, and with a small portion being allocated to the HUB project.

Mayor Bellamy explained that City staff tried to do their best in the draft CIP to address Council's request that at least 30-40% of the sales tax revenue being earmarked for programs and services that directly support low-wage workers and poverty reduction efforts.

Councilman Newman said that another condition from Resolution #2 was that "Asheville is allowed to use a 1% hotel occupancy fee (either from an increase or the existing revenues) for renovation of the Asheville Civic Center and/or other public venues, e.g., the performing arts center." Those parts of the discussion are not happening. Part of the other dynamic is that if Council gives them a list, then they will say City Council has fully endorsed this and this is what they are asking us to do. That is how that information will be used in the legislature.

Mayor Bellamy wanted to make sure that Council knows that as Mayor, every part of the motion that was adopted by Council is moving forward.

In response to Councilman Newman, Councilwoman Cape said that there has been talk about a comprehensive transit plan that she would like to see us be able to fund, whether that is solid infrastructure around an expansion of a regional transportation network, in conjunction with the County eventually, or some infrastructure for street car light rail in conjunction with buses. If we can put together a good transit picture and really fund it, she thinks it would be a high value to the working people in this community. She also thinks we have redevelopment opportunities on the land behind McCormick Field, or an affordable housing fund that has more depth to it.

Councilman Freeborn said that we have a transportation study underway to look at taking our transit system and expanding it regionally. And then there is money aside in the Transportation Improvement Plan to assess our route structure, look at what resources we have, how they are being utilized, where we would expand, how we would do that, and what resources are needed. He suggested that we decide how much of this we would want to put towards transit and put that amount of money towards implementing those plans. That would be his suggestion for transit.

Councilman Davis said we are all aware of how difficult concentrated poverty is and not giving people hope to get out of it. A worthy goal would be to fund a portion for McCormick Heights and the transit part is good if we can come up with a workable plan.

Vice-Mayor Jones suggested that if the state is thinking of keeping the 1/2 cent sales tax and not give it back to the working people, that they give the $6 Million to our community for mental health services.

The motion made by Councilman Davis and seconded by Councilwoman Cape carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis, Councilwoman Cape and Councilman Freeborn voting "yes" and Vice-Mayor Jones, Councilman Mumpower and Councilman Newman voting "no."

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:21 p.m.

Kesha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – May 8, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Representatives of the 9th grade student government of Asheville High School led City Council in the Pledge of Allegiance.

INVOCATION

Vice-Mayor Jones gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 12, 2007, AS "STAMP OUT HUNGER NATIONAL FOOD DRIVE DAY"

Councilman Davis read the proclamation proclaiming May 12, 2007, as "Stamp Out Hunger National Food Drive Day" in the City of Asheville. He presented the proclamation to Post Master Danny Jones, President of the Asheville Branch Jeff Graznger, and Post Office Coordinator of the Food Drive Cassandra Scott, who briefed City Council on some activities taking place during the day.

B. PROCLAMATION PROCLAIMING MAY, 2007, AS "NATIONAL HISTORIC PRESERVATION MONTH"

Mayor Bellamy read the proclamation proclaiming May, 2007, as "National Historic Preservation Month" in the City of Asheville. She presented the proclamation to Ms. Sharon Fahrer, from the Montford Historic District, and Ms. Stacy Merten, Historic Resources Commission Director, who briefed City Council on some activities taking place during the month.

II. CONSENT AGENDA:

Mayor Bellamy added an item to the Consent Agenda (Item "F") regarding opposition to Wireless Telecommunications Facilities proposed legislation.

Councilman Mumpower requested that Consent Agenda Items "B," "E" and "F" be removed from the Consent agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON APRIL 24, 2007

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO DISPOSE OF AN INTEREST THE CITY HAS IN REAL PROPERTY LOCATED AT 24 GRAIL STREET

This item was pulled from the Consent Agenda for individual discussion.

C. RESOLUTION NO. 07-94- RESOLUTION OF INTENT TO PERMANENTLY CLOSE AN ALLEYWAY OFF RICHARD STREET AND SET A PUBLIC HEARING FOR JUNE 12, 2007

Summary: The consideration of a resolution of intent to permanently close an alleyway off Richard Street and set a public hearing for June 12, 2007.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Joseph R. Bly has requested the City of Asheville permanently close an alleyway off Richard Street that runs between his properties on Richard Street.

Public Works Department staff has researched and determined this alleyway is not maintained by the City. Closure of this alleyway will not deny any of the adjoining property owners' reasonable means of ingress and egress as all adjoining property owners have joined in signing the petition requesting the alleyway to be closed.

Prior to the public hearing scheduled for June 12, 2007, agencies that may be affected by the closure of an alleyway off Richard Street will be contacted, including Utilities, City of Asheville Departments and the Greenway Commission.

Pros:

- The closure allows the property to be used to its maximum potential.
- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the alleyway, staff can find no potential challenges regarding the closure of the alley.

City staff recommends City Council approve a resolution of intent to permanently close an alleyway off Richard Street and set a public hearing for June 12, 2007.

RESOLUTION BOOK NO. 30 - PAGE 321

D. SUMMER YOUTH PROGRAM REVIEW

Summary: The City of Asheville is creating (CAYLA) City of Asheville Youth Leadership Academy to train and place Asheville youth in meaningful summer jobs within our community.

Component A:

The City of Asheville has traditionally funded a Summer Youth Employment Program. Over the past several years, the City has elected to contract with JobLink to administer the program. JobLink noticed us in late fall that they would not be pursuing renewal of their contract for this upcoming program year.

The Asheville City Schools (ACS) Foundation has expressed an interest to administer this program. ACS Foundation will provide two full-time VISTA (Volunteers in Service America) members for a total cost of $11,000, representing a 36% cost reduction in administrative services fees for the coming year. The City will provide on-site supervision and office space for these individuals. The positions will be allocated as follows:

City of Asheville Youth Leadership Academy Coordinator: Develop and implement the City of Asheville Youth Leadership Academy; act as a liaison for youth, parents and community; establish, build and maintain relationships with local agencies to develop job opportunities for youth; identify and build partnerships with educational institutions to provide educational opportunities for youth.

Weed and Seed Service Project Coordinator – The West Riverside Operation Weed and Seed (WROWS) is a program designed to encourage community support and involvement in high-risk areas in order to improve neighborhood residents' quality of life; the program also functions as an outreach for at-risk youth. WROWS currently funds and employs a full-time Weed and Seed Site Coordinator. The Weed and Seed Service Project Coordinator (VISTA Position) will train and supervise up to 5 youth to work on weed and seed programs and assist the Coordinator as needed.

The City is creating this program with the following objectives in mind:

- To provide an employment experience that stresses the development and practice of real-world labor expectations;
- To bring greater awareness of the various support networks and programs available within the city's government and other community bases organizations;
- To provide opportunities for career instruction, financial literacy training and various academic and social supports.
- To mentor students about long-term career opportunities in public service, with the hope of preparing them for entry level professional careers in the Asheville area.

CAYLA student workers will be chosen by a committee from eligible applicants (10^{th} to 12^{th} grade) at Asheville High School. The committee will be comprised of educators and community leaders. Each student will be required to submit an application and at least two written recommendations to the committee. The committee may choose to interview the students, as well.

Students will be supervised by someone at the site of their job and will work 28 hours per week in the summer. Fridays will be set aside for workshops on leadership, community service, and career exploration. They will be paid through the City of Asheville payroll process, and will make approximately $7 an hour, with a $2,000 stipend set aside for college at the successful completion of this program. During the school year, students will be required to attend monthly community service projects held on the weekends.

Component B:

In recognition that this is the transition year, City staff is prepared to provide some level of continuation of City of Asheville Summer Youth Job Program for Summer 2007 as a bridge opportunity in order to transition to a CAYLA only model.

- This program will be available to 20 youth at $5.15 per hour for 35 hours weekly for eight weeks. These youth would be placed in the Parks and Recreation department.
- Youth who were employed through Joblink last year (2006) and who successfully completed the program will be contacted about their interest in summer employment for 2007 bridge program. These youth will be given preference in the selection process.

This action aligns with the City's Strategic Plan: (1) This program supports the City Council's long-term strategic goal to develop strategies for youth and education programs; and (2) This program supports the City Council's long-term strategic goal of building intergovernmental relations among key governmental agencies.

City staff has included $130,000 in the Fiscal Year 2007-08 budget for this program and your consideration. If approved, both programs can be completed. If council elects to fund the program at a reduced level, staff will adjust the scope of the program accordingly.

Staff recommends that City Council allow city staff to enter into a Memorandum of Agreement with the Asheville City Schools Foundation to administer the CAYLA program.

Staff recommends that City Council support the $130,000 allocation request for this program in Fiscal Year 2007-08 in order to create CAYLA and provide final year of the Summer Youth Program for 20 students.

E. RESOLUTION AMENDING THE MEMBERSHIP STRUCTURE OF THE AD HOC PRITCHARD PARK COMMITTEE

This item was pulled from the Consent Agenda for individual discussion.

F. RESOLUTION EXPRESSING OPPOSITION TO SENATE BILL 831 - WIRELESS TELECOMMUNICATIONS FACILITIES, PROPOSED LEGISLATION UNDER CONSIDERATION BY THE NORTH CAROLINA GENERAL ASSEMBLY

This item was pulled from the Consent Agenda for individual discussion.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilwoman Cape moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. RESOLUTION AUTHORIZING THE CITY MANAGER TO DISPOSE OF AN INTEREST THE CITY HAS IN REAL PROPERTY LOCATED AT 24 GRAIL STREET

Summary: The consideration of a resolution authorizing the City Manager to dispose of an interest the City has in real property located on Grail Street by private sale.

In 1990 the Housing Authority (the City's redevelopment agency) sold a house at 24 Grail Street and an adjoining parcel to Hospitality House of Asheville, subsequently renamed Homeward Bound of Asheville, as a transitional shelter for the homeless. The City also made a $100,000 Community Development Block Grant (CDBG) to Homeward Bound to acquire and renovate the house.

The deed for each property includes a restriction whereby the ownership of the property reverts to the City of Asheville if it ceases to be used as a homeless shelter.

Homeward Bound has operated the properties as a shelter continuously for 17 years. Recently, Homeward Bound decided to focus on assisting the homeless to obtain permanent supportive housing rather than providing temporary shelter. Homeward Bound plans to sell this transitional shelter and use the sales proceeds to expand or replace its "A HOPE" day center, which is no longer large enough for its purpose.

Homeward Bound has found a buyer for the property, but is unable to convey it because of the existence of the deed restrictions. It has requested that the City remove the deed restrictions, in exchange for a commitment by Homeward Bound to use the proceeds of sale to

expand or replace its "A HOPE Center." According to the City Attorney's Office, the conveyance of the City's reversionary interest to a non-profit to promote a public purpose is authorized by law.

Pros:

- Directly supports implementation of the City and County's 10-year Plan to End Homelessness.
- Supports expansion of the A HOPE Center, which helps reduce the impact of homelessness on our downtown.
- Continues to support the broad objectives of the original CDBG grant.

Con: The only negative impact is the City surrenders its right to eventually re-possess property worth approximately $225,000 to the CDBG fund.

Staff recommends City Council approve of the request subject to Homeward Bound using the proceeds of the sale to replace or expand the A HOPE Center.

After a brief discussion, Councilman Mumpower moved to refer this item to the City Council Planning & Development Committee and if necessary to the City Council Housing & Community Development Committee and bring it back before Council on May 15, 2007. This motion was seconded by Councilman Freeborn and carried unanimously.

E. RESOLUTION NO. 07-95 - RESOLUTION AMENDING THE MEMBERSHIP STRUCTURE OF THE AD HOC PRITCHARD PARK COMMITTEE

Summary: City Council has appointed the Pritchard Park Committee to lead a public process to gain citizen input on the current use, management and operation of Pritchard Park in order for the committee develop recommendations to Council for park enhancements. The City Council has the authority to make changes to its appointed committees. City Council has determined that it is in the public interest to change the structure of the Pritchard Park Committee. The change is that "The Pritchard Park Committee membership is hereby amended to include a representative of the Downtown Asheville Residents Network (DARN) to be appointed by the president of DARN."

Ms. Susan Griffin, Chair of DARN, expressed concern that there was no direct voice for DARN. She asked City Council to appoint Mr. Larry Holt to represent DARN or to give DARN the authority to appoint him.

Councilman Mumpower was concerned about the mission of the Committee. His understanding is that they will be looking primarily at the facility itself and it would be his contention that that is not the problem. The problem is the people abusing the park. The arrest records for those who abuse the park are dramatic and we should either expand the mission of this committee or create some other initiative to go after the core problem - the people that abuse it.

Mayor Bellamy said that we are not getting our money out of the complete usage of the park. Her concern is the number of people who use it as well as the types of services that are offered there and how the present day diversity of usage is wane. We are addressing the social issues with the Downtown Social Issues Task Force and on May 29, we will be listening to public comments on the issue of homelessness. She would like to see the utility of Pritchard Park increased and the diversity of the people who use the park increase as well.

Councilwoman Cape believes that we need to get back to the small committee of Recreation Advisory Board, the Downtown Commission with support of the Police Department to

look at the use and design of Pritchard Park and take the social issues out of the Pritchard Park Committee's hands because that is a large topic for perhaps a separate committee.

Mayor Bellamy suggested waiting to talk about the social issues part until after Council receives feedback from their community meeting on May 29 and identify key players who want to be involved in the bigger issue. In addition, she suggested the Pritchard Park Committee cease meeting until after the May 29 meeting until Council can clearly identify what the expectations of the Committee are. In the meantime, however, we will need to address enforcement and creative ways to deal with enforcement. We do have police presence in Pritchard Park, however, people still litter and do other illegal things in the Park.

Vice-Mayor Jones moved to adopt Resolution No. 07-95, to add Mr. Larry Holt as the DARN representative to the Ad Hoc Pritchard Park Committee. This motion was seconded by Councilman Newman.

Councilwoman Cape asked City staff provide Council with some best practices of how other cities handle this issue prior to May 29. She had an idea of a hall monitor in the park who would act as a caretaker and who would be able to be an intermediary with the police.

The motion made by Vice-Mayor Jones and seconded by Councilman Newman carried on a 6-1 vote, with Councilwoman Cape voting "no." In addition, it was the majority of Council's consensus to (1) ask the Pritchard Park Committee cease meeting until after May 29 until they get clear expectations of Council; and (2) instruct City staff to provide best practice scenarios prior to May 29.

RESOLUTION BOOK NO. 30 - PAGE 322

F. RESOLUTION NO. 07-96 - RESOLUTION EXPRESSING OPPOSITION TO SENATE BILL 831 - WIRELESS TELECOMMUNICATIONS FACILITIES, PROPOSED LEGISLATION UNDER CONSIDERATION BY THE NORTH CAROLINA GENERAL ASSEMBLY

Summary: The consideration of a resolution expression of opposition to SB 831 – Wireless Telecommunications Facilities, proposed legislation under consideration by the North Carolina General Assembly.

State Senator David Hoyle has introduced *SB 831 – Wireless Telecommunications Facilities*, a bill to preempt the authority of municipalities and counties in determining where cell towers should be located. Federal Communications Commission regulations would govern placement of these towers.

Under this bill, a city or town could not prohibit cell towers in residential areas or residential zoning districts and could not impose separation requirements between towers. No permit application fee or financial surety requirement could be imposed unless also required for other types of commercial development. The bill would limit the duration of any moratorium on placing additional cell towers in a jurisdiction.

The League of Municipalities opposes this legislation. City staff does likewise. Land use decisions are best made at the local level, based on the welfare of the community. Telecommunication towers have been carefully regulated in the City of Asheville to avoid aesthetic and public safety conflicts. This bill has the potential to have a significant negative effect on the aesthetics of the City and region, affecting our tourism and quality-of-life economy as well as potentially creating conflicts with City and regional emergency services communications.

Staff recommends City Council approve a resolution expressing opposition to SB 831 – Wireless Telecommunications Facilities, proposed legislation under consideration by the North Carolina General Assembly.

Councilman Mumpower said that from a procedural standpoint, since this was added on as a last minute item, he would vote against it.

Councilman Freeborn moved to approve Resolution No. 07-96. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 323

III. PRESENTATIONS & REPORTS:

A. CRIMESTOPPERS ANNUAL REPORT

Mr. Tom Sobol, President of the Crimestoppers Board of Directors, said that program started in 1983. He gave Council some brief statistics: budget of approximately $72,000 a year ($36,000 by the City and $36,000 by the County); last year 396 calls came into the unit; out of those 396 calls, 111 arrests were made from the tips; and out of the 108 fugitives aired on the American Most Wanted program, 76 were either arrested or surrendered. Part of arrests were major tips that lead to one major bank robbery, several strong armed robberies, 3 major drug dealers and a recovery of multiple stolen vehicles. There were $12,275 in payments were paid out by the board. The activities of Crimestoppers continue to help people in our community.

Mr. Sobol responded to various questions from Council regarding the amount of money to administer the Committee and how tips are handled. He said that he would be happy to send Council a copy of their entire budget, assuring Council that this is money well spent.

On behalf of City Council, Mayor Bellamy thanked Mr. Sobol and the efforts of the entire board of Crimestoppers.

B. TRANSIT SYSTEM FREE FARE PROMOTION REPORT

Transit Services Manager Bruce Black said that the following is a summary of the findings concerning the transit system free fare promotion from Mid August through Mid November, 2006.

- The Asheville Transit System fleet consisted of nineteen buses operating over 24 routes prior to and during the free-fare promotion.
- Four additional evening routes were added on July 1, 2006.
- The system serves Asheville, Warren Wilson College, Weaverville and Black Mountain. It connects with Apple Country Transit to serve Hendersonville.
- Ninety percent of the population in Asheville, where density exceeds 4000 people per square mile, is within ¼ mile of a bus route.
- Seventy-five percent of the population in Asheville, where density is less than 4000 people per square mile, is within ¼ mile of a bus route.

Ridership:

- Pre-promotion ridership has been growing at twice the national average.
- Ridership grew by 8.5 percent in Fiscal Year 2006.
- During the no-fare promotion ridership increased by 58 percent over the same period last year. Fifty percent of the 58 percent increase can be attributed to the fare-free promotion.
    - Number of trips transported during promotion period: 484,118
- Since the promotion ridership has increased by 19.4 percent over the same period last year. In round numbers:
    - Eight percent of the 19.4 percent increase can be attributed to the promotion.
    - Seven points of the 19.4 percent increase can be attributed to new evening service
    - Three points of the 19.4 percent increase can be attributed to normal growth
    - One point of the 19.4 percent increase can be attributed to the Passport program
    - Topeka Kansas exhibited a 5.6 percent post program growth after an increase of 83 percent during their fare free program
- After the promotion, evening service ridership has increased by 82 percent
    - Evening service is now transporting ⅓ as many trips per hour as the core daytime services.
- During the promotion the number of bicycle trips declined by 6 percent
- During the promotion the number of wheel chair trips increased by 14 percent
- Ridership for Fiscal Year 2007 is projected to exceed 1.4 million trips, up from 1.1 million trips in Fiscal Year 2006. This includes the additional riders during fare free.
- Ridership for Fiscal year 2008 is projected to exceed 1.38 million trips.

Performance Characteristics:

- The total number of complaints has declined from one in every 7,521 trips to one for every 12,500 trips after promotion ended.
- Forty two percent of all complaints by the 45th day of operation concerned buses running late.
    - During the promotion, on time performance was 89 percent.
    - After the promotion on-time performance for first quarter of 2007 rose to 97 percent overall.
    - The amount of time needed for each passenger to board decreased about 20 percent (From 4 to 3+ seconds)
    - The overall amount of boarding time increased due to the increase in passengers

- People used the bus for shorter distances increasing the number of times the bus had to decelerate to stop, and accelerate back into traffic.
    - 30 percent of riders transfer and can be affected by late buses.
- The major reasons for riding were:
    - The convenience of the system and not having another means of transportation.
    - Five percent stated that parking was a problem
    - One percent rode for environmental reasons
    - Seven percent stated that they were "Just Riding"
- Twenty one percent of passengers were unhappy with the crowded buses
- Ridership by those who had vehicles they could have used for the trip remained steady at 14%. This increase of 4 points over last year.
- The number of riders with incomes of $10,000 and below increased 7.5% during fare free.
- Those in the $10,000 and above range decreased by 7.5 percent.

Financial Impacts:

- There were no additional significant increases in direct operating expenditures during the promotional period
- Several transmissions had to be replaced post promotion
- The buses were used much harder and required more manpower to clean.
    - People were shifted from other tasks.
    - Maintenance did increase, but no additional people were hired.
        - Preventive maintenance that could legitimately be delayed was postponed
- Net increase in revenue from post promotion ridership levels and lower per passenger yield:
    - Fare box revenue per trip is down 6.7 percent December through March
    - Fare box revenue is up 10.2 percent December through March. Fare box revenue was up 11.8 percent July through August
    - Fare box revenue is projected to up 11percent for fiscal year.
    - Per trip revenue is projected to be down 6 percent for fiscal year
- The operating subsidy for promotion period operations were increased to replace fare box revenue lost:

Estimated net loss of bus fare revenue vs. last year:	$ 96,300
Estimated net loss of Para-transit revenue vs. last year:	$ 13,125
Cost of additional security:	$ 10,000
Cost of advertising:	$ 12,000
Total subsidy from City of Asheville:	$132,125

Externalities:

The free-fare promotion had no direct effect on parking demand in downtown Asheville.

In summary, the goal of promotion was to gain permanent riders. 257,625 passengers during fare free transit promotion; 95,749 additional passengers; 10,500 of these were on evening service; and an increase of 59% over the same period this time last year.

Since the promotion, ridership is up 19.4%: 8% from the promotion; 7% from evening service; 3% from normal growth and 1% from passport program.

Complaints have decreased; on time performance has improved; ridership has increased and remains steady; record year for ridership; outperformed only other data we have for a similar promotion; and parking not affected by promotion.

Other considerations: price of gasoline; and stress on system and employees.

What has been accomplished: (1) explored the amount of demand that was constrained by economic concerns; and (2) explored the impact of very high transit demand on the existing system.

Recommendations: (1) in order to constrain short trips and overly casual use of the system, any future long term promotions should have a minimal fare (25 cents), (2) free days are still be viable for promotional purposes but should be tied to a community incentive such as red ozone days; (3) preparation for prolonged increases in demand make some activities, such as vehicle purchase strategic as well as operational; (4) the fleet should be enlarged as possible; and (5) a contingency fleet should be created.

Councilman Newman explained that the data observations show that Council made a good decision using the fare free policy as a promotional tool, rather than as an on-going policy. Over two years, the ridership has a projected increase of about 27%. That indicates to him that as we look at smart targeted improvements that the community is asking for, we can have some success around the transit system. If we continue to think about smart service level improvements, smart partnerships and creative marketing with the community, and if we can sustain the kinds of growth over the last two years, in the future these trends will become very important to the way Asheville looks in 10-20 years from now. We have laid the foundation for some future success.

Mr. Black responded to various questions/comments from Council, some being, but are not limited to: is there a general projection of where we will land at year end for operating revenue; is it true that riders are estimated to pay for about 16% of the bus service; have we seen an increase of monthly passes; can riders get monthly passes from the hub downtown and if not, why; where does the increase in ridership from the passport program come from;

Vice-Mayor Jones noted that while we lost revenue from the fare box during that 90 days we have had incremental income increases going forward that hopefully will be sustained.

Councilman Mumpower was concerned about how much we subsidize transit. He shared the concerns from the bus drivers of the fare free promotion as follows: (1) homeless people who have not bathed caused bad odor, fleas and unsanitary conditions and this is causing regular passengers unpleasant conditions while using the bus; (2) level of verbal abuse and bad language has increased considerably and is very difficult to control on the crowded buses; (3) increased passenger counts are causing elderly to have to stand at time and operators are concerned about their safety; (4) new passengers are not educated as to basic rules and some do not want to comply; (5) operators state that there is a need for more supervision and support to help handle the problems created by the fare free program; (6) schedules need to be adjusted in order to handle the overload and problems that are created by the fare free program; (7) operators state that it is becoming unbearable to handle the pressure of trying to operate the buses on schedule; (8) buses are not as clean and sanitary with the added passengers and hours of service; (9) students that should normally ride the school buses are using the transit buses which are causing regular and elderly passengers to have to stand - this is creating an unfair situation and also safety concerns and operators have no way of controlling this problem with the fare free program; (10) operators state that they are concerned about the wheelchair and handicapped passengers who ride regularly; (11) the over-crowding is creating safety concerns with these passengers; (12) operators are concerned about not being capable for maintaining the published scheduled and many passengers are missing their connections and have a lay-over time waiting on the next bus; (13) operators are concerned that the transit system is losing regular passengers that use the bus over the years because of the problems that fare free program is causing - operators believe that some of these passengers are searching for alternative means of transportation; and (14) operators state that working conditions and safety issues in which they are responsible for are not being recognized during transit planning on free fare issues. He feels that report is the reality of the fare free program.

In response to Councilwoman Cape, Mr. Black said that most of the bus driver's concerns have stopped with the end of the fare free program. Our biggest problem is getting a better on-time performance.

Councilman Newman requested additional information on the percentage of riders who are using our discounted monthly passes and what percentage of our overall ridership is that. He cited that the fare free program's benefit was getting new people to try transit and felt that tool should be an option kept in the toolbox for the future. However, in the future, he suggested the program run maybe a week or 30 days every few years as a way to have people try transit.

It was the consensus of Council to ask staff to (1) provide additional information on the percentage of riders who are using our discounted monthly passes; (2) compile current feedback from the bus drivers; (3) request the Energy & Environment Committee to provide additional information about free days being tied to red ozone days; and (4) provide information (including costs) for a one-day family pass to ride the bus.

Mayor Bellamy said that the other recommendations outlined by Mr. Black will be reviewed in the budget process.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE CONCERNING ENFORCEMENT PROVISIONS

ORDINANCE NO. 3467 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE CONCERNING ENFORCEMENT PROVISIONS

Mayor Bellamy said that this public hearing was originally scheduled on April 10, 2007, but continued to this date.

Mayor Bellamy opened the public hearing at 6:52 p.m.

Assistant City Attorney Curt Euler said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) concerning enforcement provisions. This public hearing was advertised on March 30 and April 6, 2007.

Section 18, Chapter 7 of the City of Asheville Code of Ordinances contains the enforcement provisions for dealing with persons who refuse to comply with the Chapter 7 of the City Code also known as the UDO.

City staff has undertaken a review of the enforcement provisions in an attempt to streamline the enforcement process and resolve violations in a more expedient manner.

These proposed amendments should lesson the time it takes from starting an enforcement action to the beginning a lawsuit, if the person refuses to come into compliance.

The highlights of the amendments are:

1. Making it a criminal offense to interfere to hinder, resist or obstruct a city employee attempting to enforce the UDO.

2. Requiring staff to send a Notice of Violation to both the tenant and owner at the outset of the enforcement action. This is to give both the owner and tenant a thirty (30) day period to appeal the notice of violation as opposed to giving the tenant thirty days to appeal and then having to give the owner a separate thirty days to appeal, thereby increasing the time for enforcement.

3. Allow staff to notify tenants and owners of civil citations through delivery confirmation as opposed to sending certified return receipt mail. Notices of Violation still must be served in person or by certified mail. This process makes it easier for staff to issue citations for violations.

4. Adding a one time large fine for persons who damage or destroy items or vegetation that cannot be replaced, for example cutting down a 50 year old tree or demolishing a historic structure without first obtaining the necessary permits. For example, the property owner who cuts down a large tree in violation of the UDO shall be assessed the large one time fine in addition to a civil penalty of $100.00 per day until the landscape on the property is brought into compliance with 7-11-2.

5. The City amending the civil penalty for a violation of Chapter 7, Article XIII (sign violations) from $50.00 for every 72 hours to $100.00 per day.

Pros:

- Reduces the amount of time an enforcement action is maintained against a parcel of property.
- Protects staff from persons who actively resist investigations.
- Places a greater civil penalty for destroying items that cannot be replaced.
- Creates a uniform fine structure for most UDO violations.

CON:

- Property owners will be held more accountable for zoning violations committed by tenants.

Staff recommends City Council approve an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville concerning the enforcement provisions.

Mayor Bellamy closed the public hearing at 6:55 p.m.

There was considerable discussion initiated by Councilman Mumpower about property owners being held liable for zoning violations committed by the tenants. Councilman Mumpower felt that we are placing authentic property owners at greater risk than seems appropriate.

Mr. Euler responded to Vice-Mayor Jones' comments regarding the reasoning behind our enforcement fines.

In response to Mayor Bellamy, City Manager Jackson said that he would check to see if our website can contain information where citizens can see if there is a violation on a piece of property.

When Mayor Bellamy asked what the appeal process is for neighbors who are impacted by the violations, City Attorney Oast said that the City cannot, by ordinance, give neighbors any greater standing to appeal than they have by law and that has to be established on a case by case basis. There is legislation pending currently in the North Carolina General Assembly that would change that so that anyone within 100 feet of a property where an issue arose could appeal, but they would automatically have standing. He said that we can provide in the ordinance that aggrieved persons may appeal as provided by the appropriate statute.

In response to Mayor Bellamy, Planning & Development Director Scott Shuford said that staff is looking at more enforcement of snipe signs and Council may not need to make any adjustments to strengthen the penalties under the nuisance ordinance.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3467. This motion was seconded by Councilman Newman and carried on a 6-1 vote with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE *346*

At 7:15 p.m., Councilman Mumpower moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina, County of Buncombe, Reid Thompson, Greenlife Grocery of Asheville, LLC, Board of Adjustment and Asheville Metals Recycling. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:45 p.m., Mayor Bellamy stated that the closed session would be continued after the completion of the agenda for the regular meeting.

B. PUBLIC HEARING TO CONSIDER REZONING PROPERTY LOCATED AT 100, 105, 108-1/2, 115 AND 9999 FAIRVIEW ROAD, KNOWN AS THE WHITAKER HILL PROJECT, FROM CI COMMERCIAL INDUSTRIAL DISTRICT, RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR REVIEW

OF THE CONCEPTUAL MASTER PLAN FOR DEVELOPMENT TO CONSIST OF RESIDENTIAL AND COMMERCIAL USES

ORDINANCE NO. 3468 - ORDINANCE REZONING PROPERTY LOCATED AT 100, 105, 108-1/2, 115 AND 9999 FAIRVIEW ROAD, KNOWN AS THE WHITAKER HILL PROJECT, FROM CI COMMERCIAL INDUSTRIAL DISTRICT, RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT/CONDITIONAL ZONING AND RM-8 RESIDENTIAL MULTI-FAMILY MEDIUM DENSITY DISTRICT TO URBAN VILLAGE DISTRICT FOR REVIEW OF THE CONCEPTUAL MASTER PLAN FOR DEVELOPMENT TO CONSIST OF RESIDENTIAL AND COMMERCIAL USES

Mayor Bellamy opened the public hearing at 7:51 p.m.

Urban Planner Alan Glines said that this is the consideration of an ordinance to rezone property located at 100, 105, 108-1/2, 115 and 9999 Fairview Road, known as the Whitaker Hill Project, from CI Commercial Industrial District, RM-16 Residential Multi-Family High Density District/Conditional Zoning and RM-8 Residential Multi-Family Medium Density District to Urban Village District for review of the conceptual master plan for development to consist of residential and commercial uses. This public hearing was advertised on April 27 and May 4, 2007.

The current proposal is to rezone to Urban Village district and approve a conceptual master plan for 30 acres along Fairview Road. The current zoning of the project area is CI Commercial Industrial, RM-16 Residential Multi-family High Density/Conditional Zoning and RM-8 Residential Multi-family Medium Density District. The property which is made up of 5 parcels lies on both sides of Fairview Road. The property includes two commercial buildings on the south side of Fairview Road which will be demolished. On the north side of the road the largest parcel has been cleared and graded because of the former proposal for a multi-family project. The master plan which shows the scale of the development and layout of streets and other infrastructure cannot substantially deviate from what is approved without returning to City Council for review of the changes. This master plan exists as the "big picture" guide for the development project.

According to the master plan submitted, this three-phase project proposes 118 buildings (including single family houses) with a total of 506 units at a density of 16.77 dwelling units per acre. In addition, the developer is expecting a full build out of 100,000 square feet of commercial space. The building heights in the urban village vary. Village center buildings are proposed to be up to five stories tall along Fairview Road. At other locations internal to the site, the heights will reach up to four stories. Where the urban village fronts with the existing Oakley neighborhoods along Stoner Road and Westview Avenue, the scale of the residential style buildings will be two or three stories. The residential character of the development will range from larger multi-family buildings down to single family homes. Live work units will also be provided as a part of the development. At this point in the review, specific details about building fenestration, the commercial uses for mixed-use buildings, and exact footprints are not provided. General character images however are provided for the project for mixed-use and residential buildings. The style will be similar to an older Asheville shingle style or craftsman style. The master plan indicates the general street network and land use configuration for the scale of development, as well as suitable open space, a range of building heights, setbacks and building types. The commercial node and area of highest density and building heights will be centered along Fairview Road as was mentioned. This area centered along Fairview Road, relating to the street should have the positive effect of slowing down the speed of traffic. In other areas of town such as Biltmore Village, similar urban development patterns have the effect of taming traffic. Besides the quantity of traffic along Fairview Road, fast moving traffic has been mentioned as a concern by residents of Oakley. The development has the benefit of providing several access points into area roads. The primary access is along Fairview Road, but the close proximity to Sweeten Creek Road is helpful for the development. A secondary access is along the lower end of Stoner

Road. The existing residences along Stoner Road should experience minimal impacts from traffic because traffic is directed to Thompson Street. Thompson Street will be the future site of the Wilma Dykeman Riverway planned along the Swannanoa River. A traffic impact analysis (TIA) was initiated for the development and studied intersections at the periphery of the development. The review at this point recommends some lane improvements at the intersection of Sweeten Creek and London Road and the intersection of Glendale Avenue and Thompson Street. The exact improvements along Fairview Road at the proposed access points will be determined by TIA amendments for each specific phase of the project. Finally a smaller access into the development has been recommended by the Technical Review Committee (TRC) for Westview Avenue. Connectivity can be a challenge in the community and this access point would be more for safety access instead a major point of access into the development. The transit system services this development through the number 12 bus line along Fairview Road. A bus shelter will be required for the development.

On Monday, March 19, 2007, the TRC held an informal review of the proposal. Staff and the TRC made specific recommendations on revisions needed for the master plan. On April 2, 2007, the TRC met and reviewed site plan and made some additional comments for the project. The majority of the conditions will be addressed in a more detailed review by the TRC as the phases of the development come forward.

The owner of 105 Fairview Road (Phase three of the site master plan) is including this property in the rezoning request but has a special concern. The property has been accepted by the North Carolina Department of the Environment and Natural Resources (DENR) into the brownfields program. The plan to remediate the site is being reviewed by DENR to include the urban development shown in the urban village. If the proposed uses are not accepted, the owner would like to withdraw the parcel from the rezoning and master plan and have it revert back to CI District (the existing zoning for the parcel). This will be a special condition that the owner would like to include as a part of the approval.

Recently, a community meeting organized by the Oakley Community was held and the project was discussed among other items. The primary concern with the proposal seemed to be traffic growth and the existing challenges with traffic along Fairview Road. The style or type of development was secondary to the traffic concern. Some people mentioned traffic calming efforts as something that would be beneficial for the community.

The Residential Multi-family Medium Density District (RM-8 district) is established to allow for a range of medium density residential options, integrating multi-family along with single-family attached and detached residences. This district is intended to provide a transitional area between high density single-family and multi-family areas and may allow some compatible non-residential uses as well.

The Residential Multi-family High Density District (RM-16) is established to permit a full range of high density multi-family development and associated institutional, public and commercial uses. Infrastructure capable to handle the demand related with the resulting intensity of use is required. It was applied to this property as a part of a conditional zoning for a higher density development approved in 2005 and was known as Biltmore Point.

The Commercial Industrial District (CI district) is intended for a wide range of commercial and industrial uses including warehouses and manufacturing and well as retail sales, offices and even residential uses. Similar to RM-16 described above, this district requires infrastructure capable to support the development to be build or in place. The residential limitation is 16 units per acre.

These three underlying zoning districts are not dissimilar from the proposed rezoning to Urban Village, in that the office, retail and full range of residential densities will be allowed and that the existing infrastructure will be fully capable of supporting the scale of development. The

advantage of rezoning the entire area to Urban Village provides better integration of these uses as well as a more cohesive master plan for the community.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

This rezoning was recommended for approval by a 7-0 by the Planning and Zoning Commission. Three people spoke at the Planning & Zoning Commission meeting and expressed concerns about scale, traffic, tree canopy loss and connectivity into the neighborhood. A recent community meeting held in Oakley provided some comments and concerns regarding traffic generation from the project. Others spoke about school crowding issues at Oakley School.

Pros:

- Provides a variety of uses and building styles similar to a traditional "sustainable" neighborhoods
- Infill redevelopment of previously disturbed sites revitalizes the area and locates development in an area where infrastructure already exists, resulting in efficient use of land
- Development proposes a wide mixture of housing types and an efficient use of land
- Presents a walkable community that can support transportation options
- Project is suitable to support transit and is located on an existing bus line
- Potential to be a 'main street' amenity with local businesses for the Oakley Neighborhood
- The neighborhood character is preserved by single family scale development at the edge of the urban village
- Traffic impacts could be mitigated through adequate design and multiple access points from the development

Cons:

- Existing block-style grading may prohibit connectivity between phases two and three (south of Fairview Road)
- Traffic growth is an issue for the neighborhood who already express concerns about speed and volume

At their April 4, 2007, meeting, the Planning and Zoning Commission voted 7-0 to recommend approval of the rezoning and the master plan. They also recommended that traffic calming be considered for Stoner Road. Staff concurs with these recommendations.

Mr. Chris Cole, representing the developer, spoke in support of the rezoning. He addressed the issue of transportation, noting that through design they will be able to mitigate the speed while maintaining the volume on these roads. They have budgeted specifically for the implementation of traffic calming meaures on Fairview Road and the surrounding roads and they will work with the neighborhood and City staff to where they can most effectively utilize those dollars. He then spoke about the issues of greenbuilding and their progressive stormwater design.

Mr. Daryl Rantis, architect for the developer, spoke in support of the rezoning.

The following individuals spoke against the rezoning for various reasons, some being, but are not limited to: the access point on Westview Avenue will negatively affect the surrounding neighbors since Westview is a small, narrow road with a steep incline; concern that there will be a tunnel effect on Fairview Road through the development; volume of traffic will increase significantly along Fairview Road and surrounding roads; additional traffic calming measures on Fairview Road; impact on the school system; request that the master plan stay open for future amendments and input from the neighborhood; concern of lack of water with the new

development; concern that new homes will raise surrounding area property taxes for fixed income residents; and development will put a strain on providing City services:

Dr. Kelly Ivers, resident on Westview Avenue
Mr. Cory Black, representing over 100 families in the Oakley Community Association
Ms. Dodson, Oakley resident
Ms. Peggy Ray, resident on Winston Avenue
Mr. Jake Quinn, Asheville resident

At 8:22 p.m., Mayor Bellamy closed the public hearing.

In response to Councilwoman Cape, City Attorney Oast said that the City cannot charge impact fees for schools.

Councilwoman Cape initiated discussion regarding the tunneling effect on Fairview Road through the development. Mr. Cole explained the grade change, noting that you will not see 5 story buildings on Fairview Road. He said that they will decide, stylistically, every lot from colors, style and roof design.

In response to Councilman Mumpower, City Traffic Engineer Ken Putnam gave his objective analysis regarding traffic, noting that at full build-out in five years, the traffic study indicated 6,000 cars a day, however, a two-lane road can carry twice that much. He did note that there will be some work to bring the speed down on Fairview Road, which is 30 mph but the 85 percentile speed is 43 mph. In the study, we have left the door open for more studies to be done, either as amendments or new traffic impact studies as they bring the phases forward to us, so we can address their internal roadway network and address things on Fairview and Stoner Roads.

When Councilman Mumpower asked if the concept of the access point on Westview Avenue is doable, Mr. Putnam said that the concept came from the Fire Department and he believed that the access point on Westview is possible.

In response to Councilman Mumpower regarding water availability, Mr. Glines said that the water capacity was not noted as an item of concern from the Water Department representative at the TRC meeting.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3468 to rezone property located at 100, 105, 108-1/2, 115 and 9999 Fairview Road, known as the Whitaker Hill Project, from CI Commercial Industrial District, RM-16 Residential Multi-Family High Density District/Conditional Zoning and RM-8 Residential Multi-Family Medium Density District to Urban Village District, along with the master plan and find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The site development must comply with the conceptual master plan and other documents presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (5) This project will undergo final review by the TRC prior to issuance of any required permits and (6) Traffic calming should be considered for Stoner Road following traffic calming procedures and funded by the developer. This motion was seconded by Councilman Mumpower.

After discussion initiated by Councilman Newman regarding a condition to clarify the height of the buildings at street level on Fairview Road, Vice-Mayor Jones and Councilman Mumpower agreed to a friendly amendment as follows: "design of structures along Fairview Road shall be modulated to avoid a tunnel effect of tall buildings lining the roadway and enforced by City staff through approval of structure design and using computer generated models and other techniques to illustrate that variation."

In response to Councilwoman Cape's suggestion of specifying the ability to have more space for future widening Fairview Road, Mr. Cole said that one issue they face on both sides of Fairview Road is a dramatic fall off on one side and a dramatic build-up on the other side. They likely will excavate inward on the north side of Fairview Road and use buildings as retaining structures on the south side of Fairview Road. Their hope is to modulate the speed of the traffic on Fairview Road with a street section that they institute, whether that is one side on-street parking, a small medium in the middle of the road or perhaps a bike lane. The key for them is the ability to modulate the buildings so that they can afford a wide variation of square footages.

When Mayor Bellamy asked if there was any consideration to a lesser amount of units since 506 units is a big impact to the neighborhood, Mr. Glines said that we don't have a density cap in the Urban Village District.

Vice-Mayor Jones recognized that the concerns about tax valuation are real and last year the Council worked hard to be revenue neutral. She said that as land values go up, City Council will not take advantage of the tax rate.

The motion made by Vice-Mayor Jones and seconded Councilman Mumpower (with the friendly amendment regarding the design of the structures along Fairview Road) carried on a 6-1 vote, with Mayor Bellamy voting "no."

ORDINANCE BOOK NO. 23 - PAGE 350

Councilman Newman moved to change the agenda and discuss the New Business Items next. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

V. UNFINISHED BUSINESS:

A. REPORT ON CREATION OF AN INDEPENDENT AIRPORT AUTHORITY GOVERNANCE STRUCTURE

Airport Director David Edwards said that the Asheville City Council approved a resolution on November 14, 2006, to explore the feasibility of creating an independent authority governance structure through the General Assembly of North Carolina for the Asheville Regional Airport. The County of Buncombe approved a similar resolution on December 5, 2006.

Over the last several months staff and certain elected and appointed officials of the City, County and Airport Authority have reviewed numerous items related to the creation of an independent airport authority. While this information is being conveyed by Airport Authority staff, it is information that has been discussed and assembled by all parties involved in this discussion.

This information is being provided for City Council's consideration on how or whether to move forward on the creation of an independent airport authority for the future operation and development of the Asheville Regional Airport.

The Airport and Authority history is as follows: (1) the Asheville Regional Airport was built by the City of Asheville between 1958 and 1961 for the benefit of Western North Carolina and operated by the City of Asheville until 1979; (2) the Asheville Regional Airport Authority was

established in 1979 as a joint governmental agency organized and created by the City of Asheville and the County of Buncombe, pursuant to Article 20 of Chapter 160A of the General Statutes of North Carolina for the purpose of maintaining, operating, regulating and improving the Asheville Regional Airport; (3) the Authority since its creation has been successful in the development and operation of the Airport and has matured into a full self-sustaining enterprise requiring no local financial assistance for its operations, maintenance and capital programs; (4) the Airport has become a regional asset for all of Western North Carolina that supports economic development through aviation and non-aviation development, and critical aviation related services; and (5) the Authority will cease to exist under the current joint agency agreement in April, 2018, and the Airport will revert to the City of Asheville to operate, maintain and develop. Using maps, he reviewed the current Airport property boundary, the 1979 Airport property map, and the Airport property removed by the City.

The following are regional independent Authority benefits: (1) the region would benefit from a more permanent governance structure that will create an environment for long-term stability and growth of the Airport; (2) such a governance model will provide for recognition that the Airport is a regional asset serving all of Western North Carolina; (3) would create an independent Airport Authority which would hold title to all Airport assets; and (4) would provide for a more business-like model enhancing the ability of the Airport to support and stimulate economic growth of the region. City and County benefits (1) would relieve both the City and County of all responsibility for the development, operation, and maintenance of the Airport, as both entities have certain liabilities related to the Airport under the current governance structure; (2) would relieve the County and City of any current or future financial obligations for the Airport; (3) would insulate the City and County of any potential issues related to noise and growth impacts of the Airport; and (4) provides for the inclusion of Henderson County. The Airport and Authority benefits (1) would streamline processes such as grant acceptance, long-term leases, etc.; (2) would allow the Authority greater flexibility in property acquisition and development; (3) would provide for a stable governance model; (4) would facilitate needed financing for Airport improvements; and (5) would remove potential local political conflicts which may negatively impact the ability of the Airport to properly serve the region.

The draft legislation includes the following: 5 member Authority Board; 4 year terms; 2 appointments by the City of Asheville; 2 appointments by Buncombe County; and 1 appointment by Henderson County.

Using graphs, he showed the revenues and expenses and net income from Fiscal Year 2002 through Fiscal Year 2007. In addition, he reviewed the proposed budget for Fiscal Year 2007-2008.

Regarding diversification of revenues, airports need to diversify their revenue streams in order to be financially sound. This includes the development of certain airport property for non-aviation use. By diversifying revenues airports are able to maintain a cost structure which will help to retain and expand air service which is a commercial airport's primary mission. Without diversification of revenues, an airport's cost structure may become cost prohibitive to the point of deterring air service growth which in turn ahs a negative economic impact on the region.

Regarding dollars invested, the original City investment in land acquisition for the Airport was approximately $270,000. The County supported the Airport with a $5.5 Million bond issue for airport development. There is approximately $2 Million in principal remaining with annual debt service payments of about $400,000. The Airport/Authority cannot remit funds to the City directly from the Airport for the transfer of the Airport property based on federal regulations and further discussions with the Federal Aviation Administration (FAA).

Regarding reimbursement of past contributions, the final policy is that after the proposed policy was issued, Congress enacted legislation to limit the use of airport revenue for reimbursement of past contributions, and to limit claims for interest on past contributions. 49

U.S.C. sec. 47107 (l) (5), 47107 (p). The Final Policy incorporates these statutory provisions. Based on Congressional intent evidenced by the legislative history of these provisions, airport revenue may be used to reimburse a sponsor only for contributions or expenditures for a claim made after October 1, 1996, when the claim is made within six years of the contribution or expenditure. In addition, a sponsor may claim interest only from the date the FAA determines that the sponsor is entitled to reimbursement, pursuant to sec. 47107 (p). The FAA interprets these statutory provisions to apply to contributions or expenditures made before October 1, 1996, so long as the claim is made after that date.

Using maps, he showed future non-aviation development in the east and west areas. The estimated valuation of non-aviation development is $563,593,560 (total land and building value). The estimated potential payment of lieu of taxes for non-aviation development (not by Airport) at build-out would be $684,503 for the City; $826,393 for Buncombe County; and $2,303,337 for Henderson County.

The draft independent authority legislation has been submitted through the House, sponsored by Representative Goforth. In order for the bill to be introduced into the Senate crossover date of May 17, 2007, Representative Goforth needs direction as to whether the participating governing bodies desire to move ahead with the creation of the new Airport Authority.

Based on a 2006 economic impact study by the N.C. Dept. of Transportation, the Asheville Regional Airport provides the following estimated economic impact: Direct impact of 338 jobs, annual economic impact of $44,053,000, and annual payroll of $13,218,100; Indirect impact of 1,612 jobs, annual economic impact of $156,311,600, and annual payroll of $5,214,000; and imposed impact of 516 jobs, annual economic impact of $37,985,300, and annual payroll of $3,740,100. Totals jobs of 2,466, annual economic impact of $238,349,900 and annual payroll of $22,172,300. The Airport also provides the County with a significant source of property tax revenue with 134 based aircraft at a calculated value of $63,200,000, which would result in ad valorem taxes of $372,880 based on the county rate of $0.59 per $100. This study estimated that there were 174,250 visitors to the area that utilized the Asheville Regional Airport.

Proposed Option A - Summary: (1) create an independent Airport Authority which would include board representatives from the City of Asheville, Buncombe County and Henderson County; (2) the City would convey title of all Airport land and assets to the new Authority at no cost; (3) Henderson County would enter into an agreement with the City to resolve the Bent Creek property item and related water service items; (4) the Airport Authority would resolve to work with the City on a joint-use fire station at the Airport to assist the City in meeting its fire service needs in south Buncombe County; (5) specific language would be included in the independent Authority legislation related to a payment in lieu of taxes for non-airport related commercial business activities on Airport property; and (6) a reversionary provision would be included in the legislation that would convey all Airport land and assets back to the City if the independent Authority ceased to exist.

Proposed Option B - Summary: (1) create an independent Airport Authority which would include board representatives from the City of Asheville, Buncombe County and Henderson County; (2) the City would continue to lease all Airport land and assets to the new Authority at the current rate of $1 per year; (3) the term of the lease would be for 25 years with an option for the Authority to extend the agreement for an additional 25 years; (4) Henderson County would enter into an agreement with the City to resolve the Bent Creek property item and related water service items; and (5) the Airport Authority would resolve to work with the City on a joint-use fire station at the Airport to assist the City in meeting its fire service needs.

Proposed Option C - Summary: (1) maintain the current governance structure between the City of Asheville and Buncombe County; (2) revise the current agreement to streamline

existing provisions and requirements outlined in the agreement; and (3) extend the term of the existing agreement.

Proposed Option D - Summary: Do nothing and let the current agreement run its course and expire in 2018.

Councilman Freeborn stated that his preference would be Option A.

Councilman Mumpower said that when this effort was initially initiated there was some belief that the City might receive more direct benefit in compensation for giving up this asset. Unfortunately oversight agencies limit the ability for the Airport Authority to do that. When we talk about regionalism, he feels that means Asheville is giving something up and other people are benefiting. That is not a fair exchange. He does see some advantages to the Airport, but they are secondary, not primary. The Airport has developed in good fashion under the existing parameters and as we get closer to the agreement deadline there might be some policy changes or windows of opportunities that may evolve, but to go in this direction now and get no more than the City of Asheville is getting seems a questionable policy decision.

Councilman Davis had a difficult time in finding the City's real advantage to this, noting that he does understand the Airport operations would run smoother and the idea of regionalism with Henderson County.

Councilman Newman when we talk about regionalism and facilities that could be merged, the Airport is an obvious one. Even though we are not getting a lot, based on the federal regulations we aren't giving up that much. This could have a significant positive benefit for Asheville's relationship at the regional level. He didn't want to rush into any decision, however, if Council wants to keep the door open to this and think through the questions, we could ask our legislators in the House to pass the bill with the full understanding and trust that nothing would happen in the Senate unless all parties, including Asheville, agrees to it. That is done in the legislature to keep ideas alive. If we miss the May 17 deadline, the issue will be dead for a year. He is supportive enough of the concept that he would like to keep the issue alive for consideration.

Mayor Bellamy suggested a hybrid option as follows: (1) extend the contract from 2018 for an additional 20 years so that the Airport can issue debt on the land or acquire new land to expand; and (2) change the composition of the existing board so that the current at-large seat is a Henderson County appointment. This will give the City at least one or two years (depending on the legislative cycle) to allow more time to discuss the issues. The City and Henderson County can then continue to talk about compensation for appointment to the board. In addition, the issue regarding the Bent Creek property and related water service items would be resolved.

City Attorney Oast said that to amend the interlocal agreement with the hybrid option would not require legislative action.

In response to Councilman Davis, Mr. Edwards said that they would like an extension on the existing agreement. There are some provisions in the agreement that we may be able to update in working with the City Attorney, e.g., grant approvals don't have to go to the City and County for approval if the Airport has the funds available to match it. He hoped that we can continue to move in a positive direction.

In response to Vice-Mayor Jones, Mr. Edwards said that the Airport Authority will be considering a resolution later this week that basically outlines that they will work with the City on the potential for a joint-use fire station at the Airport to assist the City in meeting its fire service needs.

In response to Councilman Mumpower, City Manager Jackson said that the service area of that joint-use fire station is the commercial development surrounding the Airport and our preliminary modeling supports a location in that area and we don't want to be precluded from the possibility of locating that on City land.

Mayor Bellamy felt that a third point in her bullet hybrid would be to have the Airport work with the City Attorney on ways to streamline specific provisions in the interlocal agreement using the example Mr. Edwards gave of not requiring City and County approval of the Airport receiving federal grant funds if the Airport has the funds available to match it.

Councilman Mumpower did not want to rush into this since there is no pressure for a decision to be reached now under the hybrid option. Until we get the equity nailed down, he didn't think we should move forward.

In response to Councilman Mumpower, City Manager Jackson recognized that there are some unanswered questions at this point. If there is a level of comfort from Council to move this forward to the crossover date, then that dialogue would continue. Staff supports (1) continuing the review and the dialogue in trying to keep the legislative option open; or (2) trying to address some of the issues with Henderson County, since we have made significant progress with them.

Vice-Mayor Jones moved to support the hybrid option to (1) extend the contract from 2018 for an additional 20 years so that the Airport can issue debt on the land or acquire new land to expand; (2) change the composition of the existing board so that the current at-large seat be a Henderson County appointment; and (3) have the Airport work with the City Attorney on ways to streamline specific provisions in the interlocal agreement using the example Mr. Edwards gave of not requiring City and County approval of the Airport receiving federal grant funds if the Airport has the funds available to match it. This motion was seconded by Councilman Freeborn.

City Attorney Oast said that Council will need to see this item again because they will need to formally vote on amending the interlocal agreement by resolution.

Vice-Mayor Jones felt that the hybrid option (1) cleans up the property exchange with Henderson County; (2) helps the Airport do business, which indirectly benefits Asheville too; (3) shows good will by the Airport Authority to work on the fire station regardless of what is done tonight; and (4) is a step in the right direction in terms of something that the state delegation is interested in seeing move forward in some degree. She doesn't see a huge win for Asheville, but there are some positives. If we make good efforts and there are some reciprocal negotiations that maybe we can get to the next level in two years.

After Councilman Newman said that a disadvantage of the hybrid option is that there will be substantial development around the Airport and all that will be government property and there will be no contribution to our tax base, a brief discussion was held resulting in City Attorney Oast stating that there are some substantial restrictions on the disposition that can be made of Airport revenues but he would investigate whether we can put a requirement in the interlocal agreement for a payment in lieu of taxes by the tenant.

Councilman Freeborn noted that whatever Council agrees to tonight still has to be approved by Buncombe County.

The motion made by Vice-Mayor Jones and seconded by Councilman Freeborn carried on a 5-2 vote, with Councilman Mumpower and Councilman Newman voting "no."

Councilman Newman moved for City Council (1) to send a resolution to our legislators expressing Council's openness to Option B (the lease option with the Airport); and asking our legislators to support legislation that would keep Option B alive past the crossover date while expressing Asheville's clear intent that no action will be taken to move this legislation to the

Senate until all parties, including Asheville, ask them to.; and (2) ask the Mayor to personally contact the Buncombe County State Senator and get his word that that is his clear understanding, again expressing our clear intent that we have not endorsed Option B and we are not raising expectations that we will follow-through with it, but just simply keeping that option open. This motion was seconded by Vice-Mayor Jones.

Councilwoman Cape confirmed that we are asking for a little more time to do further investigation of all the facets of Option B. She didn't like outlined benefit of insulating the City and County of any potential issues related to noise and growth impacts of the Airport. People in that area need the opportunity to speak about noise and growth and she would like more information on the governance structure in terms of the Authority.

City Attorney Oast confirmed that the motion which was approved supporting the hybrid option means that City staff will work with Buncombe County to develop some amendments to the interlocal agreement to accomplish the hybrid facets. That will come to Council through a resolution to amend the interlocal agreement. The motion by Councilman Newman is to preserve our options of the independent Airport Authority, but not necessarily endorsing it one way or the other.

The motion made by Councilman Newman and seconded by Vice-Mayor Jones carried on a 6-1 vote, with Councilman Mumpower voting "no."

At 10:20 p.m., Mayor Bellamy announced a short break.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE LANDSCAPE STANDARDS

Mayor Bellamy said that this public hearing was held on April 10, 2007, and continued to this date. However, City staff has requested that the action be continued until May 22, 2007. Therefore, Councilman Mumpower moved to continue this action until May 22, 2007. This motion was seconded by Vice-Mayor Jones and carried unanimously.

C. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE OPEN SPACE STANDARDS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to this date. However, due to the lateness of the hour, Councilman Mumpower moved to continue this public hearing until June 19, 2007. This motion was seconded by Councilwoman Cape and carried unanimously.

D. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING RETAINING WALL REQUIREMENTS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to this date. However, due to the lateness of the hour, Councilman Mumpower moved to continue this public hearing until June 19, 2007. This motion was seconded by Councilwoman Cape and carried unanimously.

E. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING STEEP SLOPE AND RIDGETOP REQUIREMENTS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to this date.

Planning & Development Director Scott Shuford said that at the April 24, 2007, meeting when Council first considered the ordinance, a fairly wide range of alternative ideas about the area to which the steep slope requirements should apply were proposed, including alternatives suggested by the Planning and Zoning Commission and a Chamber of Commerce subcommittee. Council expressed some interest in a possible alternative to the staff recommendation that recognized that, regardless of elevation, slopes below 25% were less problematic for development than those at or above that percentage. Council also requested information on the bonus requirements and whether the light reflectivity value standards could be mandatory as opposed to being associated with a height bonus. Additionally, Council wanted some follow-up on the takings and geotechnical analysis issues.

Taking the last issue first, he previously provided Council members with information from Dr. Rick Wooten of the North Carolina Geological Survey who is perhaps the foremost expert on landslides in NC. This information suggests that the threshold for requiring a geotechnical analysis proposed by staff and the Planning and Zoning Commission is entirely reasonable. If, however, Dr. Wooten's slope stability analysis for Buncombe County finds unique circumstances that require adjustment to this threshold, staff is prepared to pursue appropriate changes to the ordinance at that time. We do not recommend any adjustment to this standard except in its application (see below).

With regard to where the requirements should apply, staff has examined the information provided by the public and we have the following suggestions:

Areas below 2,220 feet in elevation having 25% or greater slope. First, the prior staff recommendation proposed extending slope requirements into areas below the long-standing "hillside" elevation threshold of 2,220 feet when slopes were 25% or greater. This significantly extended the area covered by the regulations but primarily applied to scattered sites of a few acres or smaller in size. Public comment noted that these areas often offered infill development opportunities having been previously passed over for development on adjoining less steep slopes. Given these circumstances, staff suggests that Council consider exempting steep slope areas below 2,220 feet in elevation from all requirements proposed for steep slope areas above 2,220 feet except the geotechnical analysis requirements (which would apply once the slope reached 40% or greater or if the area represented a moderate to high risk for landslides). The development of these areas would be governed by underlying zoning and general grading requirements.

Areas above 2,220 feet in elevation and having slopes between 15 and 24.9%. Public comment has noted that slopes below 25% were less problematic for development than those at or above that slope percentage. Whether areas of such slope represent major opportunities for affordable housing is debatable, but these areas are certainly better suited for development than those having slopes above 25% and are often on lower, less visible sections of mountainsides. Given these circumstances, staff suggests the Council consider substantially increasing the amount of grading and allowable density in these areas from what staff previously recommended, in effect essentially maintaining the current hillside grading and density limits. The recommended adjustments are illustrated in the following tables. The other proposed requirements, including tree preservation, road corridor design, height, etc. would remain in effect for these areas.

EXISTING GRADE	PERCENT GRADING	
	PRIOR	NEW
15-19%	45%	65%
20-25%	40%	55%

MAXIMUM NUMBER OF UNITS PER ACRE BY EXISTING GRADE										
Existing Grade	RS-2		RS-4		RM-6		RS-8 RM-8		RM-16	
	P	N	P	N	P	N	P	N	P	N
15%-19%	1.2	1.4	1.8	2.5	2.7	3.8	3.6	5.0	7.2	10.0
20%-24%	1.0	1.2	1.4	2.0	2.4	3.0	3.2	4.0	5.6	7.5

KEY: P=PRIOR N=NEW

Areas above 2,220 feet in elevation and having slopes 25% or greater.
No changes recommended.

With regard to the question about the relationship between grading allowances, tree preservation requirements and the density/intensity bonus requirements, it seems there is confusion between what parts of the site are allowed to be graded and what parts preserved to create a bonus. The key issue is that a preservation easement would be required to obtain a bonus. In other words, a significant portion of the site would have to be set aside and governed by a preservation easement in order to qualify for a bonus. You could not count up the percent of each lot in a subdivision that isn't allowed to be built on and claim a density bonus, for example.

NCGS 160A-381 provides that zoning ordinances may promote health, safety, morals and general welfare of the community. The law provides specifically that a zoning ordinance may regulate many aspects of buildings and structures, including height, lot coverage, and open space. Other aspects of buildings may be regulated, but a connection must be established the regulation the legitimate purposes of regulation, and this has been an evolving concept over the years. With regard to using light reflectivity value (LRV) as a requirement instead of as a condition of a height bonus, LRV is an objective, measurable factor, qualitatively no different from a setback requirement, but it is nevertheless a somewhat untested concept. If a connection can be made between LRV and the purposes for which regulation is permitted, with findings in the ordinance, then such a regulation would be legally defensible. In general, regulations such as LRV are always easier to apply when they are the landowner's choice rather than a requirement. With this in mind, a low LRV as a condition for a height bonus would be easier to enforce and would clearly alert the affected property owner to the regulation. If council chooses to make low LRV a requirement, it is suggested that the regulation only apply when the structure exceeds a certain height.

With regard to the concern raised about the ordinance constituting a "taking," the following comments that may require additional elaboration from the City Attorney. Successful takings claims involve a demonstration that no reasonable use of the property may be allowed under a regulation. Since the proposed steep slope regulations create density/intensity reductions based on empirical requirements that have a demonstrated public purpose (e.g., less density on steeper slopes), but do not preclude the use of any affected property for land uses allowed in the underlying zoning, and since the application of the ordinance would be subject to a variance in appropriate circumstances, he believed the likelihood for a successful takings case is extremely limited.

Staff would like to receive Council direction on the above issues and any others you may wish to consider at the May 8, 2007, meeting. We would then return on May 22, 2007,

with a revised ordinance that reflects that direction instead of attempting to wordsmith Council's comments immediately at the May 8 meeting.

He said that he has received two letters, which he passed out to Council, from Suzanne Molloy and Neil Thomas.

Mr. James Wood suggested that the N.C. Dept. of Environmental and Natural Resources numbers be posted at the construction sites when there is the potential for erosion or stormwater issues to let people know who they can contact to deal with the impact.

Mr. John Carroll, President of the Council of Independent Business Owners, said that the steep slope ordinance is a very complex issue and can have unintended consequences. In relationship to what has been presented, he asked Council to consider (1) that this is a private property right issue; (2) is very heavily affecting affordable housing in our community; (3) affects the future of our community; and (4) the solution is not a one size fits all. The issue of viewshed needs to be looked at along with the issues of safety. On some of the very steep slopes we have in our area Council may want to rely on geotechnical reviews in order to help make decisions.

An engineer with LandDesign talked about what is a steep slope and what it actually measures to. He finds that a 30% slope is pretty much a breakpoint where costs and things become more excessive. Using maps he showed drawings of homes with a 30% slope, 25% slope and a roadway with a 30% cross slope. In addition he showed a slope analysis. He felt that an affordable project is doable on a 30% slope and over 30% slope you should have a geotechnical analysis.

Mr. Gerald Green, Asheville resident, felt that may be a reason to have a different standard for urban areas, near urban areas and suburban areas. He also felt that City Council needs to clarify the intent of the ordinance.

Mr. Albert Sneed spoke against the ordinance. He felt that people who have invested to build on their lot will be hurt if this ordinance is enacted. He urged Council to specify what the goal is and send it back to the Planning & Zoning Commission with specific instructions.

Mr. Paul Zurick, representing Biltmore Farms, said that the bottom line is about sustainability. There needs to be a balance of mixed housing and jobs. The City has a limited about of developable land and it should be used as prudently as possible. He urged Council, especially as it relates to the 15-25% slopes to step back so that we can retain the focus on sustainability.

Mr. Robert Coxe, owner of steep slope property, explained how he bought his lot for its view and how his property will be severely affected by this proposed ordinance.

Mr. Jay Quinn, Asheville resident, was concerned about grading in the 15-19% range and the 20-25% range.

Mr. Joel Bassett, Asheville resident, questioned how the drafted state legislation will impact our ordinance.

Mayor Bellamy closed the public hearing at 10:59 p.m.

Throughout the considerable discussion, the following questions/comments were raised by Council and responded to, mainly by Mr. Shuford: how does the draft state legislation impact our ordinance; look at some opportunities for utilizing visualization, along with public input sessions, for understanding these issues; look at how we structure the

ordinance in terms of readability; can we use the fee in lieu of for sidewalks if sidewalks can't be built in the area; how many houses have slid off existing slopes in Asheville; how would the lot on Dr. Martin Luther King Drive by the red light be affected by this ordinance; and above 2220, do we, or how do we regulate slopes between 15-25%.

Councilwoman Cape suggested we require the LRV. There needs to be further discussion on where we apply the geotechnical analyses. She still has questions on the height in the ordinance. She wants to move the ordinance forward in terms of the basic, but there is a lot more work that we need to discuss and perhaps send it back to the Planning & Zoning Commission for things like recognition of viewshed, LRV, roof massings and whether gutters and curbs need to be on the roads, etc.

Councilman Newman felt that the proposal seems to achieve some of our goals, but some parts still don't go far enough in terms of protecting public safety. Information he has seen from the N.C. Geological Survey indicates that the risk of land movements and slides starts at about 36%. He moved that geotechnical analysis be required on all slopes of 36% or more regardless of zoning, and regardless of elevation, as well as all identified hazard areas as per the future mapping that will come out by the N.C. Geological Survey identifying areas that are significant slide risks based on soils and geology. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilman Mumpower didn't think this is about safety, but about trying to fix a potential problem. He felt this is just another level of bureaucracy.

Councilman Newman moved to support staff's recommendation of no application below 2,220 feet, except for geotechnical analysis requirements which would apply once the slope reached 36% or greater (as described and voted on earlier). This motion was seconded by Vice-Mayor Jones.

Councilman Freeborn made a friendly amendment to clarify Councilman Newman's motion to say that we will not apply the steep slope ordinance to anything below 2220 feet except for the requirements of the geotechnical analysis.

The clarified original motion made by Councilman Newman and seconded by Vice-Mayor Jones carried on a 6-1 vote, with Councilman Mumpower voting "no."

Councilwoman Cape moved that above 2220 feet, single-family residences be included in our existing hillside ordinance. This motion was seconded by Councilman Freeborn. City Attorney Oast said that Council is asking to amend our hillside ordinance and because that is a zoning amendment, it will need to go through the Planning & Zoning Commission first.

After discussing several options regarding the number of feet in which to apply the ordinance in slopes of 25% or greater, Mr. Shuford said that Council has given him things that can be changed to this particular ordinance to address the issues. If Council would like, we can take some of these examples given and produce some information similar to what we did with the Planning & Zoning Commission's 2500 foot elevation and give Council some idea of the amount of the existing hillside area that would be affected by these different things and then Council would have a basis for making a decision. He suggested Council instruct staff to look into that area and come back in a couple of weeks without having to go back to the Planning & Zoning Commission for more input.

At the suggestion of Mayor Bellamy, it was the consensus of Council to hire a consultant, if necessary, to develop a visualization tool for Council to see the different impacts of our community. Mayor Bellamy also suggested a Council bus tour of the different elevations.

Councilwoman Cape suggested using the N.C. Geological Survey mapping model as a viewshed area or a slope area rather than picking an elevation area.

Mr. Shuford said that it sounds like Council is interested in having the final version of the information from the N.C. Geological Survey before making any decisions and that will come out sometime mid-summer. He suggested Council table the steep slope ordinance until after the N.C. Geological Survey is available. During that time staff will work on the analysis suggested by Mayor Bellamy and make some other suggestions to Council and perhaps get a couple of the other issues worked out. In the meantime, we have a good ordinance that serves the city well for 30 years with the hillside regulations.

Councilwoman Cape suggested mapping the priority viewshed area and pull them out as an overlay district for hillside and steep slope regulations.

At the request of Councilwoman Cape, it was the consensus of Council to instruct Mr. Shuford to put the amendment regarding including single-family homes in the hillside regulations on the Planning & Zoning Commission's June agenda.

After discussion, Councilman Freeborn moved to schedule a worksession on June 12, 2007, from 4-5:00 p.m., in the Council Chamber of the City Hall Building, in order to look at the maps and data. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

VI. NEW BUSINESS:

A. RESOLUTION NO. 07-97 - RESOLUTION OF INTENT TO CONSIDER AN ORDINANCE TO AMEND THE CHARTER OF THE CITY OF ASHEVILLE TO PROVIDE FOR PARTISAN ELECTIONS

RESOLUTION NO. 07-98- RESOLUTION SETTING A PUBLIC HEARING ON THE QUESTION OF AMENDING THE CHARTER OF THE CITY OF ASHEVILLE TO PROVIDE FOR PARTISAN ELECTIONS

City Attorney Oast said that this is the consideration of a resolution of intent to amend the Charter of the City of Asheville to provide for partisan election

North Carolina law provides that a city may change several features of its form of government. One of the features it may change is to provide that elections be partisan elections.

The process prescribed for this amendment is:

1. Adoption of a resolution of intent
2. Public hearing (10 days notice; not more than 45 days following resolution of intent)
3. Adoption of ordinance amending charter (not earlier than next regular meeting; not more than 60 days after public hearing)
4. Publication of notice within 10 days of adoption of ordinance.

The amendment to the Charter must have been finally adopted and approved at least 90 days prior to the first election for Mayor or Council held pursuant thereto. Pursuant to N.C.G.S. 163-279, for municipal elections held on a partisan basis, the first primary is held on the second Tuesday after Labor Day, which this year is September 11. This means that the ordinance must be finally adopted on or before June 12.

With Council's current regular meeting schedule, there is just enough time to complete the process in time for the September 11 primary, if the following schedule is observed:

May 8 – Adoption of Resolution of Intent
May 22 – Public hearing
June 12 – Adoption of ordinance
September 11 – Hold first primary

Council may, but does not have to, provide that the amendment is only effective upon a vote of the people at a special election to be held within 90 days. If no such election is provided for by Council, the voters may force a referendum on the question by petition. If such an election is called by either method, it would lengthen the time for completing the amendment process, such that the amendment would not be effective in time for the 2007 election.

In 1994, using a similar process, Council amended the Charter to change from partisan to non-partisan elections. In 1997, the Charter was again amended to provide for four-year staggered terms.

The Institute of Government reports that, of the 500 plus municipalities in North Carolina, 9 of them use a partisan election system, including Charlotte and Winston-Salem, among the larger cities.

A resolution of intent to amend the Charter is presented for Council's consideration. If the resolution is adopted, it will be necessary to set a date for a public hearing.

Councilman Newman said that the public hearing would be on the question of involving political parties in Asheville municipal elections. He thinks City Council should consider this is because (1) political parties are already involved in municipal elections in that they have actively supported the candidates from their party by raising funds, sending out mailings, etc.; (2) a Council member's basic philosophy has a direct bearing on how they tend to view the issues; and (3) having this process creates a level playing field between both the political parties in the general municipal elections.

Mr. Jay Quinn, Asheville resident, felt that the way the elections are run now is adequate, but we should do away with all Council members being elected at large.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Vice-Mayor Jones moved to adopt the resolution of intent to consider an ordinance to amend the Charter of the City of Asheville to provide for partisan elections. This motion was seconded by Councilwoman Cape.

Councilman Mumpower was concerned that we are creating artificial hurdles for independent and third party candidates to get their names on the ballot. He felt that Council still needs to address the issue of the 4th seat on Council.

Mayor Bellamy noted that Council did address the issue of the 4th seat, but that there was not a majority of Council to ask that the Charter be amended to say that the 4th highest vote-getter automatically would get the empty seat. Councilman Mumpower felt Council should then look at different options to address that concern.

Councilman Davis would support a public hearing on this issue and would also support addressing the issue of the 4th seat at a later date.

Councilman Mumpower asked for information that provides examples of the modeling standard across the state of a weak mayor, professional manager model compared to a strong

mayor model. He thinks that we will find that there will are non-partisan elections for cities with a system such as ours - the weak mayor, professional manager model.

Mayor Bellamy said that in reality, the position of Mayor should be a full-time position and treated as such. She would like to see that changed in our Charter. She explained why the other reality is that partisan elections make the hurdles harder for African Americans.

Councilman Newman said that if he thought changing to partisan elections would affect minority involvement, he would absolutely oppose it but he hasn't seen any evidence of that. He cited Winston-Salem and Charlotte as having strong minority representation on Council. He thinks that one of the potential benefits of it would be that it could potentially lower the cost for candidates to run for office.

Mayor Bellamy noted that in Charlotte they have ward system and districts are drawn so that African Americans can have a presence on the Council.

The motion made by Vice-Mayor Jones and seconded by Councilwoman Cape carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 324

Councilwoman Cape moved to set a public hearing on May 22, 2007, to consider amending the Charter of the City of Asheville to provide for partisan elections. This motion was seconded by Vice-Mayor Jones and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 325

B. BOARD OF ELECTIONS NEW ELECTION UPDATE

Mayor Bellamy said that she has received the following information from Ms. Trena Parker, Director of Elections, regarding instant runoff voting in North Carolina. Said information read "The General Assembly approved pilot programs for 10 cities and 10 counties. This would allow the City of Asheville to hold only one election-essentially combining the primary and general. The Board of Elections Chair, Jones Byrd, has spoken with Mayor Bellamy regarding the possibility of the City of Asheville being one of the pilot elections. The Elections Board has not decided either way and thought it best to pass along this information for your consideration."

VOTING

When the Instant Runoff Voting (IRV) method is used for a particular contest, voting for one's top choice or choices is the same as if IRV were not used. Each voter is allowed to vote for as many candidates as there are seats to be filled in column A (see Exhibits – Example IRV Ballots). Each voter is then allowed the opportunity to indicate two alternate candidate choices, one per column in each of columns B and C, ranked in order of preference.

For example, in the Office of Mayor contest there is one seat to be filled. Each voter may vote for one candidate in column A, and then may indicate a first alternate candidate choice in column B, and a second alternate candidate choice in column C. In the City Council At-Large contest there are two seats to be filled. Each voter may vote for as many as two candidates in column A, and then may indicate a first alternate candidate choice in column B, and a second alternate candidate choice in column C.

COUNTING – FIRST ROUND

In the first round of counting, all ballots will be counted exactly as if IRV were not used, counting only the results in column A. At the completion of the first round of counting, if it is determined that a sufficient number of candidates received total votes exceeding the threshold of victory for all seats in that contest to be filled, normal procedures apply and there will be no need for a second round of counting. If not all seats are filled, those candidates who have won seats will be removed from further consideration, and a number of candidates not exceeding twice the number of remaining seats to be filled will advance to the second round of counting, those candidates being the ones with the greatest numbers of first round votes.

COUNTING – SECOND ROUND

If a second round of counting is required, each office shall be counted separately according to the following procedures:

A) Counting a single-seat contest:

1) Ballots shall be maintained in separate groups according to where or how they were cast, by precinct or one-stop polling locations, or by mail.
2) For each such group, ballots shall be separated into three stacks, designated **Stack A**, **Stack B**, and **Stack C**.
3) If a ballot contains a vote in column A for either runoff candidate, it shall be placed into Stack A. Because these votes have already been counted in the first round, there is no need to count them again.
4) If a ballot does not contain a vote in column A for either runoff candidate, but does contain a vote in column B for either runoff candidate, it shall be placed into Stack B.
5) All remaining ballots shall be placed into Stack C.
6) Stack B ballots shall be counted by machine or by hand. Only those votes cast for either runoff candidate in column B shall be considered. These totals shall be added to the totals for those candidates from the first round of counting.
7) Stack C ballots shall be counted by machine or by hand. Only those votes cast for either runoff candidate in column C shall be considered. These totals shall also be added to the totals for those candidates from the first round of counting.
8) Repeat steps 1-7 as necessary until all ballots for the entire jurisdiction have been counted.
9) The runoff candidate with the greatest total votes shall be declared the winner.

B) Counting a multi-seat contest:

1) Ballots shall be maintained in separate groups according to where or how they were cast, by precinct or one-stop polling locations, or by mail.
2) For each such group, ballots shall be separated into five stacks, designated **Stack A**, **Stack B**, **Stack B2**, **Stack C**, and **Stack D**.
3) If a ballot contains as many votes in column A as there are total seats to be filled, and all such votes are for candidates who either won seats in the first round or advanced to the second round, it shall be placed into Stack A. Because these votes have already been counted in the first round, there is no need to count them again.
4) If a ballot contains in column A exactly one vote fewer than the number allowed or exactly one vote for a candidate who did not win a seat in the first round and did not advance to the second round, and does contain a vote in column B for any runoff candidate not already voted for in column A, it shall be placed into Stack B.
5) If a ballot contains in column A more than one fewer votes than the number allowed or more than one vote for candidates who did not win seats in the first round and did not advance to the second round or at least one of each of these, and does contain a vote in column B for any runoff candidate not already voted for in column A, it shall be placed into Stack B2.

6) Of all remaining ballots, any which contains in column C a vote for a runoff candidate already voted for in column A or B shall be placed into Stack D, and the rest shall be placed into Stack C.
7) Stack B2 ballots shall be counted by machine or by hand. Only those votes cast for a runoff candidate in column B shall be considered. These totals shall be added to the totals for those candidates from the first round of counting.
8) All Stack B2 ballots which contain in column C a vote for a runoff candidate already voted for in column A or B shall be placed into Stack D, and the rest shall be placed into Stack C.
9) Stack B ballots shall be counted by machine or by hand. Only those votes cast for a runoff candidate in column B shall be considered. These totals shall be added to the totals for those candidates from the first round of counting.
10) Stack C ballots shall be counted by machine or by hand. Only those votes cast for a runoff candidate in column C shall be considered. These totals shall also be added to the totals for those candidates from the first round of counting.
11) Repeat steps 1-10 as necessary until all ballots for the entire jurisdiction have been counted.
12) The runoff candidate with the greatest total votes shall be declared the winner of a seat in this contest.
13) If not all seats have been filled, for each precinct or other ballot group recombine all ballots, then repeat steps 1-12 to determine the next winner.

Mayor Bellamy asked Council if they wish to participate in the IRV pilot program.

Rev. Christopher Chiaronmonte felt this would be a fair way to save taxpayers time and money.

Ms. Leesa Kulba spoke against the IRV.

Councilwoman Cape said that this has been used in other countries with great success. She thinks there is an educational process in it and would be interested in knowing more about it.

Councilman Davis moved that the City of Asheville not participate in the Instant Runoff Voting method. This motion was seconded by Councilman Mumpower and carried on a 6-1 vote, with Councilwoman Cape voting "no."

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of March 30 - April 26, 2007: Joseph R. Martin (Transit Services), Helen Brown (Streets), Barbara Ayers (Water), Solomon Norwood (Streets), Debra McIntosh (Sanitation), Michelle Koussa (Streets), Cindy Tate (Streets), Greg Turner (Streets) and Jim Wilson (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

B. LAWSUIT

The City was served with the following Complaint on April 21, 2007: Reid Thompson v. City of Asheville and Greenlife Grocery of Asheville, LLC. The nature of the proceeding is a petition for writ of mandamus and certiorari to compel the City and Greenlife to comply with the Unified Development Ordinance and noise ordinance. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Randy Teague asked City Council to adopt a resolution supporting incorporation of the Town of Leicester. Mayor Bellamy stated that City Council place this item on an upcoming agenda for consideration.

Rev. Christopher Chiaronmonte spoke about the poor treatment of the homeless in Asheville.

CLOSED SESSION

At 12:16 a.m., Mayor Bellamy announced that the closed session would continue.

At 12:25 a.m., Councilman Newman moved to come out of closed session. This motion was seconded by Councilman Freeborn and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 12:25 a.m.

Tarsha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – May 15, 2007 - 5:00 p.m.

Regular Meeting

Present: Vice-Mayor Diana Hollis Jones, Presiding; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: Mayor Terry M. Bellamy

PLEDGE OF ALLEGIANCE

The Asheville Middle School Student Council led City Council in the Pledge of Allegiance.

INVOCATION

Councilwoman Cape gave the invocation.

I. PROCLAMATIONS:

A. PROCLAMATION PROCLAIMING MAY 13-19, 2007, AS "MUSEUM WEEK"

Councilman Newman read the proclamation proclaiming May 13-19, 2007, as "Museum Week" in the City of Asheville. He presented the proclamation to Ms. Pam Myers, who briefed City Council on some activities taking place during the week.

B. PROCLAMATION PROCLAIMING MAY 13-20, 2007, AS "AMERICORPS WEEK"

Councilwoman Cape Jones read the proclamation proclaiming May 13-20, 2007, as "Americorps Week" in the City of Asheville. She presented the proclamation to Ms. Sarah Hancock and Ms. Cicely Rogers.

C. PROCLAMATION PROCLAIMING MAY 15, 2007, AS "JACK INGRAM DAY"

Councilman Davis read the proclamation proclaiming May 15, 2007, as "Jack Ingram Day" in the City of Asheville. He presented the proclamation to Jack and Ilene Ingram.

D. PROCLAMATION PROCLAIMING MAY 20-26, 2007, AS "NATIONAL PUBLIC WORKS WEEK"

Councilman Freeborn read the proclamation proclaiming May 20-26, 2007, as "National Public Works Week" in the City of Asheville. He presented the proclamation to representatives of the Metropolitan Sewerage District, City of Asheville Street Division, City of Asheville Water Department and City of Asheville Engineering Department.

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "C", "D", "E" and "G" were removed from the Consent Agenda for further discussion.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 8, 2007

B. RESOLUTION NO. 07-99 - RESOLUTION AUTHORIZING THE MAYOR TO CONVEY AIR SPACE ADJACENT TO 11 BOSTON WAY

Summary: The consideration of a resolution authorizing the Mayor to convey air space adjacent to 11 Boston Way.

On April 10, 2007, the City Council of the City of Asheville directed the City Clerk to advertise for upset bids regarding an offer to purchase air rights to City owned property adjacent to 11 Boston Way; (PIN 9648.19-60-1082, 9647.07-69-2935, 9647.07-69-1953) for the sum of $11,665.00. The notice ran in the Asheville Citizen-Times on April 27, 2007, as provided in N. C. Gen. Stat. sec. 160A-269. No upset bids were received in response to said advertisement.

Approval of the resolution will authorize the sale of the property to Kessler Asheville, LLC for the amount of $11,665.00.

Pros:

1. The sale will be at fair market value.
2. It will facilitate an increase in the tax base.
3. It will accommodate characteristics of the building design intended to conform to the historic nature of Biltmore Village.

Con: There is no negative impact.

Economic Development staff recommends City Council approve a resolution authorizing the Mayor to convey air space adjacent to 11 Boston Way.

RESOLUTION BOOK NO. 30 - PAGE 326

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE THREE AGREEMENTS WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO RECEIVE GRANTS IN THE AMOUNT OF $2,500,000, $2,000,000 AND $75,000 TO PERFORM FLOOD DAMAGE REDUCTION ASSESSMENTS AND IMPROVEMENTS

This item was removed from the Consent Agenda for individual discussion.

D. BUDGET AMENDMENT TO RECEIVE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES GRANTS

This item was removed from the Consent Agenda for individual discussion.

E. BUDGE AMENDMENT TO APPROPRIATE $600,000 FROM THE HEALTH CARE PROGRAM'S FUND BALANCE RESERVES TO COVER ONE-TIME COSTS INCURRED DURING THE CURRENT FISCAL YEAR

This item was removed from the Consent Agenda for individual discussion.

F. RESOLUTION NO. 07-101 - RESOLUTION AUTHORIZING THE MAYOR TO EXECUTE AGREEMENTS ADDRESSING COMPLIANCE ISSUES IN THE PACK SQUARE RENAISSANCE PROJECT

Summary: The consideration of a resolution authorizing the mayor to execute agreements addressing compliance issues in the Pack Square Renaissance Project.

Asheville's downtown – or most of it – is included in the National Register of Historic Places.

As a condition of receiving a grant to assist in road and sidewalk construction in connection with the Pack Square Renaissance Project, work is required to be done in accordance with certain guidelines so as to ensure that there is no effect on historic properties or districts, or that any impact is minimized to the extent possible. Pursuant to the City's agreement with the Pack Square Conservancy (herein "PSC"), PSC is responsible for carrying out all aspects of the work on Pack Square, including compliance with applicable laws and regulations. For administration of government grants, however, the City is the entity that is legally responsible to the granting government.

The City was the recipient of some N.C. Dept. of Transportation (DOT) grants in 2006, and executed a Municipal Agreement with DOT for the carrying out of the work funded by those grants. That agreement contained some provisions requiring assessment of impact on the Downtown Historic District. In order to ensure that PSC performed the work provided in the Municipal Agreement, the City entered into an agreement with PSC specifically addressed to the Agreement with DOT. Recently, the City was contacted by the State, indicating that some of the historic assessment requirements of the Municipal Agreement had not been executed properly. After several meetings, the parties (the City, the State, and PSC) have agreed to resolve these issues by entering into a Memorandum of Agreement, setting forth a few requirements in addition to the 2006 Municipal Agreement, including an update of the City's architectural inventory, performance of the archaeological survey in the project area, and the use of the historic granite and curbstones. The Agreement with PSC will be amended to ensure that PSC carries these requirements out.

The resolution (1) authorizes the Mayor to sign the Memorandum of Agreement with DOT, and (2) authorizes the Mayor to sign the amended agreement with PSC.

Pros:
- Resolves a dispute that could jeopardize existing funding.
- Requires the compilation of some information that will be useful to the City.

Cons:
- Adds expense to the project (but this will be the Conservancy's expense).

If Council approves of the proposed method for resolving the grant administration compliance issues, adoption of the resolution is recommended.

RESOLUTION BOOK NO. 30 - PAGE 328

G. RESOLUTION APPROVING THE FISCAL YEAR 2007-08 CAPITAL IMPROVEMENT BUDGET FOR THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

This item was pulled off the Consent Agenda for further discussion.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilwoman Cape and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR FURTHER DISCUSSION

C. RESOLUTION NO. 07-100- RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE THREE AGREEMENTS WITH THE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES TO RECEIVE GRANTS IN THE AMOUNT OF $2,500,000, $2,000,000 AND $75,000 TO PERFORM FLOOD DAMAGE REDUCTION ASSESSMENTS AND IMPROVEMENTS

Summary: The consideration of a resolution authorizing the City Manager to execute three agreements with the North Carolina Department of Environment and Natural Resources (NCDENR) to receive grants in the amount of $2,500,000, $2,000,000 and $75,000 for a total of $4,575,000 to perform flood damage reduction assessments and improvements.

In September 2004, Western North Carolina was severely impacted by flood from Hurricane Frances and Ivan. In November 2004, the North Carolina General Assembly approved Senate Bill 7 to provide financial aide to the area in efforts to reduce damage caused by future flood events.

NCDENR held four meetings from January 2006 to June 2006 to get input from local stakeholders to determine to prioritize the needs of the community as they relate to flood damage reduction. This group consisted of property owners, local government, environmental agencies, developers and community leaders. The group developed a prioritized list of action items to implement in order to reduce future flood damage.

NCDENR allocated money based on those priorities to the appropriate local governments to implement. We received three separate grants in the total amount of $4,575,000 with no required local match. Staff will be dedicating time toward the implementation of these objectives. The following is a breakdown of the contracts.

Amount	Task	Description
$2,500,000		This three-phase flood damage reduction measure institutes a watershed-wide program for flood damage reduction in the Swannanoa watershed.
	1	This phase includes the watershed modeling, economic analysis and project development.
	2	This phase includes implementation of the measures recommended in phase I
	3	This phase includes modeling of future conditions.
$2,000,000		Assist in the development of the Wilma Dykeman Riverway Plan specifically by assisting in acquiring property that is prone to flooding.
$75,000		Development of an Emergency Flood Preparedness and Response Plan for Biltmore Village

Pros:

- These grants will allow us to reduce damage to properties as a result of flooding.
- This money will be paid from State funds as opposed to local money only.
- The City of Asheville will work cooperatively with Black Mountain and Buncombe County to perform the work in the $2,500,000 contract. This will require a memorandum of agreement between all three agencies. Staff has met with representatives from both groups. The memorandum of understanding will be executed by the City Manager following approval of this contract.

Con:

- We will need to dedicate staff time to moving these projects forward. The implementation of this work will be a high priority for our office.

Staff recommends City Council approve a resolution authorizing the City Manager to execute three agreements with the North Carolina Department of Environment and Natural Resources (NCDENR) to receive grants in the amount of $2,500,000, $2,000,000 and $75,000 for a total of $4,575,000 to perform flood damage reduction assessments and improvements.

City Engineer responded to questions raised by Councilman Mumpower.

Councilman Mumpower moved for the adoption of Resolution No. 07-100. This motion was seconded by Councilman Davis and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 327

D. ORDINANCE NO. 3469 - BUDGET AMENDMENT TO RECEIVE N.C. DEPT. OF ENVIRONMENT AND NATURAL RESOURCES GRANTS

Summary: See Consent Agenda Item "C" above.

Councilman Mumpower moved for the adoption of Ordinance No. 3469. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 353

E. ORDINANCE NO. 3470 BUDGE AMENDMENT TO APPROPRIATE $600,000 FROM THE HEALTH CARE PROGRAM'S FUND BALANCE RESERVES TO COVER ONE-TIME COSTS INCURRED DURING THE CURRENT FISCAL YEAR

Summary: The consideration of a budget amendment to appropriate $600,000 from the Health Care Program's fund balance reserves to cover one-time costs incurred during the current fiscal year.

The City's Health Care Program has experienced a number of one-time expenses during the current fiscal year that were not anticipated when the budget was adopted last spring. For example, there has been a spike in expenses due to the occurrence of several high dollar claims amounts. Also, there were several hospital medical bills from prior years that were delayed in reaching the City, and therefore they had to be paid out of the current year's budget. The City also incurred additional expenses during the transition period from the old third party administrator to the new administrator.

To cover these one-time expenses, staff is recommending that Council appropriate $600,000 from the Health Care Program's reserves. As of June 30, 2006, the fund balance reserve for the Health Care Program was $5.48 million. Staff believes that this $600,000 appropriation from the Health Care Program reserves will leave more than enough available in reserves to cover claims incurred but not reported, protect us against the volatility of the health care market, and provide a sufficient "rainy day" cushion. Based on an analysis conducted in conjunction with Ferguson last year, we determined that a fund balance amount of approximately $3.1 million for health care is sufficient.

It should also be noted that the Health Care Program's fund balance is considered "reserved" by the City's auditors. Therefore, this fund balance appropriation will not affect the year-end unreserved fund balance projection that staff presented in the 3rd Quarter Financial Report.

PRO:

- Provides an adequate budget for the projected FY 2006-07 expenditures in the Health Care program.

CON:

- None.

City staff recommends City Council approve the budget amendment to appropriate $600,000 from the Health Care Program's fund balance.

Chief Financial Officer Ben Durant responded to questions raised by Councilman Mumpower. As a result, City Manager Jackson said that we will have our consultant evaluate this loss and ask for their advice on whether they suggest changes in the stop loss coverage or other practices.

Councilman Freeborn moved for the adoption of Ordinance No. 3470. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 355

G. RESOLUTION NO. 07-102 - RESOLUTION APPROVING THE FISCAL YEAR 2007-08 CAPITAL IMPROVEMENT BUDGET FOR THE ASHEVILLE REGIONAL AIRPORT AUTHORITY

Summary: The consideration of a resolution approving the Fiscal Year 2007-08 Capital Improvement budget for the Asheville Regional Airport Authority.

Section IV "Capital Improvements" of the current land lease agreement between the City of Asheville and the Asheville Regional Airport Authority grants the Airport the authority make capital improvements for aeronautical purposes and purposes incidental to the airport provided that written approval is first obtained from the City of Asheville. Staff has reviewed the Authority's capital improvements program and recommends approval.

Staff recommends City Council approve the Fiscal Year 2007-08 Capital Improvement budget for the Asheville Regional Airport Authority.

In response to Councilman Mumpower, City Manager Jackson said that a one page document has been provided to Council regarding the budget; and in the future when similar requests are made, similar documentation will be provided to Council in their agenda package.

Councilman Mumpower moved for the adoption of Resolution No. 07-102. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 329

III. PRESENTATIONS & REPORTS:

A. ASHEVILLE TRANSIT COMMISSION ANNUAL REPORT

Transit Commission Chair Karen Austin updated City Council on their annual report.

Ms. Austin said that their mission is to facilitate public mass transit to all customers. The vision of the Commission is to create a first-class innovative model of public transportation that moves people affordably, efficiently, and equitably in an environmentally sustainable manner.

Short range goals (1-5 years) as of January 2005 consist of expand service; improve access and ease of use; increase ridership; and improve financial stability.

Successes consist of expanded hours; expanded service area; redesigned maps and signs; upgraded bus stops and transit center; developed pass programs for employers and students; and increased public visibility.

Using graphs, she showed the steady increase in ridership and the July 2006 through May 2007 evening service customers.

Some challenges include (1) limited evening service; (2) frequency; (3) customer service; (4) schedule accuracy; and (5) expanding service area.

Ideas awaiting implement include (1) increased frequency along high-traffic corridors; (2) expanded passport program; (3) study of routes and schedules; (4) park and ride lots; (5) neighborhood transit hubs; (6) cohesive marking plan; and (7) upgrading technology.

To reach our goals, we need funding. Improvements to the system and increases in service are being held back by limited funds and a simple lack of necessary manpower.

Funding sources (1) lobby for revised federal funding; (2) City Council's continued support for transit improvements and marketing; (3) funding increases to match regional growth; (4) business/community support (passport program); and (5) innovative advertising efforts.

Advertising opportunity - bus wraps (1) estimated potential income - $8,000 per bus per year revenue; (2) generate buzz about buses; and (3) potential showcase for community asset.

Ms. Austin responded to various questions/comments from Council, some being, but are not limited to. is there any dialogue with the County or regional partners on the park and ride idea; update on the Green Building Council wanting to build larger bus stops; do we have a specific person on staff who looks for granting opportunities that support energy efficiencies and fleet efficiency measures; and do we have much success in obtaining grants for transit.

Councilman Freeborn requested additional information on the costs and the return if we did full bus wraps.

Councilman Newman said that as we set ambitious fuel conservation goals, he asked if prior to replacing our bus fleet with the more conventional buses that we analyze the feasibility of purchasing more fuel efficient vehicles.

At the request of Councilwoman Cape, it was the consensus of Council to (1) request an exploration of the park and ride proposal; and (2) ask the Chairs of the Transit Commission and the Energy & Environmental Committee to meet and talk about how they see the inter-connectiveness of the two boards and respond to questions raised by Councilman Newman and Freeborn.

On behalf of City Council, Vice-Mayor Jones thanked Ms. Austin and the Transit Commission members for their hard work.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER CONDITIONAL ZONING OF PROPERTY LOCATED ON WYNNE STREET, AND IDENTIFIED AS THE GRIMES & TEICH PARKING LOT, FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING FOR AN ADDITIONAL PARKING AREA FOR THE EXISTING BUSINESS

ORDINANCE NO. 3471 - ORDINANCE TO CONDITIONALLY ZONE PROPERTY LOCATED ON WYNNE STREET, AND IDENTIFIED AS THE

GRIMES & TEICH PARKING LOT, FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO CENTRAL BUSINESS DISTRICT/CONDITIONAL ZONING FOR AN ADDITIONAL PARKING AREA FOR THE EXISTING BUSINESS

Vice-Mayor Jones opened the public hearing at 5:58 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to conditionally zone property located on Wynne Street, and identified as the Grimes & Teich parking lot, from RS-8 Residential Single-Family High Density District to Central Business District/Conditional Zoning for an additional parking area for the existing business. This public hearing was advertised on May 4 and 11, 2007.

The subject property is located off of College Street immediately east of 535 College Street (on which are located the legal offices of Grimes and Teich, LLP). The property although also abutting Wynne Street (a residential street in the East End community), can currently be accessed off of an existing drive on College Street and relates topographically to College rather than Wynne Street. The parcel to which the petition applies is bounded to the north and west by road rights-of-way for College and Wynne Streets. To the south, there is a single-family home and to the west are the existing law offices and accompanying parking areas. Zoning to the west and north is CBD (Central Business District) and to the south, the zoning is RS8 (Residential Single-Family High Density District). The land to the east is unzoned right-of-way.

The property that is the subject of this conditional zoning request is .15 acres in size. The applicant wishes to rezone this property from RS-8 to Central Business District/Conditional Zoning in order to provide additional parking for the adjacent office building. The existing driveway entrance off of College into the current parking area will provide the ingress and egress for the additional parking area. The creation of twelve (12) parking spaces is shown along with storm drainage provision and landscaping. An alternative compliance request for the street trees is provided in the event that N.C. Dept. of Transportation (NCDOT) denies the application (submitted by the developer) for street plantings in the right-of-way. Staff is supportive of this request and will work with the developer on alternative landscaping in the unlikely even that NCDOT denies the application for encroachment. The applicant is actually proposing more landscaping than is required in the CBD and providing vegetation which should improve the buffer of the neighborhood from College Street.

The proposed parking area is not required to go through Downtown Design Review (DTDR) as it is not in the DTDR core area and is a minor work. The applicant conducted a meeting to inform the residents in the immediate area but had not one in attendance.

At their meeting on March 19, 2007, the City of Asheville Technical Review Committee (TRC) reviewed the conditional zoning request and made a positive recommendation that the project be forwarded to the Planning and Zoning Commission subject to the conditions in the TRC report and the standard conditions listed below. At the meeting, it was agreed that the City's Traffic Engineer would reevaluate the need for a 24 foot minimum drive aisle width. This review has been completed and due to the size and nature of the parking area, he has accepted and approved the proposed 20 foot width.

On April 4, 2007, the Asheville Planning and Zoning Commission unanimously recommended approval of this conditional zoning amendment. There was no public comment on the application.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The project, if approved must meet the technical standards set forth in the City's Unified Development Ordinance and Standards and Specifications Manual. The existing site plan shows compliance with most applicable development standards.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The adjoining property to the west along College is developed for office use. The topographic difference between this property and the adjoining residential property, coupled with the plantings proposed by the applicant, should minimize the impact on the adjoining residence.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   As stated previously, some of the abutting property is already developed for office use, including parking. The topographic difference between the subject property and the adjoining residential property, coupled with the plantings proposed by the applicant, should minimize the impact on the adjoining residence.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The property relates topographically to the properties along College Street which contain office buildings and accompanying parking. The addition of a parking area containing twelve (12) spaces will be similar to existing development parking.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**

   This conditional zoning request complies with the comprehensive planning strategies of:
   a. Identifying appropriate areas for commercial/office uses looking at compatibility with surrounding uses.
   b. Improving landscaping along gateway corridors into the Central Business District

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   This office parking area is located on Asheville Transit system Routes 13 and 18 and along a major street. All other technical aspects of this project have or can be met by the applicants.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The proposed use will not increase traffic in the area. No new driveway will be created for this parking area.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Provides needed parking for an existing business.
- Adds landscaping to buffer the adjoining residential area from College Street and the office development along College.
- Proposes to add street trees along College.

Cons:

- Could be considered to be a business intrusion into the adjoining residential area.

Staff recommends approval subject to the conditions placed on the development by the TRC and the following standard conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits.

A representative of the applicant spoke in support of the conditional zoning.

Vice-Mayor Jones closed the public hearing at 6:02 p.m.

Vice-Mayor Jones said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. ____, to conditionally zone property located on Wynne Street, and identified as the Grimes & Teich parking lot, from RS-8 Residential Single-Family High Density District to Central Business District/Conditional Zoning, subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits, (noting that the request is reasonable based on the information provided in the staff report and as stated in the staff recommendation). This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 357

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 103 N. BEAR CREEK ROAD FROM THE APPROVED COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING IN ORDER TO ADD THE PERMITTED USES ON THE SITE FOR A PRIVATE K-12 SCHOOL

ORDINANCE NO. 3472- ORDINANCE TO AMEND THE CONDITIONAL ZONING OF PROPERTY LOCATED AT 103 N. BEAR CREEK ROAD FROM THE APPROVED COMMERCIAL INDUSTRIAL DISTRICT/CONDITIONAL ZONING IN ORDER TO ADD THE PERMITTED USES ON THE SITE FOR A PRIVATE K-12 SCHOOL USE

Vice-Mayor Jones opened the public hearing at 6:02 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to amend the conditional zoning of property located at 103 N. Bear Creek Road from the approved Commercial Industrial District/Conditional Zoning in order to add the permitted uses on the site for a private K-12 School. This public hearing was advertised on May 4 and 11, 2007.

The subject property (2.28 acres) is located within the City Limits on North Bear Creek Road, just north of the intersection of N. Bear Creek and Deaverview Road. Access to the property is off of N. Bear Creek Road. Surrounding properties to the north and west are zoned residentially (RS8, RM8, RM16) and the properties to the south and east are zoned Commercial Industrial. The land use pattern in the area follows the zoning. To the north are single-family homes; to the west, both single-family and multi-family housing. A self-service storage facility is located immediately south of the property. MB Haynes construction/contracting/electronics operation is located to the east.

The applicant received rezoning approval, a modification, and final Technical Review Committee (TRC) approval last year for their plans to rezone the property from RM-8 to Commercial Industrial/Conditional Zoning for the purpose of establishing a preschool. The property currently contains a single-family home. It is proposed that the single-family home be preserved for residential use and for use in conjunction with the operation of the school or preschool. The original development plan showed, in addition to the preservation of the existing home, the construction of two buildings approximately 3,744 square feet in size. The planned use of a temporary educational building on the site (the subject of the modification) has now been omitted from the proposal. A sidewalk along Bear Creek is proposed along with one-way entrance and exit drives to facilitate drop off and pick up of children.

The applicants are seeking an amendment to their original plans in order to add to the uses permitted on the site, a school serving grades K-12. The site plan has been amended to address this use change but remains virtually unchanged from the previous approval.

At their meeting on March 5, 2007, the reviewed the amendment to the conditional zoning and made a positive recommendation (with conditions) that the request be forwarded to the Planning and Zoning Commission. One of the conditions listed on the report (the need for fire lanes within 150 feet of all buildings) was addressed with the addition of a condition that sprinkler systems be installed in new buildings not within 150 feet of a fire lane and that the plans for these systems be submitted to and approved by the Fire Marshal. Other conditions added by TRC (now shown on the report) were:

- That the existing use of the home for a residence be grandfathered.
- That the proposed species be reexamined with the Planning Staff to make certain that the plants have a reasonable chance of survival.
- That the applicants work with the City's Addressing Coordinator to name the drive and address all buildings in accordance with City requirements.

On April 4, 2007, the Asheville Planning and Zoning Commission unanimously recommended approval of this conditional zoning amendment. There was no public comment on the application.

Section 7-7-8(d)(2) of the Unified Development Ordinance (UDO) states that planning staff shall evaluate conditional zoning applications on the basis of the criteria for conditional use permits set out in section 7-16-2. Reviewing boards may consider these criteria; however, they are not bound to act based on whether a request meets all seven standards.

1. **That the proposed use or development of the land will not materially endanger the**

public health or safety.
The project, if approved, must meet the technical standards set forth in the City's Unified Development Ordinance. The proposed site plan shows compliance with many of the City's development standards; the applicant is working with City staff on full compliance. The applicants are also working with the appropriate licensing professionals on the development of this site for a school and preschool.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**

   The applicant is proposing little grading for the development of the child care and school facilities. The majority of the existing trees on site are proposed to be maintained.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The use of the property surrounding this site is varied. There exist commercial, industrial, and residential uses on various sides of the subject property. The applicants propose to save as much of the existing vegetation on the site as is possible. Compliant buffering is proposed in appropriate locations.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   The character of the area in which this development is proposed is not easily defined due to the varied nature of uses found. The scale of the proposed buildings is in keeping with a residential area. The area has a fairly dense residential population for which the preschool/school would be a convenience.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The proposed development (and phasing) supports the 2025 Plan regarding permitting appropriately scaled non-residential uses that serve residents of neighborhoods in appropriate residential locations.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   Asheville Transit Route 15 services the Deaverview Apartments immediately southwest of the proposed development. All technical aspects of the project have or can be met by the applicants.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
   The applicants are working with the City of Asheville Engineering Department to provide appropriately for the automobiles that will enter and exit this property for the drop off and pick up of children attending the facility.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Allows for an appropriate nonresidential use in a transition area between residential and commercial/industrial uses.
- Landscape plan indicates the preservation of considerable existing vegetation.

Cons:

- Some might view this as an intrusion into the neighborhood.

Staff recommends approval subject to the conditions placed on the development by the TRC and the following standard conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits.

Mr. Gerald Green, representing the applicant, spoke in support of the amendment to the conditional zoning.

Vice-Mayor Jones closed the public hearing at 6:05 p.m.

Mr. Ken Huck, applicant, responded to Vice-Mayor Jones' question about how many student the school would hold.

Vice-Mayor Jones said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3472, to amend the Conditional Industrial/Conditional Use approval for property located at 103 N. Bear Creek Road, subject to the following conditions: (1) The project shall comply with all the conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits, (noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilwoman Cape and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 361

C. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON ENKA LAKE ROAD FOR THE PROJECT IDENTIFIED AS BILTMORE LAKE, BLOCKS D2-E, FOR DEVELOPMENT OF 103 RESIDENTIAL UNITS

ORDINANCE NO. 3473 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED ON ENKA LAKE ROAD FOR THE PROJECT IDENTIFIED AS BILTMORE LAKE, BLOCKS D2-E, FOR DEVELOPMENT OF 103 RESIDENTIAL UNITS

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Vice-Mayor Jones opened the public hearing at 6:07 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Nate Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for property located on Enka Lake Road for the project identified as Biltmore Lake, Blocks D2-E, for development of 103 residential units (Attachment to City Exhibit 3 - Aerial Map).

This review concerns a proposed gated 103 unit single-family attached development. The proposed development is classified as a "Planned Community" pursuant to State statutes which allows for a different form of home ownership not commonly considered in Asheville. The community will appear and operate much like a single family neighborhood but without individual lot ownership. Instead, all property beyond the individual structures will be owned and managed by a homeowner's association. This affords the developer more freedom in designing the layout of the community to achieve a comparable number of units while preserving additional open space and reducing infrastructure costs much like the Block D1 development which is currently being constructed. Pursuant to Section 7-5-9(a)(1)(a.)(3.) of the Unified Development Ordinance (UDO), any manufactured housing community, camper/trailer park or other residential development containing more than 50 individual units is reviewed as a Level III Site Plan Review.

The subject site is located off of Enka Lake Road and Orvis Stone Circle west of Asheville in the City's Extraterritorial Jurisdiction (ETJ). The property consists of five lots zoned RM-16 (Residential Multi-Family High Density District) and is comprised of 44.68 acres according to Buncombe County tax records. The subject site is bounded to the north and east by Enka Lake zoned RM-16, to the west by Enka Lake Rd., Hominy Valley elementary school and vacant land zoned INST and RM-16 and to the south by Orvis Stone Circle and the Biltmore Lake Block D1 development zoned RM-16.

The RM-16 zoning district was created to permit a full range of high density multi-family housing types along with limited institutional, public and commercial uses appropriate within high density residential areas. It is intended that this district be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the demand generated by high density residential development.

Access to the property will be gained from two gated entries (Attachment to City Exhibit 3 - Conceptual Master Plan). The main entrance that will serve Block D2-E is located off of Orvis Stone Circle which was constructed as part of the Block D1 development, and one additional gated access entrance is proposed off of Enka Lake Road. Pursuant to Section 7-5-9(a)(1)(b.) of the UDO, properties within 1,500 feet of each other, under the same ownership and/or developed

by the same developer over a period of three years or less shall be considered to be one development and reviewed as such. The entire infrastructure for Block D1 has been installed and the residential units are currently under construction. Block D1 was originally to consist of 50 units, but because two units would not have met their required setbacks and one unit would have encroached into one of the Block D2-E parcels, the developer included the units as part of this approval.

At their March 19, 2007, meeting the Technical Review Committee (TRC) approved this project subject to the conditions in the staff report. Subsequently, the Planning and Zoning Commission unanimously approved this project subject to the conditions recommended by staff at their April 4, 2007, meeting.

As of the time of this writing, staff has received no communication from adjacent property owners or other citizens concerning the proposed development.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case pursuant to Section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The development provides a balance between density and the preservation of riparian buffers and open space. The RM-16 zoning district allows for both single-family detached and multi-family dwellings. Because the proposal is for a planned community, the developer is able to cluster the residences around the road infrastructure and preserve the outlining common areas as open space.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The proposed development of 103 residential dwelling units would integrate with the existing Block D1 and surrounding Biltmore Lake residential developments. The area has seen significant growth in the single-family residential market, and would transition well with the surrounding commercial, industrial and institutional elements along the Smokey Park Highway, Sand Hill Rd. and Enka Lake Rd. corridors. Staff feels that the proposed project would have no discernible effect on surrounding property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   There are a variety of commercial, institutional and multi-family residential developments in the area that would be consistent with the proposed development. The density of the project is approximately 2.3 dwelling units per acre. The zoning of the site is RM-16, and the project does not require density bonuses or special incentives to build this project. The proposed use is in harmony with the scale, bulk, coverage, density and character of the underlying area. The clustering of the units and the preservation of over 12 acres of

open space on the site will assist the development in blending into the site in a similar fashion as other developments in the area have done.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The application of high quality development, pedestrian connectivity between parcels, preservation of open space and riparian buffers supports several goals and objectives as described in both the ***Asheville City Development Plan 2025*** and the ***Strategic Operating Plan*** (See **Compliance with Comprehensive Plan** and **Strategic Operating Plan Considerations** in above staff report).

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
Plans are underway for road widening for Sand Hill Road, the closest connecting street, based on growth projections for the community. The developer must provide an urban level of service for the development and provide detailed guidelines on how requirement will be met. Other facilities are in place to support the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and does not meet the threshold for requiring a traffic impact analysis, nor is it expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The project would allow for significant preservation of open space and continuous riparian buffers along Enka Lake.
- Extensive trails and sidewalks would be provided connecting residents of the new development to the larger community.

Cons:

- Applicant wishes to gate the community and prevent public access to roads and sidewalks.

Staff feels that the proposed development has many positive aspects and does meet the minimum standards required of a conditional use permit.

It should be noted that this development is being proposed as an extension of an existing privately maintained and gated community. At Council direction, staff has prepared an ordinance that prohibits gated communities which was recently reviewed and approved by the Planning and Zoning Commission; this amendment is tentatively slated to come before Council by the end of May.

Recent concerns over the impact of gated communities on the city may be best addressed by our appointed and elected officials as a separate policy matter. Staff recommends that the City Council utilize public input concerning this matter and carefully consider whether the conditional use permit should be conditioned to mitigate any gated community concerns.

Mr. Will Bule, representing the applicant, spoke in support of the conditional use permit and specifically requested Council to allow them to proceed with the gated community as this is just an extension of an existing privately maintained gated community (Applicant Exhibit 1).

After rebuttal, Vice-Mayor Jones closed the public hearing at 6:15 p.m.

In response to Councilwoman Cape, Mr. Bule explained the stormwater measures that will be taken.

When Councilwoman Cape asked if the greenways along the lake edge would be open to the public, Mr. Bule explained that in the past when the lake was open to the public vandalism and damage to property occurred. The homeowners association then felt they needed to police the area better and as a result closed the area to public access.

There was a brief discussion initiated by Councilman Freeborn, resulting in City Manager Jackson reinforcing up front conversations with developers who especially build in our extraterritorial jurisdiction area about voluntarily annexing prior to lots being sold.

In response to Councilman Newman, City Attorney Oast said that when people purchase property in close proximity to the existing City limits and because of the level of development in the surrounding area, realtors could advise the potential property owners that the property is, or may be, eligible for annexation.

Councilman Mumpower moved for the adoption of Ordinance No. 3473, granting a conditional use permit for property located property located on Enka Lake Road for the project identified as Biltmore Lake, Blocks D2-E, for development of 103 residential units, subject to the conditions recommended by City staff and subject to the following conditions: (1) The developer shall provide an urban level of public safety service for the development; (2) The project shall comply with all conditions outlined in the TRC staff report; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (6) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Newman and carried unanimously.

D. PUBLIC HEARING TO CONSIDER REZONING AN AREA INCLUDING PROPERTIES LOCATED AROUND 1200 BLEACHERY BOULEVARD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL BUSINESS I DISTRICT

ORDINANCE NO. 3474- ORDINANCE TO REZONE AN AREA INCLUDING PROPERTIES LOCATED AROUND 1200 BLEACHERY BOULEVARD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL BUSINESS I DISTRICT

Vice-Mayor Jones opened the public hearing at 6:24 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone an area including properties located around 1200 Bleachery Boulevard from RS-8 Residential Single-Family High Density District to Commercial Business I District. This public hearing was advertised on May 4 and 11, 2007.

open space on the site will assist the development in blending into the site in a similar fashion as other developments in the area have done.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
The application of high quality development, pedestrian connectivity between parcels, preservation of open space and riparian buffers supports several goals and objectives as described in both the ***Asheville City Development Plan 2025*** and the ***Strategic Operating Plan*** (See **Compliance with Comprehensive Plan** and **Strategic Operating Plan Considerations** in above staff report).

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
Plans are underway for road widening for Sand Hill Road, the closest connecting street, based on growth projections for the community. The developer must provide an urban level of service for the development and provide detailed guidelines on how requirement will be met. Other facilities are in place to support the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and does not meet the threshold for requiring a traffic impact analysis, nor is it expected to cause undue traffic congestion or create a traffic hazard.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- The project would allow for significant preservation of open space and continuous riparian buffers along Enka Lake.
- Extensive trails and sidewalks would be provided connecting residents of the new development to the larger community.

Cons:

- Applicant wishes to gate the community and prevent public access to roads and sidewalks.

Staff feels that the proposed development has many positive aspects and does meet the minimum standards required of a conditional use permit.

It should be noted that this development is being proposed as an extension of an existing privately maintained and gated community. At Council direction, staff has prepared an ordinance that prohibits gated communities which was recently reviewed and approved by the Planning and Zoning Commission; this amendment is tentatively slated to come before Council by the end of May.

Recent concerns over the impact of gated communities on the city may be best addressed by our appointed and elected officials as a separate policy matter. Staff recommends that the City Council utilize public input concerning this matter and carefully consider whether the conditional use permit should be conditioned to mitigate any gated community concerns.

Mr. Will Bule, representing the applicant, spoke in support of the conditional use permit and specifically requested Council to allow them to proceed with the gated community as this is just an extension of an existing privately maintained gated community (Applicant Exhibit 1).

After rebuttal, Vice-Mayor Jones closed the public hearing at 6:15 p.m.

In response to Councilwoman Cape, Mr. Bule explained the stormwater measures that will be taken.

When Councilwoman Cape asked if the greenways along the lake edge would be open to the public, Mr. Bule explained that in the past when the lake was open to the public vandalism and damage to property occurred. The homeowners association then felt they needed to police the area better and as a result closed the area to public access.

There was a brief discussion initiated by Councilman Freeborn, resulting in City Manager Jackson reinforcing up front conversations with developers who especially build in our extraterritorial jurisdiction area about voluntarily annexing prior to lots being sold.

In response to Councilman Newman, City Attorney Oast said that when people purchase property in close proximity to the existing City limits and because of the level of development in the surrounding area, realtors could advise the potential property owners that the property is, or may be, eligible for annexation.

Councilman Mumpower moved for the adoption of Ordinance No. 3473, granting a conditional use permit for property located property located on Enka Lake Road for the project identified as Biltmore Lake, Blocks D2-E, for development of 103 residential units, subject to the conditions recommended by City staff and subject to the following conditions: (1) The developer shall provide an urban level of public safety service for the development; (2) The project shall comply with all conditions outlined in the TRC staff report; (3) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (4) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (5) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (6) This project will undergo final review by the TRC prior to issuance of any required permits. This motion was seconded by Councilman Newman and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 365

D. PUBLIC HEARING TO CONSIDER REZONING AN AREA INCLUDING PROPERTIES LOCATED AROUND 1200 BLEACHERY BOULEVARD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL BUSINESS I DISTRICT

ORDINANCE NO. 3474- ORDINANCE TO REZONE AN AREA INCLUDING PROPERTIES LOCATED AROUND 1200 BLEACHERY BOULEVARD FROM RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT TO COMMERCIAL BUSINESS I DISTRICT

Vice-Mayor Jones opened the public hearing at 6:24 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of an ordinance to rezone an area including properties located around 1200 Bleachery Boulevard from RS-8 Residential Single-Family High Density District to Commercial Business I District. This public hearing was advertised on May 4 and 11, 2007.

The area proposed for rezoning has undergone significant changes in the last five years. The most noteworthy change during this time period is the construction of Bleachery Boulevard, the road which now bisects the area and connects Fairview Road to the Riverbend developments and Swannanoa River Road. Three of the four residences that were in the area have been removed. Fairview Avenue, which used to connect through to Fairview Road via a road called Stevens Street, now dead-ends at a row of bollards, preventing automobile traffic flow between Bleachery Boulevard and the neighborhood to its west.

The overall acreage of the area proposed to rezoned is approximately four acres, but just under one and a half acres of that is privately owned property. This area is currently zoned RS-8, a district which was intended to "establish a high density per acre for single-family dwellings where public infrastructure is sufficient to support such development and to stabilize and protect the district's residential character in areas of existing high density single-family development while promoting a suitable environment for single-family living."

In the period since this zoning district was assigned, the aforementioned characteristics of this particular area which have been modified have trended away from the previous single-family small-street nature. The new street (Bleachery Boulevard) represents more of a thoroughfare for commercial traffic. There is no direct street connection to the adjacent residentially zoned area. Redevelopment with detached homes has not been pursued.

While this area would not have been well-suited for commercial development five years ago, the additional infrastructure provides new options. The new road is built to accommodate commercial traffic. The area is served by transit route 12, which runs both along Fairview Road and Cedar Street. The applicant is seeking rezoning to Community Business I district, whose intent is "to provide areas for medium-density business and service uses serving several residential neighborhoods. (A) community business center may serve as a workplace for many residents in the surrounding neighborhoods and should be sensitive to a significant pedestrian population, but also provide for adequate and safe vehicular access."

The changes that have arrived in this stretch of land suggest that the previous residential zoning may no longer be appropriate, and that a commercial designation like that of Community Business I would encourage a more fitting type of development. It should be noted that the constraints of the lots would prevent large-scale developments, and would require careful design to meet parking and buffering requirements should the rezoning be approved.

At their April 4, 2007, meeting the Planning and Zoning Commission voted unanimously to recommend approval of this request.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros

- Recent changes in the subject area have altered its character away from single-family residential.
- Infrastructure is in place to support commercial use.
- Complies with Comprehensive Plan policies and City Council goals.

Cons

- Designing compliant development for the narrow parcels in this area will be challenging.

Staff is of the opinion that the extensive changes to this area since it was assigned the RS8 zoning district have created conditions that lend themselves to an upzoning to allow mixed use, and therefore recommend approval of the petitioners' request.

Vice-Mayor Jones closed the public hearing at 6:27 p.m.

Mr. Harley Dunn, property owner, and Mr. Esselstyn responded to various questions/comments from Council, some being, but are not limited to: what kinds of activities might go on the properties due to the unique shape of the lots; does staff feel that Bleachery Boulevard is a commercial corridor; does staff have any concern of the proximity to the residences behind the property on the west side; what is the height limit in the Commercial Business I District; why did staff recommend the Commercial Business I District; what type of buffering and landscaping would be required between these properties and the existing residences; and how wide are the lots being proposed to be rezoned.

Councilwoman Cape was concerned about putting a commercial corridor through a residential area and the amount of traffic that would be generated on Bleachery Boulevard, especially without knowing the actual uses on the lots.

Vice-Mayor Jones said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3474, noting that City Council finds that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Davis and carried on a 5-1 vote, with Councilwoman Cape voting "no."

ORDINANCE BOOK NO. 23 - PAGE 371

E. PUBLIC HEARING TO APPROVE THE LEASE/PURCHASE AGREEMENT AND PAYMENT FOR OVERLOOK PARK

RESOLUTION NO. 07-104 - RESOLUTION APPROVING THE LEASE/PURCHASE AGREEMENT AND PAYMENT FOR OVERLOOK PARK

Vice-Mayor Jones opened the public hearing at 6:41 p.m.

City Attorney Oast said that this is the consideration of a resolution authorizing the City to enter into a lease-purchase agreement with The Trust for Public Land for the acquisition of 29.62 acres of land on Beaucatcher Mountain. This public hearing was advertised on May 4, 2007.

On March 20, 2007, Council approved in concept the acquisition of 29.5 acres of land on the west slope of Beaucatcher Mountain. The acquisition is to be facilitated by The Trust For Public Land (TPL), a non-profit land conservancy organization with which the City has worked in the past (Broadway Greenway, Jake Rusher Park). Funds for the purchase are to come from several sources, including grants, private donors, and contributions from the City and Buncombe County at $575,000 apiece. The total purchase price is $2.6 million.

Because only part of the purchase money ($1.4 million) will be available at closing, it is necessary for the remainder of the purchase to be financed. TPL proposes to do this over the course of three years, and therefore proposes a lease-purchase agreement with the City. In this arrangement, TPL would acquire the property, and obligate itself financially to the seller. TPL would then lease the property to the City for a three-year term. The annual lease payments would be approximately equal to the amounts that TPL anticipates receiving – in grants and pledges – for each year, and rather than being paid by the City, would be applied to the annual lease payment, which would then be applied to the balance of the purchase price. The lease payments reflect the "carrying costs" (9.25% interest on unpaid balance) of TPL's purchase contract. He reviewed a table showing the estimated lease payments over this term. At the end of the lease term, the property would be transferred in fee to the City, at the City's option. One of the grants anticipated in year 2 of is a $500,000 grant from the Parks and Recreation Trust Fund

(PARTF); this grant is still in the application phase, and there is no assurance that it will be awarded, although the application will be strong.

The conveyance to TPL, and accordingly, the lease and anticipated conveyance to the City will be subject to appropriate conditions regarding the use of the land as a park, along with some matters of an operational nature, such as the naming of some facilities. Although Buncombe County had previously indicated an interest in participating in the development and operation of the park, discussions have been that the City would operate it.

Although TPL has every expectation that the amounts that it expects to receive in donations and grants will be paid as promised, including the payments by Buncombe County, the possibility exists that shortfalls in anticipated contributions would occur, or that anticipated grants might be less than fully funded. In this event, the City would be legally responsible for any shortfall in the amounts credited to the annual lease payments. TPL has indicated, however, that it has assurances from private donors that these amounts will be covered, and that the City will be covered to the extent of any exposure. In the event of a shortfall that is not covered, the City has the option of not making up the difference, but risks losing the opportunity to acquire the property, and the lease would terminate with no refund of funds paid to that point. In this event, TPL indicates that it will work with the City ensure that the contract is fulfilled.

Pros:
- The City obtains use and ownership of a substantial and significant property
- The City's costs for this acquisition are substantially less than they would be if the City attempted to acquire the property directly on its own.
- Opportunity for cooperation with Buncombe County.

Cons:
- Possibility that the City could be legally responsible for lease payments if funds are not collected as anticipated.
- Incremental administrative costs.
- Additional capital expenditures in out years for development and maintenance of park.

If Council approves of this proposal, adoption of the resolution is recommended.

Vice-Mayor Jones closed the public hearing at 6:45 p.m.

Councilwoman Cape said that it is her understanding that we have commitments from private citizens for the initial $675,000 and should the Parks & Recreation Trust Fund grant not come to us, we have already been guaranteed by two private funders to support that. We have not even gone out to the public to fund raise yet. The private funds you see at this point, have been raised from less than 10 individuals and we are waiting to get this piece finalized before starting the private fund-raising piece to cover the interest for the City, set up a foundation for the development of the park, etc. In a worse case scenario, the TPL is the purchasers of this property and at the end of the three years if all can't work, the City does not have to follow through on this.

Councilman Mumpower explained how he felt this concept has changed since approval on March 20, 2007, and would not be supportive of this action.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-104. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no".

At 6:56 p.m., Councilman Mumpower moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, Errol Alexis Green, and Asheville Police Department Officers Daryl Fenton, Tim Brake and Anthony Waters. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 7:15 p.m., Councilman Newman moved to come out of closed session and return to the regular meeting. This motion was seconded by Councilman Freeborn and carried unanimously.

V. UNFINISHED BUSINESS:

A. RESOLUTION NO. 07-103 - RESOLUTION AUTHORIZING THE CITY MANAGER TO DISPOSE OF AN INTEREST THE CITY HAS IN REAL PROPERTY LOCATED AT 24 GRAIL STREET

Community Development Director Charlotte Caplan said that this is the consideration of a resolution to dispose of the City's interest in real property at 24 Grail Street and the adjoining parcel.

In 1990 the Housing Authority (the City's redevelopment agency) sold a house at 24 Grail Street and an adjoining parcel to Hospitality House of Asheville, subsequently renamed Homeward Bound of Asheville, as a transitional shelter for the homeless. The City also made a $100,000 CDBG grant to Homeward Bound to acquire and renovate the house.

The deed for each property includes a restriction whereby the ownership of the property reverts to the City of Asheville if it ceases to be used as a homeless shelter.

Homeward Bound has operated the properties as a shelter continuously for 17 years. Recently, Homeward Bound decided to focus on assisting the homeless to obtain permanent supportive housing rather than providing temporary shelter. Homeward Bound plans to sell this transitional shelter and use the sales proceeds to expand or replace its "A HOPE" day center, which is no longer large enough for its purpose.

Homeward Bound has found a buyer for the property, but is unable to convey it because of the existence of the deed restrictions. It has requested that the City remove the deed restrictions, in exchange for a commitment by Homeward Bound to use the proceeds of sale to expand or replace its "A HOPE Center." According to the City Attorney's Office, the conveyance of the City's reversionary interest to a non-profit to promote a public purpose is authorized by law.

Pros:

- Directly supports implementation of the City and County's 10-year Plan to End Homelessness.
- Supports expansion of the A HOPE Center, which helps reduce the impact of homelessness on our downtown.
- Continues to support the broad objectives of the original CDBG grant.

Cons:

- The only negative impact is the City surrenders its right to eventually re-possess property worth approximately $225,000 to the CDBG fund.

- The transfer may continue to concentrate homeless population in one area of downtown.

City staff supports the request from Homeward Bound.

On May 8, 2007, City Council referred this matter to the Planning & Economic Development (PED) Committee. On May 9, 2007, the PED Committee reviewed the request from Homeward Bound and made the following recommendation:

That the request from Homeward Bound to remove the reversion requirement with regard to the property at 24 Grail Street be approved to allow Homeward Bound to utilize the proceeds of the sale to expand or replace its A HOPE Center subject to the condition that Homeward Bound work with City staff with regard to expansion of services and/or relocation of the A HOPE Center in order to minimize any negative impact resulting from the concentration of homeless services in one area.

The Housing & Community Development Committee reviewed the request and agreed with the PED Committee's recommendation.

Councilman Freeborn and Davis commented on the continued concentration of homeless individuals in downtown.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Mumpower moved for the adoption of Resolution No. 07-103, subject to the condition that Homeward Bound work with City staff with regard to expansion of services and/or relocation of the A HOPE Center in order to minimize any negative impact resulting from the concentration of homeless services in one area. This motion was seconded by Councilman Newman and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 330

VI. NEW BUSINESS:

A. UPDATE ON THE CIVIC CENTER EVENT MANAGEMENT PLAN

Civic Center Director David Pisha said that the purpose of this briefing is to provide an overview of the Asheville Civic Center's event management practices as requested by City Council's Public Safety Committee.

The Asheville Civic Center is dedicated operating the facility according to four key guiding principles:

1. The Asheville Civic Center will provide an enjoyable and safe venue for patrons.
2. The facility will maximize the City of Asheville's financial solvency by operating as efficiently as possible.
3. The venue will serve as a public gathering space with a diverse mix of events and activities.
4. The staff will provide an exceptional level of customer service to both facility patrons and those who rent the venue.

These principles are intended to guide the professional management of every event at the Civic Center and to inform the public and our stakeholders about the standards they can expect regardless of the type or size of event they attend.

Having said that, each event at the Civic Center is unique and has its own operational requirements; therefore, certain aspects of event management, including security, are determined on an event-by-event basis within the framework of industry best practices. When working with a promoter to book an event, we will consider several factors when determining the level of security required including the event's expected ticket sales, the type of seating in the venue, past experience with similar events, industry benchmarks, etc.

During the last few years, the Asheville Civic Center has experienced a steady increase in the number of large, arena events. These events typically require more security due to larger crowds and open seating arrangements. Because of this shift in our event mix, the Asheville Civic Center has looked at other venues for best security practices and implemented a Concert Action Plan to assure our facility exceeds industry standards when it comes to the safety of our patrons.

Based on the results of the Concert Action Plan, the facility has adopted standard practices like prohibiting large bags from all events to enhance the venue's security. The Civic Center has also improved coordination with other city departments and divisions including the Asheville Police Department, the sanitation division and the traffic engineering division to ensure patrons have a safe, enjoyable experience inside and outside of the building.

The report on the Civic Center's event management plan was presented to the Public Safety Committee on April 3, 2007.

Councilman Mumpower requested that when Council is reviewing an item, that the actual report be included in Council's agenda package.

Mr. Pisha responded to Councilman Mumpower's question about what the Civic Center is doing differently now than what it did three months ago.

Councilman Mumpower suggested the Civic Center staff review policies from other cities with the emphasis on if people misbehave by smoking, doing drugs, etc. that they are arrested, told to stop or escorted out. He suggested that in a 4-6 month timeframe that this issue be brought back up again and Council be advised on how we are enforcing the rules in the Civic Center.

Mr. Pisha responded to Councilwoman Cape's question of the action plan for the guiding principles, such as Concessions trying to find ways to expand their menu; Civic Center management staff attending conferences to interact with their peers to find best practices; etc.

Councilwoman Cape suggested a recycling effort at the Civic Center, which could be as simple as placing some recycling containers in the different venues.

After a short discussion of the lack of review of this item by the Civic Center Commission due to a lack of quorum at the Civic Center Commission meeting, City Manager Jackson said that this item will be on the next Commission meeting's agenda.

B. **RESOLUTION NO. 07-105 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX THE BILTMORE LAKE AREA AND SETTING THE PUBLIC INFORMATION MEETING ON JULY 2, 2007, AND THE CITY COUNCIL PUBLIC HEARING ON JULY 24, 2007**

RESOLUTION NO. 07-106- RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX THE SARDIS ROAD AREA AND SETTING THE PUBLIC INFORMATION MEETING ON JULY 2, 2007, AND THE CITY COUNCIL PUBLIC HEARING ON JULY 24, 2007

RESOLUTION NO. 07-107 - RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX THE SCHENCK GATEWAY AREA AND SETTING THE PUBLIC INFORMATION MEETING ON JULY 2, 2007, AND THE CITY COUNCIL PUBLIC HEARING ON JULY 24, 2007

Urban Planner Julia Cogburn said that this is the consideration of resolutions stating the intent of the City to annex the Biltmore Lake, Sardis Road and Schenck Gateway areas.

The City's policy is to include within its corporate boundaries areas that are urban in nature and meet State of North Carolina qualification requirements. Staff has identified three areas: Biltmore Lake, Sardis Road, and Schenck Gateway with potential for being annexed. Under State law, the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

Staff has provided two schedules for review by City Council members. Both have the same effective dates. The main differences in the schedule are the date of the Public Information Meeting and the date of the adoption of the Services Plan. Staff provided two schedules due to concern over having the Public Information Meeting during the week of the 4th of July (Schedule #1). If Council wants to proceed under schedule #2, passage of the Resolution of Intent will need to be continued until the 22nd of May. Two resolutions are presented; one resolution for each of the suggested schedules.

The following steps and dates meet the process required by State law:

Suggested Schedule #1

- Council Adoption of Resolution of Intent – 5/15/07
- Council Adoption of Services Plan – 5/22/0
- Public Information Meeting – 7/2/07
- City Council Public Hearing – 7/24/07
- Annexation Ordinance Adopted – 8/14/07
- Effective Date – 12/31/07

Suggested Schedule #2

- Council Considers Resolution of Intent and Schedule – 5/15/07 (Continues Until 5/22/07)
- Council Adoption of Resolution of Intent – 5/22/07
- Council Adoption of Services Plan – 6/12/07
- Public Information Meeting – 7/16/07
- City Council Public Hearing – 7/24/07
- Annexation Ordinance Adopted – 8/14/07
- Effective Date – 12/31/07

Pros:

- Supports City of Asheville's Smart Growth Annexation program (regular program of annexations) as set forth in the City's 2025 Plan.
- Provides for an urban level of service for developed and developing areas adjacent to the existing city limits and includes those benefiting from existing City services in participation in the costs of such services.

Cons:

- Residents of proposed annexation areas may object to such annexation.

City staff recommends that City Council adopt the resolutions of intent stating the City's intent to annex the Biltmore Park, Sardis Road, and Schenck Gateway areas.

In response to Councilman Freeborn about area residents interested in annexation but not included in this proposal, Ms. Cogburn explained that there are tightly prescribed requirements per the N.C. Gen. Statutes and those properties would not qualify. In addition, we also try to make our boundaries follow lot lines or actual roadways. She did, however, offer those residents the voluntary annexation option.

Ms. Cogburn said that the video that is used at the public information meeting which (1) describes the area, (2) shows how the area meets the qualifications, (3) describes the services that would be provided, and (4) explains the basic financing element, can be placed on the City's Government Channel. In addition, she feels that information can be placed on the City's website as well.

Councilman Newman hoped that in the near future the City will have some tools that other cities have to make the annexation process a lot healthier process, such as working with developers at the beginning so that when people move into the development, they know they will become part of the City. The annexation process is an issue of fairness of how we pay for services and infrastructures that are critical to the future health of the whole Asheville metro area.

Councilman Mumpower felt that there are legitimate arguments in support and against annexation, however, in his opinion, the negative aspects outweigh the positive arguments.

Councilwoman Cape said that in the annexation conversations, one of the things that helps her understand is the distinction between city and county roles. It's interesting to look at the mandate for what makes a city and what makes a county, and a lot has to do with public safety and the closeness of people living together. It has been determined by the N. C. government that public safety is better enhanced with a municipal structure when people live close together, both through building codes and public safety issues.

Vice-Mayor Jones said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilman Cape moved for the adoption of Resolution No. 07-105, (Schedule 1) with the public information meeting being held on July 2, 2007, and the City Council public hearing being held on July 24, 2007. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 333

Councilman Cape moved for the adoption of Resolution No. 07-106, (Schedule 1) with the public information meeting being held on July 2, 2007, and the City Council public hearing being held on July 24, 2007. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 337

Councilman Cape moved for the adoption of Resolution No. 07-107, (Schedule 1) with the public information meeting being held on July 2, 2007, and the City Council public hearing being held on July 24, 2007. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 341

C. CONSIDERATION OF AN APPOINTMENT TO THE CIVIL SERVICE BOARD

At the request of Vice-Mayor Jones, Councilman Mumpower moved to continue the consideration of interviews for an appointment to the Civil Service Board until May 22, 2007. This motion was seconded by Councilwoman Cape and carried unanimously.

VII. OTHER BUSINESS:

Councilman Mumpower expressed appreciation to the For Our Kids Program volunteers and to the volunteers and sponsors for the Top-A-Stop Program.

Councilman Davis invited the public to a presentation by the N.C. Symphony which will honor all the music in North Carolina on May 25, 2007, at the Thomas Wolfe Auditorium.

Councilwoman Cape noted that May 17, 2007, is Arbor Day and urged the citizens to participate in this event.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Vice-Mayor Jones adjourned the meeting at 8:15 p.m.

CITY CLERK

MAYOR

Tuesday – May 22, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

The Asheville High School Debate Team led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Davis gave the invocation.

I. PROCLAMATIONS:

A. ASHEVILLE HIGH SCHOOL DEBATE TEAM RECOGNITION

Mayor Bellamy recognized the Debate Coach Keith Pittman, Assistant Debate Coach Larry Burke, and the Asheville High School Debate Team. On behalf of City Council, Mayor Bellamy wished the Team well as they represent North Carolina at the NFL National Championship Debate Championship in June of this year.

II. CONSENT AGENDA:

Councilman Mumpower requested Consent Agenda items "D" and "E" be removed from the Consent Agenda for individual discussions.

Mayor Bellamy requested Consent Agenda Item "F" be removed from the Consent Agenda for individual an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 15, 2007

B. RESOLUTION NO. 07-108- RESOLUTION STATING THE INTENT OF THE CITY TO ANNEX PROPERTY AT 1903 OLD HAYWOOD ROAD (FIRE STATION #10) AND SETTING A PUBLIC HEARING ON JUNE 12, 2007

Summary: The consideration of a resolution stating the intent of the City to annex property at 1903 Old Haywood Road, the site of the new fire station and setting a public hearing on June 12, 2007.

The City of Asheville is completing construction of a new fire station, Fire Station #10, at 1903 Old Haywood Road in West Asheville. The station is scheduled to become operational in July of this year.

This property at 1903 Old Haywood Road (PIN 9618.20-90-5200) is contiguous to the current city limits of the City of Asheville but not located within the corporate boundaries. Part 1 of Article 4A of Chapter 160A of the North Carolina General Statutes authorizes annexation of property owned by a municipality and contiguous to current municipal boundaries.

Under State law, the City must follow a specific process for annexation of such properties that begins with the adoption of a resolution that describes the boundary of the area under consideration, and fixes dates for a public hearing on the question of annexation.

Pros:

- Brings city owned-property into the corporate limits in accordance with state law.

Cons:

- Some property owners in the area may be concerned about annexation of their property.

City staff recommends that City Council adopt the resolution of intent stating the City's intent to annex the property at 1903 Old Haywood Road.

RESOLUTION BOOK NO. 30 - PAGE 345

C. ORDINANCE NO. 3475- BUDGET AMENDMENT TO INCREASE THE CIVIC CENTER FUND BUDGET TO REFLECT UPDATED FISCAL YEAR 2006-07 REVENUE AND EXPENDITURE PROJECTIONS

Summary: The consideration of a budget amendment to increase the Civic Center Fund budget by $150,000 to reflect updated Fiscal Year 2006-07 revenue and expenditure projections.

Due to a higher than expected number of events this year, Civic Center Fund revenues & expenditures are expected to exceed budget by the end of Fiscal Year 2006-07. As a result, staff has calculated an updated estimate of the expected revenues and expenses in the Civic Center Fund. In order to fund anticipated expenses over the last two months of the current fiscal year, staff is recommending that the Civic Center Fund expenditure budget be increased by $150,000. The additional operating revenue generated by the higher event load will cover the cost of the budget amendment; therefore no additional transfer from the General Fund is required. Staff is estimating that the year-end operating deficit for the Civic Center will be slightly less than the budgeted deficit of $413,340.

PROS:

- Provides sufficient budget authorization for anticipated expenditures in the Civic Center Fund without increasing the General Fund subsidy.

CON:

- None.

City staff recommends City Council approve a budget amendment to increase the Civic Center Fund budget by $150,000 to reflect updated Fiscal Year 2006-07 revenue and expenditure projections.

ORDINANCE BOOK NO. 23 - PAGE 374

D. RESOLUTION AUTHORIZING THE CITY MANGER TO ACCEPT GRANT FUNDS FROM THE DEPT. OF JUSTICE TO ASSIST THE ASHEVILLE POLICE DEPARTMENT WITH THE PURCHASE OF METHAMPHETAMINE LAB INVESTIGATION EQUIPMENT, PROVIDE FOR OFFICER TRAINING AND OFFICER OVERTIME IN METH LAB CLEAN UP

This item was removed from the Consent Agenda for individual discussion.

E. BUDGET AMENDMENT TO RECEIVE THE DEPT. OF JUSTICE FUNDS FOR METHAMPHETAMINE LAB INVESTIGATIONS

This item was removed from the Consent Agenda for individual discussion.

F. RESOLUTION PROVIDING FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2007 BELE CHERE FESTIVAL

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Freeborn and carried unanimously.

ITEMS PULLED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

D. RESOLUTION NO. 07-109 - RESOLUTION AUTHORIZING THE CITY MANGER TO ACCEPT GRANT FUNDS FROM THE DEPT. OF JUSTICE TO ASSIST THE ASHEVILLE POLICE DEPARTMENT WITH THE PURCHASE OF METHAMPHETAMINE LAB INVESTIGATION EQUIPMENT, PROVIDE FOR OFFICER TRAINING AND OFFICER OVERTIME IN METH LAB CLEAN UP

Summary: The consideration of a resolution authorizing the City Manager to accept grant funds under The Department of Justice, Office of Community Policing Services to assist Asheville Police Department with the purchase of methamphetamine lab investigation equipment, provide for officer training and officer overtime in meth lab clean up and the associated budget amendment in the amount of $172,765.

The City of Asheville has been awarded a grant from Department of Justice Office of Community Oriented Policing Services for the Methamphetamine Program in the amount of $172,765 with no local match. The purpose of the grant program is to fund Methamphetamine projects, allowed under the grant program designed to train officers in proper handling and evidence collection, train the public on cues to meth lab operation, to pay for officer overtime for security of methamphetamine lab clean up, and provide needed equipment for proper response to meth labs.

Pros:

- Will provide the public with needed information on how to spot possible meth lab operation which will enhance public safety.
- Proper officer training will aid in reduction of injure to officers responding to possible meth labs.
- The equipment will increase officer safety in response to possible meth labs.

Cons:

- The City Of Asheville and the Asheville Police Department would be required to maintain the upkeep of the equipment purchased.
- Provide overtime pay for officers securing meth lab locations once the grant funds were depleted.

This action complies with Asheville City Council Strategic Plan in the priority area of Community Building - Development strategies for youth and educational programs and Economic Development - Continue commitment to public safety and drug enforcement priorities.

City staff recommends City Council approve a resolution authorizing the City Manager to accept grant funds under The Department of Justice, Office of Community Policing Services to assist Asheville Police Department with the purchase of methamphetamine lab investigation equipment, provide for officer training and officer overtime in meth lab clean up and the associated budget amendment in the amount of $172,765.

Police Chief Bill Hogan explained that the primary goal of this grant is to aid in the suppression of the sale, distribution, and use of illegal drugs, with emphasis on methamphetamine. In 2006 there were 5 labs in Buncombe County and 1 lab in Asheville. In 2005 there were 15 labs in Buncombe County and Asheville. In 2004 there were 23 labs in Buncombe County and Asheville. Methamphetamine is less than 5% of our drug cases but it is a growing problem that is being marketed more often in our community. The dramatic decline in small local labs is a result of new legislation restricting the access and sale of pseudophedrine. This reduction is being seen throughout our state and local meth represents 5% or less of our meth cases. Mexican ICE is easier to obtain and better quality. Large scale distributors are primary Hispanic/Latino but local dealers mirror our community. We have arrested dealers that are white, black, and Hispanic/Latino.

Police Chief Hogan responded to various questions from Councilman Mumpower, who would support the motion if we are not sidestepping the intent of the grant as we applied for it.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-109. This motion was seconded by Councilman Freeborn and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 347

E. ORDINANCE NO. 3476 - BUDGET AMENDMENT TO RECEIVE THE DEPT. OF JUSTICE FUNDS FOR METHAMPHETAMINE LAB INVESTIGATIONS

Summary: See Consent Agenda "D" above.

Councilwoman Cape moved for the adoption of Ordinance No. 3476. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 376

F. RESOLUTION NO. 07-110 - RESOLUTION PROVIDING FOR THE POSSESSION AND CONSUMPTION OF MALT BEVERAGES AND/OR UNFORTIFIED WINE AT THE 2007 BELE CHERE FESTIVAL

Summary: The consideration of a resolution providing for the possession and consumption of malt beverages and/or unfortified wine at the 2007 Bele Chere Festival.

The Bele Chere Board has requested through the Asheville Parks and Recreation Department that City Council permit them to serve beer and/or unfortified wine at their events and allow for consumption at this event.

For many years, the Bele Chere Board, in cooperation with the Asheville Parks and Recreation Department, has produced Bele Chere to bring both citizens and visitors to the Downtown area. This year the request is being made for July 27-28, 2007.

Pros:

- Allows fundraising opportunities for charities.
- Generates economic impact for the community.

- Provides additional quality cultural programming and diversity.

Con:

- Potential for behavioral issues and litter.

The Asheville Parks and Recreation Department is submitting this resolution on behalf of the Bele Chere Board of Directors.

Staff recommends City Council approve a resolution providing for the possession and consumption of malt beverages and/or unfortified wine at the 2007 Bele Chere Festival.

Councilwoman Cape moved for the adoption of Resolution No. 07-110. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Mayor Bellamy voting "no."

RESOLUTION BOOK NO. 30 - PAGE 348

REQUEST TO ADD ITEM TO THE AGENDA

Councilman Mumpower requested to add a short presentation under "Other Business" regarding the confrontation of the open air drug market. He felt that when this issue comes back up in June, it will not allow staff ample opportunity to respond to the issue to allow Council to provide budgetary support.

Councilman Newman looked forward to further deliberations about this issue; however, Council will have other worksessions related to the budget.

Councilman Davis moved to add the short presentation under "Other Business." This motion was seconded by Councilman Mumpower and failed on a 2-5 vote, with Mayor Bellamy, Vice-Mayor Jones, Councilwoman Cape Councilman Freeborn and Councilman Newman voting "no."

Mayor Bellamy said that anytime during the year, City Council has the opportunity to make budget amendments.

When Councilman Mumpower asked if he would be at liberty of making the presentation under "Informal Discussion and Public Comment," City Attorney Oast said that a Council Member qualifies as a member of the public.

III. PRESENTATIONS & REPORTS:

A. HUB'S COMMUNITY & ECONOMIC DEVELOPMENT REPORT

Mr. Virgil Smith updated City Council on Asheville's HUB Project, which is Asheville and Buncombe County's collaborative, sustainable, intentional community, cultural, and economic development strategy. Without HUB we would not have (1) high speed computing ($1.5M, RENC); (2) First geek-like collaboration for development; (3) 30 business plans for new ventures (CTC); (4) SEO analysis of Clean Energy Cluster in WNC; (5) downtown farmer's market; (6) proposed federal appropriation for clean energy business incubator at A-B Tech; (7) plan for a climate/weather museum attraction; (8) climate emphasis (designation as NOAH community); (9) developing sustainability metrics; and (1) as much networking and synergistic knowledge sharing.

HUB is a national buzz attracting tourists, businesses, creative class, professionals, students and retirees, but it will not be sustained without bold, collaborative action. Asheville's opportunities are in reach, but other communities will not wait for us to seize the initiative - the spotlight is forever shifting. HUB is a mechanism for (1) refocusing our development strategy (a)

community and cultural in addition to economic; (b) hot themes - technology, rejuvenation, creativity; and (c) matches who we - Asheville - area; (2) combining agendas and collaborating among the City, County, business and non-profit; and (3) mobilizing the entire community to achieve a few specific goals - e.g., climate, riverfront, green - and attracting very big dollars from the outside.

Ms. Janice Brumit said we've proven we can collaborate as seen by the number of leaders on board. We have a great vision to better jobs and higher quality of life.

The next steps consist of (1) implement metrics (by August); (a) economic prosperity - jobs, wages, investments; (b) social responsibility - housing, middle class; and (c) environmental stewardship - sustainability; (2) radically expand the number of people involved with HUB, especially by publicizing HUB and expanding the use of its collaborative website; (3) finish plan and staff alliance for implementation; (4) jointly - City, County and Alliance - pursue work plans to implement the HUB vision and plan; and (5) focus collaborative efforts upon 2 or 3 timely and big potential projects, e.g., climate - while maintaining momentum in all programs.

Mr. Smith said what we are asking from City Council is (1) continuation and support of HUB via meeting space and staff time, collaborative participation; (2) coordination of the City's development efforts with HUB clusters, and especially the climate campaign; and (3) coordination with the County in emphasizing key development initiatives.

Councilwoman Cape encouraged Council to support and partner with the HUB, stressing the importance of the climate initiative.

In response to Councilman Davis' request for additional information on the climate initiative, Ms. Brumit explained that Asheville has the largest environmental data base in the world and we are poised to be the real time environmental weather center of the world. The federal government is poised to invest billions, state legislators are interested in development of an experimental climate attraction for school kids (like a planetarium), and UNC-Asheville and A-B Technical College are already into applied visualization. We already have (1) an applied visualization business sector with established NOAA, NASA and international contacts (e.g., Black Box Studio - immersive environments for education and decision support); and (2) applied visualization lab collaboration between UNC-Asheville/NEMAC, RENCI, MAP, Elumenati and Bent Creek Institute (underway in Asheville). She stressed the need for action as there is potential competition from Boulder, Colorado; Oklahoma City, Oklahoma; and Silver Springs, Maryland.

In response to Councilman Mumpower, Mr. Smith said that the preliminary tentative budget is $500,000, with the City's portion being 1/3 ($166,000). Mr. Smith stressed, however, that it's a public/private partnership and we need to work out what the part of the budget will the City take on, what part will the County take on, and what we can raise from local funds, foundations, the state, etc.

Mayor Bellamy thanked Mr. Smith and Ms. Brumit for the update and would look forward to the next report containing specifics on what they would like to accomplish and a budget showing revenues and expenditures.

B. ENVIRONMENTAL PARTNERSHIP WITH WARREN WILSON COLLEGE

Warren Wilson College (WWC) President Sandy Pfeiffer introduced Ms. Margo Flood, Incoming Director of the Environmental Leadership Center, who in turn explained a partnership proposal to the City of Asheville of working together to increase energy efficiencies.

Warren Wilson College and the City of Asheville's respond to the challenge. We must reduce the planet's greenhouse gas emissions 30% to 50% below 1990 levels by 2050. On its

current course, North Carolina is projected to have more than a 113% increase in greenhouse gas emissions from 1990 to 2050. We must work locally to increase energy conservation efforts by (1) inventory greenhouse gas emissions; (2) improve efficiencies; (3) plan reductions; and (4) monitor goals.

We are committed to action as seen by the City of Asheville - (1) US Conference of Mayors "Mayors Climate Protection Agreement;" and (2) International Council for Local Environmental Initiatives (ICLEI). And as seen by Warren Wilson College - (1) Talloires Declaration; and (2) American College and University Presidents Climate Control Agreement. Our shared goals include (1) educate of the public; and (2) increase energy conservation efforts - (a) adopt green-building practices; (b) encourage public transportation; and (c) inventory and monitor emissions.

A partnership makes sense. (1) WWC is fast becoming the leading sustainable campus in the nation. Asheville has national prominence for its quality of life; (2) WWC is a demonstration site for green buildings and energy conservation. Asheville intends to adopt green building practices and an energy conservation plan; and (3) WWC is committed to lead by example. Asheville is in the spotlight and its actions will serve as an example.

Ms. Flood explained how WWC is making progress in the areas of building and energy; transportation; waste; education and milestones.

WWC actions are informed by our greenhouse gas inventory. WWC average annual electricity usage is 4.4 million kWh, costing $400,000. Data shows that even with a 5.1% increase in enrollment and a 1.2% increase in building square footage between the 2003 and 2006 academic years, total electricity consumption at WWC dropped by 4.2%. Building emissions account for over 75% of the air emitted by the College. We offset 100% of our electricity emissions with renewable energy credits.

A few examples of how we can accomplish more as partners is (1) access state-of-the-art research on best practices (a) consultation from WWC regarding LEED-design and certification process; (b) use of WWC as a demo site for state-of-the-art sustainable practices; and (c) development of WWC student and faculty research projects to inform goals and practices; (2) accelerate our progress on climate commitments; (a) development of similar templates for greenhouse gas emissions inventory; and (b) access to modeling tools in WWC GIS lab; and (3) build upon our visibility and develop a national model; (a) creation of web access to partnership plans and accomplishments; and (b) assessment of the value of higher education/city governmental partnership.

The next step will be to (1) formalize partnership; (2) clarify goals; (3) develop work plan; (4) track results; and (5) celebrate success.

Mayor Bellamy asked that City Council tour the WWC campus to look at what energy saving initiatives they already have underway that we might be able to utilize.

After a short discussion of the possibilities of this partnership, Councilman Mumpower moved to ask the Energy & Environment Committee to review this partnership initiative and subject to their approval, that City Council partner with WWC in this initiative. This motion was seconded by Councilwoman Cape and carried unanimously.

C. **RESOLUTION NO. 07-111 RESOLUTION AUTHORIZING CITY COUNCIL TO APPROVE THE ISSUANCE OF THE REQUEST FOR QUALIFICATIONS (RFQ) FOR THE FOLLOWING FOUR CITY-OWNED PROPERTIES: HAYWOOD STREET PROPERTIES AT THE CIVIC CENTER, EAGLE-MARKET STREET PROPERTIES, OFFICE OF ECONOMIC DEVELOPMENT, AND PARK MAINTENANCE PROPERTIES; AND AUTHORIZING CITY STAFF TO**

PROCEED WITH THE DUE DILIGENCE FOR THE FOUR SELECTED RFQ PROPERTIES

Economic Development Director Sam Powers said that this is the consideration of Phase Two of City-owned properties to be included in a Request for Qualifications (RFQ) for interested developers.

In early 2006, City Council directed staff to review existing city owned properties for possible redevelopment to meet Council strategic goals. Staff made a presentation to Council and identified approximately 18 city owned "sites" in the greater downtown area that staff considered potentially suitable for redevelopment. Council approved moving forward with Phase One and issued a Request for Qualifications from developers for four sites. After a successful RFQ process, Council approved a development agreement with Mountain Housing Opportunities to develop Ralph and Choctaw Streets. Old Asheland Avenue has been since reserved by Council for an innovative workforce housing project under consideration for the site. Asheland Avenue did not receive any Statements of Qualification or proposals.

Staff then reviewed the remaining sites in greater detail and in November 2006, presented the results to Council. Council approved moving forward with seven sites. In January 2007, Council approved retaining project management assistance from the firm Real Estate Research Consultants (RERC). RERC has assisted numerous other municipal clients with successful public-private partnerships to redevelop public property.

RERC has conducted a market overview of the Asheville area to determine the best recommended approach for the seven sites. They met with over 20 stakeholder groups in the area, in addition to city staff, and quantified Council member's goals to help prioritize the sites so they reflect highest and best use, maximize residual land values for public purpose, and reflect City Council policy objectives. A recommended Request for Qualifications has been developed and is ready for release. Public comment has been received by City Council at each meeting in Phase One and Phase Two, a public information meeting was conducted in April 2006 on Phase One, and a public information meeting is scheduled prior to the Request for Proposal (RFP) stage of Phase Two. Additionally, in order to help provide information to the public and interested parties, a web page has been activated on the City web site devoted to the RFQ process.

Assuming City Council approves proceeding as recommended, negotiations with the preferred development team for each site is projected to begin in spring 2008.

Pros:
1. Leverages real estate for community benefit.
2. Guide development that meets public goals established by City Council.
3. Potential for facility consolidation to maximize economies of scale.
4. Market appears ready and interested in the recommended sites.
5. Phasing allows planning for maximizing site potential for remaining sites.

Cons:
1. Cost-benefit of relocation of municipal facilities.
2. Individual sites have unique considerations.

Staff recommends that City Council approve issuance of the RFQ for the four properties: Haywood Street properties at the Civic Center, Eagle-Market Street properties, Office of Economic Development, and Park Maintenance properties; and proceed with due diligence for the four selected RFQ properties.

Mr. Matt Taylor, Vice-President and COO of Real Estate Research Consultants, briefed City Council on their qualifications.

The RFQ-RFP process overview is complex, but not complicated - (1) goals and objectives; (2) market opportunities and constraints; (3) RFQ; (4) developer qualifications; (5) public open house; (6) RFPs; (7) evaluate and select developer(s); and (8) negotiate developer agreement(s).

He explained several successful private-public partnership projects.

The benefits for Asheville are (1) leverage real estate for community benefit; (2) no additional cost to taxpayers; (3) property tax base; (4) new jobs; (5) development that meets community goals; and (6) vibrant and sustainable downtown.

The City's goals and objectives are (1) workforce housing; (2) enhanced tax base; (3) smart growth; (4) realistic market opportunities; (5) attract innovative developers; (6) path to redevelopment next 2 to 4 years; (7) focus City efforts to be results-oriented; (8) transparent process; (9) best use of public assets; (10) economically and environmentally sound; (11) potential public space; (12) involve local businesses; (13) support City's Minority Business Plan; (14) cost-benefit of relocating municipal facilities; (15) limit impact on taxpayers; and (16) promote live-work-play downtown.

The market opportunities and constraints consist of (1) moderate, stable growth market; (2) small to mid-scale projects; and (3) limited land available.

Using a chart, he explained the City of Asheville's supportable and relevant market demand information.

He explained the RFQ process of establishing the baseline ability of developer(s) to implement desired project(s) - relevant experience; track record; financial capability; equity sources and lending history; management approach; and litigation history.

The developer qualifications would be reviewed by an evaluation committee (1) composed of City staff and RERC; (2) evaluates developer submittals; © recommends list of pre-qualified development teams for City Council approval; and (4) conducts meetings with developers prior to issuance of RFP.

The public open house would be a forum for the public to obtain information and be an opportunity to share updates.

He explained the RFP process of soliciting "implementation road maps" from pre-qualified developers. RFP responses would consist of detailed, feasible development program; creative planning and design solutions; resources (public and private) pledged to project; detailed project budget, including project "returns;" financial assurances or other performance guarantees; acceptance of development agreement principles; and non-contingent price proposal, if appropriate.

To evaluate and select the developer would consist of (1) capacity to meet City's goals; (2) economic and physical issues; (3) practicality of land use plan; (4) designs, budgets and specifications; (5) credit history and financial capacity; (6) ownership and management; (7) overall business deal; (8) respective roles of public and private parties; and (9) respondent interviews.

The negotiated development agreement(s) would consist of (1) specific plan provisions; (2) design standards; (3) City's obligations; (4) developer's obligations; (5) payment schedule, public/private; (6) takedown schedule, if applicable; (7) inter-local agreements, if applicable; and (8) remedies available to the parties.

Evaluation of City-owned properties included numerous City-owned sites evaluated; narrowed evaluation to 7 sites; and prioritized opportunities for 7 sites as follows.

For the Haywood Street properties at the Civic Center, the acreage is 77 acres; zoning is Central Business District; support uses include an upscale hotel (150 rooms), retail/limited office (10,000 sq. ft.), structured parking; development timeframe is 2-4 years; and priority is 1 - near term.

For the Eagle-Market Street property, the acreage is .31 acres (potential for 41 acres total with adjacent private land - includes the Ellison and McGlohon properties); zoning is Central Business District; supported uses include multi-family residential (potential live-work units) or office condos; development timeframe is 1.5 - 3 years; and priority is 1 - near term.

For the Office of Economic Development (29 Haywood Street), the acreage is .18 acres; zoning is Central Business District; supported uses include multi-family residential with ground floor commercial or office condos; development timeframe is 1.5 - 3 years; and priority is 1 - near term.

For the Park Maintenance properties, the acreage is 3.61 acres; zoning is Community Business I District; supported uses include multi-family residential (115 workforce housing units) with limited commercial; development timeframe is 1.5 - 3 years; and priority is 2 - minor remedy required.

For the Transit Operations Center, the acreage is 3.51 acres; zoning is Institutional; supported uses include multi-family residential (110 workforce housing and market rate units); development timeframe is 3-5 years; and priority is 3 - significant planning required.

For the Parkside property, the acreage is 2.47 acres; zoning is Central Business District; supported uses include office (100,000 - 140,000 sq. ft.), upscale hotel (150 rooms) or residential condos (75-100 premium market units), supporting commercial, structured parking; development timeframe is 5-7 years; and priority is 3 - significant planning required.

For the South Charlotte Street properties, the acreage is 13.79 acres; zoning is Central Business District; supported uses include corporate headquarters (target industry) or educational/training campus and complementing users or multi-family residential (500 market and workforce housing units) and commercial (500,000 sq. ft.); development timeframe is 8-10 years; and priority is 3 - significant planning required.

The recommendations are 1) issue RFQ for these four properties - Haywood Street at Civic Center, Eagle-Market Street, Office of Economic Development, and Park Maintenance properties; and (2) proceed with due diligence for the 4 RFQ properties - (a) property title; (b) boundary survey(s); (c) environmental assessment(s); (d) potential City incentives; (e) draft development agreement principles; and (f) other owner's responsibilities.

In response to Vice-Mayor Jones, Mr. Taylor said that in sending out the RFQ, City Council is not approving any of the supported uses identified that the market would support, but only asking developers to express their interest in the possibility of redeveloping these sites. There are no commitments made on behalf of the City until the RFP stage, and even then, the City has the right to pull out up until the development agreement is actually signed.

Vice-Mayor Jones asked City Manager Jackson how he envisioned this process interfacing with the downtown master planning process. He responded that the four projects we are ready to go to market with conform with the vision. We have had meetings with stakeholders and solicited input. With the subsequent due diligence, that ties right into and will be a component into the downtown master planning, as it specifically relates to these properties. There is one other part to it that will not be a significant part of the due diligence and will not be

part of the downtown master planning and that is our responsibility to do the facility master planning for where we will relocate things, like the Transit Operations Center.

Councilwoman Cape was concerned about how we frame the RFQ's until the master planning process is complete. Our properties should be used for things that enhance our community. She questioned how we can articulate the RFQ better other than just say the site will support an upscale hotel. She just doesn't want to sell our property to the highest bidder and was not supportive of hotel. The properties have more strategic value than just a tax base and she wants to make sure that we steward our land in a way that is beneficial to the community.

Councilman Mumpower didn't think it was fair to put out RFQ's unless we can provide reasonable assurances to the developers that will allow them to do what we are proposing the options are. He supported moving forward, but only with the understanding that we are going to be good partners and try to bring them to life.

Councilman Newman asked for financial information on the cost of building a new Transit Operations Center and the costs associated with the relocation of such a facility. He also asked for more detailed information on what properties the City actually owns around the Civic Center.

In response to Mayor Bellamy, Mr. Taylor explained the timeline for proceeding with Phase Two.

After a brief discussion, Councilman Newman moved to approve the issuance of the RFQ for the Eagle-Market Street properties. This motion was seconded by Councilman Freeborn and carried unanimously.

After a brief discussion, Councilman Mumpower moved to approve the issuance of the RFQ for the Haywood Street properties at the Civic Center, subject to the City functioning as a good partner in this process. This motion was seconded by Councilman Davis and carried unanimously.

Vice-Mayor Jones confirmed that being a good partner doesn't mean that the City has to agree to what a developer proposes. The City is not a bad partner if we don't accept a project.

Councilman Freeborn moved to approve the issuance of the RFQ for the Office of Economic Development. This motion was seconded by Councilman Mumpower and carried unanimously.

Councilman Newman moved to approve the issuance of the RFQ for the Park Maintenance properties. This motion was seconded by Councilwoman Cape and carried unanimously.

In response to Councilman Newman, City Manager Jackson updated Council on the property the City owns behind McCormick Field.

At 7:10 p.m., Mayor Bellamy announced a short recess.

RESOLUTION BOOK NO. 30 - PAGE 352

D. LIVING WAGE PROPOSALS

Assistant City Manager Jeff Richardson said that City staff has been asked to analyze components of a Living Wage Proposal for the City of Asheville.

The analysis has been broken down into four areas:

(1) City of Asheville consider passing a living wage ordinance tied to the city's pay plan which establishes a living wage of $10.86 per hour without health insurance and $9.50 per hour with health insurance.

Benefited Employees: The City currently pays all employees with health insurance benefits a minimum of $9.50 per hour.

Non-Benefited Employees: The City currently employs a significant number of temporary and seasonal staff (especially seasonal employment in Parks/Recreation and Civic Center events management). Based on the job responsibilities, some of these employees do not currently earn $10.86 per hour. In order to increase the hourly rate to $10.86 per hour for all seasonal staff, the budgetary impact would be approximately $420,000 annually.

(2) These wage level increases will be adjusted annually to maintain current Consumer Price Indexing to prevent future erosion of this wage.

The most recent Consumer Price Index data suggests 2.2% inflation for the past twelve month period as of February, 2007. A 2.2% cost-of-living adjustment to the city's pay plan costs approximately $1.27 million annually.

(3) Contract Bidding Process: Payment of a living wage to be considered in the City's contract bidding process. Specifically, City vendors who pay living wage thresholds as outlined above may receive additional consideration in bid award process.

City staff estimates that the City has approximately 2,500 active vendor accounts. In an attempt to discuss this proposal and what impact, if any, this might have on these companies, staff contacted 24 or roughly 1% of the City's active vendors. After speaking with representatives from these companies staff found several significant trends.

In terms of full-time employment all but one employer met or exceeded the full time hourly wage and health care requirement.

Responses to the part-time wage proposal were more diverse. Eight of 24 businesses commented that $10.86 per/hr. is too high of a wage to pay for part-time employees. Four of the 13 respondents that currently hire part-time staff felt that they would not be able to meet the $10.86 requirement. Each of these 4 respondents specialized in a variation of service or labor intensive employment. Companies that specialized in professional services were less affected by the $10.86 wage level.

Given these requirements, when asked if the company would continue to partner with the City, 17 vendors responded YES, 2 responded NO, and 5 gave a no response.

(4) Assessment of how the city would promote vendor understanding and compliance with the Living Wage thresholds if such a program is developed.

City staff has recommended as part of the 2007-08 budget to add a full-time Contract Administrator position, to assist with the process of doing business with the City, to help insure adherence to city ordinances and thresholds, minority business outreach, building construction reporting to the State of N.C., as well as other responsibilities. If this position is approved, marketing and compliance responsibilities associated with verification of vendor compliance to a living wage ordinance, can be incorporated into this position's duties. As part of the vendor certification process, each vendor could be asked to sign an affidavit regarding the living wage ordinance and the city's right to audit payroll records as part of an annual verification process.

City staff is prepared to follow City Council's policy direction on these matters as outlined above.

Mayor Bellamy outlined that public comment would only be heard on the issues of (1) a living wage ordinance for City of Asheville employees; and (2) payment of a living wage to be considered in the City's contract bidding process.

The following individuals spoke in support of a living wage ordinance for City of Asheville employees:

Mr. Tyron Greenlee, representing the Asheville-Buncombe Living Wage Campaign
A representative from the N.C. Council of Churches
Ms. Judy Miller, member of the Beth Ha Tephila Congregation
Ms. Linda Poss, representing the Board of Directors for Children First of Buncombe County
Mr. David Jones, retiree
Mr. Greg Walker-Wilson, CEO of Mountain BizWorks
Rev. Christopher Chiaronmonte
Pastor Spencer Hardaway, representing Rock Hill Missionary Baptist Church, the Baptist Ministers Union and the Interdenominational Ministerial Alliance
Ms. Garcia
Rev. Amy Cantrell
Mr. David Wright, representing residents of housing

Mr. Rick Lutovsky, President of the Asheville Area Chamber of Commerce, said that the matter has been discussed with his Board and they have a concern about the automatic cost of living increase. They hoped that if Council wants to adjust this that each year it be addressed, rather than having an automatic adjustment. When you adjust the bottom, there is a compression factor that occurs with other categories. Relative to this item being part of the criteria for businesses, our businesses had the following questions: (1) does this apply to full-time employees; (2) does this apply to part-time employees; (3) how does the City plan on weighting this criteria; (4) what is the difference between the number of people employed at a company above or below a designated living wage; (5) what will the process be in proving to the City that a living wage is paid; and (6) will the City have to hire new staff to manage this process. In addition, he noted that the City's research shows that 730 companies are in some state of flux as to their ability to do business with the City.

Mr. Tim Peck felt that wages should be based on the value of a person's labor to the employer and not based on a person's need to buy stuff.

Ms. Leesa Kulba said that the City is pretty much already paying a living wage to its employees and this is more of a symbolic token. She said that when the City uses taxpayer's money to pay City employees a living wage, they are taking the money from the people who work at McDonalds, etc. She felt City employees are paid enough.

Councilman Newman is supportive of this proposal as he sees this as a starting point for a larger conversation of what we can do to support working families in the City. Are there other ways we can support the businesses in the community who want to pay their employees a living wage? He hoped we move forward and put our heads together about what we can do to support that in tne community.

Councilman Mumpower said that Council had a formal presentation by advocates and had specifically requested a formal presentation on the other side of the equation. He had even offered to do it himself. Even though it was his understanding the Chamber was going to do that, he didn't feel we have seen the other side. He did say this is about symbolism vs. substance since we are already doing what people are advocating, except for the seasonal and part-time

employees. If we do it for the seasonal and part-time employees, it's $420,000 and that is an expensive symbolism. He has no arguments against helping people, but a lot of arguments about how you do that. Personally he has very little faith in the government's ability to do that and he offered minimum wage as an example. He believes in personal responsibility. Training, education, maturity, skills, work ethics, and other more reliability foundations are ways to a meaningful hopeful future.

Councilwoman Cape moved to establish a living wage of $10.86 per hour without health insurance and $9.50 per hour with health insurance and a 2.2% inflation index, for full-time and part-time employees. This motion died for lack of a second.

Human Resources Director Lisa Roth responded to various questions/comments from Council, some being, but are not limited to: how many employees are seasonal and temporary; what type of positions are seasonal and temporary; what hours does a part-time employee work; when did we start offering health benefits for part-time employees who work over 20 hours on a consistent basis; was there a cost-of-living adjustment in the 2001 budget shortfall year; what is the merit pay plan for this year; what is the average merit increase; and will compression issues will arise.

Councilman Davis said that he has talked to managers of stores and they have a problem with the overall living wage concept. These are good people who contribute to the community in service and in financial contributions. If they had to pay a living wage to all of their employees, it would impact the number of people they could hire. He felt it was incumbent on employers to pay living wages, but if you start singling out employers who can't, then we could put them out of business.

Mayor Bellamy supporting a living wage for full-time and part-time employees, but not the 2.2% automatic inflation index. It is not fiscally sound if we mandate future automatic across the board inflation raises without taking into consideration the entire City's budget at the appropriate time.

After a short discussion, Councilman Freeborn moved to establish a living wage of $10.86 per hour without health insurance and $9.50 per hour with health insurance for full-time and part-time employees. This motion was seconded by Councilman Newman and carried on a 6-1 vote, with Councilman Mumpower voting "no."

When Councilman Mumpower asked what the financial impact would be to establish a living wage of $10.86 per hour without health insurance and $9.50 per hour with health insurance for full-time and part-time employees, Assistant City Manager Richardson said there would be no budgetary impact.

Councilman Freeborn moved to request City staff to report back to Council with a proposal on how to weight payment of a living wage to be considered in the City's contract bidding process. This motion was seconded by Councilman Newman and carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

Councilwoman Cape said that the Housing & Community Development Committee has a structure in place where we look at weighting projects based on their merits. It sends a message that we do have strategic goals and that if you work towards those strategic goals that it has a merit and it counts. She feels that we could put a line item similar to that into our contracting process.

After a short discussion, Councilman Newman moved to adopt a policy for inflation and ask the City Manager to present that as part of the annual budget. This motion was seconded by Councilwoman Cape and failed on a 3-4 vote, with Vice-Mayor Jones, Councilwoman Cape and

Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis, Councilman Freeborn and Councilman Mumpower voting "no."

Vice-Mayor Jones moved to continue to assess how the City would promote vendor understanding and compliance with the Living Wage thresholds if such a program is developed. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE ASHEVILLE CITY CHARTER TO CHANGE THE MANNER OF ELECTION FROM NON-PARTISAN TO PARTISAN

From staff report: This is the consideration of an ordinance to amend the Asheville City Charter to change the manner of election from non-partisan to partisan. This public hearing was advertised on May 11 and 18, 2007.

At the May 8, 2007, meeting, Council adopted a resolution of intent to amend the Charter to provide for partisan elections, and set the date of the public hearing, which is the next step in the process and is required by statute. No action may be taken on this item sooner than Council's next regular meeting, scheduled for June 12.

At Council's direction, the vote on adoption of the ordinance will be scheduled for June 12, which is the last regular meeting when this action could be taken in time to be effective for the 2007 primary and election.

Mayor Bellamy opened the public hearing at 9:04 p.m.

Councilman Newman felt that local governments are very restrictive in how they run their local governments, but the structure of the local elections is one thing the state has delegated to municipalities. The question before Council is whether Council should involve the political parties or exclude the political parties from participating in the Asheville municipal elections.

The following individuals spoke in support of the current non-partisan elections:

Rev. Christopher Chiaronmonte
Mr. Lavoy Spooner, Chair of Governmental Affairs Task Force for the Asheville Area Chamber of Commerce
Mr. Tim Peck
Ms. Leah Karpen, Asheville resident
Mr. Jim Barton, Asheville resident
Mr. Craig Young, Asheville resident
A Buncombe County resident

Mr. Richard Warner, Asheville resident, spoke in support of changing the municipal elections to partisan elections.

Mayor Bellamy closed the public hearing at 9:25 p.m. and stated that action on this item will be considered on June 12, 2007.

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ALLOW SIGNS FOR HOMESTAYS IN THE RS-2 RESIDENTIAL SINGLE-FAMILY LOW DENSITY DISTRICT, RS-4

RESIDENTIAL SINGLE-FAMILY MEDIUM DENSITY DISTRICT AND RS-8 RESIDENTIAL SINGLE-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 9:25 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance to allow signs for homestays in the RS-2 Residential Single-Family Low Density District, the RS-4 Residential Single-Family Medium Density District and the RS-8 Residential Single-Family High Density District. This public hearing was advertised on May 11 and 18, 2007.

This code amendment provides for signs in "homestays" in single family residential zoning districts. City Council felt it might be a good idea to allow signs in order to alert nearby residents to the existence of a homestay use. Such signs were not recommended originally to allow homestays to "blend into" single family neighborhoods.

Section 7-16-1 provides the conditions under which uses by right subject to special requirements can be established. The proposal is to amend the recently-adopted homestay ordinance to allow signs as follows:

- Signage shall be limited to a single sign, not to exceed four square feet, attached to the home.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

On March 7, 2007, the Planning and Zoning Commission recommended denial of the proposed code amendment by a vote of 6-0 due to concerns about encouraging drive-by/walk-up traffic in single family neighborhoods. The draft minutes are as follows: "Scott Shuford presented the wording amendment staff report. Mr. Byers opened the public hearing at 8:04 PM. Barber Melton, representing CAN, indicated prior CAN recommendation for approval included a desire for there to be no signs in order to avoid walk-up/drive-by traffic. Grace Curry requested some form of disclosure about homestay location, arguing for smaller signs, neighbor notice and a City registry of homestays. Mr. Byers closed the public hearing at 8:11 PM. Commission discussion indicated a desire to not allow homestay signs in single family districts and for there to be an official registry of legally-established homestays as a consumer awareness product to combat illegal vacation rentals. Mr. Sizemore moved to recommend denial and requested staff to work on the registry idea. Mr. Jones seconded the motion which carried unanimously (6-0)."

Pro and Con:

- There would be an opportunity for persons to identify homestays in single family districts more readily.

Staff recommends City Council approve an ordinance amending the UDO to allow signs for Homestays in the RS-2, RS-4 and RS-8 zoning district.

Ms. Grace Curry, Asheville resident, urged Council to adopt a registry of legally-established homestays as a system for disclosure of homestay locations. She felt it was important to have the registry's list on the website and also available in hard copy in City Hall. She also felt the registry should be made available to real estate agents who in turn would share it (or maybe obligated to share it) with their clients.

Mr. Jay Quinn, Asheville resident, shared concerns that a sign is not enough to alert nearby residents to the existence of a homestay use. He urged Council to consider a registry that real estate agents could use and other means to make sure that when people come into town to

buy and they do their diligence that we make it as easy as possible for them to find out all the relevant information about their neighborhood.

Mayor Bellamy closed the public hearing at 9:32 p.m.

At the suggestion of Councilman Freeborn, it was the majority of Council's direction to make the registry a layer on MapAsheville and also to have a section that list all the homestays.

After a brief discussion, Councilwoman Cape moved to amend the proposed ordinance to allow a single sign, not to exceed 2.5 sq. ft., attached to the home, with verbiage on said sign be limited to name identification only (without the word "homestay.") This motion was seconded by Councilman Newman.

Councilman Mumpower supported staff's recommendation and not the motion made by Councilwoman Cape. He felt that the 4 sq. ft. sign will be unobtrusive from street level and the language on the sign is micro-managing.

Councilman Davis did not support homestays as a use by right in single-family districts.

The motion made by Councilwoman Cape and seconded by Councilman Newman failed on a 2-5 vote, with Councilwoman Cape and Councilman Newman voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilman Davis, Councilman Freeborn and Councilman Mumpower voting "no."

Councilman Mumpower moved to amend the Unified Development Ordinance to allow signs for homestays in the RS-2 Residential Single-Family Low Density District, the RS-4 Residential Single-Family Medium Density District and the RS-8 Residential Single-Family High Density District. This motion was seconded by Councilman Freeborn and failed on a 2-5 vote, with Councilman Freeborn and Councilman Mumpower voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilwoman Cape, Councilman Davis and Councilman Newman voting "no."

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE AMENDING THE STANDARDS FOR TEMPORARY AND ACCESSORY USES AND STRUCTURES

ORDINANCE NO. 3480 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE AMENDING THE STANDARDS FOR TEMPORARY AND ACCESSORY USES AND STRUCTURES

Mayor Bellamy opened the public hearing at 9:43 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) amending the standards for temporary and accessory uses and structures. This public hearing was advertised on May 11 and 18, 2007.

In a continued effort to modify and update various sections of the *UDO*, staff has identified the subsections related to *Temporary and Accessory Uses and Structures* as some that warranted re-organization and updating. From a land use perspective, temporary and accessory uses tend to be of a relatively low impact; however, as with other development in the City, the number of permits issued for temporary and accessory uses and structures has increased dramatically and, in an effort to control these uses and accommodate new technology and practices, some new standards have been established. These standards seek to for ensure public health, safety, and welfare as well as discourage perpetual occupation of undeveloped (or underdeveloped) properties for temporary uses by establishing time limitations on an individual event, along with restrictions to the number of events per year. Additionally, little used standards

have been removed or re-located to other relevant sections of the *Ordinance* while other standards remain unchanged or are only slightly modified. Lastly, it is important to note that these standards do not regulate co-sponsored events or those held on City owned properties which are regulated through a separate review and permitting process.

In summary, this ordinance is intended to:

- Replace the existing *Accessory Uses and Structures* Section (Sec. 7-14-1) in its entirety, with a corrected and updated version, including new standards for alternative energy devices.
- Replace the existing *Temporary Uses and Structures* Section (Sec. 7-14-2) in its entirety, with a newly revised and updated version, including a table with defined uses and limitations.
- Replace the existing *Temporary Use Permits* Section (Sec. 7-5-3) in its entirety with a slightly amended version.
- Add several new definitions to Sec. 7-2-5
- Remove standards related to temporary telecommunication towers (little used).
- Re-locate standards for temporary classrooms to Sec. 7-16-2 (Use by Right, Subject to Special Requirements).

This draft has been circulated to CIBO, CAN, and CREIA along with other interested parties.

Pros:

- Provides a format that is easier to read and comprehend.
- Better reflects City adopted goals, objectives, and current practices.
- Encourages development/redevelopment of underutilized properties.
- Establishes standards for new alternative energy devices.

Con:

- Reduces the opportunity for temporary uses on an individual piece of property.

Staff recommends City Council approve an ordinance amending the UDO regarding the standards for temporary and accessory uses and structures.

Mayor Bellamy closed the public hearing at 9:44 p.m.

Councilman Mumpower felt this was another layer of control.

Mr. Shuford responded to questions raised by Councilwoman Cape about whether this ordinance would regulate weddings, community block parties, or containers used when people are renovating their homes.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3480. This motion was seconded by Councilman Freeborn and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

City Attorney Oast said that because of the vote, this ordinance will need to come back for a second reading.

D. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 95 SMOKY PARK HIGHWAY, KNOWN AS LOWE'S HOME CENTER, FOR AN ANCILLARY USE IN A RESIDENTIAL DISTRICT FOR THE CONSTRUCTION OF A NEW STORMWATER FACILITY

ORDINANCE NO. 3477 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR PROPERTY LOCATED AT 95 SMOKY PARK HIGHWAY, KNOWN AS LOWE'S HOME CENTER, FOR AN ANCILLARY USE IN A RESIDENTIAL DISTRICT FOR THE CONSTRUCTION OF A NEW STORMWATER FACILITY

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 9:50 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Blake Esselstyn submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Esselstyn said that this is the consideration of the issuance of a conditional use permit for property located at 95 Smoky Park Highway, known as Lowe's Home Center, for an ancillary use in a residential district for the construction of a new stormwater facility.

This project seeks a conditional use permit for an ancillary non-residential use in a residential district. Specifically the request is to place stormwater facilities on a parcel zoned RS-4 for the Lowe's Home Improvement store which is located on the adjacent parcel, zoned Highway Business District.

The subject property is between Smoky Park Highway and Old Haywood Road, adjacent to the Lowe's Home Center at 95 Smoky Park Highway. The project site is zoned RS-4, is currently not developed and has no street frontage. The parcel is currently owned by Lowe's and is 0.95 acres.

The system originally installed on the north side of the Lowe's building site is failing and that location can no longer be used to satisfactorily handle excess stormwater. The applicant is proposing to drain the existing underground detention system, disconnect and remove the outlet pipe and fill in the area with "flowable" fill. This is to occur after the new pond has been constructed on the RS-4 site and the new storm drain pipe has been installed to reroute existing runoff to the new pond. The existing slope in this area will be reinforced per geotechnical recommendations so as not to cause any hazard.

The new facility proposed will be a stormwater detention pond enclosed by a 6' high chain link fence that will follow the upper rim of the pond. One 8' wide swing gate for access is to be located on the eastern edge of the detention pond, closest to the Lowe's building site. The pond's top elevation is proposed to be 15 feet above the bottom elevation and the emergency spillway level is indicated at 2 feet below the rim with 15 feet of rip-rap along the spillway. The volume provided at that spillway level is 139,394 cubic feet. A 2:1 slope characterizes the proposed detention pond.

There is an existing vegetated buffer between the Lowe's building site and the neighboring RS-4 zone, a portion of which will be removed. A new type "D" buffer will surround the lot containing the detention pond and will tie into the existing buffer. The applicant is proposing to buffer with the full 30' width along the northern edge of the parcel and to install reduced buffer of 15' wide through the use of a wooden fence, along the south and west boundaries.

The applicant is still deciding between several options for the temporary location of the excavated material until such time as it can be used to stabilize the slope where the existing stormwater facility is located. One option would involve placing the pile on a neighboring property in the HB zoning district. If this alternative is chosen, the material would be stored on the other property for no longer than 90 days.

The project as proposed appears to satisfy the conditions for ancillary non-residential uses in residential districts, as listed in UDO 7-16-2(d)(11). These conditions relate to use, location, buffering, operation, and occupancy. At their May 2, 2007, meeting, the Planning and Zoning Commission voted unanimously to recommend approval of the Conditional Use Permit request.

Staff is of the opinion that the passive nature of the proposed use is compatible with the surrounding residentially-zoned properties, all of which currently border the large Lowe's parcel with the principal retail use.

City Council must take formal action as set forth in section 7-5-5(e)(3) of the Unified Development Ordinance (UDO), and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of this case (UDO 7-16-2(c)). Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   The proposed project has been reviewed by City staff and appears to meet all public health and safety related requirements once the conditions enumerated by the Technical Review Committee (TRC) are met. The project must meet the technical standards set forth in the UDO, the City Standards and Specifications Manual, the North Carolina Building Code and other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed use is compatible with the surrounding natural features and topography. Grading will be required, but the site would not have not have been selected if the topography was not appropriate.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**

Staff does not expect that the proposed use would have anything more than a minimal impact on neighboring property values.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
The proposed project would be in harmony with these characteristics of the area. This type of feature, not protruding above ground and surrounded by fences and vegetation, would be compatible with almost any semi-urban environment.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
10 pages of the Asheville City Development Plan 2025 are devoted to water quality. The proposed project is designed to replace a failing stormwater facility and provide improved stormwater management relative to the current situation. Engineering Department staff considers the proposed pond a best management practice for stormwater runoff.

The Asheville City Council Goals and Vision statement mentions "Improved air and water quality" as well as addressing "stormwater pollution." The proposed project is designed to improve the stormwater management approach, and hence is in line with the City Council Plan.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
Though this ancillary use should not require frequent access to the aforementioned services and facilities, its location next to the high-traffic Lowe's parking lot off of Smokey Park Highway provides such access. In addition, technical review from other departments has not revealed any problems for serving the development.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**
The proposed project has been reviewed by the City's traffic engineer and is not expected to cause undue traffic congestion or create a traffic hazard. Indeed, after construction has been completed, there should be minimal vehicular traffic related to this use.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros

- Will represent an improvement over the current failing stormwater system.
- Complies with adopted City plans.
- Will provide additional buffer area between retail, parking and adjacent residential.

Cons

- Small area of RS-4 zoned land could otherwise be used for a home or homes (though potential for housing at this site under this zoning is limited)

Staff feels that the potential benefits of this project are significant, and recommends approval of the Conditional Use Permit, subject to the conditions recommended by staff.

After rebuttal, Mayor Bellamy closed the public hearing at 9:53 p.m.

Vice-Mayor Jones asked for information on how the City is handling getting other properties, that were in compliance at the time of construction, up to compliance if a problem occurs. Stormwater Services Manager Chad Pierce said that there is a procedure in place to address those properties and at the request of Mayor Bellamy, he check to see if Meadows Apartments are in compliance with our ordinance.

Councilman Newman moved for the adoption of Ordinance No. 3477, granting a conditional use permit for property located at 95 Smoky Park Highway, known as Lowe's Home Center, for an ancillary use in a residential district for the construction of a new stormwater facility, subject to the conditions recommended by City staff and subject to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All site lighting must comply with the City's Lighting Ordinance and be equipped with 90 degree cut-off fixtures and directed away from adjoining properties and streets; (3) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (4) The building design, construction materials and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; and (5) This project will undergo final review by the TRC prior to issuance of any required permits, noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Vice-Mayor Jones and carried unanimously.

ORDINANCE BOOK NO. 23 - PAGE 378

V. UNFINISHED BUSINESS:

A. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING NEW REQUIREMENTS FOR USE AND DIMENSIONAL NONCONFORMITIES

ORDINANCE NO. 3478 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING NEW REQUIREMENTS FOR USE AND DIMENSIONAL NONCONFORMITIES

Mayor Bellamy said that this public hearing was held on February 27, 2007, and remanded back to the Planning & Zoning Commission.

Mayor Bellamy opened the public hearing at 9:58 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance amending the Unified Development Ordinance UDO to establish new requirements for use and dimensional nonconformities.

The Planning and Zoning Commission considered this code amendment on February 7, 2007, and recommended approval of this amendment by a vote of 5-0, subject to staff adding a definition of the term "impact" and evaluating whether there was ordinance confusion about the terms "communication tower" and "telecommunication tower." Staff added a definition for "impact" and reviewed ordinance provisions concerning the other two terms, finding that there is indeed sufficient ordinance clarity about the distinctions.

The draft amendment then went on to City Council. The day of the hearing, Council received an email from James Judd, representing CAN, raising five issues below. Council referred the item back to the Commission in order to allow them to take these issues into consideration.

Staff comments on Mr. Judd's italicized comments are highlighted.

1) *There is no defined time for accumulating cost (e.g. no more than 50% of assessed value over a 5 year span). The flood plain ordinance has a 5 year time limit I believe. By the ordinance it appears that a developer could for example do one project a year at 35% of assessed value for as long as they want.* This is a good suggestion and has been accommodated in the draft.

2) *Proposed 7-17-2(b) last sentence should state..."as defined in Section 7-17-1 above" as opposed to "as defined in Section 7-11-1 above".* Good catch, change is made.

3) *Concerned that the cost side of the "50% renovation" equation is not better defined / controlled in the ordinance. Cost is defined in the city rate structure as the greater of the actual or estimated hard (ex. material) and soft (ex. architects) costs combined. When the co-owner of Greenlife publicly states that they have spent over $1 million dollars on architects for their renovation but then state that their renovation cost is $250,000...there is a need for better communication* The Building Safety Department evaluates construction costs using generally accepted cost estimating practices and adjustments if needed.

4) *Concerned with accountability, traceability, and definition drift regarding MIA Appraisal. More than one appraisal is a common requirement in other situations. If cost is a concern, the tax value is always a free option.* Staff does not recommend multiple appraisals. We do not use multiple appraisals for buying or selling properties, for example. MAI appraisers are professional and adhere to industry standards. No change is recommended.

5) *Discontinuation of nonconforming uses. A nonconforming use is allowed to continue unless the use is discontinued for a period of 180 or more consecutive days, and there are no substantial good faith efforts to re-establish the use during this period. Obtaining permits to maintain the existing use or continuous efforts to market the property for sale or lease for the existing use shall be regarded as substantial good faith efforts.*

Would a cardboard posted sign on the property or a free ad in IWANNA meet the criteria? Is there a time beyond which good faith efforts expire?

Some additional language has been added to address Mr. Judd's concerns.

There has been recent community confusion about how the nonconformities section of the UDO addresses dimensional nonconformities. The community perception is that any renovation amounting to more than 50% of the appraised value of the structure causes full compliance with ALL sections of the UDO. This is incorrect. In Asheville, the "50% rule" applies only to certain site improvements, not to all of them. The code section in question is Section 7-11-2(b)(1) that states, in part, that "{t}he following developments must bring the entire site into *full compliance with the requirements of Article XI* of this chapter" (emphasis added) with one of the listed developments being "{r}enovations with a total cost exceeding 50 percent of the assessed value of the building, according to Buncombe County tax records." The reference to Article XI limits site compliance to only the standards that are covered in that Article which are:

- Parking, loading and access standards
- Landscape and buffering standards
- Open space standards
- Sidewalk requirements

As a consequence, building location, setback, height and other requirements are not required to be complied with in renovations exceeding 50% of appraised value. While it is common for zoning codes to exempt certain features from compliance in cases of significant site improvement, Asheville's UDO is one of the more generous. We have seen situations where virtually the entire structure has been demolished without triggering compliance with anything more than site design requirements.

In response to Council direction, staff has developed the draft ordinance which significantly increases the extent to which "virtual teardowns" must comply with all dimensional requirements but which exempts renovations (see definition below) from compliance with anything other than site design (Article XI) requirements.

Renovation means the repairing or remodeling of a structure in which the exterior walls, foundation and roof are maintained structurally intact.

There are two other significant changes in this ordinance from the current situation regarding nonconformities. First, the current provisions require adjoining lots in common ownership on the day that the UDO became effective to be combined to create a conforming or less-nonconforming lot(s). In other words, if there are two adjoining lots that were lawfully created sometime in the past and which have become nonconforming due to code changes and if the lots were owned by the same entity in 1997, they cannot be separately developed. The same two lots owned by different entities in 1997 can be separately developed. The proposed amendment corrects this inequity.

Second, the proposed ordinance creates a new role for the Planning and Zoning Commission. Under current code, a nonconforming use can be replaced by another nonconforming use of equal or lesser intensity using the table provided in Section 7-11-2(d)(10). If the proposed existing or replacement use is not specifically listed, City staff makes the determination of whether replacement can occur. Under the revised ordinance, the Planning and Zoning Commission makes the determination as to whether the unlisted uses are of equal or lesser intensity.

Pros:

- Provides a simpler, cleaner approach to nonconforming uses and dimensional nonconformities.
- Meets the expectations of many in the community about site compliance during renovation.

Cons:

- Will likely result in increased cost of site development.
- Some projects may not be pursued due to expense of compliance.

The Planning and Zoning Commission considered this code amendment on April 4, 2007 and recommended approval of the revised amendment by a vote of 7-0. City staff recommends City Council approve an ordinance amending the UDO to establish new requirements for use and dimensional nonconformities.

Mayor Bellamy closed the public hearing at 9:59 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3478. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 384

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE LANDSCAPE STANDARDS

ORDINANCE NO. 3479 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE LANDSCAPE STANDARDS

Mayor Bellamy said that this public hearing was held on April 10, 2007, and continued on May 8, 2007, to this date.

Mayor Bellamy opened the public hearing at 9:59 p.m.

Assistant Planning & Development Director Shannon Tuch said that City staff presented an amendment draft to the city's current Landscape and Buffering standards (Sec. 7-11-2) at the April 10th hearing. As part of the discussion, it was requested that staff (1) make some minor adjustments to the proposed draft; (2) examine the proposed Alternative Compliance standards for improved clarity and efficacy; and (3) provide some recommendations for requiring landscaping and/or tree preservation as it related to single family subdivision development. Changes identified in the staff memo dated April 10, 2007, have been incorporated and new changes as a result of the discussion on April 10, 2007, are also included in the proposed ordinance before Council.

The minor changes were easily addressed through the latest revised draft and include:

- **Screening of Outdoor Areas** – Current standards and staff's recommendation is that the vegetation is to be placed on the exterior of the fence used to screen outdoor areas such as dumpsters, loading docks, outdoor storage, etc.; this standard remains unchanged from the former draft.
- **Reduced Buffers with Application of a Privacy Fence** – Council concern was taken into consideration and the draft has been amended to require all buffer vegetation to be planted in a minimum 7-foot wide planting strip on the exterior of the fence, facing the abutting property. If the applicant wishes to place this material on the inside of the fence, then a request for alternative compliance would need to be sought.
- **Earthen Berm as an Alternative to Street Buffers** – the former draft required that the berm be covered in "vegetation"; it is staff's recommendation that this receive a very minor amendment to read, "to be completely covered with trees, shrubs, perennials, and/or groundcovers". An earthen berm covered in turf grass would be a more effective buffer than the basic requirement of one shrub for every five linear feet. At a minimum, the street buffer would also contain street trees so requiring more significant plantings may discourage the use of a berm.

<u>Alternative Compliance</u>

The standards for Alternative Compliance were re-examined and were, with minor adjustments, generally felt to be more than adequate. The proposed standards are significantly more bounded and non-discretionary than the current process and are felt to be a great improvement. To add more standards may detract from the goal of providing an appropriate level of flexibility, particularly to those constrained infill situations; to add more process requirements would take more time and resources and should be balanced against the desire to provide an acceptable level of customer service. Staff is proposing that the standards remain as proposed with two minor adjustments which include:

- The 30 day appeal time (as described in Article VI) is identified in more detail.
- A requirement for additional notification be provided should the Planning Director choose to reject the Tree Commission's recommendation.

Staff would like to recommend that the proposed standards be adopted and tested for six months, after which staff will provide a report detailing total cases, nature of requests, efficacy of

standards and notification, and other pertinent information including possible recommendations for revision/amendment.

Tree Preservation/Re-planting

Addressing the concern over the lack of landscape requirements and/or required tree preservation as it related to single family subdivision proved challenging. An examination of other North Carolina municipalities' standards identified a very notable lack of requirements for single family homes and lots (unless located on lands with important aesthetic or environmental values that warrant special protection). In summary, North Carolina lacks the necessary enabling legislation for us to comfortably recommend such requirements on single family lots. A requirement in association with the creation of a multi-family project or a major subdivision may be considered where a proposed development must be reviewed and approved to comply with all applicable standards. In these cases, a specified amount of tree preservation and/or tree replanting may be considered. The proposed Open Space amendment, if adopted, would require open space to be provided for any residential project of eight units or more. In the interest of consistency, tree preservation/re-planting requirements could be considered for those residential projects over eight units or eight lots.

When examining other standards from other states, the most common approach was to require a preservation/replanting area equivalent to 30% of the total site. Staff would like to propose a variation of this standard that would require a preservation/replanting area of 30% where some or all of that 30% may fall on the required open space area(s) and/or property line buffers. When the 30% "tree-save area" exceeds the open space requirement then the balance must be located elsewhere on individual lots. Although enforcement of tree-save areas on private lots may not be possible once the development of the subdivision is completed, staff feels as though this would still provide value and warrants consideration since it provides the opportunity for wooded lots to those homeowners. Understanding the positive effect that mature trees have on property values (for a variety of aesthetic, energy, and environmental reasons), it would be expected that a large majority of those tree-save areas would remain in place.

Lastly, it is important to note that inflexible standards, coupled with a lack of administrative relief, provides opportunity for judicial intervention. Alternative compliance provisions or mitigation options should provide realistic opportunities for development. Staff has proposed a somewhat conservative standard with flexibility offered through the alternative compliance process. Council may also wish to consider a "tree-in-lieu" fee similar to that described in the current Open Space amendment or some other off-site mitigation option (these options are not reflected in the revised draft).

The Chairman of the Asheville Tree Commission spoke in support of the proposed standards.

Mayor Bellamy closed the public hearing at 10:04 p.m.

Councilman Mumpower couldn't support this ordinance in that he felt this is a step towards an elite community.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Davis moved for the adoption of Ordinance No. 3479. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

VI. NEW BUSINESS:

A. ENDORSEMENT TO ESTABLISH CITY OF ASHEVILLE OUTDOOR RECREATION FACILITIES AS TOBACCO FREE ZONES

Parks & Recreation Director Roderick Simmons said that this is the consideration of an endorsement to establish City of Asheville outdoor recreation facilities as tobacco free zones thus discouraging the use of tobacco products in public outdoor recreation areas in an effort to eliminate park user's exposure to secondhand smoke.

The Recreation Board recommends Asheville City Council's endorsement to discourage the use of all tobacco products in all City of Asheville outdoor recreation facilities thus establishing tobacco free facilities in conjunction with Project ASSIST Tobacco Prevention Coalition. These facilities include all public park properties such as ball fields, greenways, play areas, picnic shelters, swimming pools, tennis courts, Nature Center, Asheville Municipal Golf Course, Food Lion Skate Park, Aston Tennis Center and Riverside Cemetery.

It is the goal of the Recreation Board and the Parks and Recreation Department to create a healthy environment in all city recreation facilities. By discouraging tobacco use in outdoor recreation areas dramatically reduces the exposure of youth to secondhand smoke thus greatly enhancing a healthy environment at these public outdoor recreation areas.

Project ASSIST along with Teens Against Tobacco Use Asheville High and Question Why Youth Empowerment Center is working locally via the Buncombe County Health Center to reduce tobacco use among youth and adults and to promote public health policies that reduce the public's exposure to second-hand tobacco smoke.

Signs depicting public outdoor recreation facilities as tobacco free zones by discouraging tobacco use will be posted in all City of Asheville public outdoor recreation areas. Project ASSIST will participate in the cost of producing and placing signs in the parks.

Pros:
- Secondhand smoke is a proven cause of cancer, heart disease, stroke, emphysema and asthma in both smokers and non-smokers.
- Secondhand smoke levels in outdoor public places can reach levels as high as those found in indoor facilities.
- Tobacco free parents, coaches and recreational leaders are powerful role models that tobacco use is not part of a healthy lifestyle.
- Studies show that children who are exposed to secondhand smoke are more likely to start smoking as adolescents.

Cons:
- The signs do not prohibit tobacco use but discourage the use of tobacco, thereby making compliance a voluntary act of the park user.
- Cost of sign installation $1500 to $2500. Project ASSIST will contribute to the sign cost.

The Recreation Board recommends City Council to pass a motion to endorse City of Asheville public outdoor recreation facilities as tobacco free zones by discouraging the use of tobacco products in public outdoor recreation areas.

Ms. Colleen Daly, Asheville High School student, spoke in support of the resolution.

Mr. Lee Storrow, Asheville High School student, spoke in support of the resolution, noting that they have obtained over 750 signatures on a petition endorsing this request.

Councilman Freeborn was disgusted with the number of cigarette butts and other smoking items that are picked up by children in our parks.

In response to Vice-Mayor Jones, City Attorney Oast said that at this time we can't legally prohibit smoking in outdoor areas, but only discourage it; however, there are some state laws pending that would allow the City to legally prohibit the use of tobacco products in public outdoor recreation areas and he would advise Council when, and if, that passes.

Councilman Mumpower moved to endorse the City of Asheville public outdoor recreation facilities as tobacco free zones by discouraging the use of tobacco products in public outdoor recreation areas. This motion was seconded by Councilman Freeborn and carried unanimously.

B. RESOLUTION NO. 07-112 - RESOLUTION TO ESTABLISH BOUNDARIES BETWEEN ASHEVILLE AND WOODFIN

City Attorney Oast said that this is the consideration of a boundary adjustment between City of Asheville and Town of Woodfin.

In discussing annexation issues with the Town of Woodfin, the staffs of each municipality identified opportunities to improve service provision and community identification through municipal boundary adjustments. For example, a portion of the University of North Carolina at Asheville is located in Woodfin and a portion of a 19-23 off-ramp is in Asheville but is more logically served by Woodfin. This has been previously discussed with Council as part of our legislative package. Legislation was introduced to address this issue, subject to the two municipalities identifying the location of the boundary.

These adjustments will create a more logical and identifiable boundary between the City of Asheville and the Town of Woodfin. Because of the somewhat unusual fact situation here, legislative action is the most expedient way to accomplish what needs to be done. This resolution will be provided to the legislative for incorporation into the pending bill, and will enable the delegation to move forward with the requested boundary adjustment. A similar method was employed in 1997 to adjust the boundary between Asheville and Biltmore Forest along Hendersonville Road.

Our discussions with Woodfin on this particular issue have led to discussions on the broader topic of other areas that are near our common boundaries. We anticipate coming to Council in the near future with a proposal for an annexation agreement between Asheville and Woodfin. This does not mean that areas covered by the agreement will be annexed, but is a statutorily authorized method for determining which areas—when developed to urban standards--should more logically be considered for inclusion in the corporate limits of one city or the other, and in some cases can slow down the rate of "competitive" annexation.

City staff recommends City Council authorize the Mayor, Attorney and Clerk to execute and transmit a resolution establishing the boundary between City of Asheville and the Town of Woodfin, for inclusion in the pending legislation.

Using a map, City Attorney Oast responded to questions raised by Councilman Mumpower, noting that the boundary adjustment line is a logical service line.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-112. This motion was seconded by Councilwoman Cape and carried unanimously.

C. **RESOLUTION NO. 07-113 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS THE BILTMORE LAKE AREA**

RESOLUTION NO. 07-114 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS THE SARDIS ROAD AREA

RESOLUTION NO. 07-115 - RESOLUTION APPROVING THE REPORT SETTING FORTH PLANS TO PROVIDE SERVICES TO THE AREA PROPOSED FOR ANNEXATION KNOWN AS THE SCHENCK GATEWAY AREA

Urban Planner Julia Cogburn said that this is the consideration of resolutions approving the Annexation Services Plan for the Biltmore Lake Area, Sardis Road Area, and Schenck Gateway Area.

Staff has identified three areas with potential for being annexed: Biltmore Lake Area, Sardis Road Area, and Schenck Gateway Area. Under State law, the City must follow a specific process for annexation that begins with the adoption of resolutions that describe the boundaries of the areas under consideration, and fix dates for a public informational meeting and a public hearing on the question of annexation. State law does allow simultaneous annexation of multiple non-adjacent areas.

The following steps and dates meet the process required by State law:

- Council Adoption of Resolution of Intent – 5/15/07
- Council Adoption of Services Plan – 5/22/07
- Public Information Meeting – 7/02/07
- City Council Public Hearing – 7/24/07
- Annexation Ordinance Adopted – 8/14/07
- Effective Date – 12/31/07

The second step in the annexation process is for the City Council to consider and approve an Annexation Services Plan for the areas to be annexed.

She reviewed the Plan demonstrating how each area proposed for annexation meets the statutory qualifications for annexation and further demonstrates the capability of the City to provide urban services to these areas.

City staff recommends that City Council adopt the resolutions approving the Annexation Services Plan for the Biltmore Lake, Sardis Road and Schenck Gateway Areas.

Ms. Cogburn, along with Urban Planner Blake Esselstyn summarized the Plan for Services as follows:

Biltmore Lake Area - The Biltmore Lake Area is located southwest of the current City limits. The area is predominately developed with single-family residences. The area contains 440 acres and has an estimated population of 768 persons. The revenue summary is as follows for the Biltmore Lake area: Ad valorem taxes - $772,581; state utility taxes - $80,319; sales tax - $263,611; Powell Bill funds - $28,943; fees, charges & permits - $32,302 for a total of $1,177,756. The estimated expenditures total $179,420. The estimated capital expenditures total $974,905.

Sardis Road Area - The Sardis Road Area is located southwest of the current City limits. The area contains a mixture of commercial, residential, institutional and industrial uses. The area

contains 415.8 acres and has an estimated population of 1073. The revenue summary is as follows for the Sardis Road area: Ad valorem taxes - $377,066; state utility taxes - $75,988; sales tax - $128,954; Powell Bill funds - $27,788; fees, charges & permits - $45,130 for a total of $654,928. The estimated expenditures total $115,136. The estimated capital expenditures total $2,334,406.

Schenck Gateway Area - The Schenck Gateway Area is located adjacent to the current City limits (to the south) at the entrance to the Biltmore Park community. The parcel contains a gas station, fast food restaurant, and a convenience store. The area contains 11.0 acres and has an estimated population of 0. The revenue summary is as follows for the Schenck Gateway area: Ad valorem taxes - $21,650; state utility taxes - $2,004; sales tax - $7,420; Powell Bill funds - zero; fees, charges & permits - zero for a total of $31,074. The estimated expenditures total $4,025. The estimated capital expenditures total $4,717.

With regard to the specific departments, Ms. Cogburn and Mr. Esselstyn summarized the following:

Regarding police protection: The additional land area, street mileage, dwelling units, businesses and improvements will require expansion of the Police Department as further described below.

Extending service into the proposed annexation areas will require operational adjustment in two primary areas:

1. Configuration of patrol districts covering the proposed annexation areas so as to provide for effective manpower deployment and a balanced response time to calls for service.

2. Adding one (1) additional patrol unit to accommodate the anticipated increase in demand for police services (see information below).

The Biltmore Lake Area will be served by an expansion of the Adam Patrol District.
The Sardis Road Area will be served by an expansion of the Adam Patrol District.
The Schenck Gateway Area will be served by an expansion of the Charlie Patrol District.

Based on the estimated calls for service in the annexation regions, and in an effort to improve response time to critical calls for service, a new patrol beat will be added to the City's Police Department on or before January 1, 2008. This beat will be serviced by one officer 24/7. This addition requires the hiring of five (5) officers and two (2) police vehicles. The cost of hiring a new police officer (total initial cost - $46,735.00) is as follows:

- Salary and benefits	$40,235.00
- Radio	$ 4,000.00
- Weapon	$ 1,000.00
- Uniforms, Equipment, Vest	$ 1,500.00

The cost of a new vehicle with all necessary equipment is $38,000.00.

Regarding fire protection: The Biltmore Lake Area will be primarily served by Stations 10 and 11 with estimated annual calls for service of one hundred and seventy-five (175) to two hundred (200) calls. The Sardis Road Area will also be primarily served by Stations 10 and 11 with estimated calls for service of one hundred (100) to one hundred and twenty-five (125) calls. Schenck Gateway will be primarily served by Stations 4 and 11 with estimated calls for service of twenty-five (25) to fifty (50) calls. When Station 12 is placed into operation the Biltmore Lake and Sardis Road Areas will be primarily served by this station.

The extension of fire protection services is not simply an extension of existing department resources. The City is required by G.S. 160A-49.1 to offer existing fire service entities contract opportunities which allow for the continued service of annexed areas by existing rural fire departments. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated areas. The involvement of the rural fire department may require the City to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances may affect its plan for extending fire protection; therefore, the City has developed a plan that incorporates alternative solutions to extending fire protection to annexed areas.

Regarding solid waste collection: The extension of solid waste collection services is not simply an extension of existing department resources. The City is required by G.S. 160A-49.3 to offer existing private service entities contract opportunities which allow for the continued service of annexed areas by existing companies. The City maintains the responsibility of assuring a level of service comparable to the service level within the existing incorporated area. The involvement of the existing private companies may require the municipal department to supplement service where contract service is not comparable to the municipal service. The City recognizes these circumstances may affect its plan for extending solid waste collection services; therefore, this plan incorporates alternative solutions to extending solid waste collection services to annexed areas.

Alternative No. 1 – Extension of Existing City of Asheville Public Works Department – Sanitation Division Services by City Personnel and Equipment with the Payment to Private Companies for Economic Loss

To extend services to the annexation areas, an additional automated truck and a new MEO III position are required by the City of Asheville Public Works Department – Sanitation Division. With this additional truck and associated personnel to operate the truck, all solid waste collection services described as being provided by the City, will be provided on substantially the same basis and in the same manner as described in this plan. Costs associated with the annexation include: the purchase of new rollout containers, increased tipping fees, recycling costs, and potential "economic loss" payments to affected contractors.

Alternative No. 2 – Contract with Existing Private Companies for Curbside Roll-Out Container Service Supplemented by Municipal Specialized Services for Collection of Trash, Yard Waste, Leaves, Dumpster Containers and Recycling

Private companies having an average of fifty (50) or more residential customers, or receiving average monthly revenue from residential customers of $500 or more, within the annexation areas described in this plan, could be offered opportunities to contract for continued service.

Regarding street maintenance services, the City has evaluated the streets in the annexation areas for inclusion in the maintenance program described above. The results of that evaluation are listed below with the names and mileages of streets expected to be included by annexation area. General street conditions for the listed roads are satisfactory, unless otherwise indicated in this plan, and any maintenance issues will be handled as part of the City's routine maintenance funding.

It is proposed that existing street lights in the Biltmore Lake Area will be taken over by the City. There are thirty-six (36) existing street lights that are scheduled to become the responsibility of the City at an annual cost of $480 per light. The annual cost ($480 per light) for maintaining the existing lights in the Biltmore Lake area is $17,280.

The City has also evaluated the existing sidewalks in the Biltmore Lake Area and has determined that 18,489 linear feet of chip seal sidewalks (non-ADA compliant) at a cost of $739,500.00 would need to be replaced prior to the City taking over the maintenance of these sidewalks. The City has also determined that street repairs are needed in the area (4924 linear feet of streets needing shoulder repair; 245 drains need inverts poured) at a cost of $31,520.00. The cost of these improvements is included in the financing plan found in Section 3 of this Plan for Services with sidewalk replacement costs phased over a ten (10) year period.

SARDIS ROAD AREA

Baity	481	0.09	21
TOTAL	15,417	2.87	

It is proposed that existing street lights in the Sardis Road Area will be taken over by the City. There are thirty-three (33) existing street lights that are scheduled to become the responsibility of the City at an annual cost of $480 per light. The annual cost ($480.00 per light) for maintaining the existing and proposed lights in the Sardis Road Area is $ 15,840.00.

The City has evaluated the street infrastructure in the Sardis Road Area and has determined that a number of repairs will be needed. The repairs will include: two hundred and seventy (270) square yards of street patching; replacement of one hundred and forty-one (141) improperly constructed storm drains; and the construction of a turnaround on Morse Drive. The cost of these improvements ($57,560.00) is included in the financing plan found in Section 3 of this Plan for Services and phased for replacement to City standards over a ten (10) year period.

SCHENCK GATEWAY AREA

There is no street maintenance that is required in the proposed Schenck Gateway Area and no street lights that will become the responsibility of the City.

Regarding water services: The City of Asheville has evaluated each area being considered for annexation and has determined the following regarding the extension of water service to each of the annexation areas:

1. Biltmore Lake Area: Potable water and fire protection service are available to all parcels in this annexation area on substantially the same level as other parts of the City, as shown on Sheet 2 of 7 of the Plan for Services Drawings. Therefore, no water system improvements are proposed for this area.

2. Sardis Road Area: Potable water and fire protection service are available to most of the parcels in this area on substantially the same level of service as other parts of the City. However, fire protection service needs to be upgraded for all parcels in the vicinity of Morse Drive. As such, approximately, 1,770 linear feet of 6-inch diameter water pipe are proposed to be constructed to bring the service to substantially the same level as other parts of the City. Existing and proposed water system infrastructure is shown on Sheet 4 of 7 of the Plan for Services Drawings.

3. Schenck Gateway Area: Potable water and fire protection service are available to this area on substantially the same level of service as other parts of the City, as shown on

Sheet 6 of 7 of the Plan for Services Drawings. Therefore, no water system improvements are proposed for this area.

The City of Asheville will complete construction of the proposed water system improvements within two (2) years of the effective date of annexation.

Regarding sewer collection services: The City of Asheville has evaluated each area being considered for annexation and has determined the following regarding the extension of sewer service to each of the annexation areas:

1. Biltmore Lake Area: Major sanitary sewer trunk lines and interceptors are currently in place. Sanitary sewer service is available to this annexation area at substantially the same level as other parts of the City, as shown on Sheet 3 of 7 of the Plan for Services Drawings. Therefore, no sanitary sewer system improvements are proposed for this area.

2. Sardis Road Area: Major sanitary sewer trunk lines and interceptors are currently in place for most of the area. However, sanitary sewer service is not available for the upper northwest portion of this area and for all existing parcels in the vicinity of Morse Drive. As such, approximately 6,455 linear feet of 8-inch sanitary sewer is proposed to be constructed to bring the service to substantially the same level as other parts of the City. Existing and proposed sanitary sewer system infrastructure is shown on Sheet 5 of 7 of the Plan for Services Drawings.

3. Schenck Gateway Area: Major sanitary sewer trunk lines and interceptors are currently in place. Sanitary sewer service is available to this annexation area on substantially the same level as other parts of the City, as shown on Sheet 7 of 7 of the Plan for Services Drawings. Therefore, no sanitary sewer system improvements are proposed for this area.

The City of Asheville will complete construction of the proposed sanitary sewer system within two (2) years of the effective date of annexation.

Regarding general government, the City of Asheville is governed by a City Council consisting of a Mayor, Vice-Mayor, and five Councilpersons with general administration responsibilities delegated to a City Manager. Supporting the City Manager are key professionals and department heads specializing in public works, police protection, fire protection, urban land use planning and zoning, building code enforcement, legal matters, parks and recreation and various other municipal activities and functions. The City of Asheville has active minimum housing code and State building code administration, zoning and subdivision ordinance administration, recreational programs and parks administration, community revitalization and affordable housing grants administration, economic development efforts and many other planning and related activities in an effort to make Asheville a better community for present and future residents, businesses and property owners. Employees and employee relations are managed by the City Manager. The City of Asheville is an Equal Opportunity Employer. Three well-qualified practicing attorneys provide legal counsel to the City.

In response to Councilman Freeborn, Planning & Development Director Scott Shuford said that he would get a breakdown of what the net increase will be to the taxpayers who are proposed to be annexed.

Councilman Mumpower said that there are arguments in support of forced annexation but the personal barrier for him is that it is forced and he would not support the resolutions.

Regarding public comment, City Attorney Oast said that statutory process set up for public comments is at the public information meeting on July 2, 2007, and the City Council public hearing on July 24, 2007.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolutions and they would not be read.

Councilwoman Cape moved for the adoption of Resolution Nos. 07-113, 07-114, and 07-115. This motion was seconded by Vice-Mayor Jones and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION NO. 07-113 - RESOLUTION BOOK NO. 30 - PAGE 356
RESOLUTION NO. 07-114 - RESOLUTION BOOK NO. 30 - PAGE 357
RESOLUTION NO. 07-115 - RESOLUTION BOOK NO. 30 - PAGE 358

D. CONSIDERATION OF AN APPOINTMENT TO THE CIVIL SERVICE BOARD

It was the consensus of City Council to instruct the City Clerk to prepare the proper paperwork to reappoint Barbara Marlow to serve another two-year term on the Civil Service Board, term to expire May 21, 2009, or until her successor has been appointed.

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Councilman Mumpower commented on confronting Asheville's open air drug market. He said that on January 16 following intense Council/staff interplay, Councilman Mumpower made a motion to (1) charge our city and police administration to develop in collaboration with community partners a comprehensive, strategic and operational plan to eliminate our open air drug market in all Asheville neighborhoods. Other members of Council amended that motion to (1) affirm our support for Police Chief Hogan and the men and women of the Asheville Police Department, expressing our full confidence in their dedication to protect the public safety of the citizens and have confidence in their professionalism to achieve that goal; and (2) instruct our City Manager to explore opportunities to create job opportunities and affordable health care and ways to reduce poverty in Asheville's neighborhoods. Councilman Davis and Councilman Mumpower voting against that motion because they felt it watered down the core issue. Since January we have had a couple of presentations by the Police Chief and two or more discussions by Council on this issue. This past week, during our first formal discussions on budgeting our police on our commitment to eliminate the open air drug market in Asheville, discussion was suppressed. That was important because it precluded deliberations on whether staff and Council are upholding or abandoning our earlier mandate on addressing our open air drug market. His concern is that we do not have anything from the City Manager and Police Chief that remotely represents what we have requested - a comprehensive, strategic and operational plan to eliminate our open air drug market in all Asheville neighborhoods. Without a plan, we cannot have a valid budget. Without a valid budget. we cannot assign accountability. Without accountability, we have little assurance of success. Without success, we continue to fail in our responsibilities for public safety in all Asheville neighborhoods. His request is that we formally request (1) the City Manager and Police Chief to fulfill their mandate by developing a comprehensive plan to eliminate our open air drug market and a reasonable budget devoted to that end; and (2) we re-open deliberations on funding for public safety including the resources required to implement our open air drug market interdiction effort. He ended by saying that in January we dedicated ourselves to eliminating our open air drug market in all Asheville neighborhoods. Council has the power to sidestep this responsibility. We do not have the power to do so without public accountability. We should charge our City and police administration to develop in collaboration with community partners a comprehensive, strategic, and operational plan to eliminate our open air drug market in all Asheville neighborhoods.

A resident of the Biltmore Lake area spoke in opposition of forced annexation of the Biltmore Lake area and urged City Council and/or staff to talk with residents who have requested meetings and who can offer assistance.

Mayor Bellamy invited the public to attend the City's Memorial Day celebration on Monday, May 28, 2007, at 3:00 p.m. at the City-County Plaza.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 11:12 p.m.

Kristina Lipe
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – June 12, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Freeborn gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Councilman Mumpower requested Consent Agenda Items "C", "E", and "F" be removed from the Consent Agenda for individual votes.

A. **APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON MAY 22, 2007**

B. **RESOLUTION NO. 07-116 - RESOLUTION REAPPOINTING BARBARA MARLOWE TO THE CIVIL SERVICE BOARD**

RESOLUTION BOOK NO. 30 - PAGE 359

C. **RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH KIMLEY-HORN & ASSOCIATES INC. TO PREPARE FEASIBILITY STUDY FOR A PARKING GARAGE ON RANKIN AVENUE**

This item was removed from the Consent Agenda for an individual vote.

D. **RESOLUTION NO. 07-118- RESOLUTION AUTHORIZING AN INCREASE IN THE DELEGATED AUTHORITY OF THE PURCHASING MANAGER FOR THE DISPOSITION OF SURPLUS PERSONAL PROPERTY**

Summary: The consideration of a resolution authorizing an increase the delegated authority of the Purchasing Manager for the disposal of surplus personal property.

The Purchasing Manager currently has delegated authority for the disposal of surplus personal property under City Council Resolution 85-99.

The NC Legislature enacted S.L. 2005-227 (H1332) effective July 27, 2005 which increased the value of property that may be sold under a delegation of authority as provided in G.S. 160A-266(c) to $30,000. This legislation also provides a broader authority for the use of electronic auctions or other methods of selling property as it becomes surplus as an alternative to

sale by public auction. The law, however, was not automatic and requires the approval of Council to the increased level.

Pros:

- Permits the ongoing disposal of surplus personal property providing a continuing flow of revenue to the City.
- Alleviates the need to store surplus personal property for disposal at an annual public auction.

Con: None.

Staff recommends Council approve a resolution authorizing an increase the delegated authority of the Purchasing Manager for the disposal of surplus personal property.

RESOLUTION BOOK NO. 30 - PAGE 361

E. RESOLUTION AUTHORIZING A LEASE OF REAL PROPERTY AT CHARLOTTE STREET AND CELIA PLACE TO THE PRESERVATION SOCIETY OF ASHEVILLE AND BUNCOMBE COUNTY

This item was removed from the Consent Agenda for an individual vote.

F. RESOLUTION MODIFYING THE 2007 CITY COUNCIL MEETING SCHEDULE TO DELETE THE JULY 17, 2007, AND THE JULY 31, 2007, MEETINGS

This item was removed from the Consent Agenda for an individual vote.

RESOLUTION BOOK NO. 30 - PAGE 363

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Vice-Mayor Jones moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

C. RESOLUTION NO. 07-117 - RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH KIMLEY-HORN & ASSOCIATES INC. TO PREPARE FEASIBILITY STUDY FOR A PARKING GARAGE ON RANKIN AVENUE

Summary: The consideration of a resolution authorizing the City Manager to execute a contract with Kimley-Horn in an amount not to exceed $154,100 to prepare a feasibility study for a proposed parking garage on Rankin Avenue.

On November 28, 2006, City Council approved the Downtown Parking Action Plan. Item number seven indicates that we will determine the feasibility of locating a parking garage behind the Civic Center along Rankin Avenue. The City owns the property required to build a garage in this location. Adjacent property owners have expressed an interest in partnering on a potential multi-use facility.

In order to move forward, we need to prepare a feasibility study that addresses issues like the number of spaces needed in the area, ability to construct an adequate size parking lot on the property, financial performa, opportunity for LEED certification and conceptual design.

To this end, staff prepared requests for proposals to secure professional services to perform these tasks. Three firms submitted proposals for this work. Staff has determined that Kimley-Horn and Associates, Inc., is the most qualified to perform this work. The original proposal was estimated at approximately $215,000. Staff has worked with the consultant to reduce this cost to $154,100.

The money for this project will come from the parking enterprise fund.

Pros

- This action will allow us to move forward on providing public parking in downtown.
- The feasibility study will determine the ability to construct a parking garage in this area.
- Money for this project in available in the Parking Enterprise Fund.

Cons:

- While this is a necessary step in the process, it represents a significant investment.

City staff recommends City Council approve the resolution authorizing the City Manager to execute a contract with Kimley-Horn in an amount not to exceed $154,100 to prepare a feasibility study for a proposed parking garage on Rankin Avenue.

Councilman Mumpower said that we spent approximately $1.4 Million to plan to build a parking garage in front of the Civic Center and 10 or so years of staff time. He felt that Council made an ill advised move to walk away from that parking garage, and he is not prepared to see us waste that money with still another effort to build a parking garage beside two existing garages.

City Engineer Cathy Ball responded to questions from Councilwoman Cape regarding the private property considerations.

Councilman Newman moved for the adoption of Resolution No. 07-117. This motion was seconded by Councilwoman Cape and carried on a 6-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 360

E. RESOLUTION NO. 07-119- RESOLUTION AUTHORIZING A LEASE OF REAL PROPERTY AT CHARLOTTE STREET AND CELIA PLACE TO THE PRESERVATION SOCIETY OF ASHEVILLE AND BUNCOMBE COUNTY

Summary: The consideration of a resolution authorizing a lease of real property at Charlotte Street and Celia Place to the Preservation Society of Asheville and Buncombe County

The City proposes to lease the structure at the corner of Charlotte Street and Celia Place (NW corner) to the Preservation Society for use as the Society's business office. The structure is a 1,158 square foot rock building. It was built by E. W. Grove and used as his company's office during the development of Grove Park. It also housed the Asheville Art Museum for several years, but has been vacant recently.

The proposed term of the lease is 9 years 11 months. The proposed rent is $10.00 per month. In addition, the Lessee proposes to undertake improvements to the structure necessary to bring the structure into compliance with applicable codes. These improvements will be subject

to the City's approval, but will be done at the Lessee's expense, they will become the property of the City upon surrender of the premises.

Because the Preservation Society is a non-profit entity and is carrying out a public purpose, the law permits the Council to authorize the lease subject to a condition limiting its use to a public purpose, and then to publish a notice of its action; the lease cannot be finalized until the 10 days after the notice has run. This is the process being utilized here.

Some Council members may recall that the City previously authorized a lease to the Preservation Society back in 2002. This proposal is substantially the same, except that the rent in the previous proposal was $550 / month.

Council may also recall that this property was previously the subject of a conditional use rezoning back in 2002. However, because the building was never used pursuant to that Conditional Use Permit (CUP), the rezoning and CUP lapsed, and the property has reverted to its previous zoning classification of RS-4. Before the property could be used pursuant to this lease, Council will need to take zoning action to allow the proposed use to occur. This process has been commenced and will be coming before Council in the near future. This will present a further opportunity to regulate the use of the property.

Pros:
- Permits public purpose utilization of a property that has not been used recently, and is not suitable for residential use.
- Provides for City-owned structure to be brought up to applicable code standards.
- The building would become the Lessee's maintenance responsibility.

Cons:
- Rent is below market.
- Introduces a low-impact non-residential use into a residential area.

If Council approves of this proposal, adoption of the resolution is recommended.

In response to Councilwoman Cape, Mr. Jim Coman, President of the Preservation Society, said that the proposed cost for renovations is approximately $125,000. He also noted that they will not make a request to City Council to fund the renovations.

City Attorney Oast said that although he and Mr. Coman have not negotiated this detail, the structure and the immediate grounds will be the Preservation Society's maintenance responsibility.

In response to Councilman Newman, City Attorney Oast said that he could include language in the lease that makes it clear that when the lease has expired, the rent will not be less than market rate.

Councilman Mumpower moved for the adoption of Resolution No. 07-119, with the provision that once the lease has expired, the rent will not be less than market rate. This motion was seconded by Councilwoman Cape and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 362

F. RESOLUTION NO. 07-120- RESOLUTION MODIFYING THE 2007 CITY COUNCIL MEETING SCHEDULE TO DELETE THE JULY 17, 2007, AND THE JULY 31, 2007, MEETINGS

Mayor Bellamy responded to Councilman Mumpower's inquiry as to why City Council was canceling the July 17, 2007, meeting.

Councilman Mumpower moved for the adoption of Resolution No. 07-120. This motion was seconded by Vice-Mayor Jones and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 363

III. PRESENTATIONS & REPORTS:

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING FOR THE FISCAL YEAR 2007-08 ANNUAL OPERATING BUDGET

Mayor Bellamy opened the public hearing at 5:23 p.m.

Chief Financial Officer Ben Durant said that the City Council conducts a public hearing each year to receive public input on budget issues before the Annual Operating Budget is adopted.

The Fiscal 2007/2008 Annual Operating Budget was presented to City Council on May 8, 2007. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on June 1, 2007, and June 8, 2007. Adoption of the budget ordinance is scheduled for June 19, 2007, at the regularly scheduled City Council meeting.

The Fiscal Year 2007/2008 Annual Operating Budget is balanced with an Ad Valorem tax rate of $0.42 per $100 of assessed value. All essential City services are maintained, and a number of service enhancements and new initiatives are included in the proposed budget.

A copy of the budget is available for public inspection in the City Clerk's office. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, the budget may be changed by City Council in any way before adoption. It may also be changed by budget amendment after adoption with the only exception being the Ad Valorem Tax rate, which can not be changed once adopted.

Staff recommends City Council conduct the public hearing on the City of Asheville Fiscal Year 2007/2008 Annual Operating budget and include public input in considerations on the budget.

Mr. Mike Marshall, representing the Asheville Firefighters Association, requested an update on the proposal he presented for a matching 457 to offset inequities that the firefighters now incur as opposed to general employees and in particular the Police Department.

The following individuals urged Council to support renovations at the Reid Community Center:

Mr. Gene Bell
Mr. Al Whitesides
Ms. Jennifer Pickering
Ms. Robin Young
An area resident
Ms. Cora White
Ms. Neidra Wilson
Rev. Spencer Hardaway
Ms. Emily Hancock Myers
Mr. Graham Paul

Ms. Leah Karpan

At 5:55 p.m., Mayor Bellamy closed the public hearing.

In response to Councilman Freeborn, Human Resources Director Lisa Roth recommended funding the pay plan and that we provide the same benefit to all employees. She said that currently the firefighters take home 6.25% more in net pay than the rest of the general employees because they do not participate in Social Security and the 6.25% is the employee contribution to Social Security.

After discussion regarding the firefighters' proposal and the majority of Council's urging that the firefighters vote to participate in Social Security (Councilman Davis made, but later rescinded, a motion which Councilman Freeborn seconded to include a 2% match to a 401-A for firefighters), it was the consensus of Council to have a Social Security representative at the meeting on June 19, 2007, in addition to staff providing Council with information from prior worksessions with staff options.

After discussion regarding renovations to the Reid Community Center ($500,000 allocated last year and in 2008-09 fund the renovations with $250,000 and in 2010-11 an additional $100,000 for renovations), it was the consensus of Council to schedule this to come back to Council in July, 2007 with the Parks & Recreation Department's capital improvements, at which time Council requested additional information, some being, to get a plan on what we can use the $500,000 already allocated for; a deferred maintenance plan for all our facilities; information on a bond program to assist with some of these initiatives; how we can give the Raise the Roof at Reid Campaign $300,000 by October, 2007, so they will have a match in order that they not lose a $900,000 grant; and what are we committing to in the long-run in terms of operations.

Mayor Bellamy said that on June 19, 2007, City Council will consider adoption of the budget.

B. PUBLIC HEARING TO CONSIDER THE ISSUANCE OF A CONDITIONAL USE PERMIT FOR ASHEVILLE RADIO GROUP LOCATED AT 1190 PATTON AVENUE FOR THE CONSTRUCTION OF A TELECOMMUNICATION TOWER

ORDINANCE NO. 3481- ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR ASHEVILLE RADIO GROUP LOCATED AT 1190 PATTON AVENUE FOR THE CONSTRUCTION OF A TELECOMMUNICATION TOWER

City Clerk Lipe administered the oath to anyone who anticipated speaking on this matter.

City Attorney Oast reviewed with Council the conditional use district zoning process. This process is the issuance of a conditional use permit, which is a quasi-judicial site specific act. At this public hearing, all the testimony needs to be sworn.

After hearing no questions about the procedure, Mayor Bellamy opened the public hearing at 6:41 p.m.

All Council members disclosed that they have visited the site and would consider this issue with an open mind on all the matters before them without pre-judgment and that they will make their decision based solely on what is before Council at the hearing.

City Attorney Oast said that as documentary evidence is submitted, he would be noting the entry of that evidence into the record.

Urban Planner Nate Pennington submitted into the record City Exhibit 1 (Affidavit of Publication), City Exhibit 2 (Certification of Mailing of Notice to Property Owners); and City Exhibit 3 (Staff Report).

Mr. Pennington said that this is the consideration of the issuance of a conditional use permit for Asheville Radio Group located at 1190 Patton Avenue for the construction of a telecommunication tower.

The applicant is requesting a Conditional Use Permit for a .56 acre parcel to allow for the installation of a 60-foot lattice self supporting telecommunication tower mounted on a concrete base behind an existing building. The tower's function is to provide a communication link between the radio station and their relay tower on Spivey Mountain in north Buncombe County.

The subject site is located at 1190 Patton Ave. in West Asheville (Attachment to City Exhibit 3 - Aerial Map). The property consists of one lot zoned Highway Business (HB) and is comprised of .56 acres according to Buncombe County tax records. The subject site is bounded to the north by a convenience store and Patton Avenue, to the east by Auto Zone, to the west by an ATM and US Cellular, and to the south by a commercial parking lot used by the radio station and all zoned HB. Pursuant to Section 7-8-16(e) of the Unified Development Ordinance (UDO), telecommunication towers are reviewed as conditional uses.

The site was brought into compliance with UDO landscaping requirements when it underwent an expansion and remodel in June of 2006 (Attachment to City Exhibit 3 - Site, Landscape & Zoning Plan). Because of the existing nature of the building and parking lot, a request for alternative compliance for areas where new landscaping could not be accommodated was requested and approved. The subject site is surrounded by steep slope and dense vegetation along the rear and east side of the property. However, pursuant to the UDO telecommunication towers shall be buffered form adjacent properties with a buffer which at a minimum meets the requirements of a "B" buffer regardless of adjacent zoning district classifications or uses. Therefore, the applicant is requesting that the existing landscaping on and offsite suffice for this requirement in the form of an alternative compliance request due to the proximity of the tower to the existing building and the fact that the tower pad would be located in an existing parking lot. The tower pad area is 64 square feet, will be enclosed by an 8-foot security fence and will not be visible from the road because of its location behind the building. As required by the UDO, the tower is designed to accommodate at least one other user for co-location.

The Highway Business District is established to address the needs of commercial development along major thoroughfares. Automobile oriented development is prevalent within this district and a wide range of commercial uses is permitted. Due to the dominance of the automobile, a major objective within this district is to preserve the traffic capacity of the thoroughfare. This is attempted through minimizing the number of access points onto the thoroughfare, encouraging zero-lot line development, and promoting shared parking and access between adjacent businesses. Development which enhances the function of the thoroughfare and is sensitive to the appearance of the corridor is essential within the district. These major corridors are the gateways to Asheville and often define the first image of the city.

As part of the special requirements applied to Conditional Uses in the HB zoning district per Sec. 7-16-2(b)(3), the project must meet a number of conditions for telecommunication towers including those technical conditions addressed in the Technical Review Committee (TRC) staff report. In addition to the technical conditions, the following non-technical standards must also be met:

f. Applicants shall first be encouraged to consider properties owned by the City or Buncombe County before considering private properties.

The applicant researched the possibility of utilizing an existing monopole on city owned property located at 50 Oregon Ave. Documentation was provided that indicates, "A roof top mount would not work because the tree line would block our signal. There is no direct line-of-sight from the roof of the studio building to the monopole because of tree obstruction."

i. No telecommunication facility shall interfere with usual and customary radio and television reception.

The applicant possesses a current FCC license and no interference with other radio or television transmissions is expected.

t.7. Generators may not be used as a primary electrical power source.

Generators will not be used as a primary electrical power source.

t.13. The City Council may require any other conditions deemed necessary or desirable to ameliorate the impact of the tower on the adjacent properties and uses.

Additional conditions to be proposed as deemed necessary by Council.

u. An annual wireless telecommunication facility permit shall be required for each wireless telecommunication facility located in the city.

In order to annually renew this permit the applicant must certify the information described in Sec. 7-16-2(c)(3)(u)1-6.

v. Conditional use permits for telecommunication towers shall be valid for an initial period of five years.

In order to review the permit for an additional five year period, the applicant must submit a renewal request within 60 days prior to the expiration of the initial permit period. A review shall be conducted to determine whether and under what conditions the conditional use may be extended for successive five year periods. Additional details of this renewal process are described in Sec. 7-16-2(c)(3)(v).

w. A conditional use approval for a telecommunication tower shall become null and void if the facility is not constructed and placed in service within one year of the date of approval.

Approval will become null and void after a period of one year, however, the conditional use approval may be extended for a period of 6 months if substantial construction has commenced before the end of the initial year. If construction has not begun before the end of the initial year, re-application for a new conditional use permit would be required.

At their May 7, 2007, meeting the TRC approved this project subject to the conditions in the staff report.

As of the time of this writing, staff has received no communication from adjacent property owners or other citizens concerning the proposed development.

City Council must take formal action as set forth in Section 7-5-5(e)(3) of the UDO, and must find that all seven standards for approval of conditional uses are met based on the evidence and testimony received at the public hearing or otherwise appearing in the record of the case

pursuant to Section 7-16-2(c) of the UDO. Staff's review indicates that all seven standards are met as proposed in the site plan.

1. **That the proposed use or development of the land will not materially endanger the public health or safety.**
   This has been reviewed by City staff and appears to meet all public health and safety related requirements. The project must meet the technical standards set forth in the UDO, the Standards and Specifications Manual, the North Carolina Building Code and all other applicable laws and standards that protect the public health and safety.

2. **That the proposed use or development of the land is reasonably compatible with significant natural or topographic features on the site and within the immediate vicinity of the site given the proposed site design and any mitigation techniques or measures proposed by the applicant.**
   The proposed tower will be located along a busy commercial corridor and will be sited approximately 75 feet below the adjacent residential neighborhood along Belleair Rd. In addition, the installation is extremely limited in its footprint and will require an extremely small amount of site disturbance with little to no grading or ground disturbing activity.

3. **That the proposed use or development of the land will not substantially injure the value of adjoining or abutting property.**
   The telecommunication tower is proposed to be 60 feet from existing grade - the maximum height of structures allowed in the HB zoning district and the tower pad area will not be visible from the street. The tower structure itself will be most visible from the adjacent commercial corridor where the impact of a tower will be nominal. In addition, no reception interference is expected which could potentially affect other quality of life issues for adjacent or nearby residents.

4. **That the proposed use or development or the land will be in harmony with the scale, bulk, coverage, density, and character of the area or neighborhood in which it is located.**
   As mentioned earlier, the tower pad/installation area is extremely small (64 s.f.) and, by definition, is designed to be in harmony with the scale, bulk, coverage, density and character of the area or neighborhood. The tower would be located in proximity with other poles and objects of significant height including; flagpoles, power poles, light poles, signage and transmission lines.

5. **That the proposed use or development of the land will generally conform to the comprehensive plan, smart growth policies, sustainable economic development strategic plan and other official plans adopted by the City.**
   The Asheville City Development Plan 2025 thoroughly describes the need to accommodate and encourage new technology as a critical factor in sustainable economic development both through the further stimulation of investment and technology and through the improved quality of life desired by residents and tourists. In addition, the location of the radio station supports the notable smart growth goal of adaptive reuse/infill through the seamless co-operation with an existing site.

6. **That the proposed use is appropriately located with respect to transportation facilities, water supply, fire and police protection, waste disposal, and similar facilities.**
   The proposed development is located near transportation facilities and other utilities appear adequate. The initial technical review by other technical agencies and utility providers has not revealed any problems for serving the use.

7. **That the proposed use will not cause undue traffic congestion or create a traffic hazard.**

The proposed installation is not expected to cause any increase in traffic to the site other than the occasional maintenance visit.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- Tower designed for co-location, which eliminates the need for additional towers in the future.
- Facilitates the functionality of a newly established radio station studio.

Cons:

- Tower will be 60 feet tall and visible along Patton Ave.

Staff concurs with the Technical Review recommendation of approval with the conditions outlined in the TRC report, but additionally recommends that the City Council consider a concealed monopole or other architectural design be used in lieu of the proposed lattice style tower (Attachment to City Exhibit 3 - Elevation Plan).

Mr. Randy Cable, Vice-President and General Manager of Asheville Radio Group, explained the importance of this request for this tower. He said the tower will not be used as a broadcast tower but a point to point communication device. The tower will not be lighted. In addition, he felt that a lattice style tower is better than a monopole.

Ms. Diana Love, resident on Mace Avenue, spoke in opposition to the request, mainly for aesthetic reasons.

Councilwoman Cape initiated discussion regarding the elevation of the pole and how it would be seen from surrounding residential properties (City Exhibits 4, 5, 6 and 7).

Regarding the buffering, Councilman Davis questioned if we could condition the lot in the back which adjoins residential property to remain in a vegetative state. Assistant Planning & Development Director Shannon Tuch suggested the following condition "that the property owner pursue a lot combination and include this property with the subject property" or as an alternative we could propose a recombination where a portion of the property is recombined to preserve a buffer area. Mr. Cable said that he would have no problem with that condition.

After rebuttal, Mayor Bellamy closed the public hearing at 6:59 p.m.

Councilman Davis moved for the adoption of Ordinance No. 3481, granting a conditional use permit for Asheville Radio Group located at 1190 Patton Avenue for the construction of a telecommunication tower, to the following conditions: (1) The project shall comply with all conditions outlined in the TRC staff report; (2) All existing vegetation that is to be preserved must be clearly indicated and dimensioned on the site, landscape and grading plans; (3) The structure design, construction materials, and orientation on site must comply with the conceptual site plan and building elevations presented with this application. Any deviation from these plans may result in reconsideration of the project by the reviewing boards; (4) No outdoor lighting or lighting attached to structure (lighting is not proposed for tower structure); (5) This project will undergo final review by the TRC prior to issuance of any required permits; and (6) The lot in the back of the building be preserved as a buffer, noting that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Newman.

There was discussion of whether the tower should be a concealed monopole or other architectural design vs. the proposed lattice style tower. Mr. Pennington said that a lattice style

tower might work with so much tree line and vegetation in the rear; however, staff thinks that a monopole will have less visual impact.

Councilman Mumpower moved for a lattice style pole and not a monopole. The motion died for lack of a second.

Councilwoman Cape moved for a concealed monopole style and not a lattice style pole. The motion died for lack of a second.

The original motion made by Councilman Davis and seconded by Councilman Newman carried on a 4-2 vote, with Mayor Bellamy, Vice-Mayor Jones, Councilman Davis and Councilman Newman voting "yes" and Councilman Freeborn and Councilman Mumpower voting "no". Councilwoman Cape abstained from voting because of the dilemma that they have cut down trees in the alternate buffer.

City Attorney Oast noted that Councilwoman Cape cannot abstain from voting for the reasons set forth.

The original motion was re-voted. The original motion made by Councilman Davis and seconded by Councilman Newman carried on a 4-3 vote, with Mayor Bellamy, Vice-Mayor Jones, Councilman Davis and Councilman Newman voting "yes" and Councilwoman Cape, Councilman Freeborn and Councilman Mumpower voting "no".

City Attorney Oast said that due to the vote, a second reading of Ordinance No. 3481 would be required at the next formal meeting.

ORDINANCE BOOK NO. 23 - PAGE 423

At 7:15 p.m., Councilman Mumpower moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina and County of Buncombe. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Vice-Mayor Jones and carried unanimously.

At 7:30 p.m., Councilman Freeborn moved to come out of closed session and return to the regular meeting. This motion was seconded by Vice-Mayor Jones and carried unanimously.

C. PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF CONTIGUOUS PROPERTY LOCATED AT 1903 OLD HAYWOOD ROAD

ORDINANCE NO. 3482 - ORDINANCE EXTENDING THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE PROPERTY LOCATED AT 1903 OLD HAYWOOD ROAD

Mayor Bellamy opened the public hearing at 7:35 p.m. This public hearing was advertised on June 1, 2007.

Urban Planner Julia Cogburn said that this is the public hearing and consideration of an ordinance for the annexation of one lot located at 1903 Old Haywood Road, the site of the new fire station.

The City of Asheville is completing construction of a new fire station, Fire Station #10, at 1903 Old Haywood Road in West Asheville. The station is scheduled to become operational in July of this year.

This property at 1903 Old Haywood Road (PIN 9618.20-90-5200) is contiguous to the current city limits of the City of Asheville but not located within the corporate boundaries. Part 1 of Article 4A of Chapter 160A of the North Carolina General Statutes authorizes annexation of property owned by a municipality and contiguous to current municipal boundaries.

Pursuant to N. C. Gen. Stat. sec 160A-31, a public hearing must be held prior to adopting any ordinance for annexing municipally owned property. If Council decides to proceed with this request, it is proposed that the annexation become effective on June 30, 2007.

Pros:

- Brings City owned-property into the corporate limits in accordance with state law.

Cons:

- Some property owners in the area may be concerned about annexation of their property.

City staff recommends that City Council adopt the ordinance annexing the property at 1903 Old Haywood Road.

Mayor Bellamy closed the public hearing at 7:37 p.m.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinance and it would not be read.

Councilwoman Cape moved for the adoption of Ordinance No. 3482. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 24 - PAGE 1

D. PUBLIC HEARING TO CONSIDER PERMANENTLY CLOSING AN ALLEYWAY OFF RICHARD STREET

RESOLUTION NO. 07-121 - RESOLUTION CLOSING AN ALLEYWAY OFF RICHARD STREET

Mayor Bellamy opened the public hearing at 7:41 p.m.

Public Works Director Mark Combs said that this is the consideration of a resolution to permanently close an alleyway off Richard Street. This public hearing was advertised on May 18, 25, June 1 and 8, 2007.

N.C. Gen. Stat. sec. 160A-299 grants cities the authority to permanently close streets and alleys.

Pursuant to this statute, Joseph R. Bly has requested the City of Asheville permanently close an alleyway off Richard Street that runs between his properties on Richard Street.

Public Works Department staff has researched and determined this alleyway is not maintained by the City. Closure of this alleyway will not deny any of the adjoining property owners' reasonable means of ingress and egress as all adjoining property owners have joined in signing the petition requesting the alleyway to be closed.

We notified all utilities and City departments and have received no objections to the closing. In addition, Parks & Recreation staff does not see the closing affecting any greenways.

Pros:

- The closure allows the property to be used to its maximum potential.

- There will be no future compromise of ingress/regress to other property

Cons:

- In consideration of the location of the alleyway, staff can find no potential challenges regarding the closure of the alley.

City staff recommends City Council approve a resolution to permanently close an alleyway off Richard Street.

Mayor Bellamy closed the public hearing at 7:42 p.m.

Mayor Bellamy said that members of Council have been previously furnished with copies of the resolution and it would not be read.

Councilwoman Cape moved for the adoption of Resolution No. 07-121. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 30 - PAGE 364

E. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CREATING NEW STANDARDS FOR PROHIBITING GATED COMMUNITIES

ORDINANCE NO. 3483 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CREATING NEW STANDARDS FOR PROHIBITING GATED COMMUNITIES

Mayor Bellamy opened the public hearing at 7:43 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of amendments to the Unified Development Ordinance (UDO) to add new standards to Article VIII prohibiting "gated communities" as a Conditional Use. This public hearing was advertised on June 1 and 8, 2007.

Presently, the City of Asheville does not prohibit gated communities and, as a result, has faced some challenges with a number of recent residential projects that propose to restrict access to non-residents, thereby fragmenting the urban fabric and transportation network. The appeal and occurrence of gated communities has been growing steadily particularly in the south and southwest; in an effort to be pro-active and mitigate any potential negative impacts of gated communities, staff is following policy direction to establish standards that would prohibit gated communities.

Reducing or eliminating the opportunity for gated communities is well supported by the Smart Growth Transportation Policies adopted by the City as well as those policies that promote diversity, affordability, walkability, mixed-uses, and public open space.

In March of this year, the Planning & Zoning Commission reviewed a staff report providing options for regulating gated communities as part of a recent amendment dealing primarily with subdivision standards. At that time, the Commission requested that the portion related to gated communities be removed for separate consideration and instructed staff to explore allowing gated communities as a Conditional Use with standards as opposed to a prohibited use. A separate amendment returned in April with recommended standards; a fair amount of discussion and deliberation over those standards occurred which prompted staff to request additional time for refinement to the standards being discussed. Staff again returned with an amendment the following month where the discussion focused on the practical effect of the

restrictive standards; ultimately this resulted in a decision by the Commission to return to the original proposal that prohibited gated communities which was approved 6-1.

In summary, this ordinance is intended to:

1. Amend Article II to include a definition for "Gated community"
2. Amend Article VIII to add "Gated community" to the list of Prohibited Uses for all districts that allow residential development.

This draft has been circulated to CIBO, CAN, and CREIA along with other interested parties.

Pros

- Better reflects City adopted goals and objectives.
- Allows greater opportunity for vehicular and pedestrian connectivity.
- Allows greater opportunity for community connectivity and integration.

Cons

- Restricts the ability to develop a private gated community, thereby restricting the opportunity for this housing option.

City staff recommends approve the amendment to the UDO to add new standards to Article VIII prohibiting "gated communities" as a Conditional Use.

Ms. Heather Rayburn explained some research performed by Ms. Grace Curry on gated communities and outlined their pros and cons. She, personally, did not support gated communities.

Rev. Christopher Chiaronmonte spoke against gated communities.

Mayor Bellamy closed the public hearing at 7:51 p.m.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3483. This motion was seconded by Councilman Newman.

Councilwoman Cape was concerned of the unintended consequences to flatly refuse gated communities, e.g. public safety. She moved to amend the main motion that gated communities be a conditional use rather than to restrict them completely, specifying that the gates be used only for vehicular traffic but that they remain open for pedestrians and bike traffic. This amended motion was seconded by Councilman Davis.

Councilman Newman finds the public safety issue compelling and if a conditional use permit process was utilized, he would want to see clear criteria when gated communities would be allowed.

City Attorney Oast said that if Council chooses to allow gated communities as a conditional use, then he suggested that the main motion be continued to allow staff an opportunity to develop conditional use permit criteria and that it be presented to Council at a later date.

Councilman Mumpower felt this effort is an unnecessary control of private property rights. He felt gated communities will build outside the City limits and contribute to sprawl.

The amended motion made by Councilwoman Cape and seconded by Councilman Davis failed on a 2-5 vote, with Councilwoman Cape and Councilman Davis voting "yes" and Mayor Bellamy, Vice-Mayor Jones, Councilman Freeborn, Councilman Newman and Councilman Mumpower voting "no."

The original motion made by Councilman Freeborn and seconded by Councilman Newman carried on a 5-2 vote, with Mayor Bellamy, Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Councilman Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 21 - PAGE 3

F. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CHANGES TO PARKING, LOADING AND ACCESS STANDARDS

ORDINANCE NO. 3484- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE RELATING PARKING, LOADING AND ACCESS STANDARDS

Mayor Bellamy opened the public hearing at 8:02 p.m.

Assistant Planning & Development Director Shannon Tuch said that this is the consideration of amendments to the Unified Development Ordinance to add new standards to Article XI to better address more urban forms related to car channelization and sight visibility triangles. This public hearing was advertised on June 1 and 8, 2007.

The standards for sight visibility triangles and car channelization noted in 7-11-1 reflect a suburban standard that was the predominant form when the ordinance was created. Subsequent amendments and additions to the ordinance encouraging an urban form of development where buildings must be constructed along the edge of the right-of-way and where parking structures are encouraged are in conflict with these more suburban standards.

Currently, when a more urban form is proposed and fails to meet the suburban standard in the ordinance, the applicant must pursue a Board of Adjustment (BOA) variance. The Asheville BOA has expressed discomfort with rendering these decisions stating that they feel that these are highly technical issues that should be addressed by professionals through amended standards. Staff has recognized the need for alternative standards for urban forms for some time and has been working towards a restructuring that would remove all existing standards and from the *Ordinance* and place them in the City's *Standards and Specifications Manual* where more technical standards are typically found. In addition, engineering staff have been working to develop some new standards that are proposed to be included in the *Manual* to address these more urban forms that are occurring with more frequency.

With the adoption date of the new *Manual* still some time out and with the research not being complete, staff felt it best to address this matter with a minor amendment in the interim.

This amendment was reviewed by the Planning & Zoning Commission at their May 2, 2007, meeting where the amendment was approved unanimously.

In summary, this ordinance is intended to:

1. Add a new standard for measuring sight visibility triangles for buildings that require or allow 0-foot setbacks, with other measures to be applied if deemed necessary by the City Traffic Engineer.
2. Add a new standard that exempts parking structures from the car channelization standards developed for surface parking lots, requiring that the structure's parking and access design be approved by the City's Traffic Engineer.

This draft has been circulated to CIBO, CAN, and CREIA along with other interested parties.

Pros:

- Better reflects City adopted goals and objectives of encouraging a more urban and Smart Growth form – removes conflict with suburban standards.
- Allows for more context appropriate standards for urban vs. suburban developments.
- Removes the need to accommodate these urban form developments with a Board of Adjustment variance.

Cons:

- None identified.

Staff recommends City Council approve the amendment to the Unified Development Ordinance to add new standards for parking, loading and access.

Mayor Bellamy closed the public hearing at 8:05 p.m.

Mayor Bellamy did not support buildings constructed up to the street.

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3484. This motion was seconded by Councilman Davis and carried on a 6-1 vote, with Mayor Bellamy voting "no."

ORDINANCE BOOK NO. 24 - PAGE 5

V. UNFINISHED BUSINESS:

A. SECOND READING OF ORDINANCE NO. 3480 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO CHANGES TO TEMPORARY USES

Mayor Bellamy said that this public hearing was held on May 22, 2007.

Assistant Planning & Development Director Shannon Tuch said that City staff presented an amendment to the City's current Temporary and Accessory Uses and Structures (Sec. 7-14-1 and 7-14-2) at the May 22nd hearing. There were a couple questions raised by the Council the night of the hearing; additionally, staff was contacted by Mr. Jim Jenkins of Alpha Storage Containers with additional questions after the hearing. As a result of these inquiries, staff would like to offer the following clarifications:

- This amendment does not establish a process for requiring temporary and accessory use permits; these permits have been required since the Unified Development Ordinance (UDO) was adopted in 1997. This amendment seeks to clarify and make readily available, through the addition of the chart, the time restrictions for different structures and uses.

- Private, non-commercial events on private property are not regulated through this section of the code and do not require a permit of any kind.

- Private, non-commercial events on public property are regulated through the Special Events permit process.

- Block parties are not regulated through this section of the code; this would be considered a private, non-commercial event. If the road is closed, a road closure permit would be required through the Engineering department.

- Storage containers have always required temporary use permits. Time limitations have not changed for non-residential properties; residential properties are proposed to be restricted to no more than 14 days.

- Storage containers in association with a building permit (new construction, renovation, addition, demolition, etc.) do not require a temporary use permit – this is regulated through the building permit. The 14 day time limitation in residential areas does not apply when the container is being used in association with a valid building permit.

- Properties such as large retail sites may have more than one storage container (example of Wal-Mart where 30+ containers are used for seasonal material storage). One permit may be used for all containers.

- Enforcement actions are not proposed to change – staff will follow the same procedures established prior to the adoption of this amendment.

Staff would like to recommend that Council approve the proposed draft amendment with some very minor clarifications as outlined by City staff in Sec. 7-14-2(g).

Mayor Bellamy said that members of Council have been previously furnished with copies of the ordinance and it would not be read.

Councilman Mumpower didn't believe that this represents a simplification of the UDO and would not support the ordinance.

Councilman Freeborn moved to adopt Ordinance No. 3480 on its second and final reading, with the minor clarifications outlined by City staff. This motion was seconded by Councilwoman Cape and carried on a 4-3 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 23 - PAGE 411

VI. NEW BUSINESS:

A. ENDORSEMENT OF HEALTH CARE BILLS OF INTEREST TO MISSION HOSPITALS

City Manager Jackson said that at a recent meeting with the Board of Directors of Mission Hospitals, they asked for City Council's endorsement of Senate Bill 1512 "A bill to enact the 'Health North Carolina' program to facilitate the availability of affordable accident and health insurance coverage to small employers, self-employed individuals, and uninsured workers. To create the North Carolina Health Insurance Risk Pool to help meet the health insurance coverage needs of individuals who cannot obtain affordable health insurance because of high-risk health

conditions; and to appropriate funds for the implementation of this act"; and House Bill 265 "An act to establish the North Carolina Health Risk Pool and to appropriate funds."

Council's options are that (1) if Council wants to endorse the bills at this meeting, that they allow City staff to do further research to determine that this is a neutral impact upon us. If endorsed by Council at this meeting, he would not submit endorsement letters for the Mayor to send to our local delegation until that research was completed; or (2) if Council has questions and wants to make sure City staff thoroughly researches this, then he suggested a continuance.

Councilman Mumpower sees how this would assist Mission Hospitals, but would speak against the endorsement as there are a lot of socialistic implications in this effort.

Councilman Davis requested City staff to investigate the pros and cons of the Senate Bill 1512 feature that requires the top 15 health insurers to participate.

Councilman Mumpower moved to continue this matter until June 26, 2006, in order to allow City staff time to thoroughly research the issue to make sure that this is a neutral impact upon us. This motion was seconded by Councilman Davis and carried unanimously.

B. FLOOD MANAGEMENT POLICY DIRECTION

Ms. Mary Leonard White, Chair of the Asheville-Buncombe Flood Damage Reduction Task Force, introduced the Task Force Members.

She said that nine major floods have occurred in the past 100 years. The most serious were in 1916 and 2004, but there have been damaging floods on an average of every 20 years. Building has occurred first along the river because that is the accessible land and the most easily traversed. Census date indicates that there will be an additional 30,000 people in Buncombe County over the next 20 years, putting continued pressure to build along the river in the floodplain.

The mission of the Task Force is to establish a regional approach and long-range plan for flood damage reduction, floodplain protection and watershed management. Base the approach and plan on best management models, which integrate objectives of flood control, transportation, economic development, land use and community planning, recreation and environmental preservation.

Their approach was (1) to gather information from subject matter experts on a broad spectrum of topics including flooding, development, transportation, etc.; (2) analyze strategies to reduce the impacts of future flooding; and (3) analyze current development patterns and the impact on future flooding.

She reviewed with Council the numerous studies which were reviewed.

The lessons learned from the experts were (1) watershed issues are interconnected; (2) proper planning can reduce the severity of flooding; (3) a regional holistic solution is needed; and (4) all development, redevelopment and improvement projects must meet community priorities. Communication and balance are key.

The following are recommendations to reduce flood damage (1) plan and implement physical measures to reduce flooding (a) keep it out, slow it down, get out of the way; (b) act now to save lives, property and money; and (c) plan based on a future regional build-out scenario; (2) education (a) decision-makers; (b) builders and developers; and (c) general public; and (3) communication between and across communities (a) electronic communication from rain and stream gauges widely and easily available; (b) ongoing regional meetings of planning agencies for emergency; and (c) expand flood warning system, especially below North Fork dam.

To plan and implement physical measures to reduce flooding (1) keep it out (a) initiate incentives or requirements to ensure low impact development; (b) stormwater management; and (c) reduction in impervious surface and steep slope development; (2) slow it down (a) retention, reservoir, impoundments; (b) channel and conveyance improvements; and (c) other engineering and structural improvements; and (3) get out of the way (a) "smart" development, both public and private, in flood hazard zone; (b) encourage removal of flood-prone structures; and (c) education and outreach; and (d) emergency response and warning system.

We are all connected by watershed and need to "share the pain" and the solution. For this reason, we need a regional approach. In Swannanoa - more development on hillsides means more adverse impact on the flooding in the valley. In the River District and Biltmore Village - must take an integrated approach to look at all of the issues. At the North Fork Reservoir - must balance between drought and flood management. In Montreat - steep slopes enhance and maximize stormwater runoff and flooding. In Black Mountain - being upstream of Asheville, any decisions on impervious surface have a large impact.

Decisions made throughout the Swannanoa watershed have a direct impact on Biltmore Village and the River District (1) limit the amount of impervious surface; (2) implement steep slope protection measures; (3) facilitate (through tax credits) low impact development that mimics hydrologic cycle; and (4) encourage extensive best management practices to ensure no increased runoff from development.

Floodway issues (1) no new structures in the floodway (a) current regulations allow buildings with a no-rise certificate, but this should not be allowed along the main channel; (b) greenways allowed; and (c) parking lots allowed - this is a water quality issue, not flow constriction; (2) don't constrict channel with bridges, sewer lines, buildings (a) new bridge on US 25 in Biltmore Village should have larger "throat"; (3) purchase key properties in floodway; and (4) better upkeep of floodway (a) keep it cleaned up - debris removal in the floodway in addition to stream channel; and (b) improve conveyance of streams.

Floodplain and flood fringe issues (1) no net fill in the flood fringe (a) minimum buffer (top of bank) on all streams unless a variance is granted (for example, hardship reasons on single family lots) - 100 ft. minimum buffer along Swannanoa and French Broad River; 50 ft. on primary tributaries; 35 ft. on secondary tributaries; (b) proof of no-rise studies; (2) close the 50% improvement rule loophole by using the latest tax valuation of the structure in the floodplain; and (3) cooperate regionally to map future floodplain scenarios (a) base planning and regulation on build out scenarios - the current model will soon be outdated; (b) require a certain amount of open space be set aside for every acre that is developed in the floodplain; (c) reward developers who meet high environmental standards with a higher density development; and (b) ensure that there is balance between flood mitigation and economic development.

Specific recommendations for Swannanoa River through Biltmore Village (1) clear the channel to accommodate the minor, more common rain events and prevent flooding; (2) ensure the new bridge and surrounding area does not impede water flood as much as current bridge; (3) flood proof the buildings located in the floodplain; (4) purchase flood-prone structures; and (5) choose green space and parks over structures in this "choke point" and high flood risk areas.

The Wilma Dykeman Riverway Plan is a model for the balance between protection and development.

Implement Management Plan for North Fork Reservoir (1) Flood Operations Plan (a) operate reservoir to provide flood storage and reduce flood levels; (b) maintain drought response plan; (2) Emergency Action Plan (a) protect the dam and water supply from extreme events; and (3) Advance Flood Warning System (a) notify emergency management and citizens.

Recommendations to reduce flood damage (1) plan and implement physical measures to reduce flooding (a) keep it out, slow it down and get out of the way (b) act now to save lives, property and money in the future; and (c) plan based on a future regional build-out scenario; (2) education (a) decision makers; (b) builders and developers; and (c) general public; and (3) communication between and across communities (a) electronic communication from rain and stream gauges widely and easily available; (b) ongoing regional meetings of planning agencies for emergency; and (c) expand flood warning system, especially below North Fork dam.

In summary (1) working together, we can reduce the impact of flooding "inch by inch"; (2) we are all connected by the watershed and need to "share the pain" and the solution through a regional approach; (3) we must be proactive now (a) projections show County growing by 30,000 people in the next 20 years, putting even more people and property in harm's way; (b) severity of climate change will increase chance of severe flooding in our area; and (c) we cannot continue with current development plan; and (4) there is a cost/benefit - research has shown that for every one dollar that is spent on mitigation approximately four dollars are saved from monies that are eventually spent on correcting damages.

Councilman Mumpower felt that it was important that we not over react to stand alone events. He asked that City staff seek the point of balance. He personally did not believe we have done what needs to be done about clearing out the river and conduit pipes.

Councilman Newman requested more information on what are the different land use policies that we need to be putting in place in Asheville, our extraterritorial jurisdiction area and at a regional level to have a beneficial rather than an adverse effect on the flooding and floodplain equation.

Upon inquiry of Vice-Mayor Jones, Ms. White suggested City Council contact the N.C. Dept. of Transportation and request them to construct the bridge at Biltmore Village to have a wide a span as possible.

Ms. White said that she hoped that one recommendation from Council would be a regional watershed plan and there are efforts underway to find funding for that plan and to get cooperation from the other governmental bodies.

On behalf of City Council, Mayor Bellamy thanked the Task Force for their hard work on this effort. The next step for Council will be that City staff take the information and come back with ordinances, etc. for Council to consider.

C. ORDINANCE NO. 3485- ORDINANCE AMENDING THE CITY CHARTER OF THE CITY OF ASHEVILLE TO PROVIDE THAT PRIMARIES AND ELECTIONS TO THE OFFICES OF MAYOR AND COUNCIL MEMBERS BE CONDUCTED ON A PARTISAN BASIS

City Attorney Oast said that this is the consideration of an ordinance to amend the Charter of the City of Asheville to provide for partisan election

He said that on May 8, 2007, he gave an explanation of the process for amending the City's Charter to provide for partisan elections.

The Resolution of Intent was adopted on May 8, 2007; the public hearing was advertised and held on May 22, 2007. The next step in the process is adoption of the ordinance, scheduled to occur on June 12. Due to legally-prescribed time periods, the ordinance must be adopted on June 12 if it is to be effective for the 2007 primary and election cycle.

If adopted, the ordinance will be advertised and there will be a 30-day window for a petitioned referendum. If a petition drive is successful, the question of partisan elections would

have to be put to a vote of the people, which would delay the effective date of the ordinance past the 2007 election cycle.

After a brief discussion on re-opening the public hearing, Councilman Mumpower moved to re-open the public hearing. This motion was seconded by Councilman Davis and failed on a 3-4 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "yes" and Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "no."

Mayor Bellamy said that members of Council have been previously furnished with a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3485. This motion was seconded by Vice-Mayor Jones.

Councilman Newman supported the ordinance because (1) political parties are already actively involved in municipal elections; (2) a Council member's basic philosophy has a direct bearing on how they tend to view the issues; and (3) having this process creates a level playing field between both the political parties in the general municipal elections. The most compelling argument against the involvement of political parties in municipal elections is that the State of North Carolina has made it unnecessarily difficult for third party candidates to get on the ballot at all levels of government in North Carolina. He believes there should be rules, but agrees that it is more difficult than it should be. He voiced support for efforts to make it easier for candidates from third parties to run for office at all levels of government.

Vice-Mayor Jones voiced her support for partisan elections noting that research has shown that introducing the political parties in elections will increase voter turnout. She also pointed out that partisan vs. non-partisan election discussion began after the last City Council election.

Councilwoman Cape felt that while it appears on the surface that it penalizes individual candidates, she didn't believe in the long run that it truly does. An independent candidate cannot come in at the last minute and expect to complete on an equal level. In addition, another thing that would help individual candidates would be Instant Runoff Voting, which can only be done in partisan elections.

Councilman Mumpower believed this is about progressive power. Our current system is designed to provide a balance on perspectives and out of 500 cities in North Carolina, only 9 of them have partisan elections.

Councilman Davis did not support the ordinance in that he felt it goes against the very thing that democratic parties are built around and that is inclusiveness.

Councilman Freeborn supported the change to partisan elections in that he felt the voters really do care about the candidate's political party.

The motion made by Councilman Newman and seconded by Vice-Mayor Jones carried on a 4-3 vote, with Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "yes" and Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 21 - PAGE 71

VII. OTHER BUSINESS:

A. CLAIMS

The following claims were received by the City of Asheville during the period of April 27 - May 24, 2007: Bryan Plunkett (Streets), AT&T (Water), Robert Glasgow (Sanitation), Priscilla McDowell (Water), Peggy T. Reid (Water), Susan Lamont (Water), Sarah Folse (Streets) and AT&T (Water).

The following claims were received by the City of Asheville during the period of May 25 - June 8, 2007: Mickey Donathan (Water), Lennie Sparks (Sanitation), Marci King (Transit Services), Global Rental Company (Streets), Progress Energy (Sanitation), Howard Hurwitz (Water) and Timothy Moore (Streets).

These claims have been referred to Asheville Claims Corporation for investigation.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte challenged anyone running for City Council submit to a drug test.

Ms. Mary Steiner alerted City Council that younger drug dealers are returning back to Pisgah View Apartments.

Mr. Mike Fryer questioned City buses running outside the City limits. In addition he spoke about the number of police officers in the City. Mayor Bellamy instructed City Manager Jackson to contact Mr. Fryer with accurate information.

When Mr. Matt Mittan began speaking of an issue already voted on the agenda (which City Council rules prohibit), he disobeyed the decorum of the Chamber and was escorted out.

Mr. Joe Minicozzi, President of the Coalition of Asheville Neighborhoods, requested for an update in writing regarding Greenlife Grocery on Maxwell Street. Councilman Newman remained hopeful that the ideas discussed with Greenlife will move forward. He questioned what the process would be for setting a timeline to move forward with the other option of traffic calming on Maxwell Street, if Mr. Swann does not proceed with the good faith participation of re-designing the loading dock. After a brief discussion, Mayor Bellamy instructed the City Attorney to update Council next week in a closed session due to Mr. Reid Thompson having filed a lawsuit against the City of Asheville and Greenlife Grocery. Thereafter, an update will be provided to the community in writing.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:35 p.m.

Kesha Lipe
CITY CLERK

Terry M Bellamy
MAYOR

Tuesday – June 19, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: Councilwoman Robin L. Cape (participating in an Inter-City visit to our Sister City, Saumur, France)

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Mumpower gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

At the request of Councilman Mumpower, Consent Agenda Items "B", "C", and "D" were removed from the Consent Agenda for individual votes.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 12, 2007

Councilman Davis requested that the minutes be amended to read as follows regarding partisan elections: "Councilman Davis did not support the ordinance in that he felt it goes against the very thing that democratic parties are built around and that is inclusiveness."

B. BUDGET AMENDMENT TO APPROPRIATE N.C. DEPT. OF JUSTICE BULLETPROOF VEST REIMBURSEMENT FUNDS FOR THE PURCHASE OF POLICE PATROL SAFETY EQUIPMENT

This item was removed from the Consent Agenda for an individual vote.

C. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH JORDAN JONES & GOULDING FOR THE PROJECT KNOWN AS WATER MASTER PLAN

This item was removed from the Consent Agenda for an individual vote.

D. BUDGET AMENDMENT TO FUND THE LEASE PURCHASE AGREEMENT WITH THE TRUST FOR PUBLIC LAND FOR THE ACQUISITION OF 29.62 ACRES OF LAND ON BEAUCATCHER MOUNTAIN

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Newman moved for the adoption of the June 12, 2007, minutes as amended. This motion was seconded by Councilman Mumpower and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

B. ORDINANCE NO. 3486 - BUDGET AMENDMENT TO APPROPRIATE N.C. DEPT. OF JUSTICE BULLETPROOF VEST REIMBURSEMENT FUNDS FOR THE PURCHASE OF POLICE PATROL SAFETY EQUIPMENT

Summary: The consideration of a budget amendment, in the amount of $20,576, to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

The Asheville Police Department currently participates in the Department of Justice Bulletproof Vest Reimbursement Program. This program is designed to off-set the tremendous cost involved in purchasing bulletproof vests for police officers. During the current fiscal year, the City of Asheville has collected $20,576 from the Department of Justice Bulletproof Vest Reimbursement Program. Adding these funds into the police (patrol) safety equipment budget line would assist in the purchase of additional bulletproof vests for Asheville Police officers.

This action conforms to the City Council's Strategic Operating Plan under Partnerships to Improve Critical Services and Infrastructure. Goal 2, Objective A: Research and develop strategies for securing significant new recurring revenue sources.

Pro:

- Reimbursement revenue to cover the rising cost of bulletproof vests for Asheville Police officers

Con: None noted.

City staff recommends City Council approve a budget amendment in the amount of $20,576 to appropriate Department of Justice Bulletproof Vest reimbursement funds for the purchase of police patrol safety equipment.

Councilman Mumpower felt that at a time when the national debt is in the trillions of dollars, he felt it was inappropriate to take money from the federal government.

Vice-Mayor Jones moved to adopt Ordinance No. 3486. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 21 - PAGE 9

C. RESOLUTION NO. 07-122- RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CONTRACT WITH JORDAN JONES & GOULDING FOR THE PROJECT KNOWN AS WATER MASTER PLAN

Summary: The consideration of a resolution authorizing the City Manager to sign a contract with Jordan Jones & Goulding, in the amount of $550,000, for the project known as Water Master Plan.

This project consists of a professional engineering firm to provide professional services for the preparation of a new Water Master Plan. The last water Master Plan was completed in 1995. Typically water utility master plans are updated every five years.

The Water Resources Department advertised a Request for Qualifications (RFQ) on Thursday, March 15, 2007. Four (4) RFQ's were received from Brown and Caldwell, Hazen and

Sawyer, Jordan Jones & Goulding, and Stearns & Wheler. After a thorough review of the RFQ documents by Water Resources Department staff, Jordan Jones & Goulding was selected based upon professional qualification. Staff negotiated a price of $550,000 for the scope of work for the Master Plan.

This project totaling $550,000 for professional services has been funded in the Water Capital Projects Fund.

Jordan Jones & Goulding has performed several projects of this nature in the past in a satisfactory manner. They are a financially stable company that has been in existence for almost 50 years. Former clients were pleased with their work, and they have one of the largest engineering staffs doing water system modeling and master planning.

Considerations of adopting a resolution authorizing the City Manager to execute this contract are as follows:

Pros:

- The execution of this contract will allow the City of Asheville Water Resources Department to create a water distribution system model, identify existing water demands and forecast those demands in five-year increments over the planning period, analyze and assess water storage and distribution needs for domestic and fire supply, project population demands for water for a 30-year planning period, develop a GIS-integrated water computerized hydraulic model and map; identify pressure zones and make recommendations for reductions in pressure throughout the system, make recommendations for flow meter installations throughout the system, and identify projects within the system that meet the qualifications of the revenue bond financing, including the Town Mountain Project and Fairview Storage Tank Project which are vital components of the $35 million revenue bond and future pay-as-you-go projects.

- The Master Plan will determine storage requirements for the Town Mountain service area including tank and pump station location which will enable the Patton Mountain tank to be taken out of service and demolished. The Fairview area is the fastest growing part of our system and the Master Plan will address current and future needs and storage capacity required to serve this part of the water system.

- The bid amount of $550,000 for the professional engineering services of the Water Master Plan is equitable and comparable to others in the water industry.

Cons:

- There are no cons to this project. The current master plan is outdated and needs to be updated. Funds area available.

Staff recommends that City Council adopt a resolution authorizing the City Manager to execute a contract with Jordan Jones and Goulding, in the amount of $550,000 for the project known as Water Master Plan.

Water Resources Director David Hanks responded to Councilman Mumpower when he asked how many of the recommendations we followed when the last plan was adopted approximately 12 years ago.

Councilman Mumpower felt that until we resolve our legal issues regarding the Sullivan Acts, he would be hesitant to spend additional moneys on additional plans.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-122. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 365

D. ORDINANCE NO. 3487 - BUDGET AMENDMENT TO FUND THE LEASE PURCHASE AGREEMENT WITH THE TRUST FOR PUBLIC LAND FOR THE ACQUISITION OF 29.62 ACRES OF LAND ON BEAUCATCHER MOUNTAIN

Summary: The consideration of a budget amendment to fund the lease purchase agreement with The Trust for Public Land for the acquisition of 29.62 acres of land on Beaucatcher Mountain.

On March 20, 2007, City Council approved in concept the acquisition of 29.5 acres of land on the west slope of Beaucatcher Mountain. In addition, on May 15, Council approved a resolution authorizing an agreement with The Trust for Public Land to finance acquisition of this land through installment purchase contracts. The budget amendment will provide the necessary legal and technical adjustment to fund the $575,000 that the City has committed to this purchase.

Staff is recommending that the funding for this lease purchase agreement be taken from two sources. In March, City Council approved a budget amendment in the amount of $250,000 to purchase land at the Asheville Regional Airport. Staff has since learned that this land purchase will not take place, thus this $250,000 is available to fund a portion of the $575,000 needed for the Beaucatcher Mountain lease purchase agreement. Staff is recommending that the remaining $325,000 needed for the Beaucatcher Mountain lease purchase agreement be appropriated from fund balance. This appropriation will lower the City's Fiscal Year 2006-07 year-end fund balance to an estimated 31.5%. Based on current revenue and expenditure trends, staff does not believe that this appropriation will have a negative impact on Fiscal Year 2006-07 or Fiscal Year 2007-08 fund balance levels.

PROS:

- Fully funds land purchase agreement agreed to at prior Council meeting.

CONS:

- Will cause a slight decrease in fund balance

City staff recommends City Council approve the budget amendment to fund the lease purchase agreement with The Trust for Public Land for the acquisition of 29.62 acres of land on Beaucatcher Mountain.

Councilman Mumpower felt that changes were made from the original proposal presented and although he believes this is a good purchase, he was uncomfortable in voting in support.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3487. This motion was seconded by Councilman Freeborn and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 24 - PAGE 11

III. PRESENTATIONS & REPORTS:

A. NEW ASHEVILLE SPEEDWAY MEMORIAL FUNDRAISING KICK-OFF NIGHT OF THUNDER-DOWN ON THE RIVER REUNION

Councilman Davis said that the Asheville City Council, in coordination with Buncombe County Commissioners, has been working in tandem to coordinate fundraising efforts aimed at erecting a Memorial at the City's Carrier Park, in an effort to honor the history of NASCAR and automobile racing at this former racing venue. He showed Council the conceptual design of the Asheville Speedway Memorial, which they hope will be built by the fall of 2007.

With the City Council's support, he has been serving on a local committee, including Commission Chair Nathan Ramsey, and we have been working in an effort to fundraise enough money to build an appropriate NASCAR Memorial sometime later this year at the City's Carrier Park. The committee's first opportunity will be a community kick-off, scheduled for Thursday, June 21, 2007, at Carrier Park. The committee has set a fundraising goal of at least $30,000 for this Memorial with hope to surpass that amount, raising as much as $50,000 over the next several months. Eblen Charities has agreed to receive charitable donations during the entirety of this community fundraising effort, as a pass through agency, with all proceeds going toward construction of the Memorial.

The June 21st New Asheville Speedway, Night of Thunder Down on the River Reunion Night is a collaborative effort from the City, the County, Eblen Charities, and key local NASCAR celebrities to host an event filled with fun excitement, as local NASCAR legends share their memories of what racing has meant to this community. The evening's events include live music and food as well as the following events:

Admission to the event will be $10.00 for adults, $5.00 children under 12 and free for children under 6. Admission will include the event poster with a border for autographs.

5:00 p.m.	NASCAR Legends Welcome: Brad Daugherty and Andy Petree, Masters of Ceremonies.
5:15 p.m.	Autographs and Pictures with NASCAR Legends Driver Car Displays, Driver & Fan Informal
6:30 p.m.	NASCAR Memories: A Panel of Drivers will field questions from fans about race memories. Stories will be shared.
7:30 p.m.	NASCAR Raffle of Racing Memorabilia: Grand Prize Auction: Four Tickets to Bank of America 400
8:00 p.m.	Autograph and Picture Opportunities
9:00 p.m.	Conclusion

The committee has enjoyed tremendous staff support from Jeff Richardson, Jim Orr and Al Kopf.

He noted that the Buncombe County Commissioners will match the City's contribution, but anticipated that amount would be minimal because their goal is to raise the entire amount by public donations.

Councilman Mumpower moved to continue support for this fundraising kick-off and other efforts with all proceeds going to the NASCAR Memorial at Carrier Park. This motion was seconded by Councilman Freeborn and carried unanimously.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER REZONING A SINGLE LOT LOCATED ON HAYWOOD ROAD FROM RM-8 TO COMMUNITY BUSINESS II DISTRICT

ORDINANCE NO. 3488 - ORDINANCE REZONING A SINGLE LOT LOCATED ON HAYWOOD ROAD FROM RM-8 TO COMMUNITY BUSINESS II DISTRICT

Mayor Bellamy opened the public hearing at 5:23 p.m.

Urban Planner Alan Glines said that this is the consideration of rezoning a single lot located on Haywood Road from RM-8 Residential Multi-Family Medium Density District to Community Business II District. This public hearing was advertised on June 8 and 15, 2007.

Mr. Glines said that the proposal is to rezone a single parcel from Residential Multifamily-Medium Density (RM-8) to Community Business II (CB II). The parcel is wooded and has a fairly steep natural slope. It appears that the lots were never built on. The only access for the properties is Haywood Road. Properties adjacent to this to the south are commercial uses and are zoned CB II. Across the street the properties are zoned CB II and River and both are currently vacant. The property relates to Haywood Road by access and general orientation. Haywood Road is a busy connecting corridor and commercial uses have expanded from the center of west Asheville out along to the ends of the street over time. As a part of this expansion the single family style structures along the corridor are expected to either convert to commercial uses or the parcels will be redeveloped with new structures for commercial uses. As the corridor redevelops, residentially zoned areas will be provided a property line buffer to shield the commercial uses.

Although unofficial at this time and continuing in the discussion phase, the Haywood Road Corridor Committee is considering a zoning change for properties along Haywood Road. This zoning change is expected to include properties fronting along Haywood Road from the French Broad River and continuing most of the way to Patton Avenue. In general the new zoning district will have design requirements in a similar way to the proposed mixed-use district and is to modified to reflect Haywood Road for height, building scale and residential density.

Because this application is termed a 'straight' rezoning there is no site plan associated with this parcel included with this request.

The residential multi-family medium density district (RM-8) is established to provide areas for medium density residential uses including both multi-family and single family units. A limited list of neighborhood related non-residential uses are also permitted in the district. Residential density is limited to eight units per acre.

The Community Business II district (CB II) is established to provide areas for medium to high density business and service uses for multiple residential neighborhoods. This community business center may serve as a workplace for many residents in the surrounding neighborhoods and should be sensitive to both pedestrian movement and automobile access. Residential density is limited to sixteen units per acre.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:

- An infill parcel may be developed
- The Haywood Corridor is primarily a commercial connecting roadway.
- The parcel is a good candidate for small scale mix-use development
- Property line buffers will require landscaping that will protect residential neighbors if the property develops

Cons:

- The site will require grading in a similar way to other properties along Haywood Road

This rezoning request was recommended for approval by a 6-1 vote by the Planning and Zoning Commission. No one spoke at the meeting. Two people called in the days leading up to the meeting to inquire about the request.

The Planning and Zoning Commission at their May 2, 2007, meeting voted 6-1 to recommend approval of the rezoing request because it meets the goals of the comprehensive plan. Staff concurs with this recommendation.

Mayor Bellamy closed the public hearing at 5:27 p.m.

Mr. Glines responded to various questions and/or comments from Council, some being, but are not limited to: what standards will be applied for the stability of the lot; what type development could be built on that shallow site; how close can grading occur to the next door lots; and what types of buffer will be required for a development.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Vice-Mayor Jones moved for the adoption of Ordinance No. 3488. This motion was seconded by Councilman Davis and carried unanimously.

ORDINANCE BOOK NO. 24 - PAGE 13

B. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO ESTABLISH NEW LEVEL III THRESHOLD ADJUSTMENTS

Mayor Bellamy opened the public hearing at 5:37 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to establish new Level III threshold adjustments. This public hearing was advertised on June 8 and 15, 2007.

This code amendment is in response to direction from City Council to develop an approach that would provide threshold adjustments for certain types of Level III projects that promote City goals and objectives. This amendment would provide for increased review thresholds for developments that promote housing, environmentally-friendly construction, natural resource conservation, community building, and transit goals. In other words, developments which accumulated sufficient point totals under this amendment would receive procedural relief as an incentive to meeting key City of Asheville goals.

The selected categories include items that can be independently verified and enforced prior to issuance of a certificate of occupancy.

Staff is exploring future, general development amendments. These "next steps" are not part of this ordinance and are provided for informational purposes only.

Pros:

- Provides developments that meet certain key City goals with review incentives.
- Streamlines the development review process.

Con:

- Removes Planning and Zoning Commission and City Council review from certain types of developments.

The Planning and Zoning Commission spent considerable time on this ordinance, recommending adjustments to include the listed definitions and a "Community Building" category. The amendment has been routed to CAN, CREIA, and CIBO, among others, for review and comment.

On May 2, 2007, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 6-1 (Mr. Byers was opposed due to not being able to specifically view the several changes before voting). City staff recommends approval of the proposed code amendment.

Ms. Elaine Lite expressed concern about the lack of accountability.

Mayor Bellamy closed the public hearing at 5:42 p.m.

In response to Councilman Newman, Mr. Shuford said that this only applies to projects that are allowed under that zoning district.

Councilman Newman felt we should not apply this in all zoning categories, but only in those areas where we want to focus on intense development. He also questioned how the greenbuilding aspects were chosen and if people really involved in the greenbuilding community had input. He felt that incentizing renewable energy technology in new development projects should be included since it is measurable and can be verified up front.

Mr. Shuford explained how the greenbuilding aspects where chosen noting that there is an opportunity for more discussion.

Councilman Newman also questioned if we are giving incentive points for things that people already have to do, e.g., stormwater, open space preservation, or awarding points for things that are done above and beyond the basic requirements, which is how he felt it should be. Mr. Shuford explained how points would not be awarded for something already required.

Councilman Newman questioned the priority places aspect on the City's website. Mr. Shuford explained that the priority places item is to put areas and properties Council designates into a very market-driven type of situation to encourage development, e.g., Broadway corridor, River areas, Central Business District, individual sites designated in the 2010 Comprehensive Plan, etc. He suggested, with regard to Council's concern about steep slope areas, that we indicate that areas designated as steep slopes are not eligible for consideration under this provision.

Councilman Newman liked a lot of these concepts, but felt the ordinance needed more work.

Mayor Bellamy felt the concept is good; however, it takes out public comment at two levels, since the Planning & Zoning Commission and City Council will not be reviewing the projects. Since we have the Sustainable Energy & Environment Committee in place, she wondered if there should be a policy in place that requires them to review an ordinance of this type. She felt the increased thresholds are too large for our community without more public input. She questioned how the different categories were chosen and how can we tighten them up to make better policy.

Mr. Shuford suggested Council table this action and refer it to the Sustainable Energy & Environment Committee for review and comment, and then it be sent back to the Planning & Zoning Commission for additional review. After that, then it can come back to City Council for consideration.

Mayor Bellamy felt an incentive should be given to those developers who reach out to the community on the front end of a project.

Councilman Mumpower would have to speak against the ordinance because he felt Council gives staff mixed policy guidance. Council asks staff to simplify the UDO, but then tries to exert greater control. He felt this is an example of such.

Councilman Freeborn felt this is a good foundation. He suggested (1) this ordinance be limited to the priority places only; (2) a design charette or a community forum should be required by developers on the front end; and (3) incentives should only be awarded for things that go above and beyond the basic requirements.

Vice-Mayor Jones supported the community involvement at the front end and also the incentives being awarded only for going above and beyond the basic requirements. In simplifying facets of this ordinance, we should take out zoning districts that we know the zoning will trump it.

Vice-Mayor Jones moved to table this action and refer it to the Sustainable Energy & Environment Committee for review and comment, and then it be sent back to the Planning & Zoning Commission for additional review. After that, then it can come back to City Council for consideration. This motion was seconded by Councilman Newman.

Councilman Davis said that this ordinance was reviewed at the Planning & Economic Development Committee (PED) and they had some of the same questions and concerns raised by Council at this meeting. He felt this was a good way to get green goals accomplished, but was concerned about the lack of review.

Councilman Newman questioned if in some cases we should tighten up on some of our standards and in other cases make it easier when projects are doing things that the community wants.

Councilman Davis, at Vice-Mayor Jones' suggestion, made a friendly amendment that the ordinance go back to the PED first and then to Planning & Zoning Commission.

Mayor Bellamy could not support the motion because she feels this is an issue of public trust. Since we have changed the UDO quite a few times recently, we need time to show the public that we can make our ordinances work properly.

When Councilman Freeborn suggested a broad community conversation about development as a whole, Vice-Mayor Jones said that there are a lot of themes in this ordinance from the development forum that was held last May.

Vice-Mayor Jones restated the motion and moved that the ordinance be remanded to the Planning & Economic Development Committee for further review and further input by appropriate committees and public groups and interested parties. This motion was seconded by Councilman Newman and carried on a 4-2 vote with Mayor Bellamy and Councilman Mumpower voting "no."

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR COTTAGE DEVELOPMENTS AS A USE BY RIGHT SUBJECT TO SPECIAL REQUIREMENTS IN CERTAIN RESIDENTIAL ZONING DISTRICTS

ORDINANCE NO. 3489- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO PROVIDE FOR COTTAGE DEVELOPMENTS AS A USE BY RIGHT SUBJECT TO SPECIAL REQUIREMENTS IN CERTAIN RESIDENTIAL ZONING DISTRICTS

Mayor Bellamy opened the public hearing at 6:16 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to provide for cottage developments as a use by right subject to special requirements in certain residential zoning districts. This public hearing was advertised on June 8 and 15, 2007.

This code amendment provides for cottage developments as a use by right subject to special requirements in certain residential zoning districts (RS-8, RM-6, RM-8, and RM-16). Cottage developments are small single family homes clustered around a common open space area, generally at greater density than the underlying zoning would allow for more traditional single family development. The impact of the density increase is offset by the size of the homes. This style of development is becoming more common as an infill development strategy that is compatible with surrounding development.

City Council has expressed interest in allowing cottage developments. This ordinance has been developed to facilitate that direction and is the result of considerable research on how such ordinances have been developed in other jurisdictions. Additionally, the Planning and Zoning Commission spent considerable time on this ordinance, recommending adjustments to maximum floor area, accessory structure provisions, applicable zoning districts, and separation between cottage developments.

The amendment has been routed to CAN, CREIA, and CIBO, among others, for review and comment.

Pros:

- Provides infill development opportunities
- Adds new style of housing to local market

Con:

- Increases density

On May 2, 2007, the Planning and Zoning Commission recommended approval of the proposed code amendment by a vote of 7-0. City staff recommends approval of the proposed code amendment.

Mr. Joe Minicozzi, President of the Coalition of Asheville Neighborhoods, supported the concept. He felt Council's appointments to the Planning & Zoning Commission should contain a more well-rounded board of professionals, e.g., planners, architects, etc.

Mayor Bellamy closed the public hearing at 6:26 p.m.

It was the majority of Council's consensus to ask the Boards and Committees Committee to review the board make-up of the Planning & Zoning Commission, with input from Planning staff.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3489. This motion was seconded by Councilman Freeborn and carried unanimously.

ORDINANCE BOOK NO. 24 - PAGE 16

D. **PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE TO APPLY HILLSIDE GRADING REQUIREMENTS TO SINGLE FAMILY AND DUPLEX DEVELOPMENTS**

ORDINANCE NO. 3490 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE TO APPLY HILLSIDE GRADING REQUIREMENTS TO SINGLE FAMILY AND DUPLEX DEVELOPMENTS

Mayor Bellamy opened the public hearing at 6:28 p.m.

Planning & Development Director Scott Shuford said that this is the consideration of an ordinance to amend the Unified Development Ordinance (UDO) to apply hillside grading standards to single family and duplex developments. This public hearing was advertised on June 8 and 15, 2007.

This code amendment has been requested by the City Council to more broadly apply the hillside regulations to single family and duplex uses. This change allows the density and grading requirements to apply to those types of uses.

The amendment has been routed to CAN, CREIA, and CIBO for review and comment.

Pro:

- Hillside regulations will be able to be applied to single family and duplex development.

Con:

- Applying hillside regulations to these situations may make it more difficult for such development in hillside situations.

The Planning and Zoning Commission recommended approval of this code amendment on June 6, 2007, by a vote of 4-1. City staff recommends approval of the proposed code amendment.

Mr. Jake Quinn spoke in support of this amendment.

Mayor Bellamy closed the public hearing at 6:30 p.m.

Councilman Mumpower felt this ordinance exerts an unnecessary level of control on private property.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3490. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 24 - PAGE 20

V. UNFINISHED BUSINESS:

A. **ORDINANCE NO. 3491 - ADOPTION OF THE FISCAL YEAR 2007-08 ANNUAL OPERATING BUDGET**

Mayor Bellamy said that the public hearing on this matter was held on June 12, 2007.

Chief Financial Officer Ben Durant said that this report presents the Fiscal Year 2007/2008 Annual Operating Budget for City Council's consideration before adoption.

The Fiscal Year 2007-08 Annual Operating Budget was formally presented to City Council on May 8, 2007. In accordance with the North Carolina Local Government Budget and Fiscal Control Act, a summary of the Budget along with a notice of the Public Hearing was published on June 1 and June 8, 2007. City Council conducted a public hearing on the budget on June 12, 2007.

General Fund

The net operating budget presented to City Council on May 8 was set at $129,864,448, including a General Fund appropriation of $89,323,929. The proposed budget presented to Council for adoption tonight includes changes that were made after the proposed budget was published on May 8. Those changes are discussed below:

- At the June 12 budget work session, Council voted to make two fee changes which impacted the General fund revenue budget. The first change that Council endorsed was a 50% reduction in the household recycling fee. This fee reduction, which will save Asheville households $15.78 per year, resulted in a $400,000 reduction in the General Fund revenue budget.

- Council also voted at the June 12 work session to eliminate the maximum fee caps on business privilege licenses for retail, wholesale, and service establishments. This change will produce approximately $75,000 in additional revenue in FY 2007/2008.

- Finally, Council agreed to increase the ABC revenue budget by $100,000 based on updated revenue information provided by the ABC Board.

In summary, the changes endorsed by Council on June 12th left the General Fund budget out of balance by $225,000. To re-balance the General Fund budget, staff is proposing two adjustments:

- Reduce the Manager's Contingency by 50%. This reduction will produce a savings of $100,000.

- Adopt a managed savings program to take advantage of attrition savings opportunities and other possible contract savings. Staff believes it can save an additional $125,000 utilizing a managed savings approach.

The table below summarizes the changes to the proposed budget presented to Council tonight.

Council Action:	**Effect:**
1) Reduced Recycling Fee by 50%	(400,000)
2) Eliminated Privilege License Caps	75,000
3) Adjusted ABC Revenue Estimate	100,000
Total Revenue Reduction	(225,000)

Proposed Reductions to Balance Budget	
1) Reduce Manager's Contingency by 50%	(100,000)
2) Managed Savings Program	(125,000)
Total Expenditure Reduction	(225,000)

Firefighter Retirement Benefit

In addition to the budget changes noted above, Council also directed staff to prepare a funding strategy for a firefighter retirement benefit program in which the City provides a 2 0% match. Human Resources staff estimates that it will take at least 90 to days to implement this new retirement program. With an October 1 estimated start date, a 2.0% City match will require $130,000 in funding for FY 2007-08. It is estimated that full year funding for the program will cost approximately $177,000.

If Council adopts this new firefighter retirement plan, staff is recommending that Council fund the program with additional revenue. In the current proposed FY 2007-08 budget, staff projected tax base growth of 3.0% for next fiscal year. The City's tax base has grown by an average of 3.4% over the last ten fiscal years. Based on this growth rate average and continued strong building permit activity, staff is recommending that we adjust the projected tax base growth upward to 3.3%. This small adjustment in the FY 2007-08 property tax revenue projections will produce the necessary revenue to fund the firefighter retirement plan while not adversely impact the General Fund.

Outside Agencies

Outside Agency funding is presented in accordance with the Revenue & Finance Committee's recommendations and is included in the budget presented tonight for adoption.

Parking Fund

Council also directed staff to reduce the fees in the Parking Fund for surface lots and on-street permit parking by $5.00 each. This fee reduction will lower the Parking Fund revenues by an estimated $20,000. To offset this reduction and keep the Parking Fund balanced, staff will reduce the amount set aside for future parking deck construction by $20,000.

Other Fees & Charges

In addition to the parking fee reductions and the changes to the household recycling fee and the business privilege license fee that Council has agreed to implement, the Revenue & Finance Committee also made recommendations on various other changes to the fees & charges schedule based on requests submitted by staff during the budget process. These proposed changes were presented to Council at the May 22 work session. Council did not take action on these recommendations at that May 22 work session; thus, they are *not* included in the budget presented tonight for adoption. Council, however, may elect to review these recommendations and provide direction along with adoption of the budget.

Staff requests that Council review the FY 2007-08 Annual Operating Budget, including the changes noted above, and make necessary recommendations or adjustments followed by adoption of the Budget Ordinance.

Vice-Mayor Jones believes this budget is incredibly strong. It commits to a significant investment in our infrastructure particularly water, an unprecedented increase in public safety for

our entire community, basic community priorities such as sidewalks and downtown cleanliness, and a long-standing benefit issue for our firefighters of a 2% match to a 401-A. In addition, it offers some tax and fee relief for families that live in Asheville. She sees the genesis of this budget coming out of the community forum in January, following by subsequent Council retreats culminating in this document. This is a produce of hours and hours of Council deliberation.

Vice-Mayor Jones moved for the adoption of the Fiscal Year 2007-08 Annual Operating Budget to include the changes outlined above. This motion was seconded by Councilman Freeborn.

Councilman Newman was proud of the commitment to begin looking at energy challenges facing our community in promoting sustainable energy conservation in the City organization; the downtown planning process; increase of funds for law enforcement; and providing some relief to Asheville taxpayers.

Councilman Mumpower felt Council should have further deliberation on the issue of firefighters. He agreed that they have a legitimate concern, however, he questioned if the 2% match into a 401-A is fair consideration. He had hoped for a permanent fix as he felt this will be an on-going budget consideration in future years when the firefighters will request Council to raise the 2%.

Councilman Freeborn felt that input from the community forums and retreat represent this budget. We have funding for better planning and enforcement relating to the Unified Development Ordinance; continued increase in funding for our transit system; significant increase in funding for the Police Department; funding for a Downtown Master Plan; funding to revise our Greenway Master Plan; funding to look at our Parks & Recreation Master Plan; and addressing a retirement inequity for our firefighters. He did urge the firefighters, however, to vote for Social Security because in the long-run it would be a much better system.

Councilman Mumpower felt the Council deserves credit for capital improvements efforts and for maintaining our savings account at a significant level; however, he would have to vote against the motion. He felt (1) this budget has thrown money and personnel at our drug problem without accountability and established goals that would ensure it's success; (2) we are setting up our firefighters to be pitted against Council in the future and isolating them from the rest of the City employees; (3) appropriating a quarter of a million dollars to non-profits who should solicit tax free donations; and (4) this budget includes a token tax decrease as a screen for the real issue of some of our policies and methodologies which result in the expenditure of substantial funds for things he personally disagrees with - things that represent a distraction from the essential issues, such as public safety and going after our open air drug market.

Mayor Bellamy recognized Chief Financial Officer Ben Durant and Budget Director Tony McDowell for their willingness to work hard for this Council. For the second year now, City staff has gone a great job in tightening their belt under the leadership of City Manager Jackson, with cost-saving measures. Council heard a detailed analysis from City staff of how can we re-focus and re-prioritize what we are doing as a City to make sure that we have cost-cutting measures in place to better serve the public. She explained the issue of the inequity with the firefighters. She said that most people who have a job contribute 6.2% into Social Security and your employer matches that 6.2%. But in North Carolina (particularly Asheville) our firefighters have the opportunity to opt out and they do not contribute to Social Security. Council was tasked with the question of how do we make that equitable as far as other City employees who get that 6.2% for their retirement. Since 1999 when she was elected to City Council, being equitable to our firefighters was always an issue. This year for the first time our firefighters have put something on the table that they and Council agree with. She's not sure this is the best solution; however, she will support the motion

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

The motion made by Vice-Mayor Jones and seconded by Councilman Freeborn carried on a 5-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 24 - PAGE 22

B. SECOND READING OF ORDINANCE NO. 3481 - ORDINANCE GRANTING A CONDITIONAL USE PERMIT FOR ASHEVILLE RADIO GROUP LOCATED AT 1190 PATTON AVENUE FOR THE CONSTRUCTION OF A TELECOMMUNICATION TOWER

Mayor Bellamy said that the public hearing on this matter was held on June 12, 2007.

Vice-Mayor Jones moved to adopt on the second and final reading Ordinance No. 3481. This motion was seconded by Councilman Davis carried unanimously.

ORDINANCE BOOK NO. 24 - PAGE 411

C. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING STEEP SLOPE AND RIDGETOP REQUIREMENTS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to May 8, 2007, at which time the public hearing was closed. The action was continued until June 12, 2007, in order for Council to review specific data.

Planning & Development Director Scott Shuford said that this ordinance returns to Council's agenda at the June 19 meeting. The conversation following the June 12 worksession and Steep Slope discussion item indicated some Council interest in potentially continuing this item to July 10, owing to Council members' travel commitments in late June. Should Council still find the July date to be preferable, staff is prepared for the change in schedule. The Open Space and Retaining Wall Unified Development Ordinance amendments, which had been scheduled to accompany this item, could be kept as scheduled or continued to the later date as well.

Staff's hope is that the June 12 worksession discussion served to provide additional clarification regarding the elevation and slope thresholds, as well as the proposed single-family home site and subdivision design changes. Staff has added the visualization presentation to the City web site, as the Mayor requested.

Councilman Freeborn moved to continue this matter until July 10, 2007. This motion was seconded by Councilman Mumpower and carried unanimously.

D. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE OPEN SPACE STANDARDS

ORDINANCE NO. 3492- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING REVISIONS TO THE OPEN SPACE STANDARDS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to May 8, 2007. However, due to the length of the May 8 meeting, this public hearing was continued until this date.

Planning & Development Director Scott Shuford said that this code amendment is intended to implement goals, objectives and tasks of the City Council's Strategic Operating Plan (SOP) related to the Natural and Built Environment. The SOP proposes enhanced recreational facilities, especially greenways, as well as a fee-in-lieu program. The Unified Development Ordinance (UDO) currently contains requirements for open space provision for property being developed or redeveloped for residential and for tourist accommodation purposes. These requirements note the connection between development and loss of open space, and include measures to compensate for this loss. In practice, however, the current requirements are not especially effective in providing meaningful compensatory open space and may, in some cases, actually be at odds with City smart growth policies that promote a more urban development pattern. The proposed ordinance provides a more balanced approach to open space provision by better relating it to the use proposed for the property, the associated zoning district or districts, and any related park, greenway and open space plans and policies Additionally, there is greater flexibility created by providing for fee-in-lieu of open space.

The amendment has been routed to CAN, CREIA, and CIBO, among others, for review and comment.

Pro:

- Creates a simpler, more flexible set of open space regulations.

Con:

- Some projects may not be pursued due to expense of compliance.

Staff recommends City Council approve an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville revising the open space requirements. The Planning and Zoning Commission recommends approval of the proposed code amendment by a unanimous vote (6-0).

Mayor Bellamy closed the public hearing at 6:57 p.m.

Councilman Newman questioned what responsibility would a developer have if their property was in the Greenway Master Plan. Mr. Shuford said that if they get a density bonus to build, they are required to give the property necessary for the greenway.

At 7:00 p.m., Mayor Bellamy announced a moment of silence for the nine firefighters who lost their lives battling a furniture warehouse fire in Charleston, South Carolina.

Councilman Mumpower felt that instead of simplifying the UDO this amendment adds to our difficulties and he would not support the amendment.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3492. This motion was seconded by Vice-Mayor Jones and carried on a 4-2, with Councilman Davis and Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 24 - PAGE 31

D. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE CREATING RETAINING WALL REQUIREMENTS

ORDINANCE NO. 3493 - ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE CREATING RETAINING WALL REQUIREMENTS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to May 8, 2007. However, due to the length of the May 8 meeting, this public hearing was continued until this date.

Planning & Development Director Scott Shuford said that since the steep slopes and ridgetop ordinance will result in the increased construction of retaining walls to minimize grading and land disturbance, a separate ordinance regulating retaining walls has been developed in concert with that ordinance, although the retaining wall requirements will apply to a broader range of circumstances than just steep slope and ridgetop situations.

The amendment has been routed to CAN, CREIA, and CIBO, among others, for review and comment.

Pro:

- Provides a mechanism to address the impacts of retaining walls.

Con:

- Will likely add to the cost of retaining walls.

Staff recommends approval of an ordinance amending Chapter 7 of the Code of Ordinances of the City of Asheville creating retaining wall requirements. The Planning and Zoning Commission recommends approval of the proposed code amendment by a unanimous vote (7-0).

Mr. Joe Bassett recommended language that limits the total height of retaining walls.

Mr. Joe Quinn also recommended language that limits the height of retaining walls. He also noted that the screenings and coverings for retaining walls are insignificant.

Mayor Bellamy closed the public hearing at 7:08 p.m.

There was a brief discussion about limiting the height of retaining walls. Mr. Shuford explained that we cannot anticipate what engineering circumstances might occur that would result in a wall in excess of whatever height Council would approve. He suggested if Council is going to place a height limit that Council exempt public works projects, whether they be highway projects, projects necessary to support roads, etc. He noted that developers and engineers would prefer wider road corridors so they wouldn't have to put in retaining walls because they are expensive and would only be a last resort.

Councilman Mumpower spoke against the amendment in that we are continuing to add complexity, costs and controls.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Newman moved for the adoption of Ordinance No. 3493 and instructed City staff to review the question of a height limit for retaining walls. This motion was seconded by Vice-Mayor Jones and carried on a 5-1 vote, with Councilman Mumpower voting "no."

VI. NEW BUSINESS:

A. CONSIDERATION OF APPOINTMENTS TO THE BOARD OF ADJUSTMENT, THE CIVIC CENTER COMMISSION, THE GREENWAY COMMISSION, THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION, THE HOUSING AUTHORITY OF THE CITY OF ASHEVILLE AND URTV, INC.

It was the consensus of City Council to instruct the City Clerk to arrange the following interviews for an Alternate vacancy on the Board of Adjustment: Eric Zetterholm, Carolyn Burton and Kristy Carter.

Councilman Davis moved to instruct the City Clerk to prepare the property paperwork to reappoint John Broadbooks to the Civic Center Commission. This motion was seconded by Mayor Bellamy and carried unanimously. In addition, it was the consensus of City Council to instruct the City Clerk to readvertise for the vacancy on the Civic Center Commission in order to have diversity on said Commission.

It was the consensus of City Council to instruct the City Clerk to arrange the following interviews for vacancies for the Greenway Commission: Thomas Mesk and Christopher Gilbert.

After a brief discussion of the Asheville-Buncombe Historic Resources Commission make-up and whether it complies with our ordinance, Councilman Mumpower moved to instruct the City Clerk to prepare the proper paperwork to reappoint Marsha Shortell, Todd Williams and Susanne Jones to the Historic Resources Commission. This motion was seconded by Mayor Bellamy and carried unanimously. Vice-Mayor Jones requested the City Clerk contact the Buncombe County Clerk to update their appointments on said Commission.

Councilman Mumpower moved to instruct the City Clerk to prepare the proper paperwork to reappoint Mark Wilson and Sandra Bradbury to the URTV Inc. Board of Directors. This motion was seconded by Councilman Davis and carried unanimously.

VII. OTHER BUSINESS:

Legislative Matters

City Attorney Oast said that the Asheville City School Board's attorney has included the City of Asheville in legislation that would facilitate the sale of real property pursuant to the police and fire / school teacher housing assistance program that the City is currently exploring. The legislator who is sponsoring this bill has requested the Council formally request inclusion of the City on this legislation.

Also, the School Board's attorney has contacted him requesting that the City take a position opposing legislation (HB 1284) that would have the effect of extending the statute of limitations for certain claims arising out of construction contracts. The actual limitations period of two years would not be changed, but the time of its accrual would be changed from the date of the occurrence to the date of substantial completion of construction. On major construction projects this could be a difference of over a year. The problem this presents for school boards and other local governments is that claims could be made long after a project is completed and the budget for it is closed out.

Councilman Mumpower would vote against any action in that it is a last minute addition to the agenda.

Vice-Mayor Jones moved for Council to request inclusion in the bill to facilitate the sale of real property, and that Council authorize City staff to contact our local delegation to express our concern about HB 1284. This motion was seconded by Councilman Newman and carried on a 5-1 vote, with Councilman Mumpower voting "no."

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Mr. Charlie Hume spoke in opposition to changing to a partisan election without allowing the public to vote on the issue. He urged Council to be mindful of costs incurred until after the petition to remain non-partisan is found valid or invalid.

Mr. Mike Fryar spoke against partisan elections and felt it is the people's vote.

Mr. Gillian Kerns felt that if Council is going to have partisan elections, he hoped the City would move to the direction of both district and at large representation. He felt Council should have allowed the people to vote on this.

Closed Session

At 7:45 p.m., Councilman Mumpower moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina, County of Buncombe, Reid Thompson and Greenlife Grocery. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn and carried unanimously.

At 9:35 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Vice-Mayor Jones and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 9:35 p.m.

Keisha Lipe
CITY CLERK

Jerry M. Bellamy
MAYOR

Tuesday – June 26, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: Vice-Mayor Diana Hollis Jones and Councilwoman Robin L. Cape

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Councilman Newman gave the invocation.

I. PROCLAMATIONS:

II. CONSENT AGENDA:

Councilman Mumpower moved to continue approval of the minutes of the June 19, 2007, meeting until July 10, 2007. This motion was seconded by Councilman Davis and carried unanimously.

At the request of Councilman Mumpower, Consent Agenda Items "G," "H," "I," and "J" were removed from the Consent Agenda for individual votes.

At the request of Councilman Freeborn, Consent Agenda Item "K" was removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 19, 2007

This item was continued until July 10, 2007.

B. RESOLUTION NO. 07-123- RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN A CHANGE ORDER FOR HOBSON CONSTRUCTION COMPANY FOR THE HOMINY CREEK CROSSING

Summary: The consideration of a resolution authorizing the City Manager to sign a change order for Hobson Construction Company for the Hominy Creek Crossing, in the amount of $160,000.00, and the associated budget amendment.

A bid was received and awarded to Hobson Construction Company in the amount of $224,300.00 to install a new 24-inch waterline under Hominy Creek at Brevard Road. During the installation of the new waterline, Hobson Construction encountered rock that would require blasting in order to proceed with the project. The NCDOT would not allow blasting for this project due to the proximity of the I-40 and Brevard Road bridges, thus requiring the waterline to be moved outside the blasting zone. Hobson Construction would be required to install 840 additional linear feet of 24" ductile iron pipe, 40 additional linear feet of paving, and other associated costs for an additional cost of $160,000.00. The total project cost is $384,300.00.

These plans have been reviewed by McGill Associates, the engineer for the project, and McGill has recommended the change in project scope.

Pros:

- This project will enhance water flow and pressure on Brevard Road from I-40 to I-26 including fire flow requirements for new commercial businesses along this corridor.
- This water line will enable future system looping to supply water to the western part of the Buncombe County.

Con:

- The additional cost was not programmed for this project. Funds are being reprogrammed primarily from other end of year projects that were held when this stream crossing issue became known, including purchase of flow meters which will be addressed in a future fiscal year.

City staff recommends City Council approve a resolution authorizing the City Manager to sign a change order for Hobson Construction Company for the Hominy Creek Crossing, in the amount of $160,000.00, and the associated budget amendment.

RESOLUTION BOOK NO. 30 - PAGE 346

C. ORDINANCE NO. 3494 - BUDGET AMENDMENT FOR HOBSON CONSTRUCTION COMPANY FOR THE HOMINY CREEK CROSSING PROJECT

Summary: See Consent Agenda "B" above.

ORDINANCE BOOK NO. 24 - PAGE 39

D. RESOLUTION NO. 07-124- RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO A TEMPORARY SERVICES AGREEMENT WITH FORSYTH INITIATIVE FOR RESIDENTIAL SELF-HELP TREATMENT INC. (F.I.R.S.T.)

Summary: The consideration of a resolution authorizing the City Manager to enter into a temporary services agreement with the City of Asheville and Forsyth Initiative for Residential self-help treatment, Inc. (F.I.R.S.T.).

The City of Asheville requires temporary workers throughout the budget year for seasonal workloads in the Public Works Department (Sanitation and Street Divisions), and the Civic Center. This agreement is a collective contract for all City Departments.

F.I.R.S.T. is a non-profit organization that provides counseling to individuals and provides these individuals with opportunities to learn new skills through job placements with various organizations. The City of Asheville has utilized F.I.R.S.T. staff for the past three years with excellent results.

Benefits to contracting with F.I.R.S.T., Inc. include reduced costs in recruiting, hiring, and benefits for full-time workers. There is also a savings realized in management costs. The City is guaranteed all F.I.R.S.T. personnel requested enabling operations to be fully productive at all times.

City staff recommends City Council approve a resolution authorizing the City Manager to enter into a temporary services agreement with the City of Asheville and Forsyth Initiative for Residential self-help treatment, Inc. (F.I.R.S.T.).

RESOLUTION BOOK NO. 30 - PAGE 367

E. RESOLUTION NO. 07-125 - RESOLUTION FIXING THE DATE OF A PUBLIC HEARING ON JULY 10, 2007, FOR VOLUNTARY ANNEXATION OF PROPERTY LOCATED AT 2345 HENDERSONVILLE ROAD

Summary: Sywall Properties, L.P. has petitioned the City of Asheville for the annexation of one lot located at 2345 Hendersonville Road in South Buncombe County containing a total of approximately one (1) acre. The area is not contiguous to the primary corporate limits of the City and therefore is subject to the standards for annexation of noncontiguous areas contained in NCGS 160A-58.1.

Pursuant to NCGS 160A-58.2, such petitions must be investigated by the City Clerk for sufficiency in accordance with state law. This investigation has been completed and the Certificate of Sufficiency accompanies this petition request.

The next step in this process is for City Council to fix the date for the public hearing on this matter. Should City Council decide to proceed with this request, the effective date for the annexation would be July 31st of 2007.

Pro:

- Provides for the orderly growth of the City and the tax base through the acceptance of appropriate areas into the corporate limits where owners desire annexation.

Con:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

Staff recommends City Council approve a resolution fixing the date of a public hearing on July 10, 2007, for voluntary annexation of property located at 2345 Hendersonville Road.

G. BUDGET AMENDMENT FOR THE FINAL PAYMENT OF A GRANT FROM THE STATE OF NORTH CAROLINA FOR THE WESTERN NORTH CAROLINA NATURE CENTER

This item was removed from the Consent Agenda for an individual vote.

H. RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO PROFESSIONAL SERVICE CONTRACTS WITH MCGILL ASSOCIATES; CAMP, DRESSER AND MCKEE; CAVANAUGH & ASSOCIATES; AND BROWN AND CALDWELL FOR THE PROJECTS KNOWN AS WATER REVENUE BOND PROJECTS

This item was removed from the Consent Agenda for an individual vote.

I. BUDGET AMENDMENT FOR WATER REVENUE BOND PROJECTS

This item was removed from the Consent Agenda for an individual vote.

J. RESOLUTION DECLARING THE INTENT OF THE CITY OF ASHEVILLE TO REIMBURSE THE WATER RESOURCES FUND FOR CAPITAL EXPENDITURES INCURRED IN CONNECTION WITH THE IMPROVEMENT OF THE CITY'S WATER SYSTEM FROM THE PROCEEDS OF TAX EXEMPT BONDS TO BE ISSUED IN FISCAL YEAR 2008

This item was removed from the Consent Agenda for an individual vote.

K. BUDGET AMENDMENT TO SUPPORT THE INCURRED COST ASSOCIATED WITH THE PARKING LOT AND ENVIRONMENTAL SAFEGUARDS IN THE DISC GOLF COURSE AT RICHMOND HILL PARK, WHICH WILL COMPLETE PHASE I OF THIS PROJECT

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Newman and carried unanimously.

ITEMS PULLED OFF THE CONSENT AGENDA FOR INDIVIDUAL VOTES

G. ORDINANCE NO. 3495 - BUDGET AMENDMENT FOR THE FINAL PAYMENT OF A GRANT FROM THE STATE OF NORTH CAROLINA FOR THE WESTERN NORTH CAROLINA NATURE CENTER

Summary: The consideration of a budget amendment in the amount of $28,220 for the final payment of a grant from the State of North Carolina, Department of Environment and Natural Resources, via the Grassroots Science Museums Collaborative for the Western North Carolina Nature Center.

Grant contract number Q07032 for $112,000 was entered into by the Nature Center with grant funds held by the Friends of the Nature Center to support general operating and program cost at the Nature Center during FY 2006-2007. To date during the contract period, funds have been held and managed by the Friends of the Nature Center, a non-profit organization.

It is recommended to bring grant management at the Nature Center into full compliance with the City of Asheville grant management and administration procedures beginning with the final grant payment of the current fiscal year.

$15,138 of the final grant payment will be used to support program cost for the upcoming Beauty of Butterflies Exhibit. The balance will be applied to the cost to purchase software to support cash collection procedures to account for Nature Center admissions and reconcile attendance records to daily cash collection.

Pros:

- Provide funds to support program cost of the Beauty of the Butterflies Exhibit.

- Provide funds to purchase attendance and cash tracking software to enhance cash collection management and accountability.

Cons:
- None

The Parks and Recreation Department recommends City Council to approve the budget amendment in the amount of $28,220 to increase the Nature Center budget for Beauty of Butterflies programming cost, and to purchase attendance and cash tracking software.

Councilman Mumpower was not able to support the acceptance of $15,000 in state tax dollars to apply to the "Beauty of the Butterflies" exhibit at the Nature Center in that we have continued difficulties in taking care of our essential issues.

In response to Councilman Davis, Parks & Recreation Director Roderick Simmons said that this is money allocated from the state and if we don't accept it, we will have to fund it through our operating budget.

Mayor Bellamy noted that the Friends of the Nature Center had applied for the grant while the Nature Center was under the control of Buncombe County. Now the City has oversight over the Nature Center.

Councilman Freeborn moved for the adoption of Ordinance No. 3495. This motion was seconded by Councilman Newman and carried on a 4-1 vote, with Councilman Mumpower voting "no."

ORDINANCE BOOK NO. 24 - PAGE 42

H. RESOLUTION NO. 07-127 - RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO PROFESSIONAL SERVICE CONTRACTS WITH MCGILL ASSOCIATES; CAMP, DRESSER AND MCKEE; CAVANAUGH & ASSOCIATES; AND BROWN AND CALDWELL FOR THE PROJECTS KNOWN AS WATER REVENUE BOND PROJECTS

Summary: The consideration of a resolution authorizing the City Manager to enter into Professional Service Contracts with McGill Associates; Camp, Dresser and McKee; Cavanaugh and Associates; and Brown and Caldwell in the amount totaling $4,898,686 for the projects known as Water Revenue Bond Projects, and associated budget amendment.

The Water Resources Department requested through a request for qualifications (RFQ) professional engineering services for design and bidding of various water infrastructure projects for a $40 million water revenue bond. Approximately 40 RFQ's were sent out to local and regional engineering firms and posted on the City and State web sites for proposal solicitations.

The Water Resources Department requires a professional engineering firm to handle the project management, design and bid phase of the water infrastructure revenue bond projects. The RFQ's were broken out in to four (4) separate projects based upon project scope and location. Projects include water line replacement, storage tank and pump station replacements and installations throughout the water system, including Town Mountain service area, Fairview area, Central Business District, Tunnel Road, Hendersonville Road, West Asheville Neighborhood upgrades, removal of large lines on top of tunnel, Clayton Road to Brevard Road, and installation of propane or natural gas back up power at pump stations. Engineering firms will design construction projects and request construction bids for the projects. This design and bid cost is required for the North Carolina Local Government Commission prior to request and issuance of revenue bonds.

Staff reviewed qualifications for each project and selected the following engineering firms:

- Project One: McGill and Associates – negotiated cost $1,011,450.00 plus 10 % contingency $101,145 = $1,112,595
- Project Two: Camp, Dresser, & McKee – negotiated cost $1,606,000 plus 10 % contingency $160,600 = $1,766,600
- Project Three: Cavanaugh and Associates – negotiated cost $751,075 plus 10 % contingency $75,107 = $826,183
- Project Four: Brown & Caldwell – negotiated cost $1,084,825 plus 10 % contingency $104,482 = $1,193,308

Total cost is not to exceed $4,898,686 which is not allocated in the current FY 2006/07 budget and must come from the water appropriated fund balance.

PROS:

- These revenue bond projects will enhance the water system and improve customer reliability, fire protection, and ensure we continue to meet all federal and state mandated clean water regulations.
- These funds can be reimbursed from the water revenue bonds to the water fund.

CON: Requires funds to be reallocated from the Water Appropriated Fund Balance.

City staff recommends City Council approve a resolution authorizing the City Manager to enter into Professional Service Contracts with McGill Associates; Camp, Dresser and McKee; Cavanaugh and Associates; and Brown and Caldwell in the amount totaling $4,898,686 for the projects known as Water Revenue Bond Project, and associated budget amendment.

Councilman Mumpower's position is that we should not be pursuing primary capital water system improvement projects involving revenue bonds prior to resolution of our legal issues with the City and County.

Mayor Bellamy felt that these are needed improvements to all areas of the City, including the Town Mountain service area, Fairview area, Central Business District, Tunnel Road, Hendersonville Road, and West Asheville.

Councilman Freeborn moved for the adoption of Resolution No. 07-127. This motion was seconded by Councilman Newman and carried on a 4-1 vote, with Councilman Mumpower voting "no."

Summary: See Consent Agenda "H" above.

Councilman Freeborn moved for the adoption of Resolution No. 07-128. This motion was seconded by Councilman Newman and carried on a 4-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 371

K. **ORDINANCE NO. 3497 - BUDGET AMENDMENT TO SUPPORT THE INCURRED COST ASSOCIATED WITH THE PARKING LOT AND ENVIRONMENTAL SAFEGUARDS IN THE DISC GOLF COURSE AT RICHMOND HILL PARK, WHICH WILL COMPLETE PHASE I OF THIS PROJECT**

Summary: The consideration of a budget amendment in the amount of $111,500 to support the incurred cost associated with the parking lot and environmental safeguards in the disc golf course at Richmond Hill Park, which will complete Phase I of this project.

Richmond Hill Park construction began in 2006 to develop an 18-hole disc golf course, parking area and driveway. Funds for construction were appropriated at intervals beginning in 2004 for project start up, and again in 2006 for funds to support clean up of sedimentation run off at the construction site, and to further support construction cost of the park features. The total project budget appropriated to date is $244,300. The chart below provides detail on the current budget and expenditures to date.

	Budget	Actuals
Revenue		
Transfer from General Fund	215,000	215,000
Timber Sales	29,300	29,300
Total	**244,300**	**244,300**
Expenditures		
Construction	134,827	133,450
Professional Services	37,900	37,296
Departmental Supplies	70,267	66,848
Other	1,306	1,305
Total	**244,300**	**238,899**
Rev. over Expenses		**5,401**

The current phase of work is virtually complete although the amount of available funds has not kept up with actual construction cost. $111,500 is needed to pay outstanding expenses associated with the parking lot and environmental safeguards in the disc golf course. Upon review by the Finance Department, staff recommends appropriating the additional $111,500 needed to complete the current phase of this project from fund balance.

Pro:

- Funds will be available in the Richmond Hill Park budget to support existing project cost.

Con:
- The City of Asheville will spend $111,500 for the construction of Richmond Hill Park beyond the current capital improvement budget.

The Parks and Recreation Department recommends City Council approve a budget amendment in the amount of $111,500 to support the incurred cost associated with the parking lot and environmental safeguards in the disc golf course at Richmond Hill Park, which will complete Phase I of this project.

In response to Councilman Freeborn, City Manager Jackson said the total amount that has been spent on this project to date is $238,000, not including this budget amendment request of $111,500. He said the estimated project costs and construction requirements in the field were higher than anticipated.

Councilman Freeborn felt that the approximately $350,000 spent on this project was one of the worst decisions the City has made in terms of parks and recreation facilities over the last 10 years. That money could have gone to fix up community centers, pool repairs, etc. He expressed his dissatisfaction on how the project was handled.

In response to Councilman Newman, City Manager Jackson said that City staff has nearly completed a report to Council concerning questions raised, when environmental violations occurred, regarding contract obligations with the National Guard.

In response to Councilman Mumpower, Superintendent of Parks Jim Orr explained what lead to the increase in funds.

When Councilman Mumpower asked if there will be some method for compensation by the National Guard if the City has had to pay for something resulting from their delay, City Attorney Oast said that there will be a method for that, but they have not reached a point of settlement yet.

Councilman Mumpower moved for the adoption of Ordinance No. 3497. This motion was seconded by Councilman Davis and carried on a 4-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 24 - PAGE 46

III. PRESENTATIONS & REPORTS:

A. N.C. DEPT. OF TRANSPORTATION I-26 CONNECTOR PRESENTATION

Mr. Alan Thornburg was pleased to be able to update City Council on the I-26 Connector project. This is a regional project and will greatly benefit the City of Asheville. We have unprecedented public collaboration for project design alternatives. The Asheville Design Center (ADC) has worked with the N.C. Dept. of Transportation (NCDOT) to supply some details of their design so that a preliminary analysis of the ADC alignment might be conducted. The NCDOT staff and members of our legislative delegation and the N.C. Secretary of Transportation has come to Asheville to review the ADC alternative and generally supported a feasibility review of this plan. As a result, the NCDOT design engineers as well as two private consulting firms have reviewed the ADC proposal and are grateful for the opportunity to bring the results of their review before City Council.

Ms. Debbie Barber, NCDOT Director of Pre-Construction, presented City Council with the I-26 Connector project status (Transportation Improvement Project No. I-2513). The purpose of the presentation is to explain the transportation decision-making process; show where we are

now and the remaining steps in the process; and present the Federal Highway Administration's (FHWA) role in the process.

The goal of the transportation decision-making process is to ensure transportation improvement meets the need in the least environmentally damaging practical way. Using a flowchart, she explained how the process is very complex. Some of the agencies involved in this project include the Federal Highway Administration, the US Army Corps of Engineers, US Fish and Wildlife Service, US Environmental Protection Agency, NC DENR Division of Water Quality, NC Wildlife Resources Commission, NC Division of Cultural Resources, National Park Service, Tennessee Valley Authority, Eastern Bank of Cherokee Indians and Metropolitan Planning Organization. The must have the Federal Highway Administration (FHWA) approval of the draft and the final EIS prior to purchasing any right-of-way needed for the project. In addition, towards the end of the project, they need approval for the issuance of environmental permits. She pointed out that the project is somewhat dependent upon others and not in total control of the NCDOT.

Using the flow-chart, she showed Council where we are in the decision-making process (completing the draft of the Environmental Impact Statement (EIS)), again noting the areas where there is partial control by others, total control by others, and total control by NCDOT.

She said their target to complete the draft EIS by this fall. After they complete the draft they will hold a public hearing (probably towards the end of this year) and then they come to milestone of selecting a preferred alternative. We are targeting that timeframe to be early 2008. We are on schedule and the entire project is currently funded for right-of-way acquisition and construction. The right-of-way acquisition will start as early as Fiscal Year 2009 and construction starts as early as Fiscal Year 2012.

Mr. Don Volker, Assistant Division Administrator for the FHWA in Raleigh, explained that the role of the FHWA in this project. They work in a federally assisted state administered partnership. In other words, they provide the funds and the program is administered by the NCDOT. The FHWA does not select, design, build, maintain or operate highways or highway projects. Those are all done by the NCDOT. The FHWA just makes sure that if they want federal highway funds for a project that all the federal rules and regulations are followed. The National System of Interstate and Defense Highways is the most important in the United States. The highways of this system must be designed in keeping with their importance as the backbone of the nation's highway systems. To this end, they must be designed to ensure safety, permanence, utility, and flexibility to provide for the predicted growth in traffic.

He said that there are many design standards that the NCDOT must follow: lane width; shoulder width; normal cross slope; horizontal curvature; super-elevation; tangent grade; vertical curvature; vertical clearance; stopping sight distance; bridge width; horizontal clearance; structural capacity; and design speed. He said that they do not ask the NCDOT to spend tax-payer dollars to develop alternatives that we know will not meet these standards. Their review to date indicates that the design standards cannot be met with the Asheville Design Center (ADC) alternative.

Mr. Charlie Flow, Manager of Design for TGS Engineers, reviewed the ADC Alternative. On May 7, 2007, the NCDOT received conceptual alignment of ADC alternative. General engineering assumptions were needed that would allow the alternative to be evaluated in the most favorable manner. NCDOT directed TGS Engineering to provide and evaluate functional design of the ADC alternative alignment. Several steps in engineering and design were needed to evaluate the ADC alternative.

He explained in detail the design issues for the ADC's alternative alignment of (1) clearances (a) shoulders; and (b) over and under streets and railroads; (2) horizontal alignment (a) curvature; and (b) spirals; and (3) vertical alignment (a) grades; (b) vertical curves; and (c) super-elevation.

He explained in detail the environmental concerns, which consist of (1) historic property impacts - Montford/Riverside Cemetery; (2) stream and wetlands impacts - Smith Mill Creek; (3) air and noise impacts - Montford area; and (4) construction impacts - temporary detours.

Operational issues consist of (1) I-240 Eastbound Exit ramp to Patton Avenue (Plan vs. Model). If yes, that would equal relocations. If no, that would equal weave concerns at Exit East of French Broad River; (2) I-240 Eastbound Entrance loop from Patton Avenue. Including I-26 Northbound traffic would equal a short weave. Without I-26 Northbound traffic would equal (a) routes Patton Avenue Eastbound traffic to the east side of the French Broad River and adds 2 left turns; (b) increases Eastbound traffic on Smoky Park Bridges; and (c) short entrance ramp to US 19-23-70; (3) I-240 Westbound Exit loop to Patton Avenue - Short ramp would equal queue storage concerns. Including I-26 Southbound traffic would equal (a) short available weaving distance and (b) more traffic making a longer queue. Without I-26 Southbound traffic would equal (a) routes to east side of the French Broad River; and (b) increase to Westbound traffic on Smoky Park Bridges; (4) I-240 Westbound Exit to Hill Street - Short ramp would equal storage concerns. The longer ramp yields a shorter weave created by Montford entrance; (5) I-240 Westbound Entrance from Hill Street - Short ramp would equal sight distance concerns. The longer ramp creates a shorter weave across US 19-23-70 to I-240; and (6) Hill Street Corridor - Storage concerns.

The following are updated construction costs for Alternate 2 - $144,300,000; Alternate 3 - $199,300,000; Alternate 4 - $313,200,000; Alternate 5 - $249,900,000; and ADC Alternate (which does not include Riverside/Railroad relocation) - $260,000,000.

Ms. Barber said that we have done a review of the ADC alternative and we did try to make it work. Unfortunately, as Mr. Flow presented, we found design, operational and environmental concerns. Based on our review, we are not recommending that the alternative be carried forward for further study in the draft EIS. We will, however, as part of the draft EIS document our review of the ADC alternative. Therefore, the NCDOT is recommending to move forward to complete the draft EIS and in moving forward we would like to continue to work closely with the City, the Metropolitan Planning Organization, the ADC and the aesthetics committee with a goal of selecting an alternative that would have the least impact possible and provide a safe and efficient transportation facility for this area.

When Councilman Mumpower asked if there are any components of the ADC alternative that might be incorporated into some of the other design alternatives, Mr. Flow said there may be but they have not gone into a deep evaluation yet but as the design develops input will be sought by many groups.

When Councilman Mumpower asked about a trademark bridge, Ms. Barber said that they would want to work with the City and identify a funding source for that. Mr. Thornburg also noted that they do plan to look at design alternatives in terms of aesthetics for the existing bridge and the new bridge(s) that go across the French Broad River. They are aware that this is important not only to the City of Asheville but to Western North Carolina that this project needs to reflect Western North Carolina. He imagined they will look at increased partnership between the state, federal, city and private entities.

In response to Councilman Newman, Mr. Flow said that the updated cost estimates of the alternatives do not include right-of-way costs, only construction costs.

Councilman Newman said that the basic design concepts developed by the ADC means a great deal to the community for a lot of reasons, e.g., how it fits into the community, the economic development opportunities for Asheville, and for our overall growth management strategy. However, no one wants to support an alternative that has flaws that cannot meet the

minimum design issues of the FHWA. He asked Mr. Flow, as a registered engineer, if he is telling us that the basic design concepts developed by the ADC cannot be made to work.

Mr. Flow was not prepared to say that, but they have used the same minimum federal criteria that was used for the other alternatives on the ADC alternative. One thing that will happen is by the time they spread the project out enough to get the grades and separations they need, etc., it's going to begin to look like some of the other alternatives. It will spread out. You won't get that tight, concise footprint and meet the design criteria. While it does have appeal for small compact, we can't meet the design standards that small and compact and as it grows, it starts to look like Alternate 4.

Councilman Newman asked if it would be possible to find an engineering solution to the double-decker bridge concept and still meet the standards. Mr. Flow responded that it will be a very difficult to get through the historic district, Riverside, railroad and the landfill. The skew of the project will change and again, it will start to look like Alternate 4.

Councilman Freeborn said that we have the bulk of the community excited about this project (ADC alternative) in a positive manner. He understands the engineering concerns, but with today's technology and innovations in the industry, he hoped that we could find some way to bridge the ADC alternative with the other alternatives. He supported giving the ADC some resources to get a product everyone will feel good about.

Mayor Bellamy asked when the NCDOT will fix the I-26/I-40 interchange. Mr. Thornburg responded that all the funding is not in place for that but they should know this year if they can overcome the funding hurdles. He understands that it is a priority for the community. Mayor Bellamy stressed the need to let the community know as soon as possible what they can expect as far as improvements to that intersection.

Mayor Bellamy said that we are having issues of getting people from north and downtown Asheville to south Asheville. She asked if we could expand Sweeten Creek Road from 2 lanes to 4 lanes to Airport Road. She noted that the project is on the future Transportation Improvement Plan but funding is not available. She asked if it was possible to consider that as part of some improvements to our roadway system. Mr. Thornburg responded that Councilman Newman, member of the Metropolitan Planning Organization, has brought that issue to their attention and they are looking at how to prioritize that.

Mayor Bellamy noted that there is no access to the Emma District in the NCDOT alternatives. Mr. Ken Burleson from TGS Engineering, said that improvements to the access to the Emma area is a separate NCDOT project and they did not take that into consideration nor did they do a cost analysis for it. He did note that they will not be deleting any access that currently exists.

Mayor Bellamy said that the ADC put forward an alternative that could more our community forward. Asheville relies heavily on its beauty to survive and the NCDOT alternatives put forward are not supportive of that. We would like a trademark bridge recognizing that tourism is a big industry for our community. Having a highway through our community is huge and although she appreciates the work of the NCDOT, it's the Asheville citizens that have to live with it after it is built. She also asked that the I-26/I-40 interchange project and the Sweeten Creek Road widening project be designed in a way that will compliment our community. She doesn't want to stop any progress being made, but wants the projects to be attractive and completed in a timely manner. She felt that if those critical issues are handled correctly, that will give other engineering professionals the opportunity to look at the potential problems with the ADC alternative to see if the issues can be worked out.

Councilman Davis fully supported the trademark bridge for Asheville and hoped there is an opportunity for partnership with the City, County and region to have that built.

Mr. Alan McGuinn, representing the ADC, said that they would like the opportunity to study the NCDOT's concerns because it sounds like the ADC Alternative is doable with more engineering. He addressed some of the concerns regarding the grades and weaving; clearance issue; costs; stacking distance; and the ADC alternative looking like Alternative 4. He was encouraged that the NCDOT spent a lot of time and effort in this review because it showed that a lot of their concepts do work.

Councilman Mumpower asked if any of the solutions presented by Mr. McGuinn had merit for the NCDOT to reassess the ADC Alternative. Mr. Flow said that the ADC Alternative doesn't have sufficient advantages above the other alternatives to stop the process and carry it forward as a detail design. He was not saying that elements couldn't be incorporated in the final design, though.

Ms. Barber reiterated that we have to address the design, environmental and operational concerns in order to get the FHWA criteria to be met. When we try to achieve the design criteria, it spreads the project out and it almost goes back to Alternative 4. She said that based on the review, the NCDOT recommends that we proceed with the draft EIS and not carry forward the ADC as a further detailed study. They will document the ADC Alternative in the draft EIS but not carry it forward as an alternative that would be potentially selected.

Mr. Volker said that the NCDOT people said that based on the work done so far, they would have a very difficult time meeting the 13 controlling design criteria with the ADC Alternative. With limited federal funds that go to North Carolina, he was sure that the NCDOT would not want to continue to spend money on an alternative that cannot meet the minimum design criteria set by the FHWA.

Councilman Newman felt that the ADC Alternative has significant potential benefits and he didn't want to give up on the design or parts of it. He wished that Council would have talked about this earlier and had gotten additional engineering expertise. He suggested Council look at the idea of investing resources to the ADC so that they can hire professional engineers to look at the specific concerns outlined by the NCDOT to see if there is a way to meet the federal minimum design guidelines and so as not to lose the positive benefits of the ADC design.

Mr. Thomburg stated that the people who have reviewed the ADC Alternative are all well respected and trained professionals who have come to this conclusion.

Mr. Jeff Welsner, planner with URS which is one of the two private companies that helped with the plan adoption and preliminary design information, said that their engineers looked at the ADC Alternative as well. They quickly found out how complex the project was. His firm's engineers discovered that it would be very difficult to meet all the design standards. He said some of the standards are very difficult and complex to overcome.

Councilman Freeborn felt the community has put forth their design choice and we need to fully explore that. He was willing to support putting additional resources in to hire a professional engineer to explore the concerns outlined by NCDOT and look for solutions since Asheville is going to be the biggest municipality that will be affected by this project.

In response to Mayor Bellamy, Mr. Weisner said that their contract with the NC DOT is approximately $235,000 to assist with the completion of the draft EIS.

In response to Mayor Bellamy, Mr. Burleson said that TGS Engineer's contract with the NC DOT has been supplemented many times and is approximately $2 Million, but he has been working on this project for 12 years. He would hate to see the project delayed for another 3 or more years because the ADC Alternative has so many flaws.

Mayor Bellamy asked Mr. Thornburg if they would consider the ADC Alternative as part of the draft EIS if Council is willing to spend between $235,000 to $2 Million to look for solutions. Mr. Thornburg responded that for the last 7 years, 4 Alternatives were evaluated for the draft EIS. He explained that this is not an insignificant process. He couldn't predict the time and financial impact that would be added to add the ADC Alternative because the process would have to start close to the beginning again. The delay would be significant along with significant inflationary costs on the project as well.

Mr. Derek Weaver, with the project development branch of NCDOT, said that they were hoping to select a preferred alternative in January and they cannot select a preferred alternative if there is another alternative present without evaluating that alternative at the same level of detail and design that the other 4 alternatives received. If another alternative is brought forward, there has to be enough time for us to evaluate that and the project will be delayed. They will, however, look at all alternates, but they have looked at the ADC Alternative, evaluated it to a point where they felt it's not worth moving forward. They evaluated Alternative 1 and decided that was not worth carrying forward as well. At this point, he believed the NCDOT will continue forward to complete the draft EIS and if another alternative is brought forward at the hearing after the draft is complete, it can be considered in the final EIS. That may delay their schedule, but it doesn't mean it can't be done.

Councilman Newman wondered if we could ask our staff to bring us some information about investing resources to have some engineers work with the ADC and to provide any other feedback to them or Council about the concerns raised. He has heard some interest expressed by the County Commissioners about that same idea, so if we move in that direction, that is something that we could ask them to participate with us on.

Mayor Bellamy was concerned that if Asheville invested resources into a plan there is no guarantee that the plan would move forward. She wondered if we should send people to Raleigh and lobby NCDOT to make sure what is built keeps the sensitive nature of the area and that the aesthetics are included. Realistically we need to work with the Aesthetics Committee to make sure the project blends in with the City of Asheville. She would have to make sure that any investment will be used and the product is actually honored.

Councilman Newman supported giving our City Manager direction to bring back a couple of different options for Council to look at in terms of investing some resources to the ADC to see if we can solve some of these problems. There are two members of Council not at this meeting and because this is such an important issue perhaps we should discuss this at the next meeting.

Mr. McGuinn said that they believe the engineering evaluation costs to correct some of the concerns would be in the range of $50-70,000 and would love to see if the ADC could participate as well, in addition to the City and County. He would hate to see the City made a hasty decision without fully investigating the concerns, however, did didn't want to slow down the process.

Councilman Mumpower is not supportive of more delays and additional costs.

Mayor Bellamy said that when a Council member asks for additional information, we normally adhere to it.

Councilman Davis understands that the NCDOT has identified flaws with the ADC Alternative and he didn't hear that they have a real willingness to wait for us to determine if solutions could be found to meet the federal minimum design standards. He felt we are just spinning our wheels.

Councilman Mumpower asked if the information presented by the NCDOT contains all the information the ADC needs to address the flaws in their plan. Mr. Flow said that their

timeframe was one month to do a high level overview to look for large flaws. To say that they have given Council every design problem would be ridiculous. They have not had that level of time to do that and it will take time.

Mayor Bellamy said that Councilman Newman has requested additional information from our City Manager.

IV. PUBLIC HEARINGS:

A. PUBLIC HEARING TO CONSIDER A RESOLUTION TO AMEND THE CITY'S 2007 CONSOLIDATED ACTION PLAN TO PROVIDE FOR A COMMUNITY DEVELOPMENT BLOCK GRANT TO WORLD CHANGERS INC.

RESOLUTION NO. 07-129- RESOLUTION AMENDING THE CITY'S 2007 CONSOLIDATED ACTION PLAN TO PROVIDE FOR A COMMUNITY DEVELOPMENT BLOCK GRANT TO WORLD CHANGERS INC.

ORDINANCE NO. 3498 - BUDGET AMENDMENT TO PROVIDE FOR A COMMUNITY DEVELOPMENT BLOCK GRANT TO WORLD CHANGERS INC.

Mayor Bellamy opened the public hearing at 7:06 p.m.

Community Development Analyst Angie Cullen said that this is the consideration of a resolution and budget amendment to amend the City's 2007 Consolidated Action Plan to provide for a Community Development Block Grant (CDBG) to World Changers Inc. This public hearing was advertised on June 15 and 22, 2007.

World Changers, Inc. is a national, faith-based, non-profit organization which organizes summer youth missions to carry out community projects around the nation. They will bring about 400 youth to Asheville the week of July 8-14. Among other assignments they will work on two projects in the West Riverside Weed & Seed area: they will make repairs to about 13 homes in the Burton Street neighborhood and also renovate vacant units at Pisgah View Apartments for re-leasing. The homes in need of repair in the Burton Street area were identified by the neighborhood association and are primarily homes of the elderly. Repairs will run the gamut from new roofs to fixing leaking faucets. World Changers has asked the City to fund the cost of materials for the Burton Street homes at an estimated cost of about $1,600 per home. The Housing Authority will provide materials for Pisgah View.

A public hearing is required before approval of this amendment to the City's Annual Action Plan. Hearing notices were published on June 15 and June 22, 2007.

Staff has identified two sources of additional CDBG program income which can be used to fund this project: (1) approximately $10,000 from a rent increase on City-owned property on Biltmore Avenue, and (2) $11,165 in deposits released from escrow on completed sales of City-owned property.

Pros:

- Contributes significantly to the Weed and Seed initiative
- Has enthusiastic neighborhood support
- World Changers has long experience in managing this type of project.

Cons:

- World Changers uses only outside volunteers, not local youth.

Staff recommends City Council approve a resolution to amend the City's 2007 Consolidated Action Plan to provide for a CDBG in the amount of $21,165 to World Changers, Inc. and the associated budget amendment.

Ms. Annie Davidson, member of the Burton Street community, supported these actions.

Mayor Bellamy closed the public hearing at 7:11 p.m.

Councilman Mumpower felt the City should not be taking money from our federal government with our huge national debt, however, since we have already received the money we need to be thoughtful on how we spend it.

Councilman Davis hoped that we might consider this as a model on a local level using local youth to carry out local projects.

Mayor Bellamy said that we are working with Biltmore Baptist, a local church, to help coordinate this effort.

Mayor Bellamy said that members of Council have previously received copies of the resolution and ordinance and they would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-129, to amend the City's 2007 Consolidated Action Plan to provide for a CDBG to World Changers Inc. in an amount not to exceed $31,000. This motion was seconded by Councilman Mumpower and carried unanimously.

RESOLUTION BOOK NO. 23 - PAGE 374

Councilman Freeborn moved for the adoption of Ordinance No. 3498. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 24 - PAGE 48

B. PUBLIC HEARING TO CONSIDER THE INITIAL ZONING OF 341 ROCKWOOD ROAD TO HIGHWAY BUSINESS DISTRICT

ORDINANCE NO. 3499 - ORDINANCE TO INITIALLY ZONE 341 ROCKWOOD ROAD TO HIGHWAY BUSINESS DISTRICT

Mayor Bellamy opened the public hearing at 7:17 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to initially zone 341 Rockwood Road to Highway Business District. This public hearing was advertised on June 15 and 22, 2007.

The City of Asheville has recently completed (effective April 30, 2007) the voluntary annexation of a 1.93 acre tract located on Rockwood Road in South Buncombe County. A restaurant building is close to completion on the property. The parcel was zoned Employment under Limestone Township zoning in Buncombe County.

Other properties in the Airport Road/Rockwood Road area that are within the City's jurisdiction are zoned Highway Business. Staff proposes, at the request of the property owner, the same zoning for this parcel. At their meeting on May 2, 2007, the Asheville Planning and Zoning Commission unanimously recommended this initial zoning to the Asheville City Council.

Pro:

- Zones property recently taken into the City of Asheville in consideration of the surrounding zoning and land use and the City's Comprehensive Plan.

Con:

- Some might be concerned with additional HB zoning in the area.

Based on the above findings and the analyses provided in the report, staff finds this request to be reasonable. At their meeting on May 2, 2007, the Asheville Planning and Zoning Commission unanimously recommended this initial zoning to the Asheville City Council.

Mayor Bellamy closed the public hearing at 7:18 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Mumpower moved for the adoption of Ordinance No. 3499 and find that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Davis and carried on a 4-1 vote, with Councilman Freeborn voting "no."

ORDINANCE BOOK NO. 21 - PAGE 50

At 7:18 p.m., Mayor Bellamy announced a short recess.

C. PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE RELATING TO REVISIONS TO THE STORMWATER EROSION CONTROL ORDINANCE

Mayor Bellamy opened the public hearing at 7:26 p.m.

Stormwater Services Manager Chad Pierce said that this is the consideration of an ordinance amending the Unified Development Ordinance "UDO" relating to revisions to the stormwater erosion control ordinance. This public hearing was advertised on June 15 and 22, 2007.

As part of the Environmental Protection Agency's Federal Stormwater Regulations, the City of Asheville is required to meet six minimum measures in efforts to improve water quality from stormwater runoff. These measures include public education, public involvement, illicit discharge regulations, construction site and post-construction site measures and good housekeeping measures. In order to be incompliance with the Federal regulations, the City of Asheville must revise the Stormwater and Erosion Control Ordinance in the Unified Development Ordinance.

In an effort to make the ordinance more consistent and user-friendly, we recommend combining the Stormwater Ordinance and Erosion Control Ordinance into one ordinance.

A stakeholders group was formed called the Watershed Policy Committee to review and evaluate the proposed ordinance. Several members were invited to participate in this process. Due to scheduling conflicts not all members were able to attend. The active group consisted of the following people:

- Barber Melton — Coalition of Asheville Neighborhoods
- Starr Silvis — NC DENR

• David Herbert	Property Owner
• Jeff Van Hartesfeld	Crowfields Condominiums
• John Broadbrooks	Landscape Architect
• Jeff Slosman	Manufactures Association
• Bruce Tompkins	Biltmore Village
• Hartwell Carson	RiverLink
• Mike Goodson	Buncombe County

The group reviewed thirteen decision points and made recommendations for each. The group had full consensus on all issues with the exception of buffers. The group was equally split on the required width of the buffers.

At the June 6, 2007, Planning and Zoning Commission Meeting, the Commission approved the recommended changes, with a recommended buffer width of 50 feet on all jurisdictional waters.

Staff met with the Council of Independent Business Owners on June 8, 2007, the Coalition of Asheville Neighborhoods on June 11 and a joint group of the North Carolina Home Builders Association and the Asheville Board of Realtors on June 21, 2007.

Pros:

- The implementation of these regulations will improve water quality.
- The Stormwater and Erosion Control Ordinances have been consolidated. This should make the ordinance more user-friendly.
- These changes meet the goals and objectives of the 2025 plan.
- The City of Asheville will be in compliance with the Federal Stormwater Mandate and the North Carolina Sediment and Erosion Control Law.

Pro and Con:

- Ordinance provides for increased fines and penalties.

Con:

- In some cases, these changes will increase development costs.

Staff recommends that the City Council review and take public comment on the Stormwater and Erosion Control Ordinance and continue the public hearing on this item to July 24, 2007.

Mr. Pierce said that the NPDES Phase II requirements are that the City of Asheville must revise its stormwater and erosion control ordinances and adopt an illicit discharge ordinance by July 1, 2007, to comply with federal and state regulations. The NPDES Phase II goals are to improve water quality by reducing amount of pollution that is transported to our streams by stormwater run-off.

He said this ordinance meets the 2025 City Development Plan.

City staff teamed with consultants to research and analyze concepts from State's Minimum Model Ordinance, other communities ordinances and existing City ordinances as a baseline for comparisons. The staff and consultant team qualified each concept by using goals from the City's 2025 plan and a working knowledge of development issues in Asheville's mountainous terrain. The team compiled 13 decision elements, which were not adequately addressed in the State's minimum requirements or the City's current ordinance. These items are

critical for future protection of public safety, quality of life, environmental resources and sustainable development.

A stakeholders group, called the Watershed Policy Committee, was formed to review each of the 13 critical decision elements and make recommendations. Several members were invited to participate in this process; however, due to scheduling conflicts not all members were able to attend. The active group consisted of the following people: Barber Melton (Coalition of Asheville Neighborhoods), Bruce Tompkins, Co-Chair (Biltmore Village), David Herbert (Kenilworth Community), Hartwell Carson (RiverLink), Jeff Slosman (Manufactures Association), Jeff Van Hartesveldt (Crowfields Condominiums), John Broadbooks (Landscape Architect), Mike Goodson (Buncombe County) and Starr Silvis (Division of Water Quality).

He reviewed the stakeholder decision elements as follows:

Item 1 - Aquatic Buffers.
Stakeholder recommendations:

- Zone A - No land disturbance or impervious surface allowed, unless hardship is proven.
- Zone B - Allow impervious pedestrian and non-motorized vehicle paths and trails, utilities and maximum of a 10% encroachment for all other construction. Land disturbance within Zone B is limited to the construction of the allowances.
- For redevelopment, requirements for aquatic buffers must be met, only if project qualifies as a substantial improvement. For projects qualifying as substantial improvements, if the required aquatic buffer has been encroached and/or disturbed it must be re-established.
- For redevelopment projects that do not qualify as a substantial improvement. Staff shall research and determine if incentives for re-establishing aquatic buffers, such as credits for stormwater utility fees, can be applied. However, the scope of this process is outside this ordinance revision.

Mr. Pierce then reviewed the minimum aquatic buffer width recommended options.

Item 2 - Constructed Slopes.
Stakeholder recommendations:
Definitions

- Define constructed severe slopes as a constructed slope with a grade of 50% (2:1) or greater.
- Define constructed moderate slopes as a constructed slope with a grade of 25% (4:1) but less than 50%.

Certification of Slopes

- Require design, inspection and stability certificate by NC registered professional engineer with geotechnical expertise for constructed severe slopes greater than 8' in height. Stability certificates shall verify slopes compaction and ability to maintain soil and vegetation.
- Request that NC registered professional engineer with geotechnical expertise provide periodic inspections and compaction reports for all constructed severe slopes within existing or future public rights-of-way.

Slope Setback Requirements

- Require setback from existing adjacent property and right-of-way lines for retaining walls and constructed moderate and severe slopes as indicated in a picture which will be set forth. The constructed moderate and severe slopes shall include those created for the construction of retaining walls. The setback shall be measured from and applied for both the head and the toe of the slope.
- For slopes with a maximum height of 5' or less the setback shall be equal to the height of the slope.
- For sloes greater than 5' in height with a grade of 45 degrees, (1:1) or less the setback shall be 5'.

- For slopes greater than 5' in height with a grade greater than 45 degrees, (1:1) the setback will increase based on height and grade.
- Slope setback exemption: Where requirement will present a hardship, the required setback may be reduced if a subsurface exploration analysis of the area is completed by a NC registered professional engineer with geotechnical expertise and it is determined that a reduction in the setback will not cause greater risk of damage to adjacent public and private properties.

Item 3 - Requirements for Land Disturbances Allowances
Stakeholder recommendations:

- Security for re-vegetation - For all property, disturbance limits may exceed 1 acre, only if construction bond or letter of credit is provided. Bond shall be sufficient to re-vegetate proposed disturbed area and must be valid for 1 year from the issuance of the permit and if land disturbing activity exceeds one year in time, the bond or letter of credit must be updated.
- Maximum limits of disturbance at one time
    - Require grading on all property with 15% or greater natural average slope to be limited to disturbing 5 acres or less at a time
    - For a development, an increase in the limits of disturbance allowed at one time may be granted by the Stormwater Administrator if it can be demonstrated that public benefit is provided.
- Requirements for developments that have total allowable disturbance restrictions
    - Prior to final inspection approval for any phase of grading for developments with restrictions on total amount of disturbance, require "stamped" as-built drawings of disturbed areas to verify compliance.
    - Require deed restrictions for allowable disturbance areas within hillside and ridge top subdivisions.

Item 4 - Ground Cover
Stakeholder recommendations:

- Sufficient permanent or temporary ground cover must be provided within 14 calendar days of completion of approved construction activity.

Item 5 - Borrow and Waste Areas
Stakeholder recommendations:

- Require borrow/waste calculations for all developments with 10,000 s.f. or greater land disturbance and require proof of approved borrow/waste site prior to issuance of permit, if site is not excluded by mining or landfill act.

Item 6 - Design Storms for Erosion Control
Stakeholder recommendations:

- Require erosion control measures to be designed for 10-year storm event as per existing ordinance
- Allowance for staff to require erosion control measures for sites or specific measures on a site to be designed for 25-year storm if deemed necessary due to critical downstream areas, areas identified within watershed master plans and time of year construction.

Item 7 - Application and Exemptions for Stormwater Management
Stakeholder recommendations:

- Require application of the stormwater management ordinance to development and redevelopment that: cumulatively disturbs one acre or more; and/or
    - Will have 50% or more total impervious surface on a parcel, independent of disturbance amount, excluding 1-2 family home structures.
    - For redevelopment, only the addition of impervious and/or built upon area shall comply with the stormwater ordinance

- An exemption shall be granted for redevelopment with disturbance less than 1 acre, if reduction in impervious surface on parcel is achieved.

Item 8 - Post-Construction Stormwater Quality Control
Stakeholder recommendations:
Peak Flow Reduction
- Require PEAK FLOW control (retention) to pre-development rates for the 2-year, 24-hour and the 10-year, 24-hour storm and pass the 50-year, 24-hour storm event, per existing ordinance
- Allow Stormwater Administrator to require control to pre-development rates for the 25-year, 24-hour storm if by using existing watershed engineering analysis it is determined that downstream systems would fail due to the additional peak flows from the 25-year, 24-hour storm event.

Volume Reduction
- Require VOLUME control: extended detention, 24-hour to 120-hour drawdown, for the 2-year, 24-hour storm to protect downstream channels.
- Allow Stormwater Administrator to require volume control up to the 25-year, 6-hour storm if by using existing watershed engineering analysis it is determined that downstream systems would fail due to the additional flows from the 25-year, 6-hour storm event.

Exemptions
- Stormwater peak and volume control may not be required if the applicant can demonstrate through engineering analysis that the proposed development has no negative impact on downstream property, infrastructure and natural systems. The Stormwater Administrator will determine if requirements for stormwater peak and volume control are waived.

Item 9 - Post-Construction Stormwater Quality Control for Low Density Development
Stakeholder recommendations:
- Require same requirements as for high density developments.
- Provide incentives for low impact development projects with other tools

Item 10 - Post-Construction Stormwater Quality Control for High Density Development
Stakeholder recommendations:
- Require structural stormwater systems for the control and treatment of the first 1" of rainfall on the developed site.
- Require a runoff volume drawdown 24 - 120 hours.
- Discharge the storage volume at a rate less than or equal to the pre-development rate.
- Require average annual TSS removal of 85%.

Item 11 - Regional Stormwater Management Facilities
Stakeholder recommendations:
- Do not allow provisions for development to provide fee in lieu of constructing on-site stormwater management systems for regional systems.

Item 12 - Maintenance and Inspection Requirements
Stakeholder recommendations:
Maintenance and inspection for erosion control requirements
- Require that for sites with 10,000 s.f. of disturbance or greater a during construction contract with a licensed professional for erosion and sediment control plan compliance checks be in place prior to issuance of permits.
- Licensed professional shall perform weekly inspections and file reports for all sites regulated by steep slope standards and bi-weekly for all other sites.

Maintenance and inspection for stormwater compliance

- Require a during construction contract with person of equivalent licensure to that of designer for stormwater plan compliance for sites requiring a stormwater drainage system, prior to issuance of permit.
- The licensed professional shall perform weekly inspections and file repots for all sites regulated by steep slope standards and bi-weekly for all other sites and must inspect all stormwater control systems as installed. Installation of all BMPs must be inspected.
- Require record drawings to be recorded and clearly identified all stormwater control systems, which must also be indicated on the inspection and maintenance agreement.
- Require that all stormwater control systems be located outside of public rights-of-way unless public benefit can be proven and Stormwater Administrator approves.

Item 13 - Enforcement
Stakeholder recommendations:
- Adopt penalty schedule.

Mr. Mark Hunt, Vice-Chair of the Asheville Greenway Commission, said the Greenway Commission endorses the recommendation as outlined in Option 2 - the 30 plus 20 foot buffer in all cases; (2) request that greenways be specifically allowed in B buffer zone without condition; (3) ordinance should allow for hardship exceptions to be made and ask council indicate support for greenways be generally allowed as an exception; (4) ordinance should be clear how such hardship exceptions would be allowed and who would have the authority to grant those.

Mr. Joe Ferikes, a major stakeholder along the French Broad River, was concerned about the aquatic buffer requirements. He said that people along the River area are already highly regulated by State and FEMA regulations and they don't need another level of regulation regarding aquatic buffers. Since the new FEMA maps will be out soon, he suggested Council wait on this portion of the ordinance.

Mr. Alan Shepherd, owner of property on the River, urged Council to wait until the FEMA maps are out because they will tell people where they cannot build.

Ms. Patti Beaver, representing the Council of Independent Business Owners, requested this matter be continued in order to give Council and staff further opportunity to study the full impact of some of the items that do go above and beyond the federal mandates, especially in the buffer areas.

Mr. Joe Bassett supported the revisions to the ordinance.

In response to Mayor Bellamy, City Engineer Cathy Ball said that we anticipate receiving the draft FEMA maps in the July or August timeframe.

Councilman Newman suggested maybe having larger buffer areas that are more environmentally sensitive in areas where we don't want to foster intense development, but in areas where we want to encourage intense quality infill development, to have different standards.

Councilman Mumpower requested information on the number of abuses we have encountered using the standards of development in the past ten years.

In response to Councilman Freeborn, Ms. Ball said that the FEMA maps relate to flooding and these buffers relate to water quality.

Councilman Davis hoped that we will consider what effect these new regulations will have on secondary streams and lakes.

Mayor Bellamy felt it was important to look at impacts on tributaries and creeks. She suggested reviewing the regulations in those areas where the topography and grade is higher, e.g., having two silt fences instead of one silt fence. She also questioned how we will deal with failures other than fines. She suggested a meeting be held specifically in the French Broad River area, including the River District Design Review Committee and property owners to explain in detail the maps and how their properties are impacted so they are clear on what they can do with their property. Also, when staff comes back to Council, she requested some maps to show the buffer areas, etc. She also said it was important that the existing ponds that we have in place are kept clean from trash and litter.

Councilman Newman questioned if there was a mechanism to disclose chronic violators for public awareness.

Councilman Freeborn moved to continue this public hearing until July 24, 2007. This motion was seconded by Councilman Davis and carried unanimously.

V. UNFINISHED BUSINESS:

A. HEALTH CARE BILLS OF INTEREST TO MISSION HOSPITALS

City Manager Jackson said that Mission Hospitals has asked for Council to vote in support of Healthcare Bills 265 and 1512.

Mr. John Ferguson of The Ferguson Employee Benefits Agency provided Council with an analysis of House Bill 265 - A proposal to establish a high risk pool to provide health insurance to those currently unable to access coverage due to health conditions - as follows:

The problem:

- **15.6% of NC population is without health insurance (1.3 million residents).**
- Health expenses are the leading cause of bankruptcy in the US.

The current system:

- Medicaid and NC Health Choice are two programs designed to help this population, but most of the uninsured do not qualify for either program. Sadly, many that do qualify are not enrolled.
- The majority of uninsured pay for physician and drug claims out of their own pocket, or avoid treatment altogether due to the cost. They are generally unable to pay large hospital claims, but still receive the care. The cost of hospital claims for the uninsured is **spread out among those with insurance in the form of inflated charges.** Most estimates are in the 10% range (of all healthcare dollars), but some claim it to be as high as 33%.

The cost of the current system to the City of Asheville:

- Using the generally accepted estimate of 10%, and assuming the claims for The City of Asheville for 2007 approximate the estimate of $6,082,531, The City's claims will be inflated by **$608,253** due to this problem.
- The cost is inflated by the lack of preventive and well care received by this population. They generally get care only when the condition has reached the point of a hospitalization. Earlier and lower cost care could have prevented the higher cost claim.

The proposed solution (house bill 265):

- Provides coverage at **premiums equal to 175% of standard rated premiums** for high risk individuals who can prove they were unable to access affordable coverage through private insurance. Even this coverage would be cost prohibitive to many. The majority of the uninsured are not high risks and would not be participants in this program. 57% of those without coverage are between the ages of 18 and 34 and either assume they will be healthy and take the risk to save the premium, or are not yet in an employment situation that provides access to coverage.
- **Would address only a small portion of the uninsured population, about 8,000 of the 1.3 million NC uninsured.**
- Would cost $40,000,000 to $66,000,000 in 2008.
- **Would be funded by:**
  a. **A tax** on insurance premiums to be paid by
     -insurers
     -TPA's (Third Party Administrators)
     -excess loss insurers
     Note: If added to the TPA tax, means that self funded employers would be taxed twice (hopefully corrected in final bill).

     Tax would be as follows:
     -$ .70 per month per employee in 2008 and 2009
     -$1.00 per month per employee in 2010
     -$1.30 per month per employee in 2011
     -$1.70 per month per employee in 2012
     -$2.00 per month per employee in 2013
  b. A minimal federal contribution
  c. Premiums paid by the high risk participants

Cost of proposal to the City of Asheville:

- Because the program proposes to cover only a small portion of the uninsured (albeit the higher risk uninsured), the impact on reducing hospital write offs of unpaid claims will be negligible and even that would be wholly dependent on the hospital actually passing on that savings.
- Assuming the final bill corrects the double taxation of self funded plans that appears to be unintentionally written into the current bill, and assuming no savings from reduced hospital charges, the annual cost to the City of Asheville would be as follows:
  -2008: 1,230 x $. 70 x 12 = **$10,332**
  -2009: 1,230 x $. 70 x 12 = $10,332
  -2010: 1,230 x $1.00 x 12 = $14,760
  -2011: 1,230 x $1.30 x 12 = $19,188
  -2012: 1,230 x $1.70 x 12 = $25,092
  -2013: 1,230 x $2.00 x 12 = $29,520
- The above reflects the cost of the program as currently written and designed to address only a small portion of the problem. **What if future legislation expanded this program to attempt to include all uninsured high risks?** Assuming statistical norms, 10% or 130,000 of the 1.3 million uninsured in NC have chronic conditions that would elevate them to the category of "high risk". The cost to the City of Asheville to expand the program to cover all of them would become significant:
  -2008: 1,230 x $11.37 x 12 = **$167,821**
  -2009: 1,230 x $11.37 x 12 = $167,821
  -2010: 1,230 x $16.25 x 12 = $239,850
  -2011: 1,230 x $21.12 x 12 = $311,731
  -2012: 1,230 x $27.62 x 12 = $407,671
  -2013: 1,230 x $32.50 x 12 = $479,700

  At this level of expense, the question of whether or not the providers pass on the savings becomes quite critical. In theory our claims are inflated by approximately 10% (**$608,253**

In 2007) to cover the claims the providers have to write off due to uninsured high risk patients. If charges are reduced by this amount to reflect the fact that the uninsured high risks are now insured, the above costs of the program make more sense. **This theory is dependent upon the providers passing on that savings.**

Probability of passage:

- Similar to legislation already in place in 33 other states.
- Similar bill passed last year by a vote of 95 to 10, but was not brought up by the senate before adjournment.
- Must be reconciled with senate version, but **eventual passage is probable**.

Impact on future legislation:

- Both proponents and opponents alike state that this is only a first step, and is designed to address only a small portion of the problem. Opponents fear it will lead to a universal health structure. Some proponents hope that it will indeed lead us down the universal healthcare path, but many legislators support the bill based purely upon the impact on the current situation for high risk individuals.

Impact on the City of Asheville:

- The cost is minimal relative to the overall cost of the COA plan, but the ROI is even lower. The program would cost the COA $10,332 in 2008 grading up to $29,520 in 2013. In theory, that cost would be offset by reduced hospital charges since the hospital would write off fewer losses due to fewer uninsured high risk patients, but there is no guarantee this would occur, and it cannot be expected.

Impact on the overall cost of healthcare:

- The bill is not likely to have any impact on the overall cost of healthcare. Some proponents are claiming that the cost of healthcare in NC could remain flat or even be reduced if this bill passes and is expanded. Any impact would come from high risk patients who now have coverage getting preventive and well care that they would not have gotten without the coverage, thus avoiding a higher claim later on. However, while this strategy has proven very effective for individuals and even groups (The Asheville Project), it cannot be expected to reduce the overall cost of healthcare to the population as a whole. For example, if the hospital purchases a new piece of new technologically advanced but expensive equipment, the cost of that equipment must be passed on to those who fund healthcare (patients, employers, government, etc.). If half as many patients use the equipment because they are getting better preventive care and well care, it does not reduce the cost of the equipment, and the hospital must simply double the charge for those who do use the equipment.

Impact on high risk individuals:

- It is with individuals, specifically high risk individuals not covered by a pooled insurance plan, that the bill can have its greatest impact. The theory of insurance is that the healthy support the sick and risk is spread among the population as a whole. This system is not working for far too many high risk individuals. The bill could cap premium expense for such individuals at 175% of similar coverage for healthy individuals. Some high risk individuals currently pay as much as 700% or cannot get the coverage at all.

Mayor Bellamy said that is Council endorses House Bill 265, she would write a letter to Mission Hospitals stating that if the House Bill passes, as we go forward, we would hope that the Hospital would reduce their charges because of fewer less uninsured patients.

Councilman Freeborn moved to endorse House Bill 265. This motion died for a lack of a second.

Mayor Bellamy said that Senate Bill 1512 - An act to enact the "Healthy NC" program to facilitate the availability of affordable accident and health insurance coverage to small employers, self employed individuals, and uninsured workers; to create the North Carolina health insurance risk pool to help meet the health insurance coverage needs of individuals who cannot obtain affordable health insurance because of high risk health conditions and to appropriate funds for the implementation of this act - failed to meet the May 24 deadline and will no longer receive consideration during the 2007 Session.

Councilman Newman said that he didn't feel he had the expertise on this matter to weigh in.

Mayor Bellamy felt it was important to update City Council about health care/health insurance coverage issues. She said that in August or September she would set aside a worksession for this update.

VI. NEW BUSINESS:

A. RESOLUTION ADDRESSING THE INCORPORATION OF THE TOWN OF LEICESTER

Planning & Development Director Scott Shuford said that this is the consideration of a resolution addressing the incorporation of the Town of Leicester.

Citizens in the Leicester area of Buncombe County have petitioned the State Legislature to incorporate approximately 67.6 square miles of property containing about 16,800 residents and traversed by Highway 63, northwest of Asheville. The area proposed for incorporation constitutes the entire township of Leicester, as it currently exists. By contrast, the City of Asheville has an incorporated area of approximately 44 square miles and a population of 73,000 residents. The approximate respective densities are 250 (Leicester) and 1700 (Asheville) persons per square mile.

According to the petition filed with the State, the Town proposes a tax rate of .05 cents per $100 valuation, which is the minimum required by statute. This is in addition to the fire district tax (10-12 cents, depending on district) that is already assessed. This additional tax is anticipated to generate approximately $200,000 in revenue. Four services are proposed to be provided by the Town:

- Fire protection through a contract with the rural fire districts that currently serve the area (there are four such districts).
- Police protection through a contract with the county sheriff department (2 additional deputies).
- A street lighting program.
- Planning services (continuation of Buncombe County zoning).

Under the proposed Charter of the Town of Leicester, a five-member Town Council will be created and will operate under the council-manager form of government.

Legal and Process Issues: Under the North Carolina Constitution, municipal incorporation requires an act of the legislature. Petitions for incorporation are filed with the Joint Legislative Commission on Municipal Incorporation. Upon receiving the petition, the Commission undertakes a "Phase 1" review, which is simply to determine the sufficiency of the petition, which must contain certain information. There follows a "Phase 2" review, which focuses on whether the area meets the criteria for incorporation (density, degree of development; but a lower threshold than for annexation), and whether the services promised can actually be delivered.

During this process, the incorporating municipality must notify all other cities in the county or counties wherein it is located, and must notify any city of 50,000 or more that is within 5 miles ("proximity test"). In the case of Leicester, Asheville is within 5 miles and has been notified. Under the law, if a petition is insufficient (Phase 1), it may not be processed; if the criteria are not met (Phase 2), the Commission must make a "negative recommendation" to the General Assembly. Similarly, if there is a city that meets the proximity test that does not express its approval of the proposed incorporation (part of Phase 2), the Commission may not make a positive recommendation. In the event of a negative recommendation, the Commission may hold a public hearing and may, in certain circumstances, require a referendum (presumably of the affected area). Even if the Commission makes a negative recommendation, the legislature may still incorporate. However, if there is a city of 50,000 or more within 5 miles, incorporation requires a three-fifths vote of the General Assembly, whether or not that city approves of the proposed incorporation.

Residents of the proposed area of incorporation for Leicester have submitted their petition and satisfied the basic Phase 1 requirements. The Legislative Commission is waiting on Asheville to express its position on this incorporation before moving forward with the incorporation process.

Staff Comments:

A. Purposes of incorporation. The most obvious comment about this incorporation effort is that it appears to be primarily a "defensive" one, initiated to stop possible annexation by Asheville and the Town of Woodfin, rather than to create an urban area of enhanced public services. This is apparent from the proposed list of services which, with the exception of street lighting, are merely continuation of existing County and rural fire district services. Also, the density of the area exhibits much more of a rural character than is appropriate for the urban recognition that comes with being a town.

B. Conflicts with Asheville and other municipalities. Due to significant topographic and service delivery issues, the City of Asheville's annexations in this area have been slower than they have been in the south and west. A small portion of the proposed Town of Leicester overlaps with the City's extraterritorial jurisdiction area (ETJ) and with the area included in the City's resolution of consideration for annexation. Also of concern is that part of the proposed Town of Leicester would overlap part of the area that is of interest to the Town of Woodfin, and has been the subject of our annexation agreement discussions with Woodfin officials. Finally, Council should bear in mind that this incorporation would create a "town" that would be the sixth largest in N.C. in terms of land area, but only the 49th largest in population. The recent incorporation of Mills River also created a large town (the second largest in WNC in area) but it is only 1/3 the area of the proposed Town of Leicester; Mills River has approximately 6,150 residents (about 280 persons per square mile). Another fact of interest, the proposed size of the Town of Leicester is roughly the same as our nation's capital (Washington, DC, is about 68 square miles). Leicester's population is about 2.8% of DC's 581,500.

C. Service delivery issues. Even with the addition of 2 deputies, it is difficult to see how the proposed Town of Leicester could enjoy an enhanced level of service from incorporation over what it already has; the services it proposes to provide are primarily continuations of current arrangements. The sheer size of the proposed town represents a considerable obstacle to efficient and effective delivery of municipal services.

D. Planning and zoning issues. The Town of Leicester would remain subject to Buncombe County zoning. Under the recently-adopted Buncombe County zoning ordinance, the majority of the area is zoned OU (Open Use). The uses permitted in this classification are, as its title indicates, essentially unlimited, except for a few prohibited uses. There is a cluster of more specifically zoned property in the extreme southeastern corner of the area, where it begins to take on a more urban character. From a land use planning perspective, it would appear to make more

sense for the incorporation to be concentrated in a much smaller area, generally centering on the Highway 63 and Alexander Road / Old Newfound Road intersections. This location exhibits a more "urban" development pattern than the remainder of the proposed area of incorporation; it is already known and accepted as the "town center" of Leicester. The incorporation of this area would allow the "town center" of Leicester to be established now and perhaps expanded at a later date, while also allowing a more comprehensive planning program to be developed that would address the concerns of Asheville (and potentially Woodfin) about the scale of the proposed incorporation and the ultimate land use pattern. Additionally, such an approach would allow the Town of Woodfin to be consulted about the desired land use pattern and service delivery on its border with the Town of Leicester in much the same way as has occurred during the Asheville's negotiations with Woodfin regarding the proposed annexation agreement.

E. Financial Impact: The financial impact to the City of Asheville would be a loss of $20,000 in sales tax revenue.

For the reasons noted above, staff does not recommend adoption of the resolution, but could support a resolution for incorporation of a smaller area.

Mr. Randy Teague, Interim Council member for the Town of Leicester, explained their strong interest to incorporate began two years ago. The main reasons for their request for incorporation is (1) to elect people from their own community to govern their own town; (2) to benefit from the monies we are not receiving currently because we are unincorporated; (3) to build and/or improve community facilities for our town; and (4) to maintain the unique character of Leicester area including enacting ordinances to protect our way of life. He reviewed the staff report outlined by Mr. Shuford and countered staff's comments with reasons they want to incorporate.

Rev. Christopher Chiaronmonte said the City of Asheville should be willing to give up their power and become a metropolis.

Ms. Leesa Kulba felt that this will only cost the City $20,000 and felt it was a good investment to let people be self-determinating.

Mr. Joe Bassett felt the City isn't losing much, but the County may be losing.

Councilman Freeborn felt this issue should be left up between Leicester and the General Assembly.

Councilman Newman was open to the idea of the incorporation of Swannanoa and Leicester. However, we have to look at the future growth of our community and how we can work together. We have to be concerned about all the areas around the city becoming incorporated and boxing the city in. Most urban growth that occurs around Asheville should be incorporated in the urban area. If areas around Asheville incorporate, in the long run it could be damaging the economic health of Asheville and damaging Asheville's economic health is not in anyone's best interest that lives in Buncombe County. He could not support the resolution endorsing incorporation and wondered if Asheville and our neighbors in Buncombe County could set up a community process to look at these together and determine what would be the natural boundaries of these new communities, and come up with a vision for the future.

Mayor Bellamy said that those conversations have begun with the incorporated municipalities.

Councilman Mumpower felt that Leicester residents are afraid of policies and behaviors coming out of Asheville and want to preserve things and control their own future. He would support their effort as he did when Mills River came to Asheville requesting their support for incorporation.

Councilman Mumpower moved to adopt the resolution approving the effort of the Township of Leicester to obtain a greater degree of governance and control over its future through incorporation. This motion died for lack of a second.

VII. OTHER BUSINESS:

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

Rev. Christopher Chiaronmonte spoke in opposition of partisan elections.

Because City Council wished to re-open positive communication with Mr. Teague regarding the Town of Leicester incorporation, at the suggestion of Councilman Davis, Mayor Bellamy said that she would write a letter to Mr. Teague and the General Assembly formally responding to the resolution request and inviting Mr. Teague back to another meeting in order to not only comment on the proposal put forward but to talk about a process in general how we can work together. She stressed the importance of communication.

Mayor Bellamy explained City Council's public comment rules.

City Attorney Oast responded to Councilman Mumpower regarding the public comment period. It was City Attorney Oast's opinion that in view of our Charter, our public comment rules are reasonable.

Ms. Kyle Ross spoke to Council about dishonesty in the Asheville Police Department. She presented City Clerk Lipe with three documents which allegedly supports her allegations. Mayor Bellamy said that we will follow-up on her concerns.

Councilman Freeborn requested that in the near future an item be placed on the agenda regarding traffic calming measures relating to Greenlife Grocery on Maxwell Street.

Depending on the City Attorney's review, Councilman Mumpower requested that an item be placed on Council's July 10, 2007, agenda for Council to conduct a vote on supporting a city-wide referendum on the partisan election issue.

When Mayor Bellamy reminded Council of the process in place for requesting items to be placed on the agenda, Councilman Mumpower said that he would follow-up on his request with an e-mail.

Councilman Mumpower thanked Asheville Homebuilders for their work on building some Top-A-Stops. They completed the 15 they had committed to. That brings us up to 30 Top-A-Stops. He urged people who would like to see a Top-A-Stop on their streets, to get together 2-3 volunteers and they can make that happen. In addition, Top-A-Stops will be seen on major highways in Asheville soon. We aiming for another 25 on top of the 30 we already have.

Closed Session

At 9:05 p.m., Councilman Mumpower moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina and County of Buncombe. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn.

When Councilman Mumpower discovered that the closed session is on the same topic as last week, he withdrew his motion. He said that Council made a commitment to conduct water negotiations in open session. He understands that the County Commissioners and State legislators have not been receptive to this and that we are pursuing other options in closed session. He feels like that is a violation of our earlier commitment and he is not willing to discuss water issues behind closed doors.

Mayor Bellamy said that she has made repeated efforts for our County Commissioners to meet as a body with the City Council but was unsuccessful, except with Chairman Ramsey who said he would meet anytime. Our State delegation was willing to meet as well, and she did everything she could as Mayor to make that happen but it didn't happen. For the greater good of the community who said they wanted the water issue resolved, she said that she would meet with whatever Commissioner anytime. Council elected her and Councilman Newman to represent City Council in any meetings that would happen and as such we have been willing to meet anywhere at anytime to address the issue to get the issue closed. She has tried to do everything she could to bring this to the forefront as far as open door meetings, but she can't control other elected officials. She believes the citizens of Asheville want this issue resolved and she will work toward that end.

At 9:06 p.m., Councilman Davis moved to go into closed session in order to consult with an attorney employed by the City about matters with respect to which the attorney-client privilege between the City and its attorney must be preserved, including litigation involving the following parties: City of Asheville, State of North Carolina and County of Buncombe. The statutory authorization is N. C. Gen. Stat. sec. 143-318.11 (a) (3). This motion was seconded by Councilman Freeborn and carried on a 4-1 vote, with Councilman Mumpower voting "no".

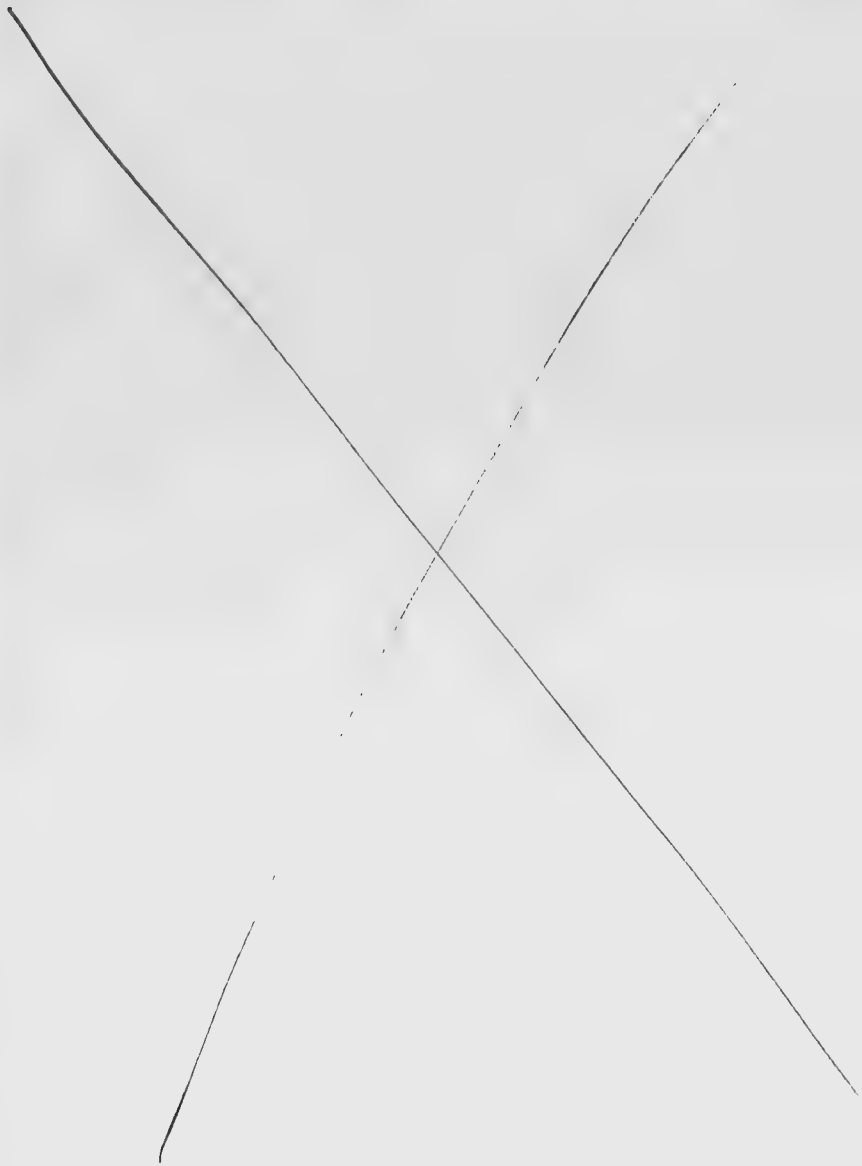
At 10:45 p.m., Councilman Freeborn moved to come out of closed session. This motion was seconded by Councilman Davis and carried unanimously.

IX. ADJOURNMENT:

Mayor Bellamy adjourned the meeting at 10:45 p.m.

Kenna Lipe
CITY CLERK

MAYOR



Tuesday – July 10, 2007 - 5:00 p.m.

Regular Meeting

Present: Mayor Terry M. Bellamy, Presiding; Vice-Mayor Diana Hollis Jones; Councilwoman Robin L. Cape; Councilman Jan B. Davis; Councilman Bryan E. Freeborn; Councilman R. Carl Mumpower; Councilman Brownie W. Newman; City Manager Gary W. Jackson; City Attorney Robert W. Oast Jr.; and City Clerk Keisha Lipe

Absent: None

PLEDGE OF ALLEGIANCE

Mayor Bellamy led City Council in the Pledge of Allegiance.

INVOCATION

Mayor Bellamy gave the invocation.

I. PROCLAMATIONS:

A. RECOGNITION OF ASHEVILLE'S SISTER CITY VALLADOLID, MEXICO

Mayor Bellamy acknowledged the new Asheville Sister City of Valladolid, Mexico. President of the Asheville Sister Cities Charles Worley and former President of the Asheville Sister Cities Carroll Hughes spoke about the importance of Sister Cities and gave thanks to City Council for their support. Mayor Bellamy accepted their certificate of friendship and presented them with a token of friendship as well.

B. BOARDWALKS OVER THE WETLANDS AT CARRIER PARK

Mr. Bob Shepherd, Chairman of RiverLink Inc., presented City Council with a check in the amount of $39,000, for the boardwalks over the wetlands at Carrier Park.

On behalf of City Council, Mayor Bellamy thanked RiverLink for their donations.

II. CONSENT AGENDA:

Councilman Mumpower requested that Consent Agenda Item "G" be removed from the Consent Agenda for an individual vote.

A. APPROVAL OF THE MINUTES OF THE REGULAR MEETING HELD ON JUNE 19, 2007, AND THE REGULAR MEETING HELD ON JUNE 26, 2007

B. RESOLUTION NO. 07-130- RESOLUTION REAPPOINTING MARK WILSON AND SANDRA BRADBURY AS MEMBERS TO THE URTV INC. BOARD OF DIRECTORS

Summary: On June 19, 2007, it was the consensus of City Council to reappoint Mark Wilson and Sandra Bradbury to each serve an additional two-year term as members to the URTV Inc. Board of Directors, terms to expire June 30, 2009, or until their successors have been appointed.

C. RESOLUTION NO. 07-131 - RESOLUTION REAPPOINTING JOHN BROADBOOKS TO THE ASHEVILLE AREA CIVIC CENTER COMMISSION

Summary: On June 19, 2007, it was the consensus of City Council to reappoint John Broadbooks to serve an additional three-year term as a member of the Civic Center Commission, term to expire June 30, 2010, or until his successor is appointed.

RESOLUTION BOOK NO. 30 - PAGE 376

D. RESOLUTION NO. 07-132- RESOLUTION REAPPOINTING MARSHA SHORTELL, TODD WILLIAMS AND SUSANNE JONES AS MEMBERS TO THE ASHEVILLE-BUNCOMBE HISTORIC RESOURCES COMMISSION

Summary: On June 19, 2007, it was the consensus of City Council to reappoint Marsha Shortell, Todd Williams and Susanne Jones to each serve an additional three-year term, terms to expire July 1, 2010, or until their successors have been appointed.

RESOLUTION BOOK NO. 30 - PAGE 377

E. RESOLUTION NO. 07-133 - RESOLUTION REAPPOINTING LEE MCELRATH AS AN ALTERNATE MEMBER TO THE BOARD OF ADJUSTMENT

Summary: On January 16, 2007, it was the consensus of City Council to reappoint Lee McElrath, as an Alternate member, to serve an additional three year term, term to expire January 21, 2010, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 - PAGE 378

F. ORDINANCE NO. 3500 - BUDGET AMENDMENT TO TRANSFER FUNDS AND REIMBURSE PALACE SPORTS FOR INSTALLING NEW SEATING AT MCCORMICK FIELD

Summary: The consideration of a budget amendment, in the amount of $35,000, for capital improvements at McCormick Field.

In Fiscal Year 2006/07, the Parks and Recreation Department received $35,000 from Palace Sports (owners of the Asheville Tourists) as part of their yearly contract with the City of Asheville. Since this payment was not budgeted for, consequently, it went directly into fund balance. This budget amendment would allow those funds to be transferred into the McCormick Field budget to reimburse Palace Sports for new seating, per a letter dated December 7, 2006.

Pros:

- Provide funds to meet contractual obligations.

Cons:

- None

The Parks and Recreation Department recommends City Council to approve the budget amendment, in the amount of $35,000, to increase the McCormick Field budget to cover capital expenditures to fulfill yearly contractual obligations.

ORDINANCE BOOK NO. 24 - PAGE 53

G. RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL

SHELTER SERVICES WITHIN THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE

This item was removed from the Consent Agenda for an individual vote.

Mayor Bellamy said that members of Council have been previously furnished with a copy of the resolutions and ordinances on the Consent Agenda and they would not be read.

Councilman Freeborn moved for the adoption of the Consent Agenda. This motion was seconded by Councilman Davis and carried unanimously.

ITEMS REMOVED FROM THE CONSENT AGENDA FOR INDIVIDUAL VOTES

G. RESOLUTION NO. 07-134- RESOLUTION AUTHORIZING THE CITY MANAGER TO SIGN AN AGREEMENT WITH THE ASHEVILLE HUMANE SOCIETY FOR ANIMAL SHELTER SERVICES WITHIN THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE

Summary: The consideration of a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

For the past few years, Buncombe County has required the City to pay for animal shelter services through the Asheville Humane Society, who has contracted with the County to run the animal shelter. On June 19, 2007, the City approved the budget for Fiscal Year 2007-2008 and in that budget approved $121,000.00 to pay for shelter services. The City and the Humane Society need to enter into an agreement for the shelter services for the term of July 1, 2007, through June 30, 2008.

Pro:
- The City will not have to pay for the construction and operation of its own animal shelter to take care of its animal sheltering needs and the Humane Society will be responsible for the care of all animals brought to the shelter.

Con:
- The City has to pay out of its general fund for shelter services where Buncombe County provides the same services to all other non-incorporated county residents at no additional cost except through county taxes.

City staff recommends City Council approve a resolution authorizing the City Manager to sign an agreement with the Asheville Humane Society for animal shelter services within the corporate limits of the City.

Councilman Mumpower said that Buncombe County has historically provided animal control services to all County residents (which include City residents) and for the County to take away that service, without a compensating variable, is double taxation.

Mayor Bellamy said that the City briefly talked with the County about our dissatisfaction and County representatives said that they have stepped away from providing those services to all municipalities in Buncombe County.

In response to Councilwoman Cape, City Attorney Oast said that a county is authorized, but not required, to provide animal shelter services to a city.

In response to Mayor Bellamy, Assistant City Manager Jeff Richardson said that if the City doesn't authorize this agreement with Buncombe County, the City would either have to

contract with someone else to provide those services or build their own animal shelter for animals that are captured within the City.

Vice-Mayor Jones moved for the adoption of Resolution No. 07-134. This motion was seconded by Councilman Newman and carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 23 - PAGE 379

III. PRESENTATIONS & REPORTS:

A. COMMUNITY FORUM ON HOMELESSNESS SUMMARY REPORT

Assistant to the City Manager Lauren Bradley said that the purpose of this report is to provide a summary and analysis of community input collected on the issue of homelessness in Asheville. Feedback was collected at a community forum hosted by Asheville City Council on May 29, 2007. The City also collected written comments from the public after the forum. In addition, staff has collected data from an observational survey conducted in Pritchard Park the week of June 25. Based on this information, the following report includes staff recommendations for the Pritchard Park Committee as well as areas for further analysis or consideration.

Community input revealed concerns about three areas into which the following analysis is divided: the maintenance and aesthetics of Pritchard Park, homelessness, and downtown social issues.

Student MPA Intern Nick Dula from the UNC-Chapel Hill and Student MPA Intern Josh Hallingse from Appalachian State University summarized the following information:

Pritchard Park

Three common themes related to Pritchard Park surfaced from the community input: park maintenance, park operations/programming and park design/amenities. Analysis for each area is included below.

A. Pritchard Park Maintenance

The City has started implementing measures to address deferred maintenance in Pritchard Park followed by steps to maintain it at appropriate levels. The City has started or completed maintenance items including replacing mulch, repairing the ornamental fountains, pressure washing concrete areas, cleaning or replacing damaged infrastructure, repairing trash receptacles and installing cigarette urns. The balance of this work will be complete no later than mid-July. The park will be pressure washed again after Bele Chere. A City crew will empty trash receptacles, remove litter, rake mulch and take care of routine maintenance items every morning, seven days a week. Crews will conduct inspections on the park's fountains, pumps and electrical once per week.

B. Park Operations and Programming

The most common community suggestion for Pritchard Park operations was an "adopt-a-park" or "park ambassador" program. Park ambassador programs have been used as a way to monitor and manage activities in high use parks while also adding enhanced coordination of park programming during peak hours. The City of Asheville has similar services at other facilities like Azalea Park, Carrier Park, Memorial Stadium, ball fields, etc. Staff recommends additional staff analysis into this suggestion if City Council is interested in exploring a "park ambassador" for Pritchard Park.

C. Pritchard Park Design Considerations

Design modifications that may improve the existing park entail policy decisions that are worthy of additional public input and City Council consideration. Staff has developed the following list of suggested considerations for Pritchard Park improvements:

Landscape
- Add more plant material for density
- Plant different palette of plant material
- Plant materials with more mature sizes
- Add more boulders to keep public from fountains
- Add low metal barrier to perimeter flower beds

Fence
- Install ornamental fence to prohibit access to plants

Pathway
- Replace walkway with concrete/aggregate rock

Benches, trash receptacles and bike rack
- Add brick pads to area underneath all of above

Cigarette urns
- Purchase urns for placement in the park

Regulatory Signs
- Purchase signs for placement in the park

Irrigation
- Install irrigation system to maintain landscaping

It is staff's recommendation that the role of the Pritchard Park Committee be to review and refine the proposed design modifications by working with staff from the Parks and Recreation Department. Once the committee develops a proposal for design considerations, it would be tasked with hosting community input sessions on proposed design modifications. After the plan is modified to reflect community input, it would be presented to City Council for consideration. Staff will develop a revised committee charter and timeline if Council supports this role for the committee.

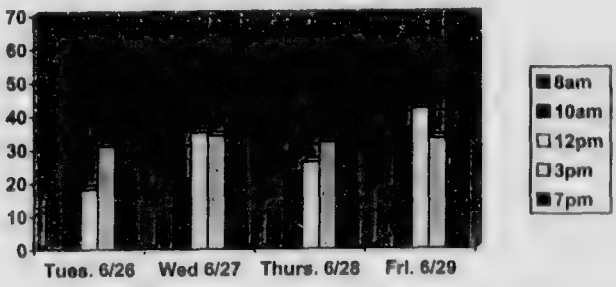
Pritchard Park Observational Survey - The purpose of the Pritchard Park Observational Survey was visit the park on regular intervals throughout the day to record any patterns of usage or park conditions.

The observational survey was conducted over the course of four days. The survey entailed 1-2 person(s) going to the park to record how many people are in the park along with notes about other activity (i.e., park cleanliness, park uses, police presence, park maintenance, etc.).

At the beginning of each observation, staff noted four key observations: date, time, weather, and park occupancy. Each site visit lasted between 15-30 minutes and typically occurred at the following times: 8 a.m., 10 a.m., noon, 3 p.m. and one observation in the evening, generally around 7 p.m.

Park Patterns Observed During Survey:

Park Usage - Prior to 8 a.m., the park is unused and empty. Between 8-8:30 a.m., the park experiences an influx of an average of 14 individuals. Throughout the course of the day, the number of people in the park steadily increases with peak usage in the afternoon and evening hours. The number of people in the park during peak hours ranges between 30-40 individuals. Of the four days, Friday experienced the most park usage, with the greatest number of park users on Friday evening.



There are two main sections of the park that experience the most amount of use: the upper wall adjacent to College St. and the chessboard area located at the corner of Patton Ave. and Haywood St. Most individuals took advantage of the shady areas provided at these two locations.

Most individuals who patron the park typically stay for extended periods of time (1 hour+). Most of the regular users of the park were adult men with few women and children seen on a daily basis.

The Friday night drum circle draws the largest crowd and the most diversity.

Park Cleanliness - Litter was a significant issue noted on all occasions, particularly cigarette butts. Large items such as aluminum cans or newspapers were for the most part absent. Vegetation (shrubs, trees, flowers) was well groomed, and the water features were operating as designed. One of the two water fountains was out of service. An employee from Parks and Recreation Department was observed providing maintenance services during two site visits.

Public Safety - A police presence was observed during 8 out of the 16 visits, or 50% of the time. Several social issues and ordinance violations were observed, particularly sleeping on park benches, panhandling, public urination, intoxicated and disruptive behavior and swearing.

Other Notes - Observers were stopped by tourists to ask for direction on several occasions.

Conclusions:

- People tend to gather on the walls in the shaded sections of the park.
- The permanent board games seem to be a big draw to the park.
- Most individuals use the park for extended amounts of time. Very few simply use the park for 30 minutes or less.
- Cigarette butts and small pieces of paper constitute the largest share of litter.
- Police patrols were observed.
- Unpaved walking portions of the park seem to create lots of dust.
- A fairly large number of citizens in wheelchairs use the park on a regular basis.
- Many people walk through the park to get to another destination.

Summary of Recommendations for Pritchard Park:

- Develop a plan and funding options for staff presence and enhanced programming in Pritchard Park, including an option for an ambassador or monitor during peak usage hours.

- Re-engage the Pritchard Park Committee to evaluate long-term Pritchard Park design modifications with community input and staff recommendations.

- Continue target law enforcement efforts in the Pritchard Park area with an emphasis on panhandling, trespassing, intoxicated and disruptive behavior and other related violations.

Homelessness

Three common themes also emerged in the area of homelessness: improving access to existing support services, medical and mental health care and affordable housing. The most common suggestions related to support services dealt with increasing access to daytime services and enhancing coordination among existing service providers. Access to affordable housing options was also cited as a barrier to ending homelessness.

Currently, the City of Asheville supports efforts to end chronic homelessness through the Asheville-Buncombe Homeless Initiative, which is the community collaboration implementing the 10 Year Plan to End Chronic Homelessness. The major focus of the effort is the end of chronic homelessness through the Housing First model, which seeks to place individuals in permanent, supportive housing. In Fiscal Year 2006-07, Asheville contributed $30,000 from Community Development Block Grant (CDBG) to support this effort, and the same allocation has been budgeted for Fiscal Year 2007-08. In addition, the City Council approved a $20,000 allocation to Homeward Bound/A-HOPE Day Center through this year's Outside Agency process.

Based on the community's input, staff recommends Council schedule a specific review of the city's efforts targeted at addressing homelessness. Staff would present information about the structure of the Homeless Initiative and the 10 Year Plan to End Chronic Homelessness, staffing and resources dedicated to the program and related performance measures.

The executive summary of the May 29, 2007, Community Forum on Homelessness is as follows:

On Tuesday, May 29, 2007, the City of Asheville held a community forum on homelessness at the First Presbyterian Church of Asheville. The assembly opened with a presentation on the history of Pritchard Park by city staff member Alan Glines followed by an update on the 10 Year Plan to End Homelessness by coordinator Amy Sawyer.

Citizens then broke into six small focus groups to reach consensus on two key questions:

1) What support services are needed in our community to help people who experience homelessness or are at risk of becoming homeless?
2) What type of community programming would you like to see in Pritchard Park?

Each focus group recorded its input and presented their overall findings in a wrap-up assembly. After the forum, the City continued to receive written comments from the public until June 11, 2007. The following is a summary of the information collected at the forum as well as the complete input from every focus group and subsequent written comments.

The following categorizes the top three answers from every focus group according to each question.

Question 1: Answers to the first question generally fell into one of three categories: increasing/enhancing existing support services, improving access to medical and mental health care, and increasing the stock of or access to affordable housing.

- **Increasing/enhancing existing support services:** All five groups included an item that related to increasing or improving existing services. These responses included increasing the availability of services, ensuring stable funding for programs and enhancing coordination among existing service providers. Specific recommendations for more day facilities, including public restrooms and laundry facilities, were also included. Some responses focused on procedures at shelters (i.e., allowing families to stay together as opposed to separating men and women) and increasing access to case managers that could help connect housing and support services for clients.

- **Improving access to medical and mental health care:** Four out of five groups included a recommendation related to medical care, mental health services and/or substance abuse treatment. The recommendations all addressed either the affordability, access to or quality of these services. Improving mental health services with an emphasis on adequate public funding for such services was the most common response.

- **Increasing the stock of and/or access to affordable housing:** Three out of five groups included the need for more affordable housing or enhanced access to affordable housing options. The Griffin Apartments were cited as a successful model.

Question 2: Answers to the have also been divided into three broad categories of recommendations: park maintenance and operations, park programming, and park amenities.

- **Park maintenance and operations:** Most answers to the second question dealt with park maintenance and operations. Four out of five groups included a recommendation to implement an "adopt-a-park" or "park ambassador" program. The purposes cited for these programs included improved park maintenance, planning, information sharing and public safety. Other items included better park maintenance and cleaning through improvements like paved walkways.

- **Park programming:** Three out of five groups addressed park programming with an emphasis on diverse and welcoming events. Specific programming recommendations include art shows, markets, movies, etc.

- **Park design and amenities:** Three out of five groups included the need for access to public restrooms and water fountains at the park.

As of June 11, 2007, the City of Asheville had received 15 written comments. The most common themes of the correspondence are listed below:

- **Using ordinances, rules or guidelines to prohibit certain activities in Pritchard Park:** Nine citizens recommended that the city should prohibit certain activities or behaviors in the park. Out of the suggested prohibited activities, public feeding and other "social services" were the most common. Others included littering, foul language, sleeping on benches, and drunk and disorderly conduct. Enforcement of these ordinances was also commonly emphasized in these responses.

- **Increasing park programming:** Six citizens advocated for increased programming of small events in the park including art shows, acoustic music, community lectures, movies and informational kiosks.

- **Making the park welcoming for all citizens:** Four citizens indicated the park was not welcoming to residents, visitors, and surrounding businesses.

- **Improving park maintenance:** Three citizens recommended enhanced park maintenance including sanitation services, pressure washing and landscaping.

- **Increased capacity for daytime homeless support services:** Three citizens recommended increasing the availability of daytime support services for the homeless. Two citizens included A-HOPE as a model for daytime services that needed to be expanded or replicated.

Summary of Recommendations on Homelessness:

- Schedule City Council review of the structure, staffing, programs and performance measures of the Asheville-Buncombe Homeless Initiative and the 10 Year Plan to End Chronic Homelessness.

- Conduct inter-city visit to Chattanooga, Tennessee, to review homeless service campus model (proposed date of July 17, 2007).

Downtown Social Issues

During the public input process, a number of downtown social issues were included with feedback on Pritchard Park and homelessness. Among the most commonly cited were public drunkenness, feeding in Pritchard Park, disruptive behavior in the park and litter. Through staff contact with the Asheville Area Chamber of Commerce/Tourism Development Authority, concerns about downtown panhandling have also been raised.

From July 1, 2006, to June 15, 2007, Asheville police officers made 3 felony arrests, 39 misdemeanor arrests, and 2 traffic arrests at Pritchard Park. Additionally, officers issued 113 citations for misdemeanor offenses (i.e., panhandling, trespassing, intoxicated and disruptive behavior, possession of marijuana, etc.), 12 traffic citations, and 2 infraction citations (i.e., parking citations) in the park.

In addition to the district officers assigned to Pritchard Park area, police presence in the downtown business district is supplemented by downtown augment. A permanent assignment in the augment schedule is the Pritchard Park area. Officers have a presence in the Pritchard Park area on a daily basis from noon until 11 p.m. This area also includes the businesses along Haywood Street, College Street and Patton Avenue near Pritchard Park. Officers patrol the area on foot and are responsible for making contact with business owners as well as patrolling Pritchard Park.

With these resources, officers are in Pritchard Park or at close proximity to the Pritchard Park at least once an hour everyday.

In March 2007, City Council received a report from the Downtown Commission outlining a review of the Downtown Social Issues Task Force recommendations. Several items that received Council direction in March are moving forward, including a pilot program for graffiti removal and the Spare Change for Real Change initiative. Other recommendations are in the process of additional staff analysis, including options for developing a Nuisance Court and a community service program directed at downtown cleaning. Staff recommends Council schedule a review of these programs in August for additional consideration and direction.

Summary of Recommendations on Downtown Social Issues:

- Schedule City Council review of staff research and recommendations on developing a Nuisance Court and community service program directed at downtown cleaning.

- Update on the Spare Change for Real Change initiative and graffiti removal pilot program.

Councilwoman Cape supported re-engaging the Pritchard Park Committee, with their role restricted to park programming and evaluating long-term Pritchard Park design modifications with community input. She felt that the Committee will look at creative ways to engage the Park actively so that there are eyes on the Park.

Councilman Newman supported the overall direction of re-engaging the Pritchard Park Committee. He also supported having Pritchard Park being open for different types of uses, as long as people are engaging in activities that don't harm other people in general. He hoped to keep the programming as open as possible. While we want our parks to be places where everyone has an opportunity to be there, we also expect a level of responsibility from everyone who is there. He asked the City Attorney and law enforcement personnel what our options are for holding people accountable for appropriate behavior in our parks.

Councilman Mumpower was against spending any money to alter our parks until we get control of the misbehaviors that are going on there. Our police can hand out citations all day long and nothing comes of it. Until we come up with some kind of accountability, there is no incentive to do the proper thing.

Councilwoman Cape said that we need to alter the misbehavior and replace it with the kind of behavior that we do want, e.g., neighborhood watches, eyes on the parks, and best practices from other communities. She finds that where citizens engage with their parks, the misbehaviors are pushed out.

Mayor Bellamy said that she and Councilman Davis meet with some services providers about these issues which are inter-connected. Regarding Pritchard Park, they confirmed that the issue we are dealing with is vagrancy, not homelessness. They all said that we have to have consistent enforcement of our laws in Pritchard Park in order to address those concerns, e.g., no panhandling, no defecation or urination in our parks, etc. She agrees that having eyes in the parks is a good deterrent but our police must be consistent in enforcement our laws. She cited that 20% of the vagrants are using 80% of the resources and that's why it's critical that we address this issue. The Downtown Social Issues Task Force, however, should not be the only ones shouldered with coming up with solutions on how to address these problems. We must work together with law enforcement and the service providers. She is supportive of looking at the programming at Pritchard Park, but doesn't think re-design is necessary if we do more law enforcement and work with the service providers. We committed to a 10-Year Plan to End Chronic Homelessness but we are not contributing any City funds to make that happen. We are, however, using Community Development Block Grant money to help with a position through the Affordable Housing Coalition. In addition, the City has used HOME funds to assist in permanent housing in the Griffin Apartments and Woodfin Apartments. She asked staff to come back to Council and truly address the issue of chronic homelessness as well as homelessness for families who may need shelter on a temporary basis. The inter-city visit is scheduled to review some models. Regarding social issues, if Mr. Dwight Buckner didn't work for years on the Spare Change for Real Change Program, we wouldn't have it. So, in order for us to make things happen, we've got to put some money in it and follow through. She supported the role of the Pritchard Park Committee to look at programming and hoped that the issues of homelessness and downtown social issues will come back to Council for specific policy direction.

Mayor Bellamy clarified her comments regarding vagrancy issues. She said she does not want the police to just arrest vagrants, but to make sure that we eliminate the illegal activities vagrants are doing, i.e., urination in the park, defecation in the park, littering, panhandling, etc.

Those are the types of activities we need to eliminate and we want those activities stopped in Pritchard Park.

In response to Councilman Mumpower, Mayor Bellamy said that Council has been invited to a meeting with local judges to talk about some options, e.g., alternate sentencing, and the City Attorney is looking into a nuisance court.

Councilman Freeborn believed we should task the Pritchard Park Committee to (1) look at programming; (2) work with service providers and community groups to address vagrancy issues; and (3) ask City staff to come back with a budget amendment to deal with litter and bathroom issues. He suggested we ask the Police Chief to come back with a proposal to put an officer in and around the Pritchard Park during the day and evening. He noted that when a park warden is at a particular park during heavy usage, you can see the crowd behavior is more respectful of the facility.

Councilman Davis recognized the efforts of the service providers. He supported the Pritchard Park Committee's direction be on recommendations for behavior problems and programming needs. He agreed with Mayor Bellamy that the Committee should not have to bear the burden of the Downtown Social Issues Task Force issues, but that City Council should give policy direction.

Vice-Mayor Jones said that this year we allocated significant funds to increase public safety and one of the police beats that will be increased will be in downtown. In terms of cleanliness, we identified significant dollars for downtown cleanliness and we will also have public restrooms downtown soon. She felt we are investing City dollars in the right direction. She did request trash cans in front of the service provider areas on Patton Avenue.

Councilman Davis noted that the County Commissioners are interested in working with the City on this issue as well since they are primarily responsible for social services.

It was the consensus of Council for the Pritchard Park Committee to move forward with programming recommendations only and report those back to Council, after which Council will give policy direction.

B. IMMIGRATION

Councilman Mumpower said that it has been almost a year since Council has approached the issue of illegal immigrants and have essentially done nothing since that time. He reviewed with Council the following power-point presentation:

"Why local action? With the paralysis and perpetual analysis at the federal and state level and their historical avoidance of accountability - it is the only realistic place to start. We must borrow from the civil rights movement of an earlier time - that was mostly accomplished at the local level. Asheville serves as an example.

"Why do we need to do this? The numbers create urgency: One half of the world lives (3 billion people) live on less than $2.00 a day. The minimum wage in Mexico is $4.00 a day. What we accomplish with illegal immigration a year (500,000) and legal immigration a year (1,000,000) is going backwards in addressing world poverty. We simply cannot absorb the numbers - we have gone from a nourishing rain to a flood.

"Until the mid-sixties we allowed roughly 200,000 legal aliens per year. This created our strong middle class and the "tremendous" economic strides of the black community by forcing employers to pay competitive wages due to the limits on cheap labor. Since that time, black economic progress has stagnated, the middle class has faded, and the gap between the richest and poorest has exploded. Quite imply the conspiracy by the Democrats (social indulgences)

and Republican (artificial wage restraint) has allowed illegal immigration to flourish at the expense of the majority and artificially propped up the corruption of other countries and cultures.

"There are other reasons: (1) public safety - no rules, no ID, and no accountability; (2) illegal aliens represent 25% of federal prisoners, are the primary distributors of illegal drugs in this county, and commit approximately 10 murders in the US per day; (3) at best, they do only 25% of the "unwanted" jobs in this country - just enough to keep wages suppressed; and (4) illegal immigration is a form of cultural terrorism - when people loose faith in the rule of law they stop playing by the rules - that is the foundation for a culture of selfishness and self-destruction.

"An 11 point plan of action is as follows: (1) add a provision in our new living wage ordinance to prohibit our subcontractors from hiring illegal aliens; (2) send a resolution to our state and federal representatives requesting that they begin enforcing existing laws and grant local authorities greater enforcement support and flexibility; (3) request that our City Attorney monitor federal and state legislation affecting local government ability to respond to illegal immigration concerns and make ongoing recommendations on potential initiatives; (4) follow-through on our August 2006 policy discussion on Asheville Police Department participation in 287 (g) of the Immigration and Nationality Act allowing for the appointment of local officers with immigration enforcement powers; (5) establish civil fines for using fake ID's within the City; (6) explore City regulation of day labor agencies by requiring confirmation of citizenship for temporary employment; (7) establish a formal City policy to enforce all existing laws related to illegal immigration at the local level; (8) implement our August 2006 policy discussion on transporting illegal immigrants to processing centers and reimbursements for such; (9) provide web based information for employers interested in the Federal Basic Pilot Employment Verification Program and IMAGE program; (10) establish an Asheville City policy to participate in these programs; and (11) require citizenship to serve on a city board or commission.

"The United States of America serves the world best by being a "beacon" of liberty, opportunity and responsibility. Destroying our culture and economic foundation through mass illegal migrations is to sacrifice the many at the indulgence of the few.

"I see illegal immigration as one of our culture's essential issues. I believe we should look beyond what we are not sure we can do - to what we might can do. The state and federal example of complacency and paralysis is a model of disgrace.

"We should not be blinded to the importance of taking local nonpartisan action today."

Councilman Mumpower understood that Mayor Bellamy's recommendation is that we conduct a study; however, he would speak to action, not further analysis.

Mayor Bellamy suggested an opportunity to evaluate the issue of legal and illegal immigration and its impact on our community. In an effort to move this issue forward in a comprehensive manner, she suggested we follow the City of Charlotte's example by forming a "Mayor's Immigration Study Committee." Like Charlotte, the purpose of Asheville's committee would be to analyze the impact of legal and illegal immigration on the county's quality of life, public safety, and economic opportunities. Drawing from diverse representation from our community, the Mayor's Immigration Study Committee would be tasked with creating a final report to serve as an educational tool for guiding City Council's decision making process. By focusing on key areas impacted by legal and illegal immigration like public safety, economic development, education, and healthcare, the committee would concentrate on immigration's unique impacts in Asheville. She said the Charlotte's final report *Immigration: Legal and Illegal* is recognized as a national best practice for analyzing legal and illegal immigration on a local level. She welcomed Council's input on the committee, how members are appointed and any additional feedback they may have about this initiative. She suggested the Committee not be comprised only of Asheville residents, but County representation and perhaps a representative from Representative Shuler's office. She hoped to launch the process to appoint committee members

after our July 10 discussion. Since Council needs good solid information for policy direction and she felt this Committee can provide that information to Council.

Councilwoman Cape supported Mayor Bellamy's idea to study these issues locally and to look at what our particular action needs to be. Best practices do come from learning from other people.

Councilwoman Cape moved to support the Mayor in establishing a local immigration study committee similar to the City of Charlotte's model that utilizes stakeholders with a broad based inclusion of committee members. She liked the idea of studying the issues locally and what their impacts would be locally and regionally. This motion was seconded by Councilman Freeborn with the suggestion of a friendly amendment that the Sheriff of Henderson County be invited to be a member of the committee as he has expressed a desire to take the lead in the 287 (g) program. Councilwoman Cape accepted the friendly amendment.

Rev. Amy Cantrell hoped that Council did not move forward with this plan but to find ways to welcome our sisters and brothers from across the border.

Mr. Bill Lack felt Council should follow the Mecklenburg County model and not the City of Charlotte's model. He supported Councilman Mumpower's 11 point plan.

Rev. Christopher Chiaronmonte felt Council should not punish illegal immigrants but punish those who are truly breaking the law.

Mr. Mike Butrum urged Council to adopt Councilman Mumpower's 11 point plan.

Mayor Bellamy felt that the 11 point plan recommended by Councilman Mumpower will be looked at by the Committee. She said this is an opportunity to look at a lot of different options. In addition, she noted that the plan is a Charlotte-Mecklenburg Plan.

Councilman Mumpower had no problem with a study as long as it's a foundation for action vs. an alternative to action. The Sheriff of Henderson County and his predecessor have been talking about taking action on this issue for 4-5 years and he doesn't want us to study this issue to death. He questioned if there were any of the 11 points that Council would be interested in moving forward on now. He understood that the 11 points will not close the door to illegal immigration, but they do begin to send a message within the limits of our ability that Asheville is not a sanctuary city and we have concerns about illegal immigration.

Councilman Newman views this issue primarily as an issue that our federal government needs to address. He didn't think it can be addressed adequately at the local level until there is a federal set of policies in place that create a coherent strategy for our country to have a more rationale effective immigration policy. We need to do what is necessary at the local level that we are protecting the public from dangerous criminals, whether they are legal or illegal residents.

Councilman Newman asked Police Chief Hogan if there is anything that City Council can do to give him the tools, to hold people accountable for violating our laws, when officers arrest people who have committed dangerous crimes that threaten the safety of the people in Asheville. Police Chief Hogan responded that where they fall short is in the federal government in terms of the Immigration Customs Enforcement deemed locally inadequate to respond to identified illegal aliens that are arrested. Our challenge can't be addressed by Council or the courts, as it now stands. If the court is more efficient in criminal processing, then it would have a positive impact as it relates to illegal aliens. Our challenge lies at the federal and state level.

Councilman Newman liked the Mayor's suggestion of a committee; however, he was concerned that we are doing a lot of different studies this year for our community. When he thinks about the responsibility that we are actually charged with, and within our purview to

actually make a difference on, he questioned if this study would be at the top of the list for him. He is not against the study, but just questioned the resource allocation and limited staff.

When Vice-Mayor Jones called the question, Councilman Mumpower moved to accept the motion to entertain the question. This motion was seconded by Councilman Freeborn and carried unanimously.

The amended motion made by Councilwoman Cape and seconded by Councilman Freeborn to establish a local immigration study committee carried on a 6-1 vote, with Vice-Mayor Jones voting "no."

Councilman Davis moved to follow-through on our August 2006 policy discussion on Asheville Police Department participation in 287 (g) of the Immigration and Nationality Act allowing for the appointment of at least one local officer (and from then on the number of officers would be at the Police Chief's discretion) with immigration enforcement powers. This motion was seconded by Councilman Mumpower with the suggestion of a friendly amendment to also provide web based information for employers interested in the Federal Basic Pilot Employment Verification Program and IMAGE Program. Councilman Davis accepted the friendly amendment.

Ms. Clare Hanrahan asked for clarification of how our police officers are supposed to know who is a vagrant or who is illegal.

Rev. Christopher Chiaronmonte urged Council to continue to work with Councilman Mumpower in finding a solution. He felt the solution is not to punish the illegal immigrants or the vagrants, but punish the ones who are corrupt.

Vice-Mayor Jones supported the portion of the motion regarding providing web based information for employers; however, she would not support the participation in 287 (g) of the Immigration and Nationality Act. She felt we did not know what we are doing. She felt it is very clear from civil rights history that change happens because of the federal action.

Councilman Freeborn felt that there are a lot of outstanding questions and that it was important that we establish a committee to study how the issues will play out in our community. He felt he didn't have enough information to make an intelligent vote for or against asking the Police Department to participate in 287 (g) of the Immigration and Nationality Act.

Mayor Bellamy said that in the past whenever we have something put forward for Council to consider, we ask staff to go back and do a budget amendment and/or give us more information on the pros and cons. She suggested we instruct the Police Chief to come back on July 24, 2007, with some more information on what he needs and what he is asking for.

Councilman Davis withdrew his motion.

Councilman Davis then moved to provide web based information for employers interested in the Federal Basic Pilot Employment Verification Program and IMAGE Program. This motion was seconded by Councilman Mumpower and carried unanimously.

It was the consensus of Council to instruct the Police Chief to come back on July 24, 2007, with some more information on (1) what he needs; (2) what he is asking for; and (3) documentation about 287 (g) of the Immigration and Nationality Act and how it's applied and how we can direct its application within this community and within the context of this community conversation.

At 6:55 p.m., Mayor Bellamy announced a short break.

IV. PUBLIC HEARINGS:

A. **PUBLIC HEARING TO CONSIDER THE VOLUNTARY ANNEXATION OF NON-CONTIGUOUS PROPERTY LOCATED AT 2345 HENDERSONVILLE ROAD**

ORDINANCE NO. 3501 - ORDINANCE TO EXTEND THE CORPORATE LIMITS OF THE CITY OF ASHEVILLE TO INCLUDE 2345 HENDERSONVILLE ROAD

Mayor Bellamy opened the public hearing at 7:15 p.m.

Urban Planner Julia Cogburn said that this is the consideration of an ordinance to extend the corporate limits of the City of Asheville to include 2345 Hendersonville Road. The public hearing was advertised on June 29, 2007.

Sywall Properties, L.P. has petitioned the City for the annexation of one lot located at 2345 Hendersonville Road (PIN No. 9654.14-23-8209) containing approximately one acre.

The lot is located on the western side of Hendersonville Road in South Buncombe County near the intersection of Hendersonville Road and Glen Bridge Road. The area, while across Hendersonville Road from other properties contiguous to the City of Asheville, is not contiguous to the primary corporate limits of the City and, therefore, is subject to the standards for annexation of noncontiguous areas contained in N.C. Gen. Stat. sec. 160A-58.1. This parcel and petition meet all applicable requirements of the State of North Carolina

Pursuant to N.C. Gen. Stat. sec. 160A-58.2 a public hearing must be held prior to adopting any ordinance for voluntary annexation. If City Council decides to proceed with this request, it is proposed that the annexation become effective on July 31, 2007.

Pro:

- Provides for the orderly growth of the City and the tax base through the acceptance of areas into the corporate limits where owners desire annexation.

Con:

- Marginal increase in service costs (too small to measure or respond to).

This action complies with the 2025 Plan in that it supports the strategy of promoting voluntary annexation of developing areas and meeting the goal of continued use of the urban development tool of annexation in providing for the orderly growth of the City.

City staff recommends City Council approve an ordinance extending the corporate limits of the City of Asheville by annexing one lot located at 2345 Hendersonville Road.

Mayor Bellamy closed the public hearing at 7:19 p.m.

Mayor Bellamy said that members of Council have previously received a copy of the ordinance and it would not be read.

Councilman Freeborn moved for the adoption of Ordinance No. 3501. This motion was seconded by Councilman Mumpower and carried unanimously.

ORDINANCE BOOK NO. 24 - PAGE 55

B. **PUBLIC HEARING TO CONSIDER REZONING 3 LOTS LOCATED AT SARDIS ROAD - BILTMORE LAKE FROM INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT**

ORDINANCE NO. 3502- ORDINANCE TO REZONE 3 LOTS LOCATED AT SARDIS ROAD - BILTMORE LAKE FROM INDUSTRIAL DISTRICT TO RM-16 RESIDENTIAL MULTI-FAMILY HIGH DENSITY DISTRICT

Mayor Bellamy opened the public hearing at 7:20 p.m.

Urban Planner Blake Esselstyn said that this is the consideration of rezoning three lots located at Sardis Road - Biltmore Lake from Industrial District to RM-16 Residential Multi-Family High Density District. This public hearing was advertised on June 29 and July 6, 2007.

The subject site is comprised of three parcels, totaling about 36 acres, landlocked in an area east of Biltmore Lake, south of Sand Hill Road, west of Sardis Road, and north of the Gaston Mountain development. The entirety of the site is currently zoned Industrial. Though no roads actually touch the site, the closest roads to the site are in Enka Village and the Biltmore Lake development. The applicant, representing Biltmore Farms, Inc. (associated with the latter development), wishes to rezone to property to RM-16.

The site's position at the margin of the extraterritorial jurisdiction area (ETJ) means that some of the adjacent zoning is City jurisdiction, while other nearby zoning is the jurisdiction of Buncombe County. The City of Asheville zoning to the north and east is Industrial, while the remaining adjacent zoning is the County's "R-2" zoning district. The applicant wishes to extend the residentially zoned area in order to expand the Biltmore Lake development towards Sardis Road.

According to the Unified Development Ordinance's (UDO's) Article 8, the purpose of the Industrial District is to reserve land for existing and future industrial activities and for land uses that support industrial activities. Development standards are established to ensure that land uses located outside the Industrial District are not adversely affected by the negative impacts of industrial uses. Industrial Districts shall be located to capitalize on existing infrastructure where possible, such as transportation facilities and utilities. Supporting land uses are characterized as providing supplies, raw materials, transportation, or storage services to industries or providing services to industrial employees.

Residential uses may be permitted in the Industrial district only as an accessory use, and they must be occupied by employees of the principal use.

The RM-16 district is intended to permit a full range of high density multi-family housing types along with limited institutional, public and commercial uses appropriate within high density residential areas. It is intended that this district be located near employment centers, shopping facilities, roads and other urban infrastructure capable of handling the demand generated by high density residential development.

It is worth noting that, while most parts of Biltmore Lake in City of Asheville jurisdiction are zoned RM-16, the dominant existing development pattern in the area is single-family residential, with a density of 2-4 units per acre. Further, it should be noted that the County's "R-2" zoning district allows a density of up to 12 units per acre.

As is noted in the sections above, the Comprehensive Plan includes a policy stating that Industrially zoned land should be preserved for industrial uses. This is further emphasized in the Sustainable Economic Development Strategic Plan that identifies a shortage of industrial zoned properties as one of its top priority issues to be addressed in our area. However, there are recent precedents (detailed above), also in this Candler area, for City Council approval of such down-zonings. The Dogwood Road site is the example with the most similarities: also more than 30 acres, also seeking residential zoning. The subject of this application, however, does not have the proximity to a road corridor that the Dogwood Road site has.

In addition, in 2005 (after the subject properties were initially zoned in 2001), an area of approximately 125 acres along Sardis Road to the east of the subject properties was rezoned from Community Business II to Commercial Industrial. While the Commercial Industrial zoning district does not permit the exact same range of uses as the Industrial district, the rezoning did establish a large area of land along this corridor available for production, manufacturing, packaging, processing, and assembly uses.

The subject site is bisected by the Progress Energy power transmission lines, as well as a small stream. These features, in addition to the slope at the south end of the site, would present obstacles for a large industrial development, but a residential development comprised of small lots could have more flexibility for working around these features.

Staff has received one communication from Southeastern Container who did not specifically oppose the rezoning but pointed out that his company is located in close proximity to the proposed rezoning area and it operates 24 hours a day, 7 days a week with truck traffic and lighting.

At the June 6, 2007, meeting, the Planning and Zoning Commission voted unanimously to recommend approval for this request.

Based on the above findings and the analysis provided in the report, staff finds this request to be reasonable.

Pros:
- Subject site is bordered on more than half its perimeter by residential zoning, and is closer to residential streets than commercial streets.
- Site features (stream, slope, power lines), would arguably present more challenges for industrial development than for residential.
- Subsequent to this site's initial zoning, 125 acres nearby have been up-zoned to Commercial Industrial.

Cons:
- The Comprehensive Plan, as well as the Sustainable Economic Development Strategic Plan, includes a stated policy to preserve Industrially zoned land for industrial uses.
- Uses permitted under the existing zoning have more potential to create and support lasting jobs.

Staff has concerns about rezoning Industrially-zoned land, due to the policies against such action stated in the Comprehensive Plan and other plans. That said, both the Planning and Zoning Commission and City Council have supported similar rezoning in the recent past, and multiple characteristics of this particular site suggest that residential uses could be more suitable than industrial. If the City Council wishes to consider this rezoning independent of the aforementioned policies, staff feels a case can be made for recommending approval.

Mr. Will Buie, representing Biltmore Farms, understood Council has to consider the base zoning and not what is proposed, however, their intention is for single-family residential. He felt the topography of the area is such that it's probably not suitable for industrial development without major grading or impact to the streams and it doesn't really have access to major highways. They spoke to Mr. Sampson with Southeastern Container and have talked about (1) providing a sewer easement; (2) purchase of a corner of the property that will allow them to provide buffer from their facility; and (3) providing some additional disclosure notices to the people who will be purchasing those lots so they would be cognizant of that facility and it's importance to the community.

Rev. Christopher Chiaronmonte felt that Council should suspend rezonings. He said that regardless of whether the land is used for industrial or residential, grading will occur. He suggested low cost housing be placed on that property.

At 7:30 p.m., Mayor Bellamy closed the public hearing.

Vice-Mayor Jones recalled Council policy against rezoning industrial land and wondered if that is something that needs to be re-visited.

Mr. Mike Plemmons, representing the Council of Independent Business Owners, said that they haven't taken this rezoning request up as an issue. He did feel that Council should take into consideration the lay of the land.

Mr. Esselstyn noted that Planning staff presented this staff report to Sam Powers, the City's Director of Economic Development, and he had no problem with the rezoning request.

In response to Vice-Mayor Jones, Mr. Esselstyn said that the 125 acres along Sardis Road that were rezoned in 2005 to industrial adds the capacity for manufacturing-type operations in that corridor with better access to transportation facilities.

Councilwoman Cape said that discussions come up all the time of where are we going to have economic development and industrial zoning in the community. In light of the economic development question, she was hesitant to vote without fully understanding what the benefits are. She felt that not all manufacturing is large buildings but a lot are small scaled industry.

Councilman Mumpower felt our policy to retain industrial land is out dated and reflective of a time when we were hemorrhaging large industries and we wanted to preserve land for their comeback. There are very few indications that the probability of a comeback is real. The jobs that are being created in this city are on a much more smaller scale and require much smaller spaces. He felt we may need to reconsider the policy. Since there is some logic for rezoning, he moved to approve Ordinance No. 3502 and finds that the request is reasonable based on information provided in the staff report and as stated in the staff recommendation. This motion was seconded by Councilman Davis.

In response to Councilman Newman, Mr. Esselstyn said that typically when someone requests a rezoning, they try to suggest zoning that is consistent with nearby zoning. Even though the zoning district is RM-16, there are mostly single-family subdivisions.

When Councilman Newman asked if Biltmore Farms would be willing to work with the City on voluntary annexation of this property, Mr. Tom Williamson, Vice-President of Community Development with Biltmore Farms, said that the property will be developed with 37 single-family homes serviced through the existing Biltmore Lake Association. He said they were asked through an e-mail from Ms. Shannon Tuch to consider voluntary annexation. They have done that with other properties, e.g., Biltmore Park at Town Square. In this case they are extending a franchise of the Biltmore Lake community and based on the advice of counsel they cannot, as part of the rezoning action, agree to a voluntary annexation. At this point they are willing to discuss it as it makes more sense at the earlier conception phase of a project to consider this. He was told that it was considered many years ago for Biltmore Lake and they considered it with Town Square West and reached an accord that was beneficial to everyone. In this case they would be willing to entertain it, but not in association with the rezoning action. If a meeting of the minds can be reached that makes sense relative to this small portion of Biltmore Lake, that's fine, but it is doubtful that that can happen as we have already had it tied into a lot of infrastructure and done significant amount of work at Biltmore Lake.

City Attorney Oast reminded Council that if the property is rezoned to RM-16, it is available for any use allowed in that district.

Mayor Bellamy was supportive of the rezoning because of the topography. She wanted to make sure, however, that people who will be purchasing the lots have full disclosure of the plant located near them and that the facility runs 24 hours a day, 365 days a year with traffic going in and out. She suggested the proposed property owners be given a map to show the location of the plant.

The motion to rezone three lots located at Sardis Road - Biltmore Lake from Industrial District to RM-16 Residential Multi-Family High Density District carried on a 5-2 vote, with Councilwoman Cape and Councilman Freeborn voting "no."

Vice-Mayor Jones requested that for industrial district rezoning changes, the Sustainable Economic Development Advisory Committee review the request. And/or, to have them review our policy about not rezoning industrial land.

City Manager Jackson suggested we consult with various stakeholders, introduce the subject, hold some focus groups involving stakeholders and major property owners, and report back to Council on what we hear from them as well as observations and recommendations we have as staff. We will then seek further direction at that point.

Mayor Bellamy said that during our next quarterly update on the financial status and drug elimination, another component of the update will be our economic development status.

ORDINANCE BOOK NO. 24 - PAGE 58

V. UNFINISHED BUSINESS:

A. CONTINUATION OF PUBLIC HEARING TO CONSIDER AN AMENDMENT TO THE UNIFIED DEVELOPMENT ORDINANCE REGARDING STEEP SLOPE AND RIDGETOP REQUIREMENTS

ORDINANCE NO. 3503- ORDINANCE AMENDING THE UNIFIED DEVELOPMENT ORDINANCE REGARDING STEEP SLOPE AND RIDGETOP REQUIREMENTS

Mayor Bellamy said that this public hearing was opened on April 24, 2007, and continued to May 8, 2007, at which time the public hearing was closed. The action was continued to a June 12, 2007, worksession in order for Council to review specific data and until continued to June 19, 2007. On June 19, 2007, the matter was continued until this date.

Interim Planning & Development Director Shannon Tuch said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to establish new steep slope and ridgetop requirements.

Interim Planning & Development Director Shannon Tuch said that as Council is aware, the hillside and ridgetop development standards have been under consideration for some time and have, very appropriately, received a significant amount of attention given the potential impacts which are not just aesthetic and ecological, but also economic and social.

Because of this, staff has conducted a significant amount of research in order to develop appropriate standards, and has also conducted a great deal of analysis to help evaluate the impacts of establishing a hillside development area. A special presentation with a number of visuals were prepared and presented at Council's worksession on June 12, 2007, and the bulk of this information was directed at establishing an appropriate threshold of where to apply the hillside development standards.

Staff's original recommendation was that it should be applied to all property over 2,220 feet in elevation and those properties with an average natural slope of 15%. Staff had also proposed to include properties with an average natural slope of over 25% regardless of elevations but only in residential districts.

The Planning & Zoning Commission also spent quite a bit of time evaluating these standards and they ultimately settled on a recommendation to apply the hillside development standards only to those properties above 2,500 feet in elevation with an average natural slope of over 25%.

The Planning & Zoning Commission's recommendation significantly reduced the amount of acreage that would be protected under the hillside standards (although the standards that were adopted were more strict). Nevertheless, this recommendation inspired some new analysis and much of that was presented at the June 12 worksession.

Understanding that Council's direction at the June 12 worksession was to develop something of a compromise between our existing standards and the proposed standards that would have less of an impact on the lower elevations that were not as steep. This compromise is outlined below (in a July 10 memo to Council) and includes two components:

1. Apply existing hillside density and grading standards to properties above 2,200 feet that have an average natural slope between 15-24%; and
2. Apply the more rigorous density and grading standards to those properties above 2,200 feet with slopes 25% or greater.

The benefit of this proposal is that it protects the same amount of property that is current protected, but only applies the more strict standard to those more challenging and sensitive properties with slopes over 25%. However, what this standard does not do is balance the development potential so, if adopted, it would reduce the amount of development that could occur in general.

So, in response, staff has more recently examined the second option which is to look at the impact of applying the standards to only those properties over 2,350 feet and 20%. But what this standard achieves is that by redefining the hillside areas, it exempts some of the lower lying areas that are not as steep and these are areas that are currently restricted. This would effectively shift some development potential from more sensitive properties to some less sensitive properties. It would be next to impossible to determine the magic number that would achieve the perfect balance but this would be one option that would, at least, provide more of a balance.

This is just one permutation of options that have already been considered and there are quite a few more that could be considered.

July 10, 2007, memo to Council:

Areas below 2,220 feet in elevation having 25% or greater slope. First, earlier staff recommendations proposed extending slope requirements into areas below the long-standing "hillside" elevation threshold of 2,220 feet when slopes were 25% or greater. This significantly extended the area covered by the regulations but primarily applied to scattered sites of a few acres or smaller in size. Public comment noted that these areas often offered infill development opportunities having been previously passed over for development on adjoining less steep slopes. Given these circumstances, staff suggests that **Council exempt steep slope areas below 2,220 feet in elevation from all requirements proposed for steep slope areas above 2,220 feet except the geotechnical**

analysis requirements (which would apply once the slope reached 36% or greater or if the area represented a moderate to high risk for landslides). The development of these areas would otherwise be governed by underlying zoning and general grading requirements.

Areas above 2,220 feet in elevation and having slopes between 15 and 24.9%. Council discussion and public comment has noted that slopes below 25% were less problematic for development than those at or above that slope percentage. Whether areas of such slope represent major opportunities for affordable housing is debatable, but these areas are certainly better suited for development than those having slopes above 25% and are often on lower, less visible sections of mountainsides. Given these circumstances, staff suggests the **Council substantially increase the amount of grading and allowable density in these areas from what was previously recommended, in effect essentially maintaining the current hillside grading and density limits.** The recommended adjustments are illustrated in the following tables. The other proposed requirements, including tree preservation, road corridor design, height, etc. would remain in effect for these areas.

EXISTING GRADE	PERCENT GRADING	
	PRIOR	NEW
15-19%	45%	80%
20-25%	40%	70%

MAXIMUM NUMBER OF UNITS PER ACRE BY EXISTING GRADE										
Existing Grade	RS-2		RS-4		RM-6		RS-8 RM-8		RM-16 +	
	P	N	P	N	P	N	P	N	P	N
15%-19%	1.2	1.7	1.8	3.3	2.7	5.1	3.6	6.8	7.2	13.5
20%-24%	1.0	1.4	1.4	2.9	2.4	4.3	3.2	5.7	5.6	11.1

KEY: P=PRIOR N=NEW

Areas above 2,220 feet in elevation and having slopes 25% or greater.
No changes to the proposed ordinance are recommended.

Incentives and Bonus for establishing "Conservation" or "Preservation" areas.
A density bonus of up to 60% is proposed by placing more sensitive portions of a property within a conservation easement; **staff is proposing to slightly amend the applicable section to now read:**

> Buildings, parking, and other improvements are clustered on less steep and sensitive areas of the site to reduce the amount of grading and the steeper, more sensitive areas are preserved through a conservation easement that safeguards the property from future development; bonus of up to 60% based on the following table. Less sensitive areas may not exceed a 40% average natural slope and may include previously cleared areas, such as logging roads and pastures, provided such clearing predates January 1, 2007. Clustering in single family residential districts and the RM-6 district may include multi-family construction up to eight units per building if necessary to achieve site preservation objectives. Conservation areas may not be located on individually owned home lots and may remain as privately owned property.

PERCENT OF SITE PRESERVED	DENSITY BONUS

30-40%	30%
>40-50%	40%
>50-60%	50%
>60%	60%

As an example, if you have a 30 acre parcel zoned RS-2 with an average natural slope of 32% the total number of units allowed would be .6 per acre for a total of 18 units. If the developer sets aside the highest and steepest 10 acres then a bonus of 30% would be afforded to allow a total of 23 units. Interestingly, in this scenario the developer must preserve a minimum of 10 acres from grading per the proposed grading standards; however, this can include undisturbed slopes on private lots. If pursuing this bonus, the conservation property would be set aside and all grading would occur in the less sensitive areas. This incentive is likely to result in less disturbance while providing the opportunity for more units in the most appropriate building areas. This incentive may be elevated by increasing the bonus.

Using graphics, Urban Planner Blake Esselstyn explained the latest analysis.

Mayor Bellamy said that she asked staff to do the analysis on 2,350 feet because the 2,200 feet was detrimental to the corridors in south Asheville. We heard from the community that 2,500 feet was way too much. The 2,350 feet was a starting place. With 2,350 feet, we are preserving our hillsides and our topography and that is what she's heard the community say they want to preserve. There are extremes of some saying don't do any regulation and some saying let's put as many limitations as possible for no growth. She feels the 2,350 feet is a way to make sure that we are not hampering the southern part of the City that is a lot lower than the northern part, so we are able to preserve a lot of the ridges in Chunns Cove and north Asheville. The 20% grade was based upon earlier presentations.

The following individuals expressed their preference on the different options:

Mr. Charles Hulme, south Asheville resident
Mr. Mike Butrum, Mountain Council for Accountable Development
Mr. Joe Bassett, Asheville resident
Mr. Jay Quinn, resident on Sunset Drive
Ms. Barber Melton, Haw Creek resident and member of the Coalition of Asheville Neighborhoods
Ms. Heather Raybum, Asheville resident
West Asheville resident
Mr. Mike Lewis, north Asheville resident
Rev. Christopher Chiaronmonte
Ms. Christy Fryar, Mountain Council for Accountable Development

At the request of Mayor Bellamy, Ms. Tuch responded to various questions that were raised by individuals.

Mayor Bellamy asked what some developments would look like now (Kenilworth and Beaucatcher Mountain) had they been required to development with some of our new standards, e.g., single-family subdivision requirements, stormwater requirements, landscaping requirements, etc. Ms. Tuch responded that there are a number of measures. She said the hillside development standards designate a protected area - an area where we apply our standards but there are a special set of standards that are designed to accommodate their sensitivity. We have a number of other standards that get reviewed in conjunction. Typically if there are standards in conflict, which we hope there are no standards in conflict when it comes to inter-play between our stormwater ordinance, erosion control ordinance, subdivision ordinance, landscape standards,

etc. but if there were a conflict we would go with the most restrictive. Using the Kenilworth project as an example, that property was reviewed as a major subdivision and was approved as a major subdivision. There was no requirement that requires a major subdivision to move forward. There have been a number of changes since then that would now require that a subdivision over 50 lots (which that one was) would have to come before Council for consideration as a conditional use permit as a Level III project. We also have applied our current existing hillside standards to single-family developments. Even if this project gets built, and our hillside development standards are adopted, we can still apply some of those standards to that development. People coming in for the individual single-family home permit will still be subject to some of these hillside development standards in terms of height, light reflectivity and tree preservation. There have been a number of steps taken by the Council that will better safeguard those kinds of developments from occurring in the future.

In response to Mayor Bellamy, City Attorney Oast felt that as long as there is a rational basis for distinction, it may be possible to have two different elevations standards.

Councilwoman Cape wants to close some of our loopholes in our community. She felt we've done that with including single-family homes in our changes. She also felt that the flatness of the land in south Asheville, despite its elevation would encourage development along the transportation corridor and that the new regulations would support that development. She questioned whether or not the recent changes we made to our ordinance would make it strong enough.

Mayor Bellamy felt the real problem is the other ordinances, e.g., stormwater, erosion, single-family residences, etc. She felt this was a waste of time and has divided our community because the focus should have been on the true issues. She would be willing to make a motion to keep what we have but look at the other ordinances to make sure they are in place to support what we want. We want to preserve green space in Asheville and make sure development happens in a balanced way. The heart of the issue is making sure that our infill development meets the standards of developing in the mountains and making sure it's sensitive to hillsides. She asked the City Manager if we could have an overlap of what we have approved to see if it is how we want it to be on our mountains and then maybe have conversations about conservation.

Councilman Newman felt that we have closed the major loopholes and have added a geotechnical analysis requirement at 36%. He supported keeping the existing hillside rules in place between 2,220 feet and 2,350 feet and then apply new regulations above 2,350 feet with a slope of 15% or higher. I think there is a rationale for a different set of regulations, because it does apply to a number of different areas in the City. We could keep existing regulations there and then focus the more powerful regulations on the areas that people most really would think of them as the steep slopes. The only thing I don't like about that is it keeps more regulations on the books.

Councilman Davis agreed with Councilman Newman, noting that it's complicated with two sets of figures, but it's about the only way it works.

Vice-Mayor Jones felt the higher standards above 2,350 is a good way to go especially since we have tightened up other issues.

Vice-Mayor Jones supported a requirement that houses in the higher elevations be painted (or have materials) to blend in opposed to color being an incentive, especially since a height bonus is given.

Councilwoman Cape would be open to discuss the requiring Light Reflectivity Value of 25 or less on anything above 2,350 feet.

City Attorney Oast said that he has concerns about making it a requirement on what color people could paint their homes and also staff's ability to enforce that. He would have to research other areas to see how they would enforce that requirement.

Councilwoman Cape suggested we move the ordinance forward and then ask the City Attorney to research the requirement on the materials or painting of homes.

Councilman Mumpower reminded Council that we do not own the land we are talking about regulating. It is owned by a broad mixture of people and it's an investment in their future. We do not have an identifiable safety problem in Asheville. He felt this is taking property rights away from owners to protect mountain views for people who already have what they want.

Ms. Tuch said that staff needs direction on how Council wants to treat the roads. We provided in the staff report some standards for creating new roads and restrictions on the widths of road corridors and cut slopes, etc. Do we want to apply that stricter standard to only those portions of the property above 2,350 feet or do we want to apply it to anything over 2,220.

Councilman Freeborn suggested we postpone taking action on this for two weeks in order for the community to see a clean document and clean charts.

Upon inquiry of Councilman Newman, Ms. Tuch said that an option could be given to property owners if they want to exclude some areas on their property from any development to get a different calculation on the average natural slope. Councilman Newman supported giving property owners this option.

Councilman Newman moved to keep our existing hillside ordinance in place for properties located between 2,220 and 2,350 in elevation and then apply the new proposed steep slope ordinance regulations to properties located above 2,350 with a slope of 15% or higher. This motion was seconded by Councilman Davis.

Councilman Newman requested staff's recommendation as to standards for creating new roads and restrictions on the widths of road corridors. Ms. Tuch recommended a reduced road cross-section and that we apply that to all properties over 2,220 feet. In addition, she recommended that the road corridor restriction would be applied above 2,350 feet. Councilman Newman accepted Ms. Tuch's recommendations into his motion.

Mayor Bellamy could not support the motion. She felt the number one reason this is an issue is enforcement of existing laws. It has been a problem in the past and until we see enforcement of stormwater issues, erosion control, etc., changing this ordinance isn't going to make any difference. She looked forward to the August discussion to see what the changes we have made will look like on the ground and how they affect the overall aesthetics and beauty that we all want to keep in our community. She supported keeping what we have on the books, tightening them up with the other ordinances, but won't support any motion for steep slope changes until greater enforcement of the ordinances that we currently have.

The motion made by Councilman Newman and seconded by Councilman Davis (1) keep our existing hillside ordinance in place for properties located between 2,220 and 2,350 in elevation and then apply the new proposed steep slope ordinance regulations to properties located above 2,350 with a slope of 15% or higher; (2) the reduced road cross-section be applied to all properties over 2,220 feet; and (3) the road corridor restriction would be applied above 2,350 feet) carried on a 5-2 vote, with Mayor Bellamy and Councilman Mumpower voting "no."

At 9:20 p.m., Mayor Bellamy announced a short break.

VI. NEW BUSINESS:

A. PARTISAN ELECTION

Mayor Bellamy said that she has received a request from Councilwoman Cape to pull this item for discussion as to a point of order.

Councilwoman Cape said that on July 2, 2007, Council received a confidential memorandum from our attorney that stated that because of the filing period timing there was nothing that City Council could do to reconsider this motion.

City Attorney Oast said that there is not a lot of guidance on this issue in the statutes or cases. It is his reading of the law that once Council sets the Charter amendment process in motion by using a particular process, then Council has the option of calling for a referendum or not. Once that process has begun, there is no way to change the course. There is the citizen initiated petition and the time for getting that done has not run out. Under the law, if Council wants to put the action to amend the Charter to a referendum, you had to have adopted a resolution to do that at the same time Council adopted the ordinance.

Councilwoman Cape questioned how does it serve the community to bring this issue up? Because of the legal rules of the charter change there is nothing we can do and we followed every legal process that we were supposed to follow. The democratic wheels are in play that if truly a majority of citizens feel like it was the wrong thing to have done, there is a mechanism within which to engage with that. To go through this when reconsideration would do nothing feels like a waste of time for the community.

Councilman Mumpower believes that there are alternatives and that those alternatives should be deliberated by the governing body. He felt that a referendum is not our only option.

City Attorney Oast said that the process that is specifically provided for in the law is essentially two ways. One is if Council adopts a resolution at the time they adopt the ordinance (which was not done). The other way is a citizen-initiated petition. If this Council decided (by majority vote) to try and subject it to a referendum and directed him to do so, he would have to take the matter to court and see if that could be done. He didn't think that would be a successful effort.

Upon inquiry of Vice-Mayor Jones, City Attorney Oast said that he has spoken with people whose specialty includes elections law at the School of Government and in the Attorney General's Office. One point everyone agreed on is there is not much guidance in this area. In reading the law, they all came to the same basic conclusion that once the process was set in motion, there was not a lot that could be done. If the ordinance that has been adopted stands, if it is not subject to a successful citizen-petition, it remains in place for a period of two years.

Councilman Mumpower requested the opportunity to share his perspective on reconsideration of this issue.

Councilwoman Cape said that we have followed all the rules on public engagement that is required. She wanted to understand Council's rules that when we have a vote on an issue and someone doesn't like the vote that is taken, how does that issue get to come back for another vote in front of the body again.

City Attorney Oast said that any Council member can get something on the agenda. The agenda is established by the Mayor and the City Manager. There is a way, in Council's rules, to prevent reconsideration within a 6-month period, but that requires that a motion on the issue in

question had been defeated. In this case, the motion was not defeated. He felt that this item is in order.

City Attorney Oast also noted that there is always the possibility of legislative relief. If Council felt strongly enough about changing the process to subject it to a referendum, Council could apply to the legislature to have that done.

Councilman Mumpower reviewed with Council the following power-point presentation:

"Partisan versus nonpartisan elections - reconsidering a step backwards. Partisan elections are a bad idea, poorly implemented, and regressive in nature. This issue deserves our best efforts towards reconsideration.

"Some quick whys: (1) Asheville is only one of less than a dozen cities out of 500 plus in North Carolina that now have partisan elections - we are on the losing side of this issue; (2) recent petition efforts have demonstrated the unrealistic hurdles for independent/third party candidates; and (3) partisan elections are about division and power - we see the failure of this approach at the state and federal level and do not need to duplicate models of failure - especially without constructive purpose.

"The impact: (1) we realistically eliminate independent and third party candidates from consideration and impair minority candidates; (2) we accelerate community polarization and division without positive compensating benefit; (3) we dramatically restrict the balance, diversity, and creative perspective of the Council; and (4) we further discourage voter enthusiasm.

"In direct challenge to those who supported partisan elections: (1) you have orchestrated an election that directly impacts on two of you who are running for office this cycle; (2) you have created an impossible timeline for obtaining a petition - either for a referendum or a candidate; and (3) you have embraced power politics under the guise of public good - the community, from all political perspectives, notes your true priority.

"What can we do? Recognize that the majority vote started with an error in process - the 90 day requirement to change parties meant it was too late for this election to ever be a fair time to implement this initiative.

"We need a need - let's find a way to (1) either hold a public referendum this coming year; or (2) postpone implementation until the next election cycle; or (3) reverse our course altogether."

"I do not believe it is the principle interest of any political party or this governing body to support any initiative that disenfranchises independent and third party candidates at any level."

Mayor Bellamy said as a point of order, whenever a presentation is made in front of the Asheville City Council the presentation is given to the City Clerk at a certain time and the Mayor reviews the presentation. She has not reviewed this presentation. She asked that Councilman Mumpower keep personal statements out of the presentation.

Councilman Mumpower felt Mayor Bellamy was restricting his ability to speak openly and candidly and that is important to this issue.

Mayor Bellamy asked Councilman Mumpower to adhere to guidelines currently in place. Normally the power-point presentation is the same presentation that is on Council's computer and on the City's web-site. She stressed that anyone making a power-point presentation before Council is supposed to have it to the City Clerk at a certain time.

Councilman Mumpower said that he would be happy to honor that going forward.

Mayor Bellamy felt that Councilman Mumpower's personal belief has nothing to do with the referendum. It is not her desire to censure any Council member, but she felt Councilman Mumpower has over-stepped her ability to defend his making this presentation. She ruled Council man Mumpower's presentation out of order, since we have a procedure that is not being adhered to.

Councilman Mumpower asked that the written procedure be supplied to him. If shown, he would be happy to adhere to it. There is no intention on his part to violate any procedures.

Mayor Bellamy said that anytime a presentation is requested, the presentation is asked for in advance.

Councilman Mumpower felt that is a subjective policy that Mayor Bellamy begun on her own. It is nothing that he has seen in writing or discussed as a Council before.

Mayor Bellamy ruled the presentation out of order.

Councilman Mumpower said this is no disrespect, but a commitment to seeing this issue through.

Councilman Mumpower continued with his power-point presentation as follows: "I do not believe it is the principle interest of any political party or this governing body to support any initiative that disenfranchises independent and third party candidates at any level. There are many who believe that independents and third parties represent the future of the country and to support any obstacles to seeking office in Asheville, such as the unrealistic petitions now required, violates all standards of fair play that are to be found in our best efforts as a community. He would be ashamed to belong to any governing body, organized party, or personal initiative that intentionally stepped over these boundaries of principle and fairness.

"Which way do we go: Plan A - success for the good folks trying to get the signatures necessary for a public referendum. They are to be commended. Plan B - find a way for this body to get this issue on as a public referendum or otherwise reverse our course. Plan C - For the public to hold the members of this Council who supported partisan politics directly accountable this November so that a new majority may reserve their actions in December."

Mayor Bellamy asked the City Clerk to present in writing the process and procedures that are needed in order for Council agendas to be made. In addition, at the next meeting she wanted all Council's procedures adopted so that we have to have some idea of what is going to be presented at the meeting in order to have a respectful decorum in the Council Chamber. It is not her desire to have unfair debate or to cause more angst or division in this community.

Vice-Mayor Jones and Councilwoman Cape would be open to hear public comment, but there is no recourse for City Council.

Mayor Bellamy said that even though Council changed the procedures as far as requesting items on the agenda, City Attorney Oast said that Mayor Bellamy was not out of order for putting this item on the agenda. He said the City Council rules say that the agenda is set by the Mayor and the City Manager and any Council member can request that something be placed on the agenda. He felt it was appropriate to establish reasonable time limits on public comments.

Upon inquiry of Councilman Freeborn, City Attorney Oast did not believe that even if Council voted in favor of Plan A, Plan B or Plan C outlined above by Councilman Mumpower, that Council could reverse course, hold a referendum or postpone the partisan election.

Councilman Mumpower moved that the issue of partisan elections be placed on the primary or the November ballot for consideration by the voters. This motion was seconded by Councilman Davis.

Mayor Bellamy read into the record a portion of Resolution No. 04-78 adopted by City Council on April 13, 2004: "Rule 7 - Public Address to the Council. (e) Persons addressing the Council are expected to observe the decorum of the Chamber, to be respectful of the Council and the public, to refrain from the use of profanity or foul language, to refrain from personal attacks and commentary on candidates for political office, and to refrain from making disclosures prohibited by the Personnel Privacy Act with respect to any City employee. (f) The mayor shall be authorized to allow additional comments and time for comments as he or she may deem appropriate for the orderly conduct of business. (g) Pursuant to Rule 9(b), the mayor may rule out of order any comments made under this part of the agenda if such comments are unruly or repetitive of information previously received by council on the same subject at the meeting then in session or at previous meetings. The mayor may also rule out of order any comments made during this part of the agenda that are rude, inappropriate, or intended to harass any person or group of people, and is authorized to take reasonable and appropriate measures to ensure compliance with these rules."

The following individuals voiced their opinion on partisan vs. nonpartisan elections, mostly as it relates to a public referendum:

Rev. Christopher Chiaronmonte
Ms. Leesa Kulba
Mr. Mike Lewis
Mr. Charlie Hulme
Mr. Jay Quinn
Ms. Christy Fryar
Mr. Carlyle
Mr. Matt Mattan
Mr. Gilian Kearns
Mr. Dick Cosgrove
Mr. Tom Braine
Mr. Bernard Carmen, Chairman of the Libertarian Party of North Carolina

Councilman Newman said that this question has been talked about every time he runs for office and at public forums. He believes that a candidate's political philosophy, the values and the priorities that they bring to that office has a huge bearing in the way that they view the important issues facing the community. The voters have a right to know that information. He believes that political parties should be included rather than excluded from local office. He supported making this change to the City's charter over a year ago. When you exclude political parties from any elections, the elections, rather than turning around ideas and issues and a sense of direction that you might want to go in as a community, tend to revolve around simple name recognition. Name recognition is easily purchased by candidates who are wealthy or well-connected. He felt the political parties do play a very active role in the political process in Asheville which is the way it should be. He thinks that non-partisan elections in Asheville is a lie and it is more honest to be forthright about the realities of the way the electoral process works. It is his opinion that our system is broken and it artificially manipulates the outcome of the election. It's true that independent and unaffiliated candidates are required to get over 2,000 signatures on a petition, which major parties are not. However, the independent or unaffiliated candidates who get the required signatures, get their names automatically on the general election ballot. Candidates from the two major parties have to compete in a primary election in order to have a chance for their name to appear on the general election ballot, at considerable time, energy and expense. He said there are cities across the country where they solve most of the important political questions facing their communities through a referendum process. That is not how Asheville typically answers the important questions facing our community. We elect City Council

to wrestle with the tough, complex issues. Non-partisan elections sounds great, but to those of us who have been through the election process and who serve on this Council and has the experience of the realities of the political dynamics of this community, it is very different. Based on that experience, he believes partisan elections are the best choice for our community.

Councilwoman Cape explained why she felt that partisan elections are the right way to go.

Councilman Mumpower said that we have philosophical differences which is much different than political differences. Party affiliation does not tell voters anything. Not having a referendum disengages the public and disengages their enthusiasm for participating. He thinks this is about power and control. Diversity matters and we should not silent voices who disagree with us. He cited N.C. Gen. Stat. sec. 160A-102 ... "The council may, but shall not be required to unless a referendum petition is received pursuant to G S. 160A-103, make any ordinance adopted pursuant to this section effective only if approved by a vote of the people, and may by resolution adopted at the same time call a special election for the purpose of submitting the ordinance for a vote. The date fixed for the special election shall be not more than 90 days after adoption of the ordinance." He hoped to be able to find a way to make the referendum work. He asked the City Attorney if that statute provides us any opportunity to reverse what he believes is an ill conceived course.

Before Mayor Bellamy called the question, since there has been over 20 minutes of comments, she asked if any other member of Council who has not spoken wished to speak.

Councilman Freeborn felt that partisan elections make sense. He didn't think it really mattered whether the election are partisan or non-partisan but the fact is that independent or unaffiliated candidates have never made it past the primaries. Now they do have a process to get on the ballot. This is not a perfect system, but this creates some level of clarity. He noted that 90% of the people on their way to vote and who pass by a candidate ask the candidate what their party affiliation is. People want to know.

Vice-Mayor Jones explained that in any decision there are public goods that you weight out. The public goods that she weighed out in this decision had to do with transparency, minority, access to the ballot and voter turnout. Back in 2002 she began talking about partisan elections, with it coming back up again in 2006 and again in 2007. She agreed with Councilman Freeborn that when people go to the polls, they want to know what your party affiliation is.

Mayor Bellamy said that she was supportive of the motion.

In response to Councilman Mumpower, City Attorney Oast said that after reviewing the statute citied by Councilman Mumpower, his opinion has not changed. If Council was going to call for a referendum, that had to be done at the time the ordinance was adopted.

The motion made by Councilman Mumpower and seconded by Councilman Davis that the issue of partisan elections be placed on the primary ballot for consideration by the voters failed on a 3-4 vote, with Mayor Bellamy, Councilman Davis and Councilman Mumpower voting "yes" and Vice-Mayor Jones, Councilwoman Cape, Councilman Freeborn and Councilman Newman voting "no."

In order to dispel any notion that she is creating rules without Council adoption, Mayor Bellamy said that these rules will be made available on line. She read the following rules that were adopted by the Asheville City Council on June 13, 1995: "The city clerk shall prepare the agenda for each meeting as directed by the mayor and the city manager. Any council member may have an item placed on the agenda so long as the request is timely and is consistent with the notice requirements of Rule 2, if applicable. A copy of all proposed ordinances shall be attached to the agenda. An agenda package shall be prepared that includes, for each item of

business placed on the agenda, as much background information on the subject as is available and feasible to reproduce. Each council member shall receive a copy of the agenda and the agenda package and they shall be available for public inspection and distribution or copying when they are distributed to the council members." Another section from Council's Rules reads: "(n) To prevent reconsideration for Six Months - The motion is in order immediately following the defeat of a substantive motion and at no other time. The motion requires for adoption a vote equal to two-thirds of the actual membership of the council, excluding the mayor, unless he or she may vote in all cases, and vacant seats. If adopted, the restriction imposed by the motion remains in effect for six months or until the next organizational meeting of the council, whichever occurs first." Another section of Council's Rules reads "20. Renewal of Motion - A motion that is defeated may be renewed at any later meeting unless a motion to prevent reconsideration has been adopted or unless reconsideration is prohibited for a specified period of time by some other provision of law such as the provisions of the zoning ordinance prohibiting reconsideration of a rezoning request for a period of one year following a denial." Regarding documentation "Any documentation material that is to be used in a public hearing or public comment period shall be furnished in advance to the City Clerk in electronic format or 15 copies thereof." Council did not receive the power-point either way. "This rule may be waived for good cause." She did not waive the rule for good cause. Also on our printed agenda that anyone can receive at the meeting, and on-line, it reads "Electronic presentations are limited to agenda items with presentation materials provide prior to the meeting by City staff, applicants, or organized opposition."

Councilman Mumpower said that this was not a repeat vote. He specifically asked the City Attorney if a referendum was a new issue and the City Attorney said it was.

Mayor Bellamy just wanted to point out that placing the item on the agenda was not out of order.

B. DIRECTION FOR SIGN CODE REGULATIONS OF AMERICAN FLAGS

Interim Planning & Development Director Shannon Tuch said that this is the consideration of an amendment to the Unified Development Ordinance (UDO) to remove or amend existing standards set forth in Article XIII that regulate the use of flags in conjunction with commercial sales or advertising.

While on a routine inspection, City code enforcement officers noted the TNT Fireworks vendor located at the Riverbend Wal-Mart shopping center as having established a temporary tent structure for the purpose of selling fireworks for the Fourth of July celebration. It was also noted that a great number of vinyl banners serving as temporary signage had been installed without any temporary sign permits, included with these banners were three American flags posted on each peak of the tent. An identical condition also existed at a second tent site located on Patton Ave.

City staff worked with the business owner on permitting the temporary signs without penalty; however, when asked to remove the American flags off the roof of the tent the business owner was uncooperative. Support information for the enforcement officer's request is as follows:

- Signs have been regulated in the City of Asheville since 1977, including the use of flags as signage.
- The sign code was further modified and adopted as part of the *Unified Development Ordinance* in 1997 and outlines a number of standards required for both permanent and temporary signage set forth in Article XIII.
- Article II defines "sign" as:

Sign means any words, lettering numeral, parts of letters or numerals, figures, phrases, sentences, emblems, devices, designs, trade names, or trademarks by which anything is known, made of any material, except live vegetation, including any surface, fabric or other material background structure designed to carry such devices, as are used to designate or attract attention.

- There are a number of prohibitions listed when it comes to signage, once such prohibition is on roof signs where Sec. 7-13-3(a)(4) reads:
  Roof signs. Roof signs are prohibited; provided, however, signs on the surfaces of a mansard roof and on parapets shall not be hereby prohibited provided the signs do not extend higher than the height restriction for on-premises freestanding signs in the zoning district in which the sign is located and provided that the sign does not extend above the mansard roof or parapet to which they are attached.

- Another prohibition set forth in the same section reads:
  (17) Flags, decorative or otherwise, may not be used in conjunction with a commercial promotion or as an advertising device, or as an integral part of a sign regulated under this article. Flags that comply with the provisions set forth in section 7-13-2(c)(3) of this chapter are not subject to this subsection.

- The City's sign code also sets forth a number of exemptions to the sign code; the above referenced Sec. 7-13-2(c)(3) falls under this section and reads:
  (3) Flags, with insignia of any nation, organization of nations, state, county or city, any religious, civic or fraternal organization, or any educational or cultural facility and/or any one corporate flag per lot.

Based on this information, the American flag is clearly exempt from regulation unless "used in conjunction with a commercial promotion or as an advertising device" as noted in #17 above. It has been this department's understanding that the arrangement of these standards is to ensure that all citizens and business owners enjoy the right to fly the flag but not to the extent that it becomes exploited for commercial gain. It should also be noted that our local standard mirrors the federal standard set forth in Title 4, Chapter 1 which reads, "The flag should never be used for advertising purposes whatsoever."

The challenge for enforcement staff is to determine whether a flag is being "used in conjunction with a commercial promotion or as an advertising device"; in other words, is it a sign or is it a display of patriotism? Determining this can prove to be very difficult and, as a result, staff typically looks to the following guidelines to help them evaluate each situation:

1) Is the flag in a position of great prominence or of an excessive, non-standard size so as to "designate or attract attention" per the definition of *Sign* outlined in Article II; is it visible from a public right-of-way?
2) Does the appearance of the flag coincide with an advertised sale and/or product?
3) Is the flag being flown respectfully and in accordance with federal standards outlined in Title 4, Chapter 1? These standards include:
   - The flag is flown from sunrise to sunset or is properly illuminated at night
   - The flag is removed in inclement weather or is made of an all weather material
   - The flag is not made of a temporary or easily discarded material such as paper or plastic
   - The flag should always be upright and never touch anything beneath it

In the case of the TNT Fireworks site, the flags were:

1) Determined to be in a position of prominence (located on the peak of the roof) and were visible from public rights-of-way;
2) Appeared in conjunction with a commercial sale - Fourth of July fireworks; and
3) Were not being flown in accordance with federal standards – they were left out at all hours without illumination, they were not taken down during inclement weather, and were not maintained at all times in an upright position.

As a result, enforcement officers made the determination that the flags were being used as a "sign" and not a patriotic display and issued the business owner of TNT Fireworks a Notice of Violation (NOV) for having a rooftop sign. Enforcement staff offered the option of removing the flags from the roof and posting them on the ground but the owner refused, stating they did not want to pay a boom truck to come remove the flags.

It is important to note that no violation was issued for flying the flag "in conjunction with a commercial promotion or as an advertising device"; this was due to the Planning department's recent initiative to adopt a policy of education rather than penalty and instead of citing business owners, officers have been asked to take the opportunity to inform and educate business owners as to the proper method of displaying the flag and not to issue any NOV's (particularly around holidays). This practice has received some criticism from various citizens for non-enforcement of the City's standard and allowing for the exploitation of the American flag for commercial profit. No other violations related to flags or rooftop signs were issued to any other business located within the City of Asheville's jurisdiction during this same time period.

The events of this enforcement action and the media coverage it received has inspired interest in the City of Asheville initiating a change in the zoning ordinance that affect the regulation of signs and the use of flags as signs. There are several options that could be considered:

Option 1
Delete section 7-13-3(a)(17) that prohibits the use of flags in conjunction with a commercial promotion or as an advertising device; maintain existing exemption for American flags.

Pros:
- Allows for a much more liberal application of flags, decorative or otherwise, to be used in conjunction with commercial advertising.
- Exempts businesses from local enforcement actions (although still potentially subject to federal enforcement).

Cons:
- Opens up opportunity for excessive use of flags without local law to control.
- Contrary to Federal standards (with respect to the American flag).

Option 2
Delete section 7-13-3(a)(17); maintain existing exemption for American flags; and amend sign code to allow all flags non-exempt flags as an allowable form of signage and include in sign permit applications.

Pro:
- Regulates and limits the use of flags as signage.

Cons:
- Sign face of flags would have to be included in the total allowance for commercial signs, resulting in less sign area for traditional signs.
- In some cases, this could be contrary to Federal standards.

- Still requires the exercise of judgment from enforcement officers to determine whether flag is a patriotic display vs. a sign.

Option 3
Amend Section 7-13-2(c)(3) to clarify that in order to be considered exempt, American flags shall be displayed in accordance with the federal standards set forth in Title 4, Chapter 1 of the U.S. Code. This can be done in conjunction with a change to the sign application form and process that informs business owners of these requirements.

Pros:

- Fully informs applicants of their right to display the flag and how to do so according to Federal standards.
- Provides information at time of permitting, reduces the need for after-the-fact enforcement.
- Eliminates the need for enforcement officers to use judgment in determining when a flag is being used as a sign.

Con:

- Maintains the prohibition on using the American flag for commercial advertising purposes (supports Federal standard).

Staff recommends Option 3 and that Council request a wording amendment to be brought before the Planning & Zoning Commission for consideration.

Ms. Tuch responded to Mr. Dick Cosgrove when he asked if this issue was complaint driven or if it was discovered from a routine enforcement patrol.

Councilwoman Cape spoke in support of Option 3 for the respectful treatment of our flag.

Councilman Mumpower felt this is another example of the complexities of trying to control too many variables. It's interesting that we find such strong local enthusiasm for going after a federal issue on flags but with illegal immigration we try to run in a different direction.

In response to Councilman Mumpower, City Attorney Oast said that someone can burn a flag if it doesn't violate Fire Code regulations. Councilman Mumpower felt that if someone can legally burn a flag in the United States then the City of Asheville has no business in trying to regulate what people can do with the flag.

Councilman Freeborn said that according to the United States Code, burning a flag is the only proper way to dispose of the flag. Unfortunately people take that to extremes and burn it as a protest to our government. He would be supportive of Option 3; however, he agreed with Councilman Mumpower that this is a federal issue and is not appropriate for Asheville to be weighing in.

Councilman Newman supported Option 3, however, he felt we should get the opinion from the WNC Veterans Association on which option they would like.

Mayor Bellamy said that we have the Mayor's Task Force on Veterans Affairs and would be happy to send this to them for input and recommendation.

Mayor Bellamy said that she has received a lot of phone calls about this issue and apologized to the Veterans because it wasn't that we were regulating any flag, it was the nature in which TNT Fireworks chose to have the flag displayed. The federal government has adopted regulations on how the flag is to be flown and respected and the flags at TNT Fireworks did not

adhere to any of those regulations. Unfortunately the pictures that where shown did not do an accurate job of depicting the flags.

It was the consensus of Council to send this issue to the Mayor's Task Force on Veterans Affairs for their input and recommendation with a request that it come back to Council within 40-45 days.

C. RESOLUTION NO. 07-135- RESOLUTION APPOINTING AN ALTERNATE MEMBER TO THE BOARD OF ADJUSTMENT

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing Alternate members to the Board of Adjustment.

The term pf Michael Anders, as an Alternate member on the Board of Adjustment, expired on January 21, 2007.

On June 19, 2007, City Council instructed the City Clerk to arrange interviews for: Eric Zetterholm, Carolyn Burton and Kristy Carter.

After Council spoke highly of the candidates, Eric Zetterholm received 0 votes, Carolyn Burton received 1 vote and Kristy Carter received 6 votes. Therefore, Kristy Carter was appointed as an Alternate member of the Board of Adjustment, term to expire January 21, 2010, or until her successor has been appointed.

Vice-Mayor Jones asked that the City Clerk include a paragraph in the letters to the candidates not chosen that Council was really impressed with their interviews and they will definitely keep their names on file for consideration to other service to the City.

RESOLUTION BOOK NO. 30 – PAGE 380

D. RESOLUTION NO. 07-136- APPOINTING A MEMBER TO THE GREENWAY COMMISSION

Vice-Mayor Jones, Chair of the Boards & Commissions Committee, said that this is the consideration of appointing a member to the Greenway Commission.

Paula Robbins has resigned as a member of the Greenway Commission, thus leaving an unexpired term until December 31, 2007.

On June 19, 2007, City Council instructed the City Clerk to arrange interviews for Thomas Mesk and Christopher Gilbert. Mr. Mesk was interested in being appointed, however, was unable to come in at the interview time.

Thomas Mesk received no votes and Christopher Gilbert received 7 votes. Therefore, Christopher Gilbert was appointed as a member of the Greenway Commission to serve the unexpired term of Ms. Robbins, term to expire December 31, or until his successor has been appointed.

RESOLUTION BOOK NO. 30 – PAGE 381

E. RESOLUTION NO. 07-137- RESOLUTION APPROVING A $250,000 HOUSING TRUST FUND LOAN TO MOUNTAIN HOUSING OPPORTUNITIES AND $160,000 HOUSING TRUST FUND LOAN TO JCS INVESTMENTS FOR AFFORDABLE HOUSING DEVELOPMENT

At the request of Mayor Bellamy, Councilman Mumpower moved to excuse Mayor Bellamy from participating in this matter due to a conflict of interest. This motion was seconded by Councilman Davis and carried unanimously.

At this time, Mayor Bellamy turned over the gavel to Vice-Mayor Jones to conduct the meeting.

Community Development Director Charlotte Caplan said that this is the consideration of a resolution approving $410,000 in Housing Trust Fund (HTF) loans for affordable housing development.

The following two Housing Trust Fund (HTF) applications were evaluated by the HTF review panel and recommended for approval by the Housing and Community Development Committee at the May 14 meeting. Currently over $865,000 is available in the Housing Trust Fund.

1. Mountain Housing Opportunities, Clingman Avenue Lofts, $250,000

This condominium development will consist of 21 one- and two-bedroom units, 9 of which will meet the HTF affordability requirements. Mountain Housing Opportunities has an excellent track record developing quality affordable housing. The project will meet *SystemVision* energy efficiency standards. The affordable units will carry a minimum affordability period of ten years and will be sold to households with income below 80% AMI as a result of the HOME funds also invested in the development.

2. JCS Investments, Bostic Place Phase II, $160,000

Phase II will consist of 4 three-bedroom homes. The developer has much experience with modular development and a very strong financial capacity. The developer has informed staff that he now plans to ensure energy efficiency by participating in the *Energy Star* program.

Pros:

- Assists with the development of 13 units of affordable housing in Asheville
- Increases the City tax base by at least $2.5 million
- Energy efficient construction

Con:

- None

The Housing and Community Development (HCD) Committee reviewed the proposals on May 14, 2007. The HCD Committee recommends City Council approve a resolution approving $410,000 in Housing Trust Fund (HTF) loans for affordable housing development. With the following terms: two year construction loans at 2% interest; may be passed to eligible buyers (i.e. those with income less than 80% of area median) as soft second mortgages.

Mr. Joe Bassett spoke in support of these Housing Trust Fund loans. He suggested that in the future Council look at longer periods of time for these homes to remain affordable, possibly even requiring perpetual affordability.

Ms. Caplan responded to various questions from Councilman Mumpower, some being, but not limited to: what is the square footage costs based on land values; how long are the soft second mortgages; how is the interest rate calculated; what happens if people default on their first mortgage; and how many soft loans have we done soft second mortgages.

Upon inquiry of Councilwoman Cape, Ms. Caplan said that to date we have had no losses at all due to foreclosures.

Councilman Mumpower felt this doesn't hold the accountability that he personally would feel comfortable with regarding the amount of dollars we are talking about.

Councilman Newman spoke in support of these two good projects. They also demonstrate how our affordable housing, low interest loan fund continues to be a very effective tool in encouraging both for-profit and non-profit builders in our community to create affordable housing as part of their infill developments that they would not otherwise be able to do. He agreed with the need for long-term affordability and that is something that the Housing & Community Development Committee is trying to figure out ways to do that.

Vice-Mayor Jones said that members of Council have been previously furnished with a copy of the resolution and it would not be read.

Councilman Freeborn moved for the adoption of Resolution No. 07-137. This motion was seconded by Councilwoman Cape and carried on a 5-1 vote, with Councilman Mumpower voting "no."

RESOLUTION BOOK NO. 30 - PAGE 382

VII. OTHER BUSINESS:

Councilwoman Cape (1) announced that there is a group of people who are talking about Ashe Village which will be an interesting project in our community next summer, which conversation will be around sustainability, green building and community engagement; and (2) commended the Sister Cities project for their role in the trip to Saumur, France, and would like for Council to consider expanding the City's role that we play in that organization.

The City received a Complaint on June 27, 2007, which is generally described as follows: Kelvin Benjamin and Wendy Benjamin vs. the City of Asheville. The complaint is for personal injury sustained from a fall into a manhole. This matter will be handled in-house.

VIII. INFORMAL DISCUSSION AND PUBLIC COMMENT:

IX. ADJOURNMENT:

Vice-Mayor Jones adjourned the meeting at 11:52 p.m.

DIVISION OF ARCHIVES AND HISTORY

ARCHIVES AND RECORDS SECTION

CERTIFICATE OF AUTHENTICITY

This is to certify that the micrographic images appearing on this film are true and accurate reproductions of records originated during the normal course of business by the *BUNCOMBE COUNTY CITY OF ASHEVILLE, CITY COUNCIL* **and consist of** *MINUTES*

The records begin with VOLUME: 77 YEAR: SEPTEMBER 21, 2004

PAGE: INDEX

and end with VOLUME: 81 YEAR: July 10, 2007

PAGE: 446

It is further certified that the above records were microfilmed in conformity with the provisions of the *General Statutes of North Carolina*, chapter 8-45.1 and 8-45.4, *"Uniform Photographic Copies of Business and Public Records as Evidence Act"*; that the microphotography processes accurately reproduce the records so microfilmed, that the film forms a durable medium for reproducing the original, if necessary; and that the film used conforms to American National Standards Institute, *Photographic Films-Specifications for Safety Film, ANSI IT9.6-1996* and American National Standards Institute, *Imaging Media (Film)-Silver Gelatin Type-Specifications for Stability, ANSI NAPM IT9.1-1996.*

This is further to certify that the microphotography processes were accomplished by the undersigned on the date and at the reduction ratio indicated below.

Date filming of this reel began: 2/05/09 **Reduction Ratio** *32X*

Date filming of this reel ended: 2/5/09
